SkyePharma PLC

SkyePharma PLC Announces Completion of Disposal of Injectable Bus

LONDON, UK, 26 March 2007 - SkyePharma PLC (LSE: SKP; Nasdaq: SKYE) announces that the Paul Capital Partners' disposal of the Injectables Business of the Company and the Placing of the New Ordinary Shares of the Company have been completed. As such, the Placing of the New Ordinary Shares is expected to raise approximately £14.8m (net of costs). It is expected that admission and dealings in the new shares will commence on 27 March 2007.

This completes the major financial restructuring announced on 9 January 2007. SkyePharma is continuing to develop its business by completing the development of its unique combination product Flutiform (fluticasone propionate/formoterol fumarate dihydrate) for asthma, which is in phase III development, as well as seeking additional opportunities to leverage its skills and technologies in developing oral and inhalation products.

Frank Condella, SkyePharma's Chief Executive, said:

"The completion of the disposal has removed the cash burn attributable to the Injectable Business from the Company's balance sheet and cash flows.

With the restructuring phase now successfully completed, we can focus fully on the development of our oral and inhalation product pipeline, and seek further new opportunities to exploit our unique capabilities in the drug delivery market."
