Risk Management

On pages 38 to 78 we have provided an analysis of the key risks faced by the Group across a number of asset classes and businesses, referencing significant portfolios and including summary measures of asset quality. Additional information referenced in this section is to be found in the notes to the financial information.

We set out on pages 38 to 41 a detailed analysis of the Group's total assets by valuation basis and underlying asset class, to provide an overview of the nature of the Group's assets and risks.

Detailed disclosures and analysis are provided on Barclays Capital's credit market exposures by asset class, covering current exposures, losses in the year, sales and pay downs, foreign exchange movements and where appropriate details of collateral held; geographic spread, vintage and credit quality. These are set on pages 42 to 58.

On pages 59 to 75, we review the Group's other credit risk exposures, focusing on the quality of the Group's loans and advances to customer and banks, as well as the credit quality of the Group's debt securities.

The Group's principal exposure to market risk is set out on pages 76, as captured through a review of Barclays Capital's average daily value at risk (DVaR).

Finally, on pages 77 to 78, we provide summary information in respect of Barclays liquidity risk.
