Terry Duffy Executive Chairman, CME

4

A Shared History and Vision for the Future

1848: CBOT founded derivatives industry is born

1865: CBOT launches first grain futures 1898: Chicago Butter and Egg Board founded

1919: CME established

1972: Financial futures invented

1977: U.S. Treasury futures launched

1981: CME Eurodollar contract launched

1987: CME, CBOT, Reuters pioneer electronic trading

1997: E-mini stock index futures launched

2002: CME becomes a public company

2003: CBOT/CME common clearing link initiated

2005: CBOT becomes a public company

2006: CME and CBOT announce merger plans

Today: we are better together.

Strategic Benefits of CME s Proposal

Craig S. Donohue CME Chief Executive Officer

6
CBOT/CME: Better Together Our View
Strategically
Financially
Operationally
ICE s proposal

exaggerates the estimated synergies offers CBOT shareholders a weaker currency will limit CBOT s comparative future growth potential and value creation opportunities poses significant execution and integration risks that could adversely affect customers and shareholders

7
CBOT/CME DOJ Review On Track

ICE s comments are misleading

We are well advised by anti-trust counsel and leading

economists

We compete in a global market: Domestic and foreign exchanges Securities, options and futures exchanges Cash and OTC derivatives markets We remain confident that our merger will close mid-year 2007

8
CBOT/CBOE Exercise Right

ICE has proposed same exact structure

ICE has not offered a specific alternative

ICE has not offered CBOT shareholders a guarantee

CBOE has not consented to ICE s proposal

CME will consider an alternative structure if CBOE confirms preservation of the exercise right ICE s proposed structure/transaction is not a differentiating factor

9 Better Together Our View Operationally Strategically Financially Operationally

10 CBOT/CME is Financially Compelling

CME and CBOT are 1 st and 3 rd

largest exchanges ICE is 10th

CBOT and CME are the most well diversified exchanges in the world - by volume and revenue

ICE has a narrow energy product set

CME offers stronger currency

CME will deliver on synergies

CBOT/CME: The Superior Combination Most significant opportunities for growth Best ability to execute and integrate ICE CME Broadest global distribution

Most scalable technology
Industry-leading clearing house
Ability to deliver promised synergies
Most robust product line
Greatest operational efficiencies
Stable and tested currency
Proven record as a public company
Most valuable exchange
Shared sense of heritage
Best smoke and mirrors

The CBOT/CME Clearing Advantage
Kim Taylor President, CME Clearing

24 Benefits of the Common Clearing Link

Offers rock solid operational reliability

Provides high degree of risk management and financial integrity

Delivers low-cost services

Leverages scalability and adaptability

Clearing: Operational Benefits

NYBOT would need to scale up clearing capacity to accommodate CBOT volume:
By 18+ times to accommodate CBOT ADV on day one
By 30 times to handle peak volume

CME has supported give-up functionality for 15 years & a 2-way API for the past 5 years
Both are critical to processing CBOT business

CME is experienced with managing mark-to-market flows more than 40 times NYBOT ICE lacks operational capacity to clear business of CBOT s magnitude

Clearing: Risk Management & Financial Integrity

CME offers important innovation over clearing houses that offer solely net or gross margining:
CBOT house portfolios are margined net by CME
CBOT customer portfolios have the choice between

net margining or gross margining For some portfolios, net margining is more efficient and for other portfolios, gross margining is more efficient

ICE s net margining proposal is a step backwards

27 Clearing: Cost & Capital Efficiencies

The combination of CME & CBOT products under a single clearing house resulted in significant capital savings & efficiency for the market Potential Margin Efficiencies Lost:

\$700 million-\$1 billion+

Potential Guarantee Fund Requirements:

\$550 million

NYBOT Ad 1

Req:

\$350 million

CME Savings Lost:

\$200 million

Total potential disruption to capital efficiency:

\$1.3 -

\$1.6 billion

ICE cross-margining efficiencies of \$50 million don t

compare to margin efficiencies with CME/CBOT

Clearing: Growth Capabilities

CME Clearing already has a strong foundation to continue growing the combined business of the CME & CBOT

Clearing provides the following capabilities to support or

drive	growth in	n our comb	ined busines	ss hase.
ulive	ZIOW III II	ii oui como	illed busilies	ob busc.

Operational scale

Product scope

Functional richness

Deep risk management experience

OTC growth capabilities (Clearing 360)

NYBOT s focus will be on absorbing rather than growing the CBOT business Five of the top 10 CBOT volume firms are not NYBOT clearing members

Leveraging Operational

33 CBOT/CME is Financially Compelling

ICE operating margins are the highest of any U.S. exchange, near 70%

Existing ICE clearing costs are 9¢

per side vs. CBOT clearing charge of 6¢ per side **ICE** 2006 rate per contract of \$1.33 does not include recent price increase of 6¢ per contract coincides with LCH Clearing charge decrease Rate Per Contract Trend ICE charges customers, on average, more than twice the CME and CBOT rate per contract \$0.20 \$0.50 \$0.80 \$1.10 \$1.40 2003 2004 2005 2006 0.691 0.645 0.664 0.702 0.631 0.597 0.517 0.461 1.20 1.33 1.36 1.28 **ICE** CME

CBOT

34 Customers Win with CBOT/CME

Retention of common clearing link efficiencies CBOT/CME retains more than \$1 billion in margining efficiencies v. ICE/CBOT \$50M

Lower costs for end users and firms
At least \$70M in annual savings
trading floor unification and Globex
ICE transaction requires interfaces and deposits with two clearing houses
rather than one, as well as interface to ICE electronic platform

Allows trading of complementary products on a single platform

Provides CBOT customers with deeper liquidity and more trading opportunities from CME Globex functionality, scalability and reliability

Greatly reduces operational and financial risk from migrating clearing
Customers and clearing firms, not ICE/CBOT will bear this risk

35
Calling Them on the (Red) Carpet
ICE claims they will see overwhelming
support from the FCM community, from
FIA and from Wall Street

We have to ask, why would these constituents who

cheered the common clearing link:
Give back more than \$1 billion in margin efficiencies?
Support the addition of \$550 million in security deposits?
Give up \$70 million in recurring annual cost efficiencies?
Support an exchange with 100% higher rate per trade?
Customers trade more when they save more.
