(Zip Code)

Registrant's telephone number, including area code: (214) 756-6900

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of each class:	Name of each exchange on which registered:
Common Stock, par value \$0.01 per share	New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: None

Indicate by check mark if registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value on June 30, 2008 of the voting and non-voting common equity held by non-affiliates of the registrant was \$213,463,000. For purposes of this calculation, the registrant has assumed that stockholders that are not officers or directors of the registrant are not affiliates of the registrant.

The number of shares of registrant's Common Stock, par value \$0.01 per share, outstanding as of February 23, 2009: 7,190,238.

DOCUMENTS INCORPORATED BY REFERENCE

Selected portions of the registrant's definitive Proxy Statement for the 2009 Annual Meeting of Stockholders are incorporated by reference into Part III hereof.

PART I

Item 1. Business.

Unless the context otherwise requires, the term we, us, our, Westwood, or Westwood Holdings Group when used in this Form 10-K (Report) and in the Annual Report to the Stockholders refers to Westwood Holdings Group, Inc., a Delaware corporation, and its consolidated subsidiaries and predecessors taken as a whole. This Report contains some forward-looking statements within the meaning of the federal securities laws. Actual results and the timing of some events could differ materially from those projected in or contemplated by the forward-looking statements due to a number of factors, including without limitation those set forth under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 1A. Risk Factors .

General

We manage investment assets and provide services for our clients through our two subsidiaries, Westwood Management Corp. (Westwood Management) and Westwood Trust. Westwood Management provides investment advisory services to corporate retirement plans, public retirement plans, endowments and foundations, a family of mutual funds, which we call the WHG Funds, other mutual funds and clients of Westwood Trust. Westwood Trust provides trust and custodial services and participation in common trust funds that it sponsors to institutions and high net worth individuals. Our revenues are generally derived from fees based on a percentage of assets under management, and at December 31, 2008, Westwood Management and Westwood Trust collectively managed assets valued at approximately \$7.2 billion. We have been providing investment advisory services since 1983 and, according to recognized industry sources, including Morningstar, Inc., when measured over multi-year periods of ten years and longer, our principal asset classes rank above the median in performance within their peer groups.

The core of our business is dependent on our client relationships. We believe that, in addition to investment performance, client service is paramount in the asset management business. As such, a major focus of our business strategy is to continue building strong relationships with clients to better enable us to anticipate their needs and to satisfy their investment objectives. Our team approach is designed to result in efficient, responsive service for our clients. Our future success is dependent to a significant degree on both investment performance and our ability to provide attentive client service.

We were incorporated under the laws of the State of Delaware on December 12, 2001. We are an independent public company, and our common stock is listed on the New York Stock Exchange under the ticker symbol WHG. We are a holding company, and our principal assets consist of the capital stock of Westwood Management and Westwood Trust.

One of the priorities on which we have focused since 2002 is building a foundation in terms of personnel and infrastructure to support a potentially much larger business. We have also developed products that we believe will be desirable within our target institutional and private client markets. The cost of developing new products and the organization as a whole can result in our incurring expenses before material offsetting revenue is realized. We believe that the foundation and products are now in place and have been taking these products to the institutional marketplace in recent years. We have seen a high level of interest from institutional investors in these products, which we hope will generate new revenue streams.

We maintain a website at www.westwoodgroup.com. Information found on our website is not intended to be a part of this Report. All filings made by us with the Securities and Exchange Commission (SEC), including our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Sections 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, are available without charge on our website. Additionally, our Code of Business Conduct and Ethics, our Corporate Governance Guidelines and our Audit Committee, Compensation Committee and Governance/Nominating Committee Charters are available without charge on our website. Stockholders also may obtain print copies of these documents free of charge by submitting a written request to William R. Hardcastle, Jr. at the address set forth in the front of this Report.

Westwood Management

General

Westwood Management provides investment advisory services to large institutions, including corporate retirement plans, public retirement plans, endowments and foundations, having at least \$10 – \$25 million in investable assets, depending on the asset class. Westwood Management also provides advisory services to the WHG Funds and subadvisory services to other mutual funds. Our overall investment philosophy is determined by our chief investment officer, Susan M. Byrne, and, with respect to the bulk of assets under management, consists of a value-oriented approach focused on achieving a superior, risk-adjusted return by investing in companies positioned for growth but not fully recognized as such in the marketplace. This investment approach is designed to preserve capital during unfavorable periods and provide superior real returns over the long term. Ms. Byrne has 39 years of investment experience. Westwood Management’s investment advisory team consists of a number of investment management, research and trading professionals with substantial investment management experience. The continuity of the team and its years of experience are critical elements in successfully managing investments.

Managed Asset Classes

Asset Management. We offer a broad range of investment asset classes allowing us to serve various types of clients and varying investment objectives. More than half of our assets under management are invested in our LargeCap Value asset class. The following sets forth the principal asset classes currently managed by Westwood Management:

LargeCap Value: Investments in equity securities of approximately 45-60 well-seasoned companies with market capitalizations generally over \$1 billion. This portfolio is invested in companies where we expect that future profitability, driven by operational improvements, will be higher than expectations reflected in current share prices.

SMidCap Value: Investments in equity securities of approximately 45-60 companies with market capitalizations between \$100 million and \$10 billion. Similar to the LargeCap Value asset class, we seek to discover operational improvements that are driving earnings growth within small to mid-size companies that can be purchased inexpensively.

SmallCap Value: Investments in equity securities of approximately 50-70 companies with market capitalizations between \$100 million and \$2.5 billion. Similar to the LargeCap Value and SMidCap Value classes, we seek to invest in high quality companies whose earnings growth is driven by operational improvements not yet fully recognized by the market.

AllCap Value: Investments in equity securities of approximately 60-80 well-seasoned companies. The portfolio is generally comprised of the best ideas within all market capitalizations above \$100 million. Similar to the LargeCap Value asset class, we seek to invest in companies across a broad range of market capitalizations where we expect that future profitability, driven by operational improvements, will be higher than expectations currently reflected in share prices.

Balanced: Investments in a combination of equity and fixed income securities, designed to provide both growth opportunities and income, while also emphasizing asset preservation in down markets. Westwood Management applies its expertise in dynamic asset allocation and security selection decisions in carrying out this balanced strategy approach.

Income Opportunity: Investments in dividend-paying common stocks, straight and convertible preferred stock, master limited partnerships, REITs and selected debt instruments. This portfolio’s strategy focuses on companies with strong and improving cash flow sufficient to support a sustainable or rising income stream for investors. This asset class is targeted towards investors seeking high current income through dividend-paying and/or interest-bearing securities.

Table of Contents

Index to Financial Statements

Master Limited Partnerships (MLPs): Investments include MLPs (including limited partnerships, LPs, and general partnerships, GPs), securities of tanker and other marine shipping companies and other securities whose characteristics are consistent with those listed above. The portfolio focuses on companies that, over time, exhibit higher dividend yields, stable and predictable cash flows, low correlations to other asset classes, and growth opportunities.

Core/Intermediate Fixed Income: Investments in high-grade, intermediate term corporate and government bonds. We seek to add value to client portfolios through yield curve positioning and investing in debt instruments with improving credit quality potential.

Each asset class consists of a portfolio of equity and/or fixed income securities selected by Westwood Management's portfolio teams and chosen to best provide the long term returns consistent with Westwood Management's investment philosophy. Our portfolio teams make decisions for all of Westwood Management's asset classes in accordance with the investment objectives and policies of such asset classes, including determining when and which securities to purchase and sell.

We employ a value-oriented approach in managing the bulk of our equity asset classes. The common thread that permeates our investment strategies is our focus on a disciplined approach to controlling risk and, whenever possible, preserving the core value of the assets under management. Our value-oriented asset classes place a greater emphasis on identifying companies where earnings result from actual operational improvements rather than from manufactured improvements derived from financial statement adjustments. Our desire to prevent the loss of the core value of the assets under management is the overriding objective of this strategy, even at the cost of potentially higher returns. Through investments in companies that exhibit these characteristics, Westwood Management seeks to demonstrate consistently superior performance relative to our industry peers and the broad market.

More than half of our assets under management are invested in equity securities of companies with large market capitalizations. When measured over multi-year periods, ten years and longer, Westwood Management's principal asset classes rank above the median within peer group performance rankings according to recognized industry sources, including Morningstar, Inc. For the ten-year period ended on December 31, 2008, our LargeCap Value, SMidCap Value, Balanced and Core Fixed Income asset classes ranked in the top quartile in their peer groups.

Our ability to grow assets under management is primarily dependent on our competitive long-term performance record, building strong relationships with investment consulting firms nationwide as well as our ability to develop new client relationships. We continually look for opportunities to expand our assets under management by growing our existing asset classes and developing new portfolios focusing on investment areas not part of our current asset classes under management. We primarily intend to grow our asset classes internally but may consider acquiring new asset classes from third parties, as discussed under "Growth Strategy" below. Our growth strategy provides our clients with more investment opportunities and diversifies our assets under management, thereby reducing our risk in any one area of investment and increasing our competitive ability to attract new clients.

Advisory and Subadvisory Service Agreements

Westwood Management manages client accounts under investment advisory and subadvisory agreements. Typical within the asset management industry, such agreements are usually terminable upon short notice and provide for compensation based on the market value of the client's assets under management. Westwood Management's advisory fees are paid quarterly in advance based on assets under management on the last day of the preceding quarter, quarterly in arrears based on assets under management on the last day of the previous quarter, or are based on a daily or monthly analysis of assets under management for the stated period. A limited number of our clients have a performance-based fee component in their contract, which generates additional revenues if we outperform a specified index over a specific period of time. We record revenue for performance-based fees at the end of the measurement period. Revenue from advance payments is deferred and recognized over the period that services are performed. Pursuant to these agreements, Westwood Management provides overall investment management services, including directing investments in conformity with the investment objectives and restrictions established by clients. Unless otherwise directed in writing by our client, Westwood Management has the authority to vote all proxies with respect to client assets.

Table of Contents

Index to Financial Statements

Westwood Management is also a party to subadvisory agreements with other investment advisors under which it performs substantially the same services as it does under its advisory agreements. However, the investment strategy adopted for a particular client is subject to supervision and review by the client. Our subadvisory fees are computed based upon the daily net assets of the client and are payable on a monthly basis. As with our advisory agreements, these agreements are terminable upon short notice.

Under our subadvisory agreement with Teton Advisors, Inc. (formerly Gabelli Advisers, Inc.), Westwood Management provides investment advisory services to the GAMCO Westwood Funds family of mutual funds. Westwood Management owns shares of Class A Common Stock representing a 19.2% economic interest in Teton Advisors, Inc., a subsidiary of GAMCO Investors, Inc. Based on SEC filings, we believe that GAMCO Investors, Inc. owned 15.0% of our common stock as of December 31, 2008. Westwood Management received subadvisory payments from Teton Advisors, Inc. of \$784,000, \$844,000 and \$863,000 for the twelve months ended December 31, 2008, 2007 and 2006, respectively.

While Westwood Management provides subadvisory services with respect to the Westwood Funds family of funds, Westwood Management provides investment advisory services directly to the WHG Funds family of mutual funds, which includes the WHG SMidCap Fund, the WHG Income Opportunity Fund, the WHG LargeCap Value Fund, the WHG Balanced Fund and the WHG SmallCap Value Fund. WHG Funds represent the family of institutional mutual funds for which Westwood Management serves as advisor. Westwood Funds represent the family of mutual funds for which Westwood Management serves as subadvisor.

Our largest client in terms of fee revenue paid us both asset-based and performance-based advisory fees during the last two years. Due to a significant performance fee earned in 2008, this client accounted for 19.5% of our fee revenues and our four largest clients accounted for approximately 31.0% of fee revenues for the twelve months ended December 31, 2008. The loss of some or all of these clients or the failure to achieve superior investment performance necessary to earn a performance fee could have a material adverse affect on our business and our results of operations.

Westwood Trust

General

Westwood Trust provides trust and custodial services and participation in common trust funds that it sponsors to institutions and high net worth individuals generally having at least \$1 million in assets under management. Westwood Trust seeks to define and improve the risk/return profile of the client's investment portfolio by complementing or enhancing existing investment strategies. Westwood Trust also provides back office services to its clients, including tax reporting, distribution of income to beneficiaries, preparation of trust and account statements and attending to the special needs of particular trusts, as well as serves as trustee for tax and estate-planning purposes and for special needs trusts. Westwood Trust is chartered and regulated by the Texas Department of Banking.

Westwood Trust primarily provides services for employee benefit trusts and personal trusts. Employee benefit trusts include retirement plans of businesses to benefit their employees, such as defined contribution plans, pensions and profit sharing plans. Westwood Trust may also be appointed as a trustee and may provide administrative support for these plans, as well as investment advisory and custodial services. Personal trusts are developed to achieve a number of different objectives, and Westwood Trust acts as trustee to these trusts and assists them in developing tax-efficient trust portfolios. The fees charged by Westwood Trust are separately negotiated with each client and are based on the complexity of the operations of the trust and the amount of assets under management.

Services

Westwood Trust undertakes a fiduciary responsibility toward the management of each client's assets and utilizes a consultative asset allocation approach. This approach involves Westwood Trust examining the client's financial situation, including the client's current portfolio of investments, and advising the client on ways in which it can enhance its investment returns and financial position. Westwood Trust also provides custodial services, safekeeping and accounting services.

Table of Contents

Index to Financial Statements

Common Trust Funds

Westwood Trust sponsors a number of common trust funds in which our clients' assets are commingled to achieve economies of scale. Westwood Trust's common trust funds fall within two basic categories: personal trusts and employee benefit trusts. Westwood Trust sponsors common trust funds for most of the asset classes managed by Westwood Management. Westwood Trust also engages third party subadvisors for some common trust funds, such as our Growth Equity, International Equity and High Yield Bond common trust funds.

Enhanced Balanced Portfolios

Westwood Trust is a strong proponent of asset class diversification, and offers its clients the ability to diversify among multiple different asset classes. Westwood Trust Enhanced Balanced portfolios seek to combine these asset classes into a customizable portfolio for clients seeking to maximize return for a given level of risk. Periodic adjustments are made to asset class weightings in Enhanced Balanced portfolios based on historical returns, risk and correlation data, as well as an analysis of our capital markets outlook.

Distribution Channels

We market our services through several distribution channels that allow us to expand the reach of our investment advisory services. These channels enable us to leverage existing distribution infrastructure and capabilities of other financial services firms and intermediaries while focusing on our core competency of developing outstanding investment asset classes.

Institutional Investment Consultants

Investment management consulting firms serve as gatekeepers to many corporate retirement plans, public retirement plans, endowments and foundations, which represent Westwood's primary client target markets. Consultants provide guidance in setting client asset allocation strategy, as well as creating investment policies. Consultants also make recommendations for investment firms they believe can best meet their clients' investment objectives. We have established strong relationships with many national and regional investment consulting firms, which has resulted in our being considered and hired by many of their clients. Continuing to enhance our existing consulting firm relationships, as well as forging new relationships, serves to increase the awareness of our services in both the consultant community and their underlying institutional client base.

Subadvisory Relationships

Our subadvisory relationships allow us to extend the reach of our investment management services to clients of other investment companies with broad, established distribution capabilities. In subadvisory arrangements, our client is typically the investment company through which our services are offered to investors. In these subadvisory arrangements, our investment advisory services are typically made available through retail-based mutual fund offerings. The investment company that sponsors the mutual fund is responsible for marketing, distribution, operations and accounting related to these funds.

Managed Accounts

Managed accounts are similar in some respects to subadvisory relationships in that a third-party financial institution, such as a brokerage firm or turnkey asset management program provider, handles distribution to the end client. The end client in a managed account is typically a high net worth individual or small institution. In these arrangements, the third party financial institution is responsible to the end client for client service, operations and accounting.

Growth Strategy

We believe that we have established a strong platform to support future growth, deriving our strength in large part from the experience and capabilities displayed by our management team and skilled investment professionals. We believe that this focused, stable team has contributed in large part to our solid investment performance, superior client service and a growing array of asset classes. We believe that opportunities for future growth may come from our ability to:

generate growth from new and existing clients and consultant relationships

Table of Contents

Index to Financial Statements

attract and retain key employees

grow assets in our additional asset classes

foster continued growth of the Westwood Trust platform

foster expanded distribution via mutual funds

pursue strategic acquisitions and alliances

continue to strengthen our brand name.

Generate growth from new and existing clients and consultant relationships. As our primary business objective, we intend to maintain and enhance existing relationships with clients and investment consultants by continuing to provide solid investment performance and high quality customer service to existing relationships. Additionally, we intend to pursue growth through targeted sales and marketing efforts that emphasize our investment performance and superior client service. New institutional client accounts are generally derived through investment consultants, and we have been successful in developing solid long-term relationships with many national and regional investment consultants. We believe that the familiarity with our firm, our people and our processes that we have built in consultant and client relationships is one of the key factors in being considered for new client investment mandates.

Attract and retain key employees. In order to achieve our performance and client relationship objectives, we must be able to retain and attract talented investment professionals. We believe that we have created a workplace environment in which motivated, performance-driven, and client-oriented individuals thrive. As a public company, we are able to offer to our employees a compensation program that includes strong equity incentives such that the success of our employees will be closely tied to the success of our clients. We believe that these factors are critical ingredients in maintaining a stable, client-focused environment, and accordingly we have built a firm that we believe can support significant future growth.

Grow assets in our additional asset classes. LargeCap Value is our flagship product and we believe it has significant capacity for additional assets; however, we continue to develop additional asset classes in response to client needs and the opportunities we see in the marketplace. We believe these additional asset classes provide opportunities for us to grow our assets under management. For instance, we have achieved meaningful growth in assets in our SMidCap Value product since we began marketing this asset class to institutions in 2004. We have also developed new asset classes in recent years that we intend to introduce to the institutional marketplace in the future. SmallCap Value has a five-year track record, Income Opportunity has compiled a six-year track record and AllCap Value will soon complete a seven-year track record. We began marketing SmallCap Value to institutions in 2007 and it has already completed the approval process at many investment consulting firms, earning several institutional mandates during 2008. In 2007, we launched an MLP portfolio in response to the needs of an existing client. We believe that we have the team in place to support these products in the institutional marketplace. If we continue to deliver strong performance, we believe that demand for these asset classes can provide meaningful growth in our assets under management.

Foster continued growth of the Westwood Trust platform. Westwood Trust has experienced solid growth in serving small- to medium-sized institutions and high net worth individuals. We are seeing continued interest from clients and prospects in the diversified, highly attentive service model that we have developed. A significant percentage of new asset growth at Westwood Trust stems from referrals and additional assets from existing clients. We believe the continued acceptance of our Enhanced Balanced product, which offers diversified exposure to multiple asset classes in a tax efficient, comprehensive solution for clients, provides us with opportunities for future growth.

Foster expanded distribution via mutual funds. The WHG Funds consist of the WHG SMidCap Fund, the WHG Income Opportunity Fund, the WHG LargeCap Value Fund, the WHG Balanced Fund and the WHG SmallCap Value Fund, which were launched in 2005 through 2007. The WHG Funds, which mirror our institutional strategies, offer capped expense ratios and are available in an institutional share class for all funds. In December 2007 we launched an A share in the WHG LargeCap Value Fund and the WHG Income Opportunity Fund in order to target No Transaction Fee (NTF) mutual fund supermarket platforms and the broker/dealer marketplace. The WHG SMidCap and WHG Income

Edgar Filing: WESTWOOD HOLDINGS GROUP INC - Form 10-K

Opportunity funds were both recently awarded 5-star ratings by Morningstar. We expect the WHG LargeCap Value and WHG Balanced funds to be rated by Morningstar in 2009 after

Table of Contents

Index to Financial Statements

they complete 3-year track records later this year. We believe that access to our SMidCap Value, Income Opportunity, LargeCap Value, Balanced and SmallCap Value asset classes via an institutional mutual fund vehicle will present an attractive offering for certain segments of institutional investors, including 401(k) plans.

Pursue strategic acquisitions and alliances. We will carefully evaluate strategic acquisition, joint venture and alliance opportunities. We may express an interest in pursuing acquisitions of asset management firms, mutual funds, or trust companies having assets where we have expertise or that appear appropriate as a means of expanding the range of asset classes or services we offer or expanding our distribution capabilities. By acquiring investment firms that successfully manage asset classes beyond our current expertise we could increase opportunities to attract new clients and provide existing clients with an even more diversified range of asset classes. We may also consider entering into alliances with other financial services firms to allow us to leverage our core competency of developing superior investment products in combination with alliance partners that could provide us with enhanced distribution capabilities or provide our clients with access to additional service offerings.

Continue strengthening our brand name. We believe that the strength of our brand name has been a key component to our successful long-term tenure in the investment industry and will continue to be instrumental to our future success. We have developed our strong brand name largely through high profile coverage in various investment publications and electronic media. A number of our investment professionals, including Ms. Byrne, David S. Spika, Investment Strategist, and Mark Freeman, Senior Vice President, enjoy a visible presence in print and electronic media, which we believe enhances our brand name. We will continue to look for creative ways to strengthen our brand name and reputation in our target client markets.

Competition

We are subject to substantial and growing competition in all aspects of our business. Barriers to entry to the asset management business are relatively low, and we believe that we will face a growing number of competitors. Although no one company dominates the asset management industry, many companies are larger, better known and have greater resources than us.

Further, we compete with other asset management firms on the basis of asset classes offered, the investment performance of those asset classes in absolute terms and relative to peer group performance, quality of service, fees charged, the level and type of compensation offered to key employees, and the manner in which asset classes are marketed. Many of our competitors offer more asset classes and services and may also have substantially greater assets under management.

We compete against numerous investment dealers, banks, insurance companies and others that sell equity funds, taxable income funds, tax-free investments and other investment products. In addition, the allocation by many investors of assets from active equity investment to index funds, fixed income or similar asset classes has enhanced the ability of firms offering non-equity asset classes and passive equity management to compete with us effectively. In short, the competitive landscape in which we operate is both intense and dynamic, and there can be no assurance that we will be able to compete effectively in the future as an independent company.

Additionally, most prospective clients perform a thorough review of an investment manager's background, investment policies and performance before committing assets to that manager. In many cases, prospective clients invite a number of competing firms to make presentations. The process of obtaining a new client typically takes twelve to eighteen months from the time of the initial contact. While we have achieved a high degree of success in competing successfully for new clients, it is a process to which we must continue to dedicate significant resources over an extended period, with no certainty of success.

Regulation

Westwood Management

Virtually all aspects of our business are subject to federal and state laws and regulations. These laws and regulations are primarily intended to protect investment advisory clients and stockholders of registered investment advisers. Under such laws and regulations, agencies that regulate investment advisers like us have broad administrative powers, including the power to limit, restrict or prohibit advisers from carrying on their business in the event that they fail to comply with such laws and regulations. In such event, the possible sanctions that may be imposed include the suspension of individual employees, limitations on engaging in certain lines of business for specified periods of time, revocation of investment adviser and other registrations, censures and fines. We believe that we are in substantial compliance with all material laws and regulations.

Our business is subject to regulation at both the federal and state level by the SEC and other regulatory bodies. Westwood Management is registered with the SEC under the Investment Advisers Act of 1940 and under the laws of various states. As a registered investment adviser, Westwood Management is regulated and subject to examination by the SEC. The Investment Advisers Act imposes numerous obligations on registered investment advisers, including fiduciary duties, record keeping requirements, operational requirements, marketing requirements and disclosure obligations. Westwood Management also acts as adviser to a family of mutual funds, the WHG Funds, which are registered with the SEC under the Investment Company Act of 1940. As adviser to a registered investment company, Westwood Management must comply with the requirements of the Investment Company Act and related regulations. The Investment Company Act imposes numerous obligations on registered investment companies, including requirements relating to operations, fees charged, sales, accounting, record-keeping, disclosure, governance and restrictions on transactions with affiliates. Under the rules and regulations of the SEC promulgated pursuant to the federal securities laws, we are subject to periodic examination by the SEC. The SEC is authorized to institute proceedings and impose sanctions for violations of the Investment Advisers Act and the Investment Company Act, ranging from censure to termination of an investment adviser's registration. The failure of Westwood Management to comply with the requirements of the SEC could have a material adverse effect on Westwood. We must also comply with anti-money laundering laws and regulations, including the USA PATRIOT Act of 2001. We believe that we are in substantial compliance with the requirements of the regulations under the Investment Advisers Act, the Investment Company Act and the USA PATRIOT Act.

Westwood Trust

Westwood Trust operates in a highly regulated environment and is subject to extensive supervision and examination. As a Texas chartered trust company, Westwood Trust is subject to the Texas Finance Code (the Finance Code), the rules and regulations promulgated under the Finance Code and supervision by the Texas Department of Banking. These laws are intended primarily for the protection of Westwood Trust's clients and creditors, rather than for the benefit of investors. The Finance Code provides for and regulates a variety of matters, such as:

- minimum capital maintenance requirements

- restrictions on dividends

- restrictions on investments of restricted capital

- lending and borrowing limitations

- prohibitions against engaging in certain activities

Edgar Filing: WESTWOOD HOLDINGS GROUP INC - Form 10-K

periodic examinations by the office of the Texas Department of Banking Commissioner

furnishing periodic financial statements to the Texas Department of Banking Commissioner

fiduciary record-keeping requirements

prior regulatory approval for certain corporate events (such as mergers, sale/purchase of all or substantially all of the assets and transactions transferring control of a trust company).

The Finance Code also gives the Banking Commissioner broad regulatory powers (including penalties and civil and administrative actions) if the trust company violates certain provisions of the Finance Code or conservatorship or closure if Westwood Trust is determined to be in a hazardous condition (as defined by law). Westwood Trust's failure to comply with the Finance Code could have a material adverse effect on Westwood.

Table of Contents

Index to Financial Statements

Westwood Trust is limited by the Finance Code in the payment of dividends to undivided profits which is described as that part of equity capital equal to the balance of net profits, income, gains, and losses since its formation date minus subsequent distributions to stockholders and transfers to surplus or capital under share dividends or appropriate board resolutions. At the discretion of its board of directors, Westwood Trust has made quarterly and special dividend payments to Westwood Holdings Group out of undivided profits.

Employee Retirement Income Security Act of 1974

We are subject to the Employee Retirement Income Security Act of 1974, as amended (ERISA), and to the related regulations, insofar as we are a fiduciary under ERISA with respect to some of our clients. ERISA and applicable provisions of the Internal Revenue Code impose certain duties on persons who are fiduciaries under ERISA or who provide services to ERISA plan clients and prohibit certain transactions involving ERISA plan clients. Our failure to comply with these requirements could have a material adverse effect on us.

Employees

At December 31, 2008, we had 63 full-time employees, including 27 investment management, research and trading professionals, 18 marketing and client service professionals, and 18 operations and business management professionals. No employees are represented by a labor union and we believe our employee relations to be good.

Segment information

For information about our operating segments, Westwood Management and Westwood Trust, please see footnote 10 Segment Reporting in the financial statements accompanying this Report.

Index to Financial Statements

Item 1A. Risk Factors

We believe these represent the material risks currently facing our business. Our business, financial condition or results of operations could be materially adversely affected by these risks. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. You should carefully consider the risks described below before making an investment decision. You should also refer to the other information included or incorporated by reference in this Report, including our financial statements and related notes.

Poor investment performance of assets managed by us could adversely affect our results of operations.

Because we compete with many asset management firms on the basis of asset classes offered and the investment performance of those asset classes, our success is dependent to a significant extent on the investment performance of the assets that we manage. Because our revenue is primarily generated from fees derived as a percentage of assets under management, poor performance tends to result in the loss or reduction of client accounts, which correspondingly decreases revenues. Underperformance relative to peer groups for our various asset classes could adversely affect our results of operations, especially if such underperformance continues for a lengthy period of time.

Some management employees are considered critical to our success, and our inability to attract and retain key employees could compromise our future success.

We believe that our future success will depend to a significant extent upon the services of our executive officers, particularly Susan M. Byrne, our Chairman of the Board and Chief Investment Officer, and Brian O. Casey, our President and Chief Executive Officer. As with other asset management businesses, our future performance depends to a significant degree upon the continued contributions of these and other key officers, investment professionals, marketing, client service and management personnel. There is substantial competition for skilled personnel and the loss of one or more of our key employees or our failure to attract, retain and motivate qualified personnel, could negatively impact our business, financial condition, results of operations and future prospects.

Our revenues are dependent upon the performance of the securities markets and negative performance of the securities markets could reduce our revenues.

Our results of operations are affected by many economic factors, including the performance of the securities markets. Negative performance within the securities markets or short-term volatility within the securities markets could result in investors withdrawing assets, decreasing their rates of investment or shifting assets to cash or other asset classes that we do not manage, all of which could reduce our revenues. Because most of our revenues are based on the value of assets under management, a decline in the value of those assets would also adversely affect our revenues. In addition, in periods of slowing growth or declining revenues, profits and profit margins are adversely affected because certain expenses remain relatively fixed.

In particular, more than half of our assets under management are invested in equity securities of companies with a large market capitalization. As a consequence, we are particularly susceptible to the volatility associated with changes in the market for large capitalization stocks. Due to this concentration, any change or reduction in such markets, including a shift of our clients and potential clients preference from investments in equity securities of large capitalization stocks to other equity or fixed income securities could have a significant negative impact on our revenues and results of operations. This negative impact could occur due to the depreciation in value of our assets under management, the election by clients to select other firms to manage their assets or the election by clients to allocate assets away from asset classes that we manage. Any of these events would result in decreased assets under management and therefore reduced revenues and a decline in results of operations.

If we are unable to realize benefits from the costs we have incurred and are continuing to incur to develop new asset classes and otherwise broaden our capabilities, our growth opportunities may be adversely affected.

We have incurred significant costs during the last several years to develop new asset classes, including SMidCap Value, SmallCap Value, AllCap Value, Income Opportunity and an MLP portfolio, to launch five new mutual funds, the WHG SMidCap Fund, the WHG Income Opportunity Fund, the WHG LargeCap Value Fund, the WHG Balanced Fund and the WHG

Table of Contents

Index to Financial Statements

SmallCap Value Fund and also to upgrade our business infrastructure. Some of the costs associated with these improvements will continue to be incurred in future periods and are relatively fixed. We may not realize the benefits of these investments and, in the event we are not able to do so, our growth opportunities may be adversely affected.

Due to the substantial cost and time required to introduce new asset classes in our industry, we may not be able to successfully introduce new asset classes in a timely manner, or at all.

The development and marketing of new asset classes in our industry requires a substantial amount of time and financial resources. Our ability to market and sell a new asset class successfully depends on our financial resources, the performance results of the specific asset class, the timing of the offering and our marketing strategies. Once an asset class is developed, whether through acquisition or internal development, we must still effectively market the asset class to our existing and prospective clients. This entails incurring substantial financial costs related to research on the target assets and the demand for such asset class in the market, as well as sales and marketing costs associated with attracting assets to the new asset class. In addition, our ability to sell new asset classes to our existing and prospective clients depends on our ability to meet or exceed the performance of our competitors who offer the same or similar asset classes. We may not be able to manage the assets within a given asset class profitably. Moreover, it may take years before we are able to produce the level of results that will enable us to attract clients. If we are unable to realize the benefits of the costs and expenses incurred in developing new asset classes, we may experience losses as a result of our management of these asset classes, and our ability to introduce further new asset classes and compete in our industry may be hampered.

Our business is dependent on investment advisory, subadvisory and trust agreements that are subject to termination or non-renewal. As a result, we could lose any of our clients on very short notice.

Substantially all of our revenues are derived pursuant to investment advisory, subadvisory and trust agreements with our clients. In general, either party may terminate these agreements upon 30 days' notice. Any termination of, or failure to renew, a material number of these agreements could have a material adverse impact on us, particularly because many of our costs are relatively fixed.

A small number of clients account for a substantial portion of our business. As such, the reduction or loss of business with any of these clients could have an adverse impact on our business, financial condition and results of operations.

Our largest client in terms of revenue paid us both asset-based and performance-based advisory fees during the last two years. Due to a significant performance fee earned in 2008, this client accounted for 19.5% of our fee revenues and our largest four clients accounted for 31.0% of fee revenues for the twelve months ended December 31, 2008, and we are therefore dependent to a significant degree on our ability to maintain our existing relationships with these clients. There can be no assurance that we will be successful in maintaining these existing client relationships, securing additional clients or achieving the superior investment performance necessary to earn a performance-based advisory fee. Any failure by us to retain one or more of these large clients or establish profitable relationships with additional clients could have a material adverse effect on our business, financial condition and results of operations.

Competitive fee pressures could reduce revenues and profit margins.

The investment management business is highly competitive and has relatively low barriers to entry. To the extent we have to compete on the basis of price, we may not be able to maintain our current fee structure. Although our investment management fees vary from product to product, we have competed primarily on the performance of our products and client service rather than on the level of our investment management fees relative to our competitors. In recent years there has been a trend toward lower fees in the investment management industry. In order to maintain our fee structure in a competitive environment, we must be able to continue to provide clients with investment returns and service that make investors willing to pay our fees. We cannot be assured that we will succeed in providing investment returns and service that will allow us to maintain our current fee structure. Fee reductions on existing or future new business could have an adverse effect on our profit margins and results of operations.

Table of Contents

Index to Financial Statements

Performance fees could have a significant effect on our revenues and results of operations.

We have performance fee agreements with a small number of our clients, which would pay us a fee if we outperform a specified index over predetermined periods of time. There can be no assurance that we will perform well relative to such indexes and the failure to do so would cause us to earn none or only part of those potential revenues, which would have a material adverse effect on our revenues and results of operations. Our revenues from performance-based fees could fluctuate significantly from one measurement period to the next, depending on how we perform relative to the indexes specified in these agreements.

Any event that negatively affects the asset management industry in general could have a material adverse effect on us.

Any event affecting the asset management industry that results in a general decrease in assets under management or a significant general decline in the number of advisory clients or accounts could negatively impact our revenues. Our future growth and success depends in part upon the growth of the asset management industry.

Our business is subject to extensive regulation with attendant costs of compliance and serious consequences for violations.

Virtually all aspects of our business are subject to various laws and regulations including the Investment Advisers Act, the Investment Company Act, and anti-money laundering laws. These laws and regulations generally grant regulatory agencies broad administrative powers, including the power to limit or restrict us from operating our business as well as the powers to place us under conservatorship or closure in the event we fail to comply with such laws and regulations. Violations of such laws or regulations could subject us and/or our employees to disciplinary proceedings and civil or criminal liability, including revocation of licenses, censures, fines or temporary suspension, permanent bar from the conduct of business, conservatorship, or closure. Any such proceeding or liability could have a material adverse effect upon our business, financial condition, results of operations and business prospects. Due to the extensive regulations and laws to which we are subject, our management is required to devote substantial time and effort to legal and regulatory compliance issues.

In addition, the regulatory environment in which we operate is subject to change. We may be adversely affected as a result of new or revised legislation or regulations or by changes in the interpretation or enforcement of existing laws and regulations. See Regulation.

Misuse of assets and information in the possession of our investment professionals and employees could result in costly litigation and liability for us and our clients.

Our investment professionals handle a significant amount of assets along with financial and personal information for our clients. Although we have implemented a system of controls to minimize the risk of a fraudulent taking or misuse of assets and information, there can be no assurance that our controls will be adequate to prevent such fraudulent actions by our portfolio managers or employees. If our controls are ineffective in preventing the fraudulent taking or misuse of assets and information, we could be subject to costly litigation, which could consume a substantial amount of our resources, distract our management from our operations, and could also result in regulatory sanctions. Additionally, any such fraudulent actions could adversely affect some of our clients in other ways, and these clients could seek redress against us.

Acquisitions involve inherent risks that could compromise the success of the combined business and dilute the holdings of current stockholders.

As part of our long-term business strategy, we may consider acquisitions of similar or complementary businesses. See Growth Strategy. If we are not correct when we assess the value, strengths, weaknesses, liabilities and potential profitability of acquisition candidates or if we are not successful in integrating the operations of the acquired businesses, the success of the combined business could be compromised. Any future acquisitions will be accompanied by the risks commonly associated with acquisitions. These risks include, among others, potential exposure to unknown liabilities of acquired companies and to acquisition costs and expenses, the difficulty and expense of integrating the operations and personnel of the acquired companies, the potential

Table of Contents

Index to Financial Statements

disruption to the business of the combined company and potential diversion of management's time and attention, the impairment of relationships with and the possible loss of key employees and clients as a result of the changes in management, potential future write-downs related to goodwill impairment in connection with acquisitions, and dilution to the stockholders of the combined company if the acquisition is made for stock of the combined company. In addition, asset classes, technologies or businesses of acquired companies may not be effectively assimilated into our business or have a positive effect on the combined company's revenues or earnings. The combined company may also incur significant expense to complete acquisitions and to support the acquired asset classes and businesses. Further, any such acquisitions may be funded with cash, debt or equity, which could have the effect of diluting the holdings or limiting the rights of stockholders. Finally, we may not be successful in identifying attractive acquisition candidates or completing acquisitions on favorable terms.

Various factors may hinder the declaration and payment of dividends.

We have historically paid a quarterly dividend. However, the payment of future dividends is subject to the discretion of our Board of Directors and various factors may prevent us from paying dividends. Such factors include our financial position, capital requirements and liquidity, the existence of a stock repurchase program, state corporate and banking law restrictions, results of operations and such other factors as our Board of Directors may consider relevant. In addition, as a holding company, our ability to pay dividends is dependent on the dividends and income we receive from our subsidiaries. At the present time our primary source of cash is dividends that may be received from Westwood Management or Westwood Trust. The payment of dividends by Westwood Management or Westwood Trust is subject to the discretion of their Boards of Directors and compliance with applicable laws, including, in particular, the provisions of the Texas Finance Code applicable to Westwood Trust. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

Our business is vulnerable to systems failures that could have a material adverse effect on our business, financial condition and results of operations.

Any delays or inaccuracies in securities pricing information or information processing could give rise to claims against us, which could have a material adverse effect on our business, financial condition and results of operations. We are highly dependent on communications and information systems and on third party vendors for securities pricing information and updates from certain software. We may suffer a systems failure or interruption, whether caused by an earthquake, fire, other natural disaster, power or telecommunications failure, unauthorized access, act of God, act of war or otherwise, and our back-up procedures and capabilities may not be adequate or sufficient to eliminate the risk of extended interruptions in operations.

We may not be able to fund future capital requirements on favorable terms, if at all.

We cannot be certain that financing to fund our working capital or other cash requirements, if needed, will be available on favorable terms, if at all. Our capital requirements will vary greatly from quarter to quarter depending on, among other things, capital expenditures, fluctuations in our operating results and financing activities. If future financing is necessary, we may or may not be able to obtain financing on favorable terms, if at all. Further, any future equity financings could dilute the relative percentage ownership of the then existing holders of our common stock, and any future debt financings could involve restrictive covenants that limit our ability to take certain actions.

Failure to maintain effective internal controls could have a material adverse effect on our business and stock price.

Effective internal controls are necessary for us to provide reliable financial reports. If we cannot provide reliable financial reports, our brand and operating results could be harmed. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

We cannot be certain that the measures we take to evaluate and improve our internal controls will ensure that we implement and maintain adequate controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to

Table of Contents

Index to Financial Statements

meet our reporting obligations. If we fail to maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time; we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. In addition, failure to achieve and maintain an effective internal control environment could cause investors to lose confidence in our reported financial information, which could have a material adverse effect on our stock price.

Our organizational documents contain provisions that may prevent or deter another group from paying a premium over the market price to our stockholders to acquire our stock.

Our organizational documents contain provisions that require a vote of two-thirds of the shares of stock entitled to vote to remove directors for cause, establish that stockholders cannot act by written consent, and that authorize our board of directors to issue, without shareholder approval, blank check preferred stock. In addition, as a Delaware corporation, we are subject to Section 203 of the Delaware General Corporation Law relating to business combinations. These provisions could delay, deter or prevent a merger, consolidation, tender offer or other business combination or change of control involving us that could include a premium over the market price of our common stock that some or a majority of our stockholders might consider to be in their best interests.

We are a holding company and are dependent on the operations and funds of our subsidiaries.

We are a holding company, with no revenue generating operations and no assets other than our ownership interests in Westwood Management and Westwood Trust. Accordingly, we are dependent on the cash flow generated by these operating subsidiaries and must rely on dividends or other intercompany transfers from these operating subsidiaries to generate the funds necessary to meet our obligations.

Item 2. Properties.

Westwood, Westwood Management and Westwood Trust conduct their principal operations through a leased property with approximately 21,600 square feet located in Dallas, Texas. The initial term of the lease agreement expires in May 2011. We believe these facilities will be adequate to serve our currently anticipated business needs.

Item 3. Legal Proceedings.

We are subject from time to time to certain claims and legal proceedings arising in the ordinary course of our business. We do not believe the outcome of these proceedings will have a material impact on our financial position, operations or cash flow.

Table of Contents**Index to Financial Statements****PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities. Market Information**

Our common stock has traded on the New York Stock Exchange (the "NYSE") under the symbol "WHG" since July 1, 2002. At December 31, 2008, there were approximately 169 record holders of our common stock, although we believe that the number of beneficial owners of our common stock is substantially greater. The table below sets forth the high and low sale prices for the common stock, as reported by the NYSE for the periods indicated.

	High	Low
2008		
Fourth Quarter	\$ 48.05	\$ 22.47
Third Quarter	53.31	39.05
Second Quarter	43.00	33.38
First Quarter	39.00	32.31
2007		
Fourth Quarter	\$ 39.96	\$ 30.19
Third Quarter	36.27	24.40
Second Quarter	34.30	22.72
First Quarter	26.51	22.19

Dividends

We have declared a cash dividend on our common stock for each quarter since the date that our common stock was first publicly traded. The table below sets forth the quarterly and special dividends declared for the periods indicated.

	Quarterly	Special
2008		
Fourth Quarter	\$ 0.30	
Third Quarter	0.30	
Second Quarter	0.30	
First Quarter	0.30	
2007		
Fourth Quarter	\$ 0.25	
Third Quarter	0.25	\$ 0.25
Second Quarter	0.20	
First Quarter	0.20	

In addition, on February 5, 2009 we declared a quarterly cash dividend of \$0.30 per share on our common stock payable on April 1, 2009 to stockholders of record on March 13, 2009. We currently intend to continue paying cash dividends in such amounts as our Board of Directors determines is appropriate. Any payment of cash dividends in the future will be at the discretion of the Board of Directors and subject to some limitations under the Delaware General Corporation Law.

Westwood Holdings Group, Inc. is the sole stockholder of both Westwood Management and Westwood Trust. Westwood Trust is limited under applicable Texas law in the payment of dividends to undivided profits which is defined as that part of equity capital equal to the balance of net profits, income, gains, and losses since its formation date minus subsequent distributions to stockholders and transfers to surplus or capital under share dividends or appropriate board of director resolutions.

Table of Contents**Index to Financial Statements****PERFORMANCE GRAPH**

The following graph compares total stockholder returns of Westwood since December 31, 2003 with the total return of the Russell 2000 Index and the SNL Asset Manager Index. The SNL Asset Manager Index is a composite of 32 publicly traded asset management companies.

Comparison of Cumulative Five Year Total Return

<i>Index</i>	Period ended						Cumulative
	12/31/03	12/31/04	12/31/05	12/31/06	12/31/07	12/31/08	Five-Year Total Return
Westwood Holdings Group, Inc.	\$ 100.00	\$ 116.55	\$ 114.26	\$ 154.37	\$ 262.20	\$ 205.12	105.12%
Russell 2000 Index	100.00	118.33	123.72	146.44	144.15	95.44	-4.56
SNL Asset Manager Index	100.00	130.47	165.93	192.43	219.04	104.10	4.10

The total return for our stock and for each index assumes \$100 invested on December 31, 2003 in our common stock, the Russell 2000 Index, and the SNL Asset Manager Index, including reinvestment of dividends. Our common stock is traded on the NYSE.

The closing price of our common stock on the last trading day of the year ended December 31, 2008 was \$28.41 per share. Historical stock price performance is not necessarily indicative of future price performance.

Table of Contents**Index to Financial Statements****Item 6. Selected Consolidated Financial Data.****SELECTED CONSOLIDATED FINANCIAL DATA**

The selected consolidated financial data presented below for the five years ended December 31, 2008, except Assets Under Management, is derived from our consolidated financial statements as audited by Grant Thornton LLP, independent registered public accounting firm as of and for the years ended December 31, 2008, 2007 and 2006, and from our consolidated financial statements as audited by Deloitte & Touche LLP, independent registered public accounting firm as of and for the years ended December 31, 2005 and 2004, and should be read in conjunction with those statements. The information set forth below should be read in conjunction with Item 1. Business and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this Report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion and analysis in conjunction with Selected Consolidated Financial Data included in this Report, as well as our consolidated financial statements and related notes thereto appearing elsewhere in this Report.

Forward-Looking Statements

Statements in this Report and the Annual Report to Stockholders that are not purely historical facts, including statements about our expected future financial position, results of operations or cash flows, as well as other statements including words such as anticipate, believe, plan, estimate, expect, intend, should, could, goal, target, designed, on track, comfortable with, optimistic and other similar expressions are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results and the timing of some events could differ materially from those projected in or contemplated by the forward-looking statements due to a number of factors, including, without limitation, those set forth below:

our ability to identify and successfully market services that appeal to our customers;

the significant concentration of our revenues in four of our customers;

our relationships with investment consulting firms;

our relationships with current and potential customers;

our ability to retain qualified personnel;

our ability to develop and market new asset classes successfully;

our ability to maintain our fee structure in light of competitive fee pressures;

competition in the marketplace;

downturns in financial markets;

new legislation adversely affecting the financial services industries;

interest rates;

changes in our effective tax rate;

our ability to maintain an effective system of internal controls;

the other risks detailed from time to time in our SEC reports.

Additional factors that could cause our actual results to differ materially from our expectations are discussed under the section entitled "Risk Factors" and elsewhere in this Report. You should not rely unduly on these forward-looking statements, which speak only as of the date of this Report. Except as required by law, we are not obligated to publicly release any revisions to these forward-looking statements to reflect events or circumstances occurring after the date of this Report or to reflect the occurrence of unanticipated events.

Overview

We manage investment assets and provide services for our clients through our two subsidiaries, Westwood Management and Westwood Trust. Westwood Management provides investment advisory services to corporate retirement plans, public retirement plans, endowments and foundations, the WHG Funds, other mutual funds and clients of Westwood Trust. Westwood Trust provides institutions and high net worth individuals trust and custodial services and participation in common trust funds that it sponsors. Our revenues are generally derived from fees based on a percentage of assets under management and at December 31, 2008 Westwood Management and Westwood Trust collectively managed assets valued at approximately \$7.2 billion. We have been providing investment advisory services since 1983 and, according to recognized industry sources, including Morningstar, Inc., when measured over multi-year periods, our principal asset classes have consistently ranked above the median in performance within their peer groups.

One of the priorities on which we have focused since our spin-off in 2002 is building a foundation in terms of personnel and infrastructure to support a potentially much larger business. We have also developed products that we believe will be desirable within our target institutional and private client markets. The cost of developing new products and the organization as a whole has resulted in us incurring expenses that, in some cases, do not currently have material offsetting revenue. Now that we believe the foundation and the products are in place, we are taking these new products to the institutional marketplace and believe that institutional investors will recognize the value in these products and generate new revenue streams for us.

Table of Contents

Index to Financial Statements

We began marketing our SMidCap Value product to institutional investment consultants in late 2004. As a result of this targeted marketing effort, we gained a number of meaningful SMidCap Value clients in 2005 through 2008 with assets increasing from \$78 million at December 31, 2004 to \$1.4 billion at December 31, 2008. We continue to devote significant marketing efforts to the institutional market for our SMidCap Value product as well as for our SmallCap Value product, which now has a five-year track record. Our SmallCap Value product is progressing through the approval process at many investment consulting firms and we are beginning to see search activity in this capacity-constrained product. We won our first institutional separate account mandates in SmallCap Value in 2007. Between December 2005 and April 2007 we also launched five mutual funds under the WHG Funds name. As of December 31, 2008, assets in these five funds were approximately \$253 million. In addition to the funds' existing institutional share class, in December 2007 we launched an A share in the WHG LargeCap Value Fund and in the WHG Income Opportunity Fund in order to target No Transaction Fee (NTF) mutual fund supermarket platforms and the broker/dealer marketplace. We have an additional WHG Fund registered with the SEC, the WHG AllCap Value Fund, and are evaluating opportunities to launch this fund in the future.

Revenues

We derive our revenues from investment advisory fees, trust fees, and other revenues. Our advisory fees are generated by Westwood Management, which manages client accounts under investment advisory and subadvisory agreements. Advisory fees are calculated based on a percentage of assets under management, and are paid in accordance with the terms of the agreements. Westwood Management's advisory fees are paid quarterly in advance based on assets under management on the last day of the preceding quarter, quarterly in arrears based on assets under management on the last day of the previous quarter, or are based on a daily or monthly analysis of assets under management for the stated period. Westwood Management recognizes revenues as services are rendered. A limited number of our clients have a performance-based fee component in their contract, which generates additional revenues if we outperform a specified index over a specific period of time. We record revenue for performance-based fees at the end of the measurement periods. In 2008, we recognized a performance-based fee for a client in the second quarter and a separate performance-based fee for another client in the fourth quarter. Since most of our advance paying clients' billing periods coincide with the calendar quarter to which payment relates, the revenue related to those clients is fully recognized within the quarter. Consequently, there is not a significant amount of deferred revenue contained in our financial statements.

Our trust fees are generated by Westwood Trust pursuant to trust or custodial agreements. Trust fees are separately negotiated with each client and are generally based on a percentage of assets under management, which in turn is influenced by the complexity of the operations of the trust and the services provided. Westwood Trust also provides trust services to a small number of clients on a fixed fee basis. Most trust fees are paid quarterly in advance and are recognized as services are rendered. Since the majority of Westwood Trust's advance paying clients' billing periods coincide with the calendar quarter to which payment relates, the revenue related to those clients is fully recognized within the quarter; consequently, there is not a significant amount of deferred revenue contained in our financial statements.

Our other revenues generally consist of interest and investment income. Although we invest most of our cash in bonds, we also invest in equity instruments and money market funds.

Assets Under Management

Assets under management decreased \$668 million, or 9%, to \$7.2 billion at December 31, 2008 compared to \$7.9 billion at December 31, 2007. The decrease in assets under management was primarily due to market depreciation of assets under management, partially offset by net inflows of assets from new and existing clients. Quarterly average assets under management increased \$813 million, or 12%, to \$7.7 billion for 2008 compared with \$6.9 billion for 2007.

Table of Contents**Index to Financial Statements**

Assets under management increased \$2.0 billion, or 33%, to \$7.9 billion at December 31, 2007 compared to \$5.9 billion at December 31, 2006. The increase in assets under management was primarily due to inflows of assets from new and existing clients and the market appreciation of assets under management, partially offset by the withdrawal of assets by certain clients. Quarterly average assets under management increased \$1.4 billion, or 26%, to \$6.9 billion for 2007 compared with \$5.5 billion for 2006.

	As of December 31, (in millions)			% Change	
	2008	2007	2006	2008 vs. 2007	2007 vs. 2006

Westwood Management. In the preceding table, Separate Accounts represent corporate pension and profit sharing plans, public employee retirement funds, Taft Hartley plans, endowments, foundations and individuals. Subadvisory represents relationships where Westwood Management provides investment management services for funds offered by other financial institutions. WHG Funds represent the family of institutional mutual funds for which Westwood Management serves as advisor. Westwood Funds represent the family of mutual funds for which Westwood Management serves as subadvisor. Managed Accounts represent relationships with brokerage firms and other registered investment advisors who offer Westwood Management's products to their customers.

Westwood Trust. In the preceding table, Commingled Funds represent funds that have been established to facilitate investment of fiduciary funds of multiple clients by combining assets into a single trust for taxable and tax-exempt entities. Private Accounts represent discretionary accounts where Westwood Trust acts as trustee or agent and has full investment discretion. Agency/Custody Accounts represent non-discretionary accounts in which Westwood Trust provides agent or custodial services, but does not act in an advisory capacity. For certain assets in this category, Westwood Trust currently provides limited custody services for a minimal or zero fee, but views these assets as potentially converting to fee-generating managed assets in the future. As an example, some assets in this category consist of low-basis stock currently being held in custody for clients, but will likely transfer to fee-generating managed assets during an inter-generational transfer of wealth at some future date.

Table of Contents**Index to Financial Statements*****Results of Operations***

The following table and discussion of our results of operations is based upon data derived from our consolidated statements of income contained in our consolidated financial statements and should be read in conjunction with these statements, which are included elsewhere in this Report.

	Years ended December 31, (in thousands)			% Change

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Total Revenue. Our total revenues increased by 28% to \$46.5 million in 2008 compared with \$36.3 million in 2007. Asset-based advisory fees increased by 24% to \$27.0 million in 2008 from \$21.7 million in 2007 primarily due to net inflows from new and existing clients. These increases were partially offset by the withdrawal of assets by certain clients. Performance-based advisory fees increased 189% to \$8.7 million in 2008 from \$3.0 million in 2007 primarily due to an out-performance fee of \$5.2 million carried over from 2007, which was subject to potential under-performance reductions in 2008, which did not occur. Performance fees for 2008 out-performance were fully recognized in 2008 and there is no carryover into 2009. We are eligible to earn a performance fee in 2009 dependent on out-performance in 2009. Trust fees increased by 7% to \$11.0 million in 2008 from \$10.3 million in 2007 primarily due to higher average fee realizations. Other revenues, which generally consist of interest and investment income, decreased by 120% to \$(253,000) in 2008 compared with \$1.3 million in 2007. Other revenues decreased primarily due to an \$872,000 increase in unrealized losses, a \$405,000 decrease in net realized gains and a \$390,000 decrease in interest income. Partially offsetting these decreases was an increase of \$143,000 in dividend income.

Employee Compensation and Benefits. Employee compensation and benefits, which generally consist of salaries, incentive compensation, equity-based compensation expense and benefits, increased by 26% to \$23.2 million compared with \$18.4 million in 2007. This increase resulted primarily due to an increase of \$1.6 million in incentive compensation expense due to higher pretax income, an increase of approximately \$1.4 million in restricted stock expense due to additional restricted stock grants in February 2008 and July 2007, an increase of

Edgar Filing: WESTWOOD HOLDINGS GROUP INC - Form 10-K

\$1.2 million in salary expense due to increased headcount and salary increases for certain employees, and an increase of \$251,000 in profit sharing contributions. We had 63 full-time employees as of December 31, 2008 compared to 52 at December 31, 2007.

Table of Contents**Index to Financial Statements**

Sales and Marketing. Sales and marketing costs consist of expenses associated with our marketing efforts, including travel and entertainment, direct and consultant marketing, and advertising costs. Sales and marketing costs increased by 38% to \$803,000 in 2008 compared with \$581,000 in 2007. The increase is primarily the result of increases in travel and entertainment costs of \$185,000 and in direct marketing expense of \$31,000.

WHG Mutual Funds. WHG Mutual Funds expenses generally consist of costs associated with our marketing, distribution and administration efforts related to the WHG Funds. WHG mutual funds expenses increased 139% to \$384,000 in 2008 compared with \$161,000 in 2007. This increase is primarily due to an \$189,000 increase in shareholder servicing expense and a \$106,000 increase in legal fees. Decreased fund reimbursement expense due to lower reimbursements due to a higher level of assets in the funds compared to last year partially offset these increases.

Information Technology. Information technology expenses are generally costs associated with proprietary investment research tools, computing hardware, software licenses, maintenance and support, telecommunications and other related costs. Information technology expense increased by 15% to \$1,114,000 in 2008 compared with \$970,000 in 2007. The increase is primarily due to increases of \$43,000 in IT environment support costs, \$32,000 in software maintenance and licenses, \$30,000 in quotations and \$24,000 in research tools.

Professional Services. Professional services expenses generally consist of audit, external subadvisor expense, legal and other professional fees. Professional services expense increased by 7% to \$1.7 million in 2008 compared with \$1.6 million in 2007. The increase is primarily due to a \$55,000 increase in advisory fees paid to external subadvisors due to increased average assets under management in growth and high yield common trust funds sponsored by Westwood Trust, a \$33,000 increase in other professional fees related to collective fund start-up costs and an increase in public relations expense and a \$21,000 increase in legal expense.

General and Administrative. General and administrative expenses generally consist of costs associated with the lease of our office space, insurance, office supplies, custody expense, investor relations, charitable contributions and other miscellaneous expenses. General and administrative expenses increased by 14% to \$2.7 million in 2008 compared with \$2.3 million in 2007. The increase is primarily due to increases of \$147,000 in custody expense due to the addition of a second international subadvisor at Westwood Trust, \$39,000 in occupancy expense, \$36,000 in miscellaneous expenses and \$36,000 in office supplies expense.

Provision for Income Taxes. Provision for income taxes increased by 41% to \$6.0 million in 2008 compared with \$4.3 million in 2007 primarily due to higher income before taxes. The effective tax rate was 36.2% in 2008 compared to 34.9% in 2007. The increase in the effective tax rate was primarily due to more taxable income in the 35% tax bracket for federal income taxes than in the previous year.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Total Revenue. Our total revenues increased by 33% to \$36.3 million in 2007 compared with \$27.4 million in 2006. Asset-based advisory fees increased by 24% to \$21.7 million in 2007 from \$17.5 million in 2006 primarily due to inflows from new and existing clients and growth in assets under management of existing clients due to market appreciation. These increases were partially offset by the withdrawal of assets by certain clients. Performance-based advisory fees were \$3.0 million in 2007, the first year we were eligible to earn a performance-based fee. Trust fees increased by 25% to \$10.3 million in 2007 from \$8.2 million in 2006 primarily due to inflows from new clients and growth in assets under management of existing clients due to market appreciation. These increases were partially offset by the withdrawal of assets by certain clients. Other revenues, which generally consist of interest and investment income, decreased by 20% to \$1.3 million in 2007 compared with \$1.6 million in 2006. Other revenues decreased primarily due to a \$245,000 decrease in unrealized gains, a \$170,000 decrease in dividend income from Gabelli Advisers, which was due to a decrease in the dividend rate, and a decrease in consulting income from Gabelli Advisers. We were notified by Gabelli Advisers in the fourth quarter of 2006 that our consulting payment arrangement was to be replaced with a dividend payment from Gabelli Advisers, which is included in dividend income. These decreases were partially offset by increases of \$97,000 in interest and non-Gabelli related dividend income and \$46,000 in realized gains.

Table of Contents**Index to Financial Statements**

Employee Compensation and Benefits. Employee compensation and benefits increased by 23% to \$18.4 million compared with \$14.9 million in 2006. This increase resulted primarily due to an increase of \$2.1 million in incentive compensation expense due to higher pretax income, an increase of approximately \$816,000 in restricted stock expense due to additional restricted stock grants in July 2007 and July 2006, an increase of \$430,000 in salary expense due to increased headcount and salary increases for certain employees, increased payroll taxes related to the increases in salary and incentive compensation expense, restricted stock vesting and the payment of dividends on unvested restricted stock as well as increased 401(k) and profit sharing contributions. A decrease of \$126,000 in compensation expense related to stock options partially offset these increases. We had 52 full-time employees as of December 31, 2007 compared to 48 at December 31, 2006.

Sales and Marketing. Sales and marketing costs increased by 10% to \$581,000 in 2007 compared with \$528,000 in 2006. The increase is primarily the result of increases in direct marketing expense of \$47,000 and in travel and entertainment costs of \$43,000. Decreased consultant marketing expenses partially offset these increases.

WHG Mutual Funds. WHG Mutual Funds expenses decreased 32% to \$161,000 in 2007 compared with \$238,000 in 2006. This decrease is due to a \$104,000 decrease in fund expense reimbursements due to a higher level of assets in the funds compared to last year. Increases in other fund costs partially offset this decrease.

Information Technology. Information technology expenses increased by 5% to \$970,000 in 2007 compared with \$925,000 in 2006. The increase is primarily due to increases of \$32,000 in software maintenance and licenses, \$29,000 in research tools and \$23,000 in IT environment support costs. These increases were partially offset by decreases in computer hardware depreciation expense, website maintenance costs and other IT expenses.

Professional Services. Professional services expenses increased by 19% to \$1.6 million in 2007 compared with \$1.4 million in 2006. The increase is primarily due to a \$283,000 increase in advisory fees paid to external subadvisors due to increased assets under management in international equity and growth common trust funds sponsored by Westwood Trust and a \$27,000 increase in other professional fees. Partially offsetting these increases was a decrease of \$53,000 in legal expense.

General and Administrative. General and administrative expenses increased by 10% to \$2.3 million in 2007 compared with \$2.1 million in 2006. The increase is primarily due to increases of \$35,000 in miscellaneous expenses, \$33,000 in the fees paid to our independent directors, \$24,000 in training and seminar expenses, \$22,000 in office supplies expense and \$17,000 in occupancy costs. A decrease in state and local taxes partially offset these increases.

Provision for Income Taxes. Provision for income taxes increased by 53% to \$4.3 million in 2007 compared with \$2.8 million in 2006 primarily due to higher income before taxes. The effective tax rate was 34.9% in 2007 compared to 38.4% in 2006. The decrease in the effective tax rate was primarily due to a decrease in taxes owed to the state of Texas under the new margin tax compared to the previous franchise tax rates.

Supplemental Financial Information

As supplemental information, we are providing non-generally accepted accounting principles (non-GAAP) performance measures that we refer to as cash earnings and cash expenses. We provide these measures in addition to, but not as a substitute for, net income and total expenses, which are reported on a U.S. generally accepted accounting principles (GAAP) basis. Both our Management and Board of Directors review cash earnings and cash expenses to evaluate our ongoing performance, allocate resources and review dividend policy. We believe that these non-GAAP performance measures, while not substitutes for GAAP net income and total expenses, are useful for both management and investors to evaluate our underlying operating and financial performance and our available resources. We do not advocate that investors consider these non-GAAP measures without considering financial information prepared in accordance with GAAP.

Table of Contents**Index to Financial Statements**

In calculating cash earnings, we add to net income the non-cash expense associated with equity-based compensation awards of restricted stock and stock options. In calculating cash earnings for the year ended December 31, 2006, we also eliminate the non-cash cumulative effect of a change in accounting principle associated with our implementation of SFAS No.123 (R). We define cash expenses as total expenses less non-cash equity-based compensation expense. Although depreciation on fixed assets is a non-cash expense, we do not add it back when calculating cash earnings or deduct it when calculating cash expenses because depreciation charges represent a decline in the value of the related assets that will ultimately require replacement.

For the year ended December 31, 2008, our cash earnings increased by 30% to \$17.3 million compared with \$13.3 million for the year ended December 31, 2007, primarily due to a 28% increase in total revenues.

The following table provides a reconciliation of net income to cash earnings and total expenses to cash expenses for the years presented:

(in thousands)	2008	2007	2006	% Change	
				2008 vs. 2007	2007 vs. 2006
Net Income	\$ 10,543	\$ 7,944	\$ 4,508	33%	76%
Add: Restricted stock expense	6,735	5,316	4,500	27	18
Add: Stock option expense			126		
Less: Cumulative effect of change in accounting principle			(39)		
Cash earnings	\$ 17,278	\$ 13,260	\$ 9,095	30	46
Total expenses	\$ 29,921	\$ 24,085	\$ 20,110	24	20
Less: Restricted stock expense	(6,735)	(5,316)	(4,500)	27	18
Less: Stock option expense			(126)		
Cash expenses	\$ 23,186	\$ 18,769	\$ 15,484	24%	21%

Liquidity and Capital Resources

Historically we have funded our operations and cash requirements with cash generated from operating activities. As of December 31, 2008, we had no long-term debt. The changes in net cash provided by operating activities generally reflect the changes in earnings plus the effect of non-cash items and changes in working capital. Changes in working capital, especially accounts receivable and accounts payable, are generally the result of timing differences between collection of fees billed and payment of operating expenses.

During 2008, cash flow used in operating activities, principally our investment advisory business, was \$6.3 million compared to cash provided by operations of \$11.7 million and \$7.2 million during 2007 and 2006, respectively. The decrease of \$18.0 million was due primarily to the net purchase of U.S. Treasury Bills and an increase in accounts receivable, partially offset by an increase in cash earnings. The increase of \$4.5 million from 2006 to 2007 was primarily due to increased cash earnings, offset in part by the net change in operating assets and liabilities. At December 31, 2008 and 2007, we had working capital of \$35.2 million and \$26.4 million, respectively.

Cash flow provided by investing activities during 2008 of \$13.1 million was primarily due to the net sales of investments, partially offset by the purchase of fixed assets. Cash flow used in investing activities during 2007 of \$3.1 million was primarily due to net purchases of available-for-sale investments. Cash flow provided by investing activities during 2006 was \$0.9 million, and was primarily related to net sales of available-for-sale investments.

Cash used in financing activities during 2008 of \$7.9 million and during 2007 of \$6.2 million were primarily due to the payment of cash dividends and the purchase of treasury stock, offset in part by excess tax benefits related to vested restricted shares and proceeds from the issuance of stock due to option exercises. Cash used in financing activities during 2006 of \$7.9 million was primarily related to the payment of cash dividends on our common stock, offset by proceeds received from stock option exercises.

Table of Contents**Index to Financial Statements**

We had cash and investments of \$31.7 million and \$26.7 million at December 31, 2008 and December 31, 2007, respectively. As required by the Texas Finance Code, Westwood Trust maintains current assets in an amount equal to the required minimum restricted capital of \$1.0 million, which is included in Investments in the accompanying consolidated balance sheets. We had no liabilities for borrowed money at December 31, 2008 or December 31, 2007, and our accounts payable were paid in the ordinary course of business for each of the periods then ended.

Our future liquidity and capital requirements will depend upon numerous factors including our results of operations, the timing and magnitude of capital expenditures or strategic initiatives and our dividend policy. We believe that current cash and short-term investment balances and cash generated from operations will be sufficient to meet the operating and capital requirements of our ordinary business operations through at least the next twelve months. However, there can be no assurance that we will not require additional financing within this time frame. The failure to raise needed capital on attractive terms, if at all, could have a material adverse effect on our business, financial condition and results of operations.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2008 (in thousands).

Contractual Obligations	Total	Payments due in:		
		Less than 1 year	1-3 years	3-5 years
Non-cancelable operating leases	\$ 1,634	\$ 661	\$ 967	\$ 6

Accounting Developments

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157), which addresses how companies should measure fair value when they are required to use a fair value measure for recognition or disclosure purposes under GAAP. The provisions of SFAS 157 are effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. We adopted SFAS 157 on January 1, 2008 and determined that SFAS 157 did not have a material impact on our financial statements.

In February 2007, the FASB issued FASB Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of the statement is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The provisions of SFAS 159 are effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. We adopted SFAS 159 on January 1, 2008. We did not make any fair value elections upon adoption and determined that SFAS 159 did not have a material impact on our financial statements.

In December 2007, the FASB amended SFAS No. 141 (revised 2007), Business Combinations (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer: (1) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree; (2) recognizes and measures the goodwill acquired in the business combination or gain from a bargain purchase; and (3) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first reporting period for fiscal years beginning on or after December 15, 2008 and will have no impact on our transactions recorded to date.

Index to Financial Statements

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent losses and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. In applying accounting principles, we must often make individual estimates and assumptions regarding expected outcomes or uncertainties. Our estimates, judgments and assumptions are continually evaluated based on available information and experience. Because of the use of estimates inherent in the financial reporting process, actual results could differ from those estimates. We believe the following are areas where the degree of judgment and complexity in determining amounts recorded in our consolidated financial statements make the accounting policies critical.

Goodwill

During the third quarters of 2008, 2007 and 2006, we completed our annual impairment assessment as required by SFAS 142 Goodwill and Other Intangible Assets. No impairment losses were required. We perform our annual impairment assessment as of July 1 and would reassess if circumstances indicated a potential impairment between our annual assessment dates. We assess the fair value of our business units with goodwill using a market multiple approach. No events occurred in the last half of 2008 that indicated that these assets should be retested for impairment.

Stock Options

For all options granted after January 1, 2002, we have been expensing the cost associated with employees as well as non-employee directors. We value stock options issued based upon the Black-Scholes option-pricing model and recognize this value as an expense over the periods in which the options vest. Implementation of the Black-Scholes option-pricing model requires us to make certain assumptions, including expected volatility, risk-free interest rate, expected dividend yield and expected life of the options. We utilized assumptions that we believed to be most appropriate at the time of the valuation. Had we used different assumptions in the pricing model the expense recognized for stock options may have been different than the expense recognized in our financial statements. As of December 31, 2006, all outstanding options were vested and all related compensation had been expensed.

Restricted Stock

We have granted restricted stock to employees, non-employee directors and a non-employee consultant. We calculate compensation cost for restricted stock grants by using the fair market value of its common stock at the date of grant, the number of shares issued and an estimate of shares that will not vest due to forfeitures. This compensation cost is amortized on a straight-line basis over the applicable vesting period. The estimate of shares that will not vest due to forfeitures is based on our historical forfeiture rate and our expectation of potential forfeitures, which is dependent upon our judgment. If actual experience differs significantly from these estimates, stock based compensation expense and our results of operations could be materially affected. If forfeitures of restricted stock do not occur or are significantly less than our estimation, we would record as much as \$364,000 of compensation cost in addition to what we currently expect to expense over the next 3.2 years.

Accounting for Income Taxes

Our provision for income taxes reflects the statutory tax obligations of the jurisdictions in which we operate. Significant judgment and complex calculations are used in determining our tax liability and in evaluating our tax positions. We adjust our income tax provision in the period in which we determine that actual outcomes will likely be different from our estimates. Changes in tax laws may result in a change to our tax position and effective tax rate. We classify any interest or penalties related to income taxes as a component of income tax expense.

Deferred income taxes reflect the expected future tax consequences of temporary differences between the financial statement and tax bases of our assets and liabilities as measured at enacted income tax rates. Our deferred taxes relate principally to stock-based compensation expense, which is deductible for tax purposes at the time restricted stock vests and stock options are exercised.

Table of Contents

Index to Financial Statements

Significant Accounting Policies

Our significant accounting policies are summarized below.

Revenue Recognition

Investment advisory and trust fees are recognized in the period the services are provided. These fees are determined in accordance with contracts between our subsidiaries and their clients and are generally based on a percentage of assets under management. Performance-based fees may pay us an additional fee if we outperform a specified index over a specific period of time. We record revenue for performance-based fees at the end of the measurement period when the fees have been fully earned.

Accounting for Investments

We have designated our investments, other than money market holdings, as trading securities, which are recorded at market value with the related unrealized gains and losses reflected in Other revenues in the consolidated statements of income. Our trading securities, primarily U.S. Government and Government agency obligations as well as mutual fund and common trust fund shares, are valued based upon quoted market prices and, with respect to funds, the net asset value of the shares held as reported by the fund. We have generally designated our investments in money market accounts as available for sale. The market values of our money market holdings generally do not fluctuate. Dividends and interest on all of our investments are accrued as earned.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

We invest our corporate capital in various financial instruments such as United States treasury bills, equity mutual funds and United States government agency obligations, which entail certain inherent market risks. We do not currently participate in any hedging activities, nor do we currently utilize any derivative financial instruments. The following information describes the key aspects of certain financial instruments that have market risks.

Interest Rates and Securities Markets

Our cash equivalents and other investment instruments are exposed to financial market risk due to fluctuations in interest rates, which may affect our interest income. These instruments are not entered into for trading purposes. We do not expect our interest income to be significantly affected by a sudden change in market interest rates.

The value of our assets under management is affected by changes in interest rates and fluctuations in securities markets. Since we derive a substantial portion of our revenues from investment advisory and trust fees based on the value of assets under management, our revenues may be adversely affected by changing interest rates or a decline in the prices of securities generally.

Item 8. Financial Statements and Supplementary Data.

The independent registered public accounting firm's reports and financial statements listed in the accompanying index are included in Item 15 of this Report. See Index to Financial Statements on page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. An evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this annual report. Based on this evaluation, our management, including our Chief Executive Officer and our Chief Financial Officer, concluded that, as of December 31, 2008, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Please refer to Westwood Holdings Group, Inc.'s Management Assessment of Internal Control over Financial Reporting on page F-4 of this Report.

Our independent registered public accounting firm has issued an audit report on the effectiveness of our internal control over financial reporting. This report can be found on page F-3.

For the quarter ended December 31, 2008, there were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
