LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Basis of Presentation

LyondellBasell Industries N.V., together with its consolidated subsidiaries (collectively LyondellBasell N.V.), is a worldwide manufacturer of chemicals and polymers, a refiner of crude oil, a significant producer of gasoline blending components and a developer and licensor of technologies for production of polymers and other chemicals. When we use the terms Company, we, us, our or similar words, unless the conte otherwise requires, we are referring to LyondellBasell N.V.

The accompanying consolidated financial statements are unaudited and have been prepared from the books and records of LyondellBasell N.V. in accordance with the instructions to Form 10-Q and Rule 10-1 of Regulation S-X for interim financial information. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States (U.S. GAAP) for complete financial statements. In our opinion, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results for the entire year. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the LyondellBasell Industries N.V. Annual Report on Form 10-K for the year ended December 31, 2012.

2. Accounting and Reporting Changes Recently Adopted Guidance

Disclosures about Offsetting Assets and Liabilities In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*. This ASU requires entities to provide disclosures to reconcile differences in the offsetting requirements under U.S. GAAP and IFRS. The new disclosure requirements mandate that entities disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position, as well as instruments similar to a master netting arrangement. In addition, the standard requires disclosure of collateral received and posted in connection with master netting agreements or similar arrangements. In January 2013, the FASB issued ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, which clarifies the scope of the offsetting disclosures required by ASU 2011-11, which was effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. Retrospective presentation for all comparative periods presented is required. The adoption of this amendment did not materially impact the presentation of our consolidated financial statements.

Comprehensive Income In February 2013, the FASB issued ASU 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*, which requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. In addition, an entity is required to present, either in the financial statements or in the accompanying footnotes, amounts reclassified out of AOCI by the respective line items of net income. For public entities, this ASU was effective for reporting periods beginning after December 15, 2012. See Note 15 for the disclosures required by this ASU.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. Discontinued Operations

The amounts included in Income (loss) from discontinued operations of the Berre refinery are summarized as follows:

	Three Months En March 31,			
Millions of dollars	2	013		2012
Sales and other operating revenues	\$	5	\$	145
Income (loss) from discontinued operations before income taxes	\$	(6)	\$	6
Provision for income taxes				1
Income (loss) from discontinued operations, net of tax	\$	(6)	\$	5

Income (loss) from discontinued operations for the three months ended March 31, 2012 includes a \$42 million benefit related to the liquidation of LIFO-valued inventory.

The following table summarizes the assets and liabilities of the Berre refinery that are included in the Consolidated Balance Sheets. These amounts were derived from historical financial information and adjusted to exclude intercompany receivables and payables between the Berre refinery and other subsidiaries of the Company.

Millions of dollars		March 31, 2013		,		,		mber 31, 2012
Current assets related to discontinued operations:								
Accounts receivable trade, net	\$	6	\$	16				
Inventories		27		34				
Prepaid expenses and other current assets		5						
Total current assets related to discontinued operations	\$	38	\$	50				
Current liabilities related to discontinued operations: Accounts payable trade Accrued liabilities	\$	12 13	\$	19 21				
Total current liabilities related to discontinued operations	\$	25	\$	40				
Long-term liabilities related to discontinued operations: Other liabilities	\$	44	\$	48				
Total long-term liabilities related to discontinued operations	\$	44	\$	48				

Future cash inflows will arise from the liquidation of on-hand raw materials, intermediate and refined product inventories.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Future cash outflows will occur for activities associated with exit or disposal activities and for payments made to severed employees. Exit and disposal related costs are expected to be incurred over the next two years. Payments to the affected employees are expected to be substantially complete by 2019.

The following table summarizes the changes in the accrual for the social plan for employees affected by the closure of the Berre refinery.

		Three Months March 31			
Millions of dollars	2013		2012		
Balance - January 1	\$ 59	\$	130		
Accretion expense	2				
Cash payments	(10)				
Effect of exchange rate changes	(2)		1		
Balance - March 31	\$ 49	\$	131		

4. Accounts Receivable

Our allowance for doubtful accounts receivable, which is reflected in the Consolidated Balance Sheets as a reduction of accounts receivable, totaled \$34 million and \$29 million at March 31, 2013 and December 31, 2012, respectively.

5. Inventories

Inventories consisted of the following components:

Millions of dollars	Ν	March 31, 2013	De	cember 31, 2012
Finished goods	\$	3,242	\$	3,194
Work-in-process		272		266

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. Debt

Long-term loans, notes and other long-term debt to unrelated parties consisted of the following:

Millions of dollars	March 31, 2013	December 31, 2012
Senior Notes due 2019, \$2,000 million, 5.0%	2,000	2,000
Senior Notes due 2021, \$1,000 million, 6.0%	1,000	1,000
Senior Notes due 2024, \$1,000 million, 5.75%	1,000	1,000
Guaranteed Notes due 2027, \$300 million, 8.1%	300	300
Other	8	5
Total	4,308	4,305
Less current maturities	(1)	(1)
Long-term debt	\$ 4,307	\$ 4,304

Short-term loans, notes, and other short-term debt to unrelated parties consisted of the following:

Millions of dollars	March 31, 2013		mber 31, 2012
\$2,000 million Senior Revolving Credit Facility	\$ 	\$	
\$1,000 million U.S. Receivables Securitization Facility			
450 million European Receivables Securitization Facility			
Financial payables to equity investees	9		9
Precious metal financings	106		74
Other			12
Total short-term debt	\$ 115	\$	95

Amortization of debt issuance costs in each of the three month periods ended March 31, 2013 and 2012 resulted in amortization expense of \$6 million, which is included in interest expense in the Consolidated Statements of Income.

U.S. Receivables Securitization Facility Our U.S. accounts receivable securitization facility provides for up to \$1,000 million of liquidity through the sale or contribution of trade receivables by certain of our U.S. subsidiaries to a wholly-owned, bankruptcy-remote subsidiary on an ongoing basis and without recourse. The bankruptcy-remote subsidiary may, at its option and subject to a borrowing base of eligible receivables, sell undivided interests in the pool of trade receivables to financial institutions participating in the facility. We retain responsibility for servicing the receivables. In the event of a liquidation, the bankruptcy-remote subsidiary s assets will be used to satisfy the claims of its creditors prior to any assets or value in the bankruptcy-remote subsidiary becoming available to us. The facility also provides for the issuance of letters of credit up to \$200 million. At March 31, 2013, availability under this facility was \$1,000 million. There were no borrowings or letters of credit outstanding under the facility.

At March 31, 2013 and 2012, our weighted average interest rates on outstanding short-term debt were 0.1% and 2.9%, respectively.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. Financial Instruments

Cash Concentration Our cash equivalents are placed in high-quality commercial paper, money market funds and time deposits with major international banks and financial institutions.

Market Risks We are exposed to market risks, such as changes in commodity pricing, currency exchange rates and interest rates. To manage the volatility related to these exposures, we selectively enter into derivative transactions pursuant to our risk management policies. Since the duration of our derivative contracts are typically short, we have chosen not to elect hedge accounting, and therefore, changes in the fair value of these instruments are recorded in earnings.

Commodity Prices We are exposed to commodity price volatility related to anticipated purchases of natural gas, crude oil and other raw materials and sales of our products. We selectively use over-the counter commodity swaps, options and exchange traded futures contracts with various terms to manage the volatility related to these risks. Such contracts are generally limited to durations of one year or less.

Foreign Currency Rates We have significant operations in numerous countries. The functional currencies of our consolidated subsidiaries through which we operate are primarily the U.S. dollar and the Euro. We enter into transactions denominated in currencies other than our designated functional currencies. As a result, we are exposed to foreign currency risk on receivables and payables. We maintain risk management control policies intended to monitor foreign currency risk attributable to both the outstanding foreign currency balances and future commitments. These control policies involve the centralization of foreign currency exposure management, the offsetting of exposures and the estimating of expected impacts of changes in foreign currency rates on our earnings. We enter into foreign currency forward contracts to reduce the effects of our net currency exchange exposures. At March 31, 2013, foreign currency forward contracts in the notional amount of \$1,215 million, maturing in April 2013 through June 2013, were outstanding.

Foreign Currency Gain (Loss) Other income (expense), net, in the Consolidated Statements of Income reflected gains of \$4 million and \$2 million for the three months ended March 31, 2013 and 2012, respectively, related to changes in currency exchange rates.

Warrants We had warrants outstanding to purchase 13,156 ordinary shares as of March 31, 2013 and 20,580 ordinary shares as of December 31, 2012 at an exercise price of \$13.06 per share. The fair values of the warrants were determined to be \$1 million at March 31, 2013 and at December 31, 2012.

LYONDELLBASELL INDUSTRIES N.V.

	\$9	\$	7	\$	2	\$	

There were no derivative financial instruments measured on a recurring basis using Level 3 inputs during the three months ended March 31, 2013 and the year ended December 31, 2012.

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2013 and the year ended December 31, 2012.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table presents the carrying value and estimated fair value of our non-derivative financial instruments as of March 31, 2013 and December 31, 2012. Short-term and long-term debt are recorded at amortized cost in the Consolidated Balance Sheets. The carrying and fair values of short-term and long-term debt exclude capital leases.

	March 31, 2013							
	Carrying	Fair						
Millions of dollars	Value	Value	Level	1	Level 2	Level 3		
Short-term debt	\$ 115	\$ 108	\$	-	\$ 99	\$9		
Long-term debt	4,303	5,032		-	5,029	3		
Short-term and long-term debt, including current maturities	\$ 4,418	\$ 5,140	\$	-	\$ 5,128	\$ 12		

		December 31, 2012							
	Carrying	Fair		Level					
Millions of dollars	Value	Value	Level 1	2	Level 3				
Short-term debt	\$ 95	\$ 95	\$	\$ 74	\$ 21				
Long-term debt	4,300	4,935		4,935					
Short-term and long-term debt, including current maturities	\$ 4,395	\$ 5,030	\$	\$ 5,009	\$ 21				

The fair value of all non-derivative financial instruments included in current assets, including cash and cash equivalents, restricted cash and accounts receivable, and current liabilities, including short-term debt and accounts payable, approximates the applicable carrying value due to the short maturity of those instruments.

We use the following inputs and valuation techniques to estimate the fair value of our financial instruments:

Derivatives The fair value of our commodity derivatives is measured using the closing market price at the end of the reporting period obtained from the New York Mercantile Exchange and from third-party broker quotes and pricing providers. Warrants are valued using the weighted average price of our stock for the last 20 trading days less the warrant exercise price. The fair value of our foreign currency derivatives is based on forward market rates.

Long-Term Debt Fair value is calculated based on non-binding broker quotes obtained from well-established and recognized vendors of market data for debt valuations.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. Pension and Other Post-retirement Benefits

Net periodic pension benefits included the following cost components for the three months ended March 31:

	2013			2012			
Millions of dollars	U.S. Non-U.S.		U.S.		No	n-U.S.	
Service cost	\$ 12	\$	18	\$	12	\$	11
Interest cost	20		10		20		12
Expected return on plan assets	(34)		(5)		(30)		(6)
Curtailments and settlements loss			2				
Prior service cost amortization			1				
Actuarial and investment loss amortization	6				5		1
Net periodic pension benefit costs	\$ 4	\$	26	\$	7	\$	18

Net periodic other post-retirement benefits included the following cost components for the three months ended March 31:

	2013			2012				
Millions of dollars	U.	S.	Non	U.S.	ι	U .S.	Nor	n-U.S.
Service cost	\$	1	\$		\$	1	\$	1
Interest cost		3		1		3		
Actuarial loss amortization		1				1		
Net periodic benefit costs	\$	5	\$	1	\$	5	\$	1

13. Income Taxes

Our effective income tax rate for the first quarter of 2013 was 28.3% compared with 33.6% for the first quarter of 2012. Our effective tax rate fluctuates based on, among other factors, pretax income in countries with varying statutory tax rates, the U.S. domestic production activity deduction, change in valuation allowance and changes in unrecognized tax benefits. Compared with the first quarter of 2012, the effective tax rate for the first quarter of 2013 was lower primarily due to favorable permanent adjustments related to the U.S. domestic production activity deduction and foreign exchange gains and losses, which were partially offset by an increase in earnings in jurisdictions with higher statutory tax rates.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Commitments and Contingencies

Financial Assurance Instruments We have obtained letters of credit, performance and surety bonds and have issued financial and performance guarantees to support trade payables, potential liabilities and other obligations. Considering the frequency of claims made against the financial instruments we use to support our obligations, and the magnitude of those financial instruments in light of our current financial position, management does not expect that any claims against or draws on these instruments would have a material adverse effect on our consolidated financial statements. We have not experienced any unmanageable difficulty in obtaining the required financial assurance instruments for our current operations.

Environmental Remediation Our accrued liability for future environmental remediation costs at current and former plant sites and other remediation sites totaled \$123 million and \$126 million as of March 31, 2013 and December 31, 2012, respectively. At March 31, 2013, the accrued liabilities for individual sites range from less than \$1 million to \$22 million. The remediation expenditures are expected to occur over a number of years, and not to be concentrated in any single year. In our opinion, it is reasonably possible that losses in excess of the liabilities recorded may have been incurred. However, we cannot estimate any amount or range of such possible additional losses. New information about sites, new technology or future developments such as involvement in investigations by regulatory agencies, could require us to reassess our potential exposure related to environmental matters.

The following table summarizes the activity in our accrued environmental liability included in Accrued liabilities and Other liabilities :

	Т	Three Months Ended March 31,							
Millions of dollars	201	3	2012						
Balance at beginning of period	\$	126 \$	120						
Additional provisions			12						
Amounts paid		(1)	(3)						
Foreign exchange effects		(2)	3						
Balance at end of period	\$	123 \$	132						

Access Indemnity Demand In December 2010, one of our subsidiaries received demand letters from affiliates of Access Industries (collectively, Access), a more than five percent shareholder of the Company, demanding indemnity for losses, including attorney s fees and expenses, arising out of a pending lawsuit styled Edward S. Weisfelner, as Litigation Trustee of the LB Litigation Trust v. Leonard Blavatnik, et al., Adversary Proceeding No. 09-1375 (REG), in the United States Bankruptcy Court, Southern District of New York. In the Weisfelner lawsuit, the plaintiffs seek to recover from Access, the return of all amounts earned by them related to their purchase of shares of Lyondell Chemical prior to its acquisition by Basell AF S.C.A.; distributions by Basell AF S.C.A. to its shareholders before it acquired Lyondell Chemical, and management and transaction fees and expenses. The trial that was scheduled for October 2011 has been postponed.

The Access affiliates have also demanded \$100 million in management fees under a 2007 management agreement between an Access affiliate and the predecessor of LyondellBasell AF, as well as other unspecified amounts relating to advice purportedly given in connection with financing and other strategic transactions. In June 2009, an Access affiliate filed a proof of claim in Bankruptcy Court against LyondellBasell AF seeking no less than \$723,000 for amounts allegedly owed under the 2007 management agreement. In April 2011, Lyondell Chemical filed an objection to the claim and brought a declaratory judgment action for a determination that the demands are not valid. The declaratory judgment action is stayed pending the outcome of the *Weisfelner* lawsuit.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We do not believe that the 2007 management agreement is in effect or that the Company or any Company-affiliated entity owes any obligations under the management agreement, including for management fees or for indemnification. We intend to vigorously defend our position in any proceedings and against any claims or demands that may be asserted.

We cannot at this time estimate the reasonably possible loss or range of loss that may be incurred in the *Weisfelner* lawsuit; therefore, we cannot estimate the loss that may be sought by way of indemnity.

Indemnification We are parties to various indemnification arrangements, including arrangements entered into in connection with acquisitions, divestitures and the formation of joint ventures. Pursuant to these arrangements, we provide indemnification to and/or receive indemnification from other parties in connection with liabilities that may arise in connection with the transactions and in connection with activities prior to completion of the transactions. These indemnification arrangements typically include provisions pertaining to third party claims relating to environmental and tax matters and various types of litigation. As of March 31, 2013, we had not accrued any significant amounts for our indemnification obligations, and we are not aware of other circumstances that would likely lead to significant future indemnification obligations. We cannot determine with certainty the potential amount of future payments under the indemnification arrangements until events arise that would trigger a liability under the arrangements.

In addition, at the time of Basell s formation in 2005, Basell entered into agreements with Shell and BASF whereby they agreed to indemnify Basell and its successors (including the Company) for a significant portion of the potential obligations that could arise with respect to costs relating to contamination at various sites. These indemnity obligations are currently in dispute. Also, the agreements involving the purchase of the Berre cracker and Berre refinery include similar indemnities from Shell to Basell and its successors. These indemnity obligations are also currently in dispute.

As part of our technology licensing contracts, we give indemnifications to our licensees for liabilities arising from possible patent infringement claims with respect to certain proprietary licensed technologies. Such indemnifications have a stated maximum amount and generally cover a period of five to ten years.

Other We have identified an agreement related to a former project in Kazakhstan under which a payment was made that raises compliance concerns under the U.S. Foreign Corrupt Practices Act (the FCPA). We have engaged outside counsel to investigate these activities, under the oversight of the Audit Committee of the Supervisory Board, and to evaluate internal controls and compliance policies and procedures. In this respect, we may not have conducted business in compliance with the FCPA and may not have had policies and procedures in place adequate to ensure compliance. We made a voluntary disclosure of these matters to the U.S. Department of Justice and are cooperating fully with that agency. We cannot predict the ultimate outcome of these matters at this time since our investigations are ongoing. Therefore, we cannot reasonably estimate a range of liability for any potential penalty resulting from these matters. Violations of these laws could result in criminal and civil liabilities and other forms of relief that could be material to us.

LYONDELLBASELL INDUSTRIES N.V.

17. Segment and Related Information

We operate in five business segments.

Olefins and Polyolefins Americas (O&P Americas). Our O&P Americas segment produces and markets olefins, including ethylene and ethylene co-products, and polyolefins.

Olefins and Polyolefins Europe, Asia and International (O&P EAI). Our O&P EAI segment produces and markets olefins, including ethylene and ethylene co-products, polyolefins, and polypropylene compounds.

Intermediates and Derivatives (I&D). Our I&D segment produces and markets propylene oxide (PO) and its co-products and derivatives, acetyls, ethanol, ethylene oxide (EO) and its derivatives, and oxygenated fuels, or oxyfuels.

Refining. Our Refining segment refines heavy, high-sulfur crude oil on the U.S. Gulf Coast.

Technology. Our Technology segment develops and licenses chemical and polyolefin process technologies and manufactures and sells polyolefin catalysts.

Summarized financial information concerning reportable segments is shown in the following table for the periods presented:

	Three Months Ended March 31, 2013

Sales and other operating revenues and operating income in the Other column above include elimination of intersegment transactions.

In the first quarter of 2012, operating results for our O&P Americas segment included a \$41 million charge related to the interim liquidation of LIFO inventory. Inventory levels, which were increased in the fourth quarter 2011 in preparation for a turnaround at our Channelview, Texas facility, decreased during the first quarter 2012 following the commencement of the turnaround. In addition, first quarter 2012 operating results for our O&P EAI segment included a \$22 million impairment charge related to damage sustained at our LDPE plant in Wesseling, Germany resulting from an explosion in a reactor bay.

Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

This discussion and analysis should be read in conjunction with the information contained in our Consolidated Financial Statements and the accompanying notes elsewhere in this report. When we use the terms we, us, our or similar words in this discussion, unless the context otherwise requires, we are referring to LyondellBasell Industries N.V. and its consolidated subsidiaries.

References to industry benchmark prices or costs, including the weighted average cost of ethylene production, are generally to industry prices and costs from third party consulting data. References to industry benchmarks for refining and oxyfuels market margins are to industry prices reported by Platts, a reporting service of The McGraw-Hill Companies. References to industry benchmark prices for crude oil and natural gas are to Bloomberg.

OVERVIEW

Our performance is driven by, among other things, global economic conditions generally and their impact on demand for our products, raw material and energy prices, as well as industry-specific issues, such as production capacity. Our businesses are generally subject to the cyclicality and volatility seen in the chemicals and refining industries.

Our first quarter 2013 results demonstrate our focus on continuous strong financial and operational performance despite challenging economic conditions outside of the United States. Our focus on safe, reliable operations, cost reductions and disciplined growth remains steadfast as we commence several growth projects. We believe this strategy allows us to generate solid results even while facing challenges due to external factors. Significant items that affected our results during the first quarter 2013 include:

Strong U.S. ethylene margins, which benefited from the continued abundance of low cost, natural gas liquids (NGLs) supply;

Lower average cost of raw materials in Europe relative to the first quarter 2012, which led to improved olefins margins, despite continued weak economic conditions in the region; and

Lower crude processing rates at our Houston refinery due to planned and unplanned maintenance. Other noteworthy items since the beginning of the year include the following:

Our credit rating was raised to investment grade by Standard & Poors;

We commenced construction of an ethylene expansion of our La Porte, Texas facility and the restart of a methanol plant in Channelview, Texas;

We paid an interim dividend of \$0.40 per share on March 18, 2013 to shareholders of record on February 25, 2013; and

In April 2013, we amended and restated our 450 million European Accounts Receivable Securitization facility to obtain more favorable terms and conditions and to extend the date of maturity.

Results of operations for the periods discussed are presented in the table below.

	Three Months Ended March 31,		
Millions of dollars	2013		2012
Sales and other operating revenues	\$ 10,669	\$	11,734
Cost of sales	9,153		10,532
Selling, general and administrative expenses	213		223
Research and development expenses	36		39
Operating income	1,267		940
Interest expense	(71)		(99)
Interest income	2		4
Other income (expense), net	6		(1)
Income from equity investments	59		46
Reorganization items			5
Provision for income taxes	357		301
Income from continuing operations	906		594
Income (loss) from discontinued operations, net of tax	(6)		5
Net income	\$ 900	\$	599

RESULTS OF OPERATIONS

Revenues Revenues decreased by \$1,065 million, or 9%, in the first quarter of 2013 compared to the first quarter of 2012. Lower sales volumes were responsible for substantially all of the decrease in revenues in the first quarter of 2013. With the exception of North American olefins, sales volumes in the first quarter of 2013 were lower than the levels seen in the first quarter 2012. Weak economic conditions in Europe, turnaround activities at our Houston refinery and Bayport, Texas EO/EG facility, and a scheduled outage by a third party provider of certain feedstock for acetyls contributed to the reduced level of sales volumes in the first quarter of 2013.

Cost of Sales Cost of sales in the first quarter 2013 decreased by \$1,379 million compared to the same period in 2012. The lower prices of crude oil, NGL-based raw materials, particularly ethane and propane, and other raw materials in the first quarter of 2013 contributed to decreases in cost of sales across all segments, except Technology.

Operating Income The increase in operating income in the first quarter of 2013 primarily reflects strong olefins margins in our O&P Americas segment and improved olefins margins in our O&P EAI segment. These increases were offset in part by lower Refining results and lower I&D segment results for oxyfuels, PO and derivatives and EO and derivatives. Results for our Technology segment benefited from higher licensing revenues in the first quarter 2013 compared to the same period in 2012. Results for each of our business segments are reviewed further in the Segment Analysis section below.

Interest Expense Interest expense decreased \$28 million in the first quarter of 2013 compared to the first quarter of 2012. This is due to the refinancing of most of our long-term debt to lower coupon notes which occurred in the second quarter of 2012.

Income from Equity Investments Income from equity investments increased \$13 million in the first quarter of 2013, compared to the first quarter of 2012. These increases were mainly due to the higher operating results of our joint ventures in the Middle East and Asia in the first quarter of 2013 compared to 2012, which were driven by higher sales volumes and higher margins. Turnaround activities at our Al Waha joint venture that led to an increase in operating rates and enhanced reliability during 2012 also contributed to the improved operating results in the first quarter of 2013. First quarter 2012 results were negatively affected by planned maintenance activities at our HMC joint venture and unplanned outages at our Al Waha joint venture.

Income Tax Our effective income tax rate for the first quarter of 2013 was 28.3% compared with 33.6% for the first quarter of 2012. Our effective tax rate fluctuates based on, among other factors, pretax income in countries with varying statutory tax rates, the U.S. domestic production activity deduction, change in valuation allowance and changes in unrecognized tax benefits. Compared with the first quarter of 2012, the effective tax rate for the first quarter of 2013 was lower primarily due to favorable permanent adjustments related to the U.S. domestic production activity deduction and foreign exchange gains and losses, which were partially offset by an increase in earnings in jurisdictions with higher statutory tax rates.

Comprehensive Income Comprehensive income decreased by \$96 million in the first quarter of 2013 compared to the first quarter of 2012. The decrease mainly reflected foreign currency translation adjustments, partially offset by an increase in net income. The predominant local currency of our operations outside of the United States is the Euro, which has decreased relative to the value of the U.S. dollar.

Segment Analysis

Our continuing operations are divided into five reportable segments: O&P Americas; O&P EAI; I&D; Refining; and Technology.

Millions of dollars		Three Months Ended March 31, 2013 2012	
Sales and other operating revenues:			
O&P Americas segment	\$ 3,244 \$	3,349	
O&P EAI segment	3,800	3,898	
I&D segment	2,282	2,485	
Refining segment	2,468	3,203	
Technology segment	134	119

O&P EAI segment	54	40	
I&D segment	1		
Total	\$ 59 \$	46	

Olefins and Polyolefins Americas Segment

Overview The U.S. ethylene industry continues to benefit from processing NGLs. Ethylene produced from NGLs in North America is currently much lower in cost than that produced from crude oil-based liquids, which is the predominant feedstock used in the rest of the world.

Olefins results improved significantly in the first quarter of 2013 compared to the first quarter of 2012. The benefit of lower NGL-based raw material prices was slightly offset by lower average sales prices for ethylene. Higher sales volumes reflect increased ethylene production compared to the first quarter of 2012, which was impacted by turnaround activity at our Channelview, Texas site. Polyethylene results were relatively unchanged in the first quarter of 2013 compared to the first quarter of 2012, while lower polypropylene results reflect lower sales volumes in the first quarter of 2013.

Ethylene Raw Materials Benchmark crude oil and natural gas prices generally have been indicators of the level and direction of the movement of raw material and energy costs for ethylene and its co-products in the O&P Americas segment. Ethylene and its co-products are produced from two major raw material groups:

crude oil-based liquids (liquids or heavy liquids), including naphtha, condensates and gas oils, the prices which are generally related to crude oil prices; and

NGLs, principally ethane and propane, the prices of which are generally related to natural gas prices.

Although the prices of these raw materials are generally related to crude oil and natural gas prices, during specific periods, the relationships among these materials and to benchmarks may vary significantly. In the U.S., we have significant capability to change the mix of raw materials used in the production of ethylene and its co-products to take advantage of the relative costs of heavy liquids and NGLs.

Production economics for the industry have continued to favor NGLs throughout 2012 and into 2013. As a result, we further increased our use of NGLs and reduced liquids consumption at our U.S. plants. Approximately 87% of our U.S. ethylene production was produced from NGLs during the first quarter of 2013, compared to 82% during the first quarter of 2012. Based on current trends and assuming the price of crude oil remains at a high level relative to natural gas, we would expect production economics in the U.S. to continue to favor NGLs for the near and mid-term.

The following table shows the average U.S. benchmark prices for crude oil and natural gas for the applicable periods, as well as the U.S. benchmark sales prices for ethylene and propylene, which we produce and sell or consume internally. The table also shows the discounted U.S. benchmark sales prices for certain polyethylene and polypropylene products. The benchmark weighted average cost of ethylene production, which reflects credits for co-product sales, is based on a third party consultant s estimated ratio of heavy liquid raw materials and NGLs used in U.S. ethylene production.

	Average Benchmark Price and Percent Change Versus Prior Year Period Average Three Months Ended March 31,		
	2013	2012	Change
Crude oil, dollars per barrel:			
WTI	94.4	103.0	(8)%
LLS	113.9	119.9	(5)%
Natural gas (Henry Hub), dollars per million BTUs	3.5	2.7	33%
United States, cents per pound:			
Weighted average cost of ethylene production	13.8	28.5	(52)%
Ethylene	48.0	54.9	(13)%
Polyethylene (high density)	66.7	67.0	%
Propylene - polymer grade	73.5	67.2	9%
Polypropylene	88.0	81.2	8%

The following table sets forth the O&P Americas segment s sales and other operating revenues, operating income, income from equity investments and selected product sales volumes.

	Three Mon	Three Months Ended	
	Marc	h 31,	
Millions of dollars	2013	2012	
Sales and other operating revenues	\$ 3,244	\$ 3,349	
Operating income	821	519	
Income from equity investments	4	6	

<u>Production volumes, in millions of pounds</u>		
Ethylene	2,337	1,988
Propylene	624	533
Sales volumes, in millions of pounds		
Polyethylene	1,398	1,448
Polypropylene	648	735

Revenues Revenues for our O&P Americas segment decreased by \$105 million, or 3%, in the first quarter of 2013 compared to first quarter of 2012. Lower average sales prices resulted in a 2% revenue decline in the first quarter of 2013 compared to the first quarter of 2012. Average sales prices for ethylene and polyethylene were lower in the first quarter of 2013 largely as a result of the lower costs of NGL feedstocks. Lower olefins and polyethylene prices more than offset higher average sales prices for polypropylene in the first quarter of 2013, which were due to the higher cost of the feedstock propylene. The remaining 1% decrease in revenues reflected higher olefins sales volumes, which were more than offset by lower polypropylene and polyethylene volumes. Increased production volumes and opportunistic spot sales as a result of competitor outages were largely responsible for the increase in olefins sales volumes over the first quarter 2012, which was impacted by a turnaround at our Channelview facility. The polypropylene volume decrease was largely due to operating issues at one of our plants and delays in customer purchases in response to the increasing cost of propylene.

Operating Income Operating income for the O&P Americas segment in the first quarter of 2013 increased by \$302 million, compared to the first quarter of 2012, mainly due to higher olefins sales volumes and margins. The benefit to olefins margins from the lower costs of NGLs, ethane and propane, was offset in part by lower average sales prices. First quarter 2013 polyethylene results were relatively unchanged compared to the first quarter of 2012. Polypropylene results were lower largely due to the 12% decrease in volumes as compared to the first quarter of 2012.

Olefins and Polyolefins Europe, Asia and International Segment

Overview Weak market conditions in Europe, which were present throughout 2012 and the first quarter of 2013, are expected to continue. These market conditions, including a slowdown in the automotive industry in Europe, continue to negatively impact European demand for ethylene and polyolefins.

Higher first quarter 2013 operating results primarily reflected higher olefins margins, and to a lesser extent, higher polypropylene margins, compared to the first quarter of 2012. Lower average naphtha feedstock prices benefited olefins margins, while first quarter 2012 margins were compressed by steadily increasing naphtha prices. Polypropylene margins were higher in the first quarter of 2013 as higher average sales prices outpaced the increase in the cost of feedstock, propylene. Polypropylene (PP) compounding and polybutene-1 results were relatively unchanged in the first quarter of 2013 compared to the first quarter of 2012. First quarter 2012 operating results also included a charge for the impairment of a polyethylene plant after an explosion disabled the plant in January 2012.

Ethylene Raw Materials In Europe, heavy liquids are the primary raw materials for our ethylene production.

The following table shows the average Western Europe benchmark prices for Brent crude oil for the applicable periods, as well as benchmark Western Europe prices for ethylene and propylene, which we produce and consume internally or purchase from unrelated suppliers, and discounted prices for certain polyethylene and polypropylene products.

	Average Benchmark Price and Percent Change Versus Prior Year Period Average Three Months Ended March 31,		
	2013	2012	Change
Brent crude oil, dollars per barrel	112.6	118.3	(5)%
Western Europe benchmark prices, 0.01 per pound:			
Weighted average cost of ethylene production	36.2	45.4	(20)%
Ethylene	58.6	55.1	6%
Polyethylene (high density)	61.2	58.6	4%
Propylene	50.6	50.1	1%
Polypropylene (homopolymer)	59.1	57.9	2%
Average exchange rate, \$US per	1.32	1.31	1%

The following table sets forth the O&P EAI segment s ales and other operating revenues, operating income, income from equity investments and selected product production and sales volumes. Production volumes are based on the actual production in the time period.

		Three Months Ended March 31,	
	2013	2012	
Millions of dollars			
Sales and other operating revenues	\$ 3,800	\$ 3,898	
Operating income	93	3	
Income from equity investments	54	40	
Production volumes, in millions of pounds			
Ethylene	912	947	
Propylene	577	577	
Sales volumes, in millions of pounds			
Polyethylene	1,216	1,316	
Polypropylene	1,584	1,541	

Revenues Revenues in the first quarter of 2013 decreased by \$98 million, or 3%, compared to revenues in the first quarter of 2012. Lower sales volumes, which were responsible for a 4% decrease in revenues, reflect economic conditions in Europe that continue to be weak. The decrease was partially offset by higher average sales prices in the first quarter of 2013 due to favorable foreign exchange effects, which contributed a 1% increase in revenue.

Operating Income Operating results for the O&P EAI segment increased by \$90 million in the first quarter of 2013 compared to the same period in 2012. Operating results for the first quarter of 2012 included a \$22 million charge for impairment of assets related to damage of our LDPE plant in Wesseling, Germany that resulted from an explosion in a reactor bay and other costs associated with that event.

First quarter 2013 operating results benefited primarily from an improvement in olefins margins over those seen in the first quarter of 2012. Decreases in the naphtha feedstock price in the early part of the first quarter 2013 and again in the latter part of the quarter contributed to the improved margins compared to the first quarter of 2012, when naphtha prices steadily increased. This benefit was partially offset by lower butadiene margins. Weak demand for butadiene, largely stemming from the slowdown of the automotive industry in Europe, resulted in lower average sales prices in the first quarter of 2013 compared to the very strong first quarter of 2012. Higher polypropylene margins reflected higher average sales prices that outpaced the increase in the cost of feedstock, propylene. Excluding the impact of the impairment discussed above, first quarter 2013 results for the polyethylene business were relatively unchanged from those seen in the same 2012 period.

Intermediates and Derivatives Segment

Overview Operating results for the first quarter of 2013 reflected lower earnings for oxyfuels, PO and derivatives and EO and derivatives compared to the same period in 2012, offset in part by higher styrene results. Oxyfuels results in the first quarter of 2013 reflect lower sales volumes, compared to the same period in 2012, due to fewer competitor outages and a lower gasoline to methyl tertiary butyl ether (MTBE) spread that was still strong compared to historical first quarter levels. The lower PO and derivative earnings were mainly in the butanediol (BDO) and solvents businesses. Weak economic conditions in Europe coupled with capacity additions in Asia negatively affected the first quarter 2013 results for BDO. Sales volumes, which were lower in the first quarter of 2013 than the strong levels seen in first quarter of 2012, contributed to the decrease in both the EO- and PO-based solvents earnings. The negative impact on EO and derivative results from turnaround activities in the first quarter 2013 was largely offset by improved ethylene glycol margins. Stronger markets due to supply constraints from industry outages in the first quarter 2013 led to higher styrene results.

The following table sets forth the I&D segment s sales and other operating revenues, operating income, income from equity investments and selected product production and sales volumes. Production volumes are based on actual production in the time period. In addition, the table shows MTBE margins in Northwest Europe (NWE).

		Three Months Ended March 31,		
Millions of dollars	2013	2012		
Sales and other operating revenues	\$ 2,282	\$ 2,485		
Operating income	323	370		
Income from equity investments	1			
Sales volumes, in millions of pounds				
PO and derivatives	683	774		
EO and derivatives	260	312		
Styrene	655	704		
Acetyls	432	489		
TBA intermediates	439	462		
Sales volumes, in millions of gallons				
MTBE/ETBE	187	205		
Market margins, cents per gallon				
MTBE NWE	104.9	125.1		
Devenues Devenues decreased by \$203 million or 8% in the first quarter of				

Revenues Revenues decreased by \$203 million, or 8%, in the first quarter of 2013 compared to the first quarter of 2012. First quarter 2013 revenues reflected a 4% decrease due to lower sales volumes in all businesses except styrene, primarily related to turnarounds. Lower first quarter 2013 average sales prices, primarily in oxyfuels, styrene and ethylene glycol, also resulted in a 4% revenue decline compared to the prior year quarter.

Operating Income Operating income decreased by \$47 million in the first quarter of 2013, compared to the first quarter of 2012. First quarter 2013 oxyfuels results reflected a decrease in sales to South America and a temporary build of inventory in preparation for a turnaround scheduled to commence in the second quarter of 2013. BDO results were negatively impacted in the first quarter 2013 by lower European demand and additional Asian capacity, resulting in a decrease in sales volumes and lower margins driven by a decrease in average sales prices. Solvents results were lower in the first quarter 2013 due to a decrease in sales volumes from the level seen in the strong first quarter 2012 period. Operating results for styrene were higher in the first quarter of 2013 compared to the first quarter of 2012 due to margin improvements as sales prices increased due to industry outages, outpacing rising benzene feedstock prices.

Refining Segment

Overview Operating results for the first quarter of 2013 reflected the negative impact of a scheduled maintenance turnaround of one of our crude and coker units and, to a lesser extent, unscheduled maintenance of another coker unit in the latter part of the quarter, which delayed a return to full crude processing rates following the completion of the turnaround. In addition, the cost for renewable identification numbers (RINs), a government established credit used to show compliance in meeting the EPA s Renewable Fuel Standard, increased significantly in the first quarter of 2013. Compared to the prior year period, these negative impacts were somewhat mitigated by higher refining margins as distillate spreads improved, the average differential between the cost of heavy and light crude oils increased and we realized higher byproduct values.

The following table sets forth the Refining segment s sales and other operating revenues, operating income (loss) and U.S. market refining margins for the applicable periods. Light Louisiana Sweet, or LLS is a light crude oil, while Maya is a heavy crude oil.

	Three Months Ended March 31,	
Millions of dollars	2013	2012
Sales and other operating revenues	\$ 2,468	\$ 3,203
Operating income (loss)	(17)	10
Heavy crude processing rates,		
thousands of barrels per day	173	259
<u>Market margins, dollars per barrel</u>		
Light crude oil 2-1-1	9.80	9.34
Light crude Maya differential	11.17	10.81
Total Maya 2-1-1	20.97	20.15

Revenues Revenues for the Refining segment decreased \$735 million, or 23%, in the first quarter of 2013 compared to the first quarter of 2012. Lower sales volumes in the first quarter of 2013 were responsible for a revenue decrease of 22%, and lower average refined product prices reduced revenues by 1% compared to first quarter of 2012. In the first quarter of 2013, crude processing rates decreased 33% from the first quarter of 2012 level as a result of the planned and unplanned outages discussed above.

Operating Income (Loss) Operating results for the first quarter of 2013, which decreased by \$27 million compared to the first quarter of 2012, reflected lower crude processing rates in the first quarter of 2013, offset in part by higher refining margins. Crude processing rates were 33% lower in the first quarter of 2013 due to the turnaround activity and unplanned maintenance described above. The higher refining margins reflected improved distillate spreads, a higher average differential between the cost of heavy and light crude oil, and increased byproduct values. In addition, the cost of RINs increased by \$18 million in the first quarter of 2013 compared to the same period in 2012. Some of this cost is recovered in higher prices for gasoline; however, the amount of such recovery cannot be accurately quantified due to the number of other factors that influence gasoline prices.

Technology Segment

The following table sets forth the Technology segment s sales and other operating revenues and operating income.

		Three Months Ended March 31,	
Millions of dollars	2013	2	2012
Sales and other operating revenues	\$ 134	\$	119
Operating income	50		38

Operating Results The increase in operating results for the first quarter of 2013 is primarily attributable to higher revenues recognized from process licenses issued in prior years slightly offset by lower catalyst results. Revenues increased by \$15 million, or 13%, in the first quarter of 2013 compared to the first quarter of 2012. Higher licensing and services revenues contributed 17% to the revenue increase in the first quarter of 2013 compared to the same period in 2012. Lower catalyst sales volumes accounted for a revenue decrease of 10% in the first quarter of 2013 compared to the corresponding period in 2012. Catalyst sales price improvement increased revenues relative to the prior year quarter by 6%, including a 1% increase due to favorable foreign exchange rates.

FINANCIAL CONDITION

Operating, investing and financing activities of continuing operations, which are discussed below, are presented in the following table:

		Three Months Ended March 31,		
Millions of dollars	2013	2012		
Source (use) of cash:				
Operating activities	\$ 799	\$ 913		
Investing activities	(408)	(185)		
Financing activities	(234)	(140)		

Operating Activities Cash of \$799 million provided in the first quarter of 2013 primarily reflected earnings, adjusted for non-cash items, offset in part by cash used by the main components of working capital accounts receivable, inventories and accounts payable, and certain payments related to sales rebates, employee bonuses, property taxes and vendor prepayments.

The cash used by the main components of working capital in the first quarter of 2013 reflects increases of \$22 million and \$242 million in accounts receivable and inventories, respectively, and a \$17 million decrease in accounts payable. The increase in inventories was largely due to a build in inventories at our Houston refinery in March 2013 in preparation for a return to full crude processing rates following the completion of a turnaround coupled with a lower than normal inventory level at December 31, 2012 due to the timing of crude deliveries.

The \$913 million of cash provided in the first quarter of 2012 reflected earnings adjusted for non-cash items, \$244 million of income tax refunds, and \$52 million of cash provided by the main components of working capital, partially offset by certain payments related to sales rebates, employee bonuses and property taxes.

The \$52 million of cash provided by the main components of working capital in the first quarter 2012 reflected an increase of \$374 million in accounts receivable, which was more than offset by a \$346 million decrease in inventories and an \$80 million increase in accounts payable. The increase in accounts receivable reflected higher first quarter 2012 sales volumes in our O&P EAI and I&D segments. In late 2011, the level of sales volumes for

the O&P EAI and I&D segments was negatively affected by economic weakness and turnaround activities, respectively. The decrease in inventories reflects the liquidation of inventory at our Berre refinery following the suspension of operations in early January 2012 as well as a return to more normal inventory levels in the O&P Americas segment following a build in inventory in late 2011 in preparation for a major turnaround in early 2012. Rising naphtha and propylene prices in the O&P EAI and I&D segments, respectively, were the primary drivers of the increase in accounts payable.

Investing Activities Cash of \$408 million used in investing activities in the first quarter of 2013 reflects capital expenditures of \$391 million. These expenditures were used to fund turnaround activities at several sites, the purchase of railcars, debottlenecks of certain assets to enhance production, and certain expansion projects. The \$185 million of cash used in investing activities during the first quarter of 2012 reflects capital expenditures, partially offset by a \$44 million decrease in restricted cash.

The following table summarizes capital expenditures for the periods presented:

		onths Ended rch 31,
Millions of dollars	2013	2012
Capital expenditures by segment:		
O&P Americas	\$ 122	\$ 102
O&P EAI	63	60
I&D	106	18
Refining	93	38
Technology	7	9
Other		1
Consolidated capital expenditures of continuing operations	\$ 391	\$ 228

Financing Activities Financing activities in the first quarters of 2013 and 2012, which used net cash of \$234 million and \$140 million, respectively, included dividend payments of \$229 million and \$143 million.

Liquidity and Capital Resources As of March 31, 2013, we had unrestricted cash and cash equivalents of \$2,879 million. In addition, we had total unused availability under our credit facilities of \$3,351 million at March 31, 2013, which included the following:

\$1,844 million under our revolving credit facility, which is net of outstanding borrowings and outstanding letters of credit provided under the facility. At March 31, 2013, we had \$153 million of outstanding letters of credit and no outstanding borrowings under the facility.

\$1,000 million under our U.S. accounts receivable securitization facility. Availability under this facility is subject to a borrowing base of eligible receivables, which is reduced by outstanding borrowings and letters of credit, if any. There were no outstanding borrowings or letters of credit at March 31, 2013.

376 million and \$18 million (totaling approximately \$507 million) under our 450 million European receivables securitization facility. Availability under this facility is subject to a borrowing base, net of outstanding borrowings. There were no outstanding borrowings under this facility at March 31, 2013.

In addition to the letters of credit issued under our committed revolving credit facility, we also have outstanding letters of credit and bank guarantees totaling \$85 million at March 31, 2013.

At March 31, 2013, we had total debt, including current maturities, of \$4,423 million.

In April 2013, we amended and restated our 450 million European receivables securitization facility to obtain more favorable terms and conditions, including reduced pricing, and to extend the maturity date of the facility to April 2016.

We have receivables outstanding of 286 million (\$366 million) at March 31, 2013 related to value added tax (VAT) in Italy. The balance of VAT receivables due from Italy, which is reflected in Other investments and long-term receivables in the Consolidated Balance Sheets, has increased since the first quarter 2010. At that time, Italy implemented a reverse change rule, under which non-domestic companies may not collect VAT on sales to domestic companies but must submit VAT on purchases from domestic companies. In April 2013, we received a \$108 million refund from the Italian tax authorities related to 2010 VAT returns. We expect to collect all remaining amounts owed to us.

As a result of ceasing operations at our Berre refinery in France, we expect to make future payments to affected employees and for exit or disposal activities. See Note 3 to the Consolidated Financial Statements for additional information related to this matter.

We may repay or redeem our debt, including purchases of our outstanding bonds in the open market, using cash on hand, cash from operating activities or proceeds from asset divestitures. We plan to finance our ongoing working capital, capital expenditures, debt service and other funding requirements with cash from operations, which could be affected by general economic, financial, competitive, legislative, regulatory, business and other factors, many of which are beyond our control.

We intend to continue to declare and pay quarterly dividends, with the goal of increasing the dividend over time, after giving consideration to our cash balances and expected results from operations. We believe that our cash on hand, cash from operating activities and proceeds from our credit facilities provide us with sufficient financial resources to meet our anticipated capital requirements and obligations as they come due.

CURRENT BUSINESS OUTLOOK

Business conditions similar to those seen in the first quarter of 2013 are generally expected to continue through at least the second quarter of 2013. Our O&P Americas and I&D segments are expected to continue to benefit from favorable shale gas developments. While our O&P EAI business experienced sequential improvement from the fourth quarter 2012, overall economic and industry conditions are expected to remain challenging. Although refining margins are currently below first quarter 2013 levels, results for our Houston refinery are expected to be favorably impacted by a return to full crude processing rates following the completion of scheduled and unscheduled maintenance late in the first quarter 2013.

ACCOUNTING AND REPORTING CHANGES

For a discussion of the potential impact of new accounting pronouncements on our consolidated financial statements, see Note 2 to the Consolidated Financial Statements.

CAUTIONARY STATEMENT FOR THE PURPOSES OF THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify our forward-looking statements by the words anticipate, estimate, believe, continue. CO should, intend. may, plan, potential, predict, will, expect, objective, projection, forecast, goal, guidance, outl expressions.

We based the forward-looking statements on our current expectations, estimates and projections about ourselves and the industries in which we operate in general. We caution you these statements are not guarantees of future performance as they involve assumptions that, while made in good faith, may prove to be incorrect, and involve risks and uncertainties we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Any differences could result from a variety of factors, including the following:

the cost of raw materials represents a substantial portion of our operating expenses, and energy costs generally follow price trends of crude oil and/or natural gas; price volatility can significantly affect our results of operations and we may be unable to pass raw material and energy cost increases on to our customers;

our U.S. operations have benefited from low-cost natural gas and natural gas liquids; decreased availability of these materials (for example, from their export or regulations impacting hydraulic fracturing in the U.S.) could reduce the current benefits we receive;

industry production capacities and operating rates may lead to periods of oversupply and low profitability; for example, there has been substantial capacity expansion announced in the U.S. olefins industry;

we may face operating interruptions at any of our facilities, which would negatively impact our operating results; for example, because the Houston refinery is our only refining operation, we would not have the ability to increase production elsewhere to mitigate the impact of any outage at that facility;

regulations may negatively impact our business by, among other things, restricting our operations, increasing costs of operations or requiring significant capital expenditures;

we face significant competition due to the commodity nature of many of our products and may not be able to protect our market position or otherwise pass on cost increases to our customers;

changes in general economic, business, political and regulatory conditions in the countries or regions in which we operate could increase our costs, restrict our operations and reduce our operating results;

our ability to implement business strategies may be negatively affected or restricted by, among other things, governmental regulations or policies;

uncertainties associated with worldwide economies, especially in Europe and the recent slowdown in Asia, could create reductions in demand and pricing, as well as increased counterparty risks, which could reduce liquidity or cause financial losses resulting from counterparty default;

Edgar Filing: LyondellBasell Industries N.V. - Form 10-Q

the negative outcome of any legal, tax and environmental proceedings may increase our costs;

we may be required to reduce production or idle certain facilities because of the cyclical and volatile nature of the supply-demand balance in the chemical and refining industries, which would negatively affect our operating results;

we rely on continuing technological innovation, and an inability to protect our technology, or others technological developments could negatively impact our competitive position;

we have substantial international operations, and continued economic uncertainties, fluctuations in exchange rates, valuations of currencies and our possible inability to access cash from operations in certain jurisdictions on a tax-efficient basis, if at all, could negatively affect our liquidity and our results of operations;

we are subject to the risks of doing business at a global level, including wars, terrorist activities, political and economic instability and disruptions and changes in governmental policies, which could cause increased expenses, decreased demand or prices for our products and/or disruptions in operations, all of which could reduce our operating results;

if we are unable to comply with the terms of our credit facilities and other financing arrangements, those obligations could be accelerated, which we may not be able to repay; and

we may be unable to incur additional indebtedness or obtain financing on terms that we deem acceptable, including for refinancing of our current obligations; higher interest rates and costs of financing would increase our expenses.

Any of these factors, or a combination of these factors, could materially affect our future results of operations (including those of our joint ventures) and the ultimate accuracy of the forward-looking statements. These forward-looking statements are not guarantees of future performance, and our actual results and future developments (including those of our joint ventures) may differ materially from those projected in the forward-looking statements. Our management cautions against putting undue reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels.

All subsequent written and oral forward looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section and any other cautionary statements that may accompany such forward looking statements. Except as otherwise required by applicable law, we disclaim any duty to update any forward looking statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market and regulatory risks is described in Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2012. Our exposure to such risks has not changed materially in the three months ended March 31, 2013.

Item 4. CONTROLS AND PROCEDURES

As of March 31, 2013, with the participation of our management, our Chief Executive Officer (principal executive officer) and our Chief Financial Officer (principal financial officer) carried out an evaluation, pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended (the Act), of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Act). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were operating effectively as of March 31, 2013.

There have been no changes in our internal control over financial reporting, as defined in Rule 13a-15(f) of the Act, in the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Environmental Matters

From time to time we and our joint ventures receive notices or inquiries from federal, state or local governmental entities regarding alleged violations of environmental laws and regulations pertaining to, among other things, the disposal, emission and storage of chemical and petroleum substances, including hazardous wastes. Item 103 of the SEC s Regulation S-K requires disclosure of certain environmental matters when a governmental authority is a party to the proceedings and the proceedings involve potential monetary sanctions that we reasonably believe could exceed \$100,000. In September 2012, Harris County, Texas filed a lawsuit against our subsidiary, Equistar Chemicals, LP, in Harris County District Court in connection with four emissions events between September 2011 and March 2012 at our manufacturing plant in Channelview, Texas. The complaint alleges a maximum penalty of \$200,000.

Litigation and Other Matters

Information regarding our litigation and other legal proceedings can be found in Note 14, *Commitments and Contingencies*, to the Consolidated Financial Statements.

Item 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in Item 1A of our 2012 Annual Report on Form 10-K.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the quarter ended March 31, 2013, we issued 5,070 shares upon exercise of warrants. The warrants originally were issued on April 30, 2010 with an exercise price of \$15.90 per share. Pursuant to the terms of the warrant agreements, the exercise price was adjusted to \$13.765 on November 25, 2011 as a result of the payment of our special dividend on December 16, 2011 and further adjusted to \$13.055 on November 19, 2012 as a result of the payment of our special dividend on December 11, 2012. We received total proceeds of \$653 from the exercises. Warrants for 5,020 shares were exercised pursuant to a cashless exercise procedure pursuant to which we withhold shares that would otherwise be issued to the warrant holder in payment of the exercise price. As a result, we received no proceeds from these exercises.

The issuance of the warrants and the shares issued upon exercise of the warrants were exempt from the registration requirements of Section 5 of the Securities Act and any other applicable laws pursuant to Section 1145 of the Bankruptcy Code, which generally exempts distributions of securities in connection with plans of reorganization.

None of the foregoing transactions involved any underwriters, underwriting discounts or commissions, or any public offering.

Issuer Purchases of Equity Securities

Period		Shaas 1	otal NumberBy ares Purchased Part of Publicly Announced Plans or	ximum Number (or oximate Dollar Value) of Shares That 7 May Yet Be Purchased Under the Plans or Programs
January 1 January 31	(1) 1			
February 1 February 28	129,990	\$ 61.18		
March 1 March 31				
Total	129,990	\$ 61.18		

(1) Pursuant to the terms of our CEO s restricted stock award agreement, if certain shareholders affect sales of their shares, the CEO will automatically vest in a percentage of his restricted stock. On February 19, 2013 affiliates of Apollo Management Holdings L.P. sold 25 million shares of the Company. As a result of these sales, our CEO automatically vested in 309,871 shares of his restricted stock. Of the shares vested, the Company withheld 129,990 shares to satisfy tax withholding obligations. The staff of the SEC takes the position that withholding of restricted stock to pay taxes due upon vesting involves a reacquisition of outstanding shares that must be reported as repurchase of equity securities under this Item.

Item 6. EXHIBITS

- 31.1 Certification of Principal Executive Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934
