Net operating mobile revenues in the quarter recorded a growth of 7.5% in the annual comparison, driven by the increased data and terminal revenues. The mobile service revenue grew by 7.1% when compared to the same period of last year. Excluding the regulatory impact effect, the mobile net service revenue growth would be of 9.1% y-o-y.

Access and usage revenues increased by 5.4% in the y-o-y comparison. The increase in the postpaid customer base with the “*Vivo Ilimitado*” plans and the growth in prepaid recharges contributed for this performance.

Network usage revenues decreased by 16.0% compared to 3Q12 mainly due to the reduction of the MTR. By normalizing this effect, such reduction would be of 5.1%. In the q-o-q comparison, a slight growth of 0.8% was recorded.

Data and VAS (Value Added Services) revenues continued to record a good performance, with growth of 24.6% y-o-y. This is mainly due to the growth in sales of data packages, in addition to higher mix of smartphones. In the quarter, Data and VAS revenues accounted for 32.4% of the net mobile services revenue, an annual growth of 4.6 p.p.. Considering outgoing revenue only, data and VAS would represent 37.9% in 3Q13.

SMS revenues increased by 5.0% y-o-y, driven by the launch of the “*Vivo Sempre 3*” promotion with reduced SMS rate to all the operators, in addition to sales of unlimited packages in the postpaid plans (R\$ 10/month), higher SMS penetration in the “*Vivo Sempre*” campaign (R\$ 0.05/sms), as well as inclusion of off-net SMS in postpaid plans.

Mobile internet revenues continued to accelerate, recording an increase of 35.5% in the y-o-y comparison, accounting for 54.2% of data revenue in 3Q13. This performance is directly driven by the strong growth of postpaid and data accesses, especially the 3G Plus and 4G plans. In the postpaid individual customers segment, 75% of the customers own smartphones or smartlights.

VAS Revenues increased by 32.5% y-o-y, driven by the education platform, “*Vivo Som de Chamada*” and “*Vivo Segurança Online*” services which maintain significant growth level.

The annual increase of 14.4% in the **mobile handset revenues** was reduced in relation to the previous quarter due to the change in the hardware sales model for the SME segment that occurred in 3Q12, which makes the comparison homogeneous, in addition to a less aggressive subsidy policy.

The quarterly variation increased by 3.8%.

The **cost of goods sold** in 3Q13 grew by 11.8% in relation to 3Q12, reducing the growth rate recorded in the previous quarters due to the change in our handsets sales model for the SME segment in 3Q12, which makes the comparison homogeneous, in addition to the increase of the prices for smartphones and cuts in subsidies for control plans, that reduced the volume of sales in the quarter.
