- **Total accesses** fell by 10.5% over 1Q15, totaling 73,271 thousand accesses. Worthy of mention is the postpaid segment, which grew by 8.1% y-o-y, totaling 31,259 thousand accesses and accounting for 42.7% of mobile accesses, up by 7.4 p.p. in the annual comparison. - **Total market share** came to 28.4% in February (-0.5 p.p. y-o-y). The Company also leads in terminals with 4G technology, corresponding to 36.3% market share in February 2016. The Company's quality differential was once again recognized by consumers, who elected Vivo the leader in satisfaction and perceived quality survey conducted by ANATEL in the pre and postpaid segments.

1 Excludes dongles and M2M.

- In the first quarter, **net mobile additions** came to approximately 2 thousand accesses. Net postpaid additions reached 185 thousand accesses, while prepaid net disconnections amounted to 183 thousand accesses.
- The **prepaid customer base** contracted by 20.7% in 1Q16 over 1Q15, due to a restrictive policy for the disconnection of non-profitable clients, highlighting the Company's focus on rationality and profitability.
- The access base continued to expand in the **machine-to-machine (M2M)** market, reaching 4.4 million customers in March, 19.1% up on 1Q15. On the other hand, the dongle market continued to shrink, declining by 433 thousand clients, 13.5% down y-o-y in 1Q16.
- **Total ARPU** moved up by 10.9% y-o-y, fueled by the performance of **data ARPU**, which strongly increased in 1Q16 over 1Q15 (+35.7%). Excluding MTR reductions in the period, total ARPU posted annual growth of 13.7%.

VAS	476.4	508.3	(6.3)	467.3	1.9

Net handset revenues	301.7	349.3	(13.6)	338.6	(10.9)

First-quarter net mobile revenue slightly reduced, by 0.3% over 1Q15, affected by the reduction in handset sales (-10.9% y-o-y while mobile service revenue increased 0.4% y-o-y, mainly due to the reduction in voice revenue, influenced by the MTR reduction on February 2015 and 2016 and to the challenging macroeconomic environment. Excluding the MTR reduction effect, first-quarter mobile service revenue increased by 2.9% y-o-y.

Outgoing voice revenue fell 15.6% in 1Q16 over 1Q15, reflecting the increased migration of usage to mobile internet, which offsets the reduction in voice. The prepaid segment was also impacted by the lower volume of recharges in the period (-9.1% y-o-y and -5.1% q-o-q).

Interconnection revenue contracted 24.3% y-o-y, mainly due to the MTR tariff reduction in February 2015 and 2016 (-33.0% and -33.8%, respectively). With the normalization of this effect, interconnection revenue was 7.5% higher in 1Q16 over 1Q15, also impacted by the higher incoming traffic.

Data and VAS revenue grew 22.8% y-o-y. Sales of stand-alone data plans and packages and upselling of data bundles strongly contributed to this growth, in addition to the higher penetration of smartphones within our customer base. In 1Q16, data and VAS revenue represented 51.5% of net mobile service revenue, up by 9.4 p.p. y-o-y.

SMS revenue slightly declined, by 2.1% y-o-y, due to the reduction in promotional SMS in the period.

Mobile internet revenue moved up by 35.4% y-o-y and accounted for 71.1% of data revenue in 1Q16. This performance is directly linked to the strong growth in postpaid data accesses, especially in 4G plans, the increased sales of stand-alone data packages and the growth of the smartphone customer base. At the close of 1Q16, 76% of our customer base already had smartphones or webphones, up by 6 p.p. compared to the same period of last year.

VAS revenue moved up by 1.9% in 1Q16 over 1Q15, chiefly due to the sale of premium VAS in own stores, such as Vivo Música and Nuvem do Jornaleiro. Services of educational platforms, such as Kantoo, and safety platforms, such as Vivo Sync and Vivo Segurança online, also recorded positive performance, with the continuous interest of our customers for these products. Even so, growth was affected by lower usage especially by prepaid users in the period.

Other services revenue totaled R\$85.8 million, 24.8% up on 1Q15, due to the higher recurring recovery of taxes on disputed invoices.

Mobile handset revenue fell 10.9% y-o-y, due to the Company's value driven and selective strategy focusing the sale of handsets on higher-value customers.

- The **fixed access base** totaled 23,950 thousand accesses in 1Q16, 0.3% up on 1Q15, mainly influenced by the positive performance of ultra-broadband and Pay TV services.
- **Fixed voice accesses** totaled 14,949 thousand in 1Q16, 1.8% down y-o-y, reflecting the lower number of residential accesses. Voice ARPU remained stable y-o-y, even considering the negative pressure caused by VC reductions and the fixed to mobile substitution.
- **Fixed broadband accesses** recorded 7.2 million customers in 1Q16, 3.7% more than in 1Q15. The FTTx customer base reached 3,914 thousand accesses, 637 thousand of which in FTTH technology. The UBB customer base represented 54.2% of total broadband accesses, 12.6% up on 1Q15, fueling the ARPU, which increased by 7.6% y-o-y in 1Q16 (+5.4% y-o-y in 4Q15).
- **Pay TV accesses** increased 4.9% y-o-y, to 1,787 thousand subscribers in 1Q16, with 83 thousand more accesses compared to the previous year. Company's market share came to 9.4% in February, 1.0 p.p. up y-o-y. TV ARPU increased by 12.6% y-o-y, reflecting the evolution in premium TV accesses (+17.7%), including IPTV and interactive DTH with Full HD packages.

Note: Fixed Net Revenue includes revenue from the FWT solution (“Vivo Fixo”). Broadband revenue includes residential clients and SME.

Net revenue from the fixed line business climbed 2.0% in 1Q16, mainly due to the increase in broadband and Pay TV revenue. Fixed line revenue was impacted by fixed to mobile tariff (VC) reductions in February 2015 and 2016 and by the fixed interconnection (TU-RL and TU-RIU) reductions in February 2016. Excluding this effect, the variation in net fixed service revenue was 5.1% in the period.

Voice revenue declined 1.2% in 1Q16 over 1Q15. Excluding the VC reduction (-20.6%), voice revenue climbed 4.1% y-o-y.

Interconnection revenue fell 18.3% compared to 1Q15, due to the reduction in TU-RL (-65.9%) and TU-RIU (-21.3%) in February 2016. Excluding this effect, interconnection revenue grew 1.8%.

Broadband revenue moved up by 11.5% y-o-y, fueled by the growth in the FTTx revenues, which already accounts for 60% of broadband revenue and increased by 22.3% y-o-y. In this sense, the Company has been focusing on the migration of customers to higher speeds, mainly in FTTx, expanding the fiber customer base, which has higher ARPU and lower churn.

Corporate data and IT revenue fell 6.5% y-o-y, influenced by the economic downturn and the stricter competition in this market.

Pay TV revenue increased 21.1% in 1Q16 over 1Q15, due to the growth of the interactive DTH and IPTV subscriber base, with an increased adoption of HD packages resulting in a 33.6% revenue increase. Revenue from the premium segment accounts for more than 70% of Pay TV revenue.

Other services revenue fell 7.2% y-o-y, mainly influenced by the reduced sale of integrated solutions' equipment to large clients.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$6,642.9 million in 1Q16, 9.0% down y-o-y. Excluding the positive effect from the sale of towers on March 31, totaling R\$513.5 million, costs came to R\$7,156.4 million, still down by 2.0% y-o-y, in a period when inflation measured by the IPCA index stood at 9.4%. In 1Q16 over 4Q15, operating costs moved down by 2.3%, already excluding the sale of towers.

Personnel costs rose 4.5% over 1Q15, particularly reflecting the internalization of employees from providers of network installation and maintenance services in 4Q15, partially offset by the lower costs due to the reduction of the workforce in September 2015. It is important to mention that this increase is lower than the 7% pay rise due to the collective bargaining agreement in September 2015.

The **cost of services rendered** reduced 1.1% in 1Q16 over 1Q15, positively influenced by MTR reductions in February 2015 and 2016 and TU-RL/TU-RIU reductions in February 2016. Excluding this effect, the y-o-y increase was 4.2%, well below the inflation measured in the period. This variation chiefly reflects the higher expenses with network maintenance and conservation services, due to

the expansion in 4G coverage and the focus on service quality, higher expenses with site leasing and purchase of TV content, as well as the higher expenses with electricity, due to the tariff increase, partially offset by lower expenses with regulatory fees.

Cost of goods sold (COGS) fell 10.8% in 1Q16 over 1Q15, reflecting the Company's focus on profitability, concentrating on higher-value customers.

Selling expenses declined by 5.8% y-o-y in the first quarter, due to the Company's commercial rationality and synergies capturing, offsetting the impact of the economic environment.

Provisions for bad debt closed 1Q16 at R\$344.4 million (-7.8% y-o-y), with delinquency levels at 3.3% of net operating revenue, 0.3 p.p. down y-o-y, despite the macroeconomic deterioration. The Company continued to adopt strict credit granting criteria, improving the identification of clients' risk profile and adopting more effective collection measures. In comparison with 4Q15, provisions for bad debt increased 26.6%, chiefly due to the end-of-year seasonality effect and the intensification of collection initiatives in that period.

Third-party services registered a 4.9% y-o-y reduction, as a result of lower costs with call center services, sales promoters in retail stores and publicity and advertising, partially offset by higher expenses with system development and collection services focused on reducing delinquency.

First-quarter **general and administrative expenses** increased by 25.1% y-o-y, chiefly influenced by the higher expenses with energy due to tariff hikes and system development, due to the integration of the companies.

Other net operating revenues (expenses) recorded revenue of R\$401.0 million in 1Q16, fueled by the sale of towers totaling R\$513.5 million in March 2016. Excluding this effect, this line posted expense of R\$112.5 million, versus an expense of R\$146.2 million in 1Q15, 23.1% down, due to higher revenue from fines.

Ebitda

First-quarter **EBITDA** (earnings before interest, taxes, depreciation and amortization) totaled R\$3,788.5 million. **Recurring EBITDA**, excluding the sale of towers previously mentioned, came to R\$3,275.0 million, 7.0% up on 1Q15, particularly thanks to the cost efficiency measures adopted by the Company.

The **recurring EBITDA margin** stood at 31.4%, 1.9 p.p. up on the 29.5% posted in 1Q15. Despite the challenging macroeconomic environment, the Company continued to post revenue growth and maintained its commercial rationality and a strict control over costs, which grew below the period's inflation, always seeking to maximize value generation for shareholders.

Net financial expenses declined by R\$211.8 million in 1Q16 over 1Q15, mainly influenced by the losses due to the foreign exchange variation on GVT's loans and financing denominated in foreign currency (Euro) in 1Q15, which were fully covered by hedge operations as of May 2015, in addition to the lower average net debt in the period.

Net Income

Net income totaled R\$1,218.2 million in 1Q16, 179.3% more than in 1Q15. The **recurring Net Income**, excluding the sale of towers, reached R\$ 879.3 million, 101.6% more than in 1Q15, chiefly due to improved operating results and the reduction in financial expenses in the period.

The investments were focused in guaranteeing quality and enabling growth. In this sense, 75% of the Capex was allocated in commercial projects to drive revenue growth.

The Company closed 1Q16 with a **gross debt** of R\$8,921.7 million, 29.4% down on 1Q15, 17.0% of which denominated in foreign currency. The reduction in gross debt is related to the settlement of loans and financing in the period, offset by refinancing commercial liability (R\$120.0 million), besides the regular accrual expenses. Currently, foreign exchange exposure of debt is 100% covered by hedge operations.

Net debt totaled R\$4,686.5 million at the close of 1Q16, accounting for 0.35 of LTM EBITDA. Net debt reduced by R\$3,120.2 million compared to 1Q15, mainly due to the capital increase carried out by the Company, partially offset by the payment of the 700 MHz license to ANATEL, the payment of dividends and refinancing of commercial liabilities.
