

ITEM 1.01 ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT.

On April 27, 2011, Siberian Energy Group Inc. (the “Company”, “we”, and “us”) entered into a Share Exchange Agreement with Rare Minerals Corporation, a Nevada corporation (“RMC” and the “Share “Exchange”) and RMC’s shareholders (“RMC Shareholders”). Pursuant to the Share Exchange, we agreed to exchange 65,200,000 shares of newly issued common stock (representing 99% of our then outstanding common stock) with the RMC Shareholders for 100% of the outstanding shares of RMC. The Share Exchange closed effective May 11, 2011 (the “Closing”).

RMC was formed as a Nevada corporation on December 9, 2010. RMC’s wholly-owned subsidiary is OOO Koklanovskoe, a Russian limited liability company (“Koklanovskoe”). Koklanovskoe holds a license (KUG00939TE) for the Koklanovskoe Molybdenum-Tungsten deposit in the Kurgan Region of the Russian Federation (the “License” and the “Deposit”).

Pursuant to the Share Exchange, the RMC Shareholders agreed not to vote the shares which they hold in favor of removing any current Director of the Company, to vote any and all shares in favor of re-appointing all current members of the Board of Directors (subject to the terms of the Share Exchange) for a period of one year from Closing, and that they had no rights to appoint or remove Directors for a period of one year from Closing (collectively the “Voting Requirements”).

ITEM 2.01 COMPLETION OF ACQUISITION OR DISPOSITION OF ASSETS.

The Share Exchange closed May 11, 2011, at which time the Company acquired all of the outstanding capital stock of RMC, and as a result, its wholly-owned subsidiary Koklanovskoe and its rights to the License. Through the acquisition of the License, the Company plans to enter the market for the exploration and production of rare and semi-rare earth metals and precious minerals.

The Deposit is a molybdenum-tungsten stockwork deposit that was identified and subsequently explored between 1985 and 1988. The Deposit is located in the Russian Urals, approximately 45 kilometers (“km”) south-east from the town of Kamens-Uralskiy which is also the nearest rail head. The Deposit area can be accessed via all seasonal roads from the town of Kataysk which is located approximately 30 km to the north-east.

The Company plans to explore the Deposit (funding permitting) in the hopes of discovering commercial quantities of molybdenum, tungsten, iron ore, gold, fluorite, bismuth, copper and other rare and semi-rare earth metals and precious minerals. The Company believes that the Deposit is potentially suitable for open-pit mining.

ITEM 3.02 UNREGISTERED SALES OF EQUITY SECURITIES.

In connection with and pursuant to the Share Exchange, we agreed to issue an aggregate of 65,200,000 shares of restricted common stock (representing 99% of our then outstanding shares of common stock) to the RMC shareholders. The Company claims an exemption from registration afforded by Regulation S and/or Section 4(2) of the Securities Act of 1933, as amended (the “Act”) since the foregoing issuances did not involve a public offering, the recipients took the shares for investment and not resale, the Company took appropriate measures to restrict transfer, and the recipients were “sophisticated investors” who had access to similar documentation and information similar as to what would be required in a Registration Statement under the Act. No underwriters or agents were involved in the foregoing issuances and the Company paid no underwriting discounts or commissions.

ITEM 5.01 CHANGES IN CONTROL OF REGISTRANT.
