FORM 10-Q

[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended July 3, 2010

OR

[ ] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission File Number 001-10684

International Game Technology

Nevada (State or other jurisdiction of Incorporation or Organization)	88-0173041 (I.R.S. Employer Identification No.)

9295 Prototype Drive
Reno, Nevada 89521
(Address of Principal Executive Offices)(Zip Code)

(775) 448-7777
(Registrant’s Telephone Number, Including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days:
Yes [X] No [ ]

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes [X] No [ ]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer,

or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act:

Large accelerated filer [X] Accelerated filer [ ] Non-accelerated filer [ ] Smaller reporting company [ ]
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes [ ] No [X]

At August 9, 2010, there were 298.1 million shares of our $.00015625 par value common stock outstanding.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND CONSOLIDATION

Our consolidated financial statements include the accounts of International Game Technology (IGT, we, our, or the Company), including all majority-owned or controlled subsidiaries and VIEs for which we are the primary beneficiary. All appropriate inter-company accounts and transactions are eliminated.

We prepare our consolidated financial statements in accordance with SEC and US GAAP requirements and include all adjustments of a normal recurring nature that are necessary to fairly present our consolidated results of operations, financial position, and cash flows for all periods presented. Interim period results are not necessarily indicative of full year results. This quarterly report should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2009 and our Current Report on Form 8-K filed on June 3, 2010, which revised and recast certain financial information from our Annual Report on Form 10-K for the year ended September 30, 2009, to reflect the retrospective application of accounting standards adopted at the beginning of 2010 for convertible debt, noncontrolling interests and participating securities.

Our fiscal year is reported on a 52/53-week period that ends on the Saturday nearest to September 30 each year. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, this report presents all fiscal periods using the calendar month end as outlined in the table below. Fiscal 2010 will contain 52 weeks and our results for the first nine months contained 39 weeks versus 40 weeks in the prior year period.

	Period End	
	Presented as	Actual
Current quarter	June 30, 2010	July 3, 2010
Prior year quarter	June 30, 2009	July 4, 2009
Prior fiscal year end	September 30, 2009	October 3, 2009

Use of Estimates

Our consolidated financial statements are prepared in conformity with US GAAP. Accordingly, we are required to make estimates, judgments and assumptions that we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, and information available from other outside sources. Our estimates affect reported amounts for assets, liabilities, revenues, expenses, and related disclosures. Actual results may differ from initial estimates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition

We recognize revenues when all of the following have been satisfied:

- persuasive evidence of an arrangement exists
- the price to the customer is fixed and determinable
- delivery has occurred and any acceptance terms have been fulfilled
- no significant contractual obligations remain

- collection is reasonably assured

Revenues are reported net of incentive rebates, discounts, sales taxes, and other taxes of a similar nature. Amounts billed prior to completing the earnings process are deferred until revenue recognition criteria are met.

Gaming Operations

Gaming operations revenues are generated from providing customers with our proprietary electronic gaming equipment and related network systems, licensing, and services under a variety of recurring revenue arrangements, including WAP, CDS, stand-alone participation and flat fee, equipment leasing and rental, and online gaming solutions.

WAP systems consist of linked slot machines located in multiple casino properties, connecting to an IGT central computer system. WAP games differ from stand-alone units in that a progressive jackpot increases with every wager until a player wins the top award combination. Casinos with IGT WAP machines pay a percentage of the coin-in (amounts wagered) for IGT services related to the design, assembly, installation, operation, maintenance, and marketing of the WAP systems, as well as funding and administration of the progressive jackpot.

Revenues from CDS, stand-alone and other equipment leasing or rentals are recognized based on a percentage of the net win or on a fixed daily/monthly fee or rental basis. Online gaming solutions encompass online casino gaming software and content licensing, as well as back office operational support services. All online gaming solutions are provided under revenue sharing arrangements based on net gaming revenues.

Product Sales

Our product sales revenues are generated from the sale of electronic gaming equipment and network systems, as well as licensing, services, and component parts. Time-based licensing and maintenance fees are typically recognized ratably over the term of the agreement. Our credit sales terms are predominately 90 days or less. We also grant extended payment terms under contracts of sale secured by the related equipment sold, and these contracts are typically paid within their terms.

Our gaming machines and certain other tangible products, containing both software and nonsoftware components that function together to deliver the product’s essential functionality, were previously subject to software revenue recognition. Under ASUs adopted for new and materially modified arrangements entered into after the beginning of our first quarter of fiscal 2010 (discussed below under Recently Issued Accounting Standards – Adopted), our gaming machines and certain other tangible products no longer fall under the scope of software revenue recognition and are generally recognized upon delivery and customer acceptance.

Multi-element Arrangements

The majority of our multiple element contracts are for some combination of machines, network systems, license fees, maintenance, training, and other services. Revenues for individual deliverables are recognized when the recognition criteria for that element has been met. We elected to early adopt ASUs for revenue recognition related to certain software-enabled products and multi-element arrangements on a prospective basis for new or materially modified arrangements entered into after the beginning of our fiscal year 2010. Most of our products and services qualify as separate units of accounting, and the ASUs do not change this premise. The terms of performance, cancellation, termination, or refunds in our multiple element contracts are similar to those for individual stand-alone deliverables.

Under the ASUs, arrangement consideration is allocated among multiple deliverables based on relative selling prices. In order of preference, relative selling prices are estimated based on VSOE, TPE, or MBE, and the residual method is not allowed for nonsoftware elements. VSOE is determined by the net price charged for each deliverable when it is sold separately. VSOE for maintenance agreements is determined based on the annual renewal rates. When VSOE or TPE is not available, generally for new or highly customized offerings, the estimated selling price is the amount we would sell the product or service for individually. The determination of MBE is made based on our standard pricing and discounting practices, which consider multiple factors, such as market conditions, competitive landscape, internal costs, and profit objectives.

Under the ASUs, revenues for machines and other software-enabled equipment in certain bundled arrangements are no longer deferred because VSOE is not available for an undelivered element. Generally, revenues allocated to non-software elements will be recognized upon delivery and customer acceptance, and only revenues allocated to software elements require deferral and recognition over a lease or license term.

Prior to the beginning of fiscal 2010, if we were unable to establish VSOE for any undelivered element, revenue was generally deferred until all elements were delivered or until VSOE could be determined. If we did not have VSOE for a delivered element, VSOE for the undelivered elements was deferred, and the residual amount constituted the revenues recognized for the delivered elements. Additionally, when machines were sold in combination with a leased system on which the machines depend for essential functionality, machine revenues were recognized ratably over the system lease contract term.

Deferred Revenue

Deferred revenue consists of amounts received or billed after products are delivered or services are rendered, but prior to meeting all of the requirements for revenue recognition. Complex systems and/or multi-element contracts may take several months to complete and our deferred revenues may increase as our products evolve toward a more systems-centric environment.

Deferred revenue balances in the table below related primarily to product sales where the installation was not yet complete or we were obligated to perform future services. At June 30, 2010, $17.0 million remains deferred because it is subject to prior revenue recognition criteria in effect before the beginning of fiscal 2010.

	June 30, 2010	September 30, 2009
(In millions)		
Other accrued liabiltites (current)	$77.8	$101.7
Other liabilities (noncurrent)	14.0	20.3
Total	$91.8	$122.0

Recently Issued Accounting Standards - Adopted

Revenue Recognition For Software-enabled Products and Multi-element Arrangements

In October 2009, the FASB issued ASUs about revenue recognition for certain software-enabled products and multi-element arrangements. Under these ASUs, tangible products, containing both software and nonsoftware components that function together to deliver a tangible product's essential functionality, are no longer subject to software revenue accounting. These ASUs also established a more economically aligned model for allocating revenues among deliverables in a multi-element arrangement, based on relative selling prices.

We elected to early adopt these ASUs prospectively for new or materially modified arrangements entered into on or after the beginning of our fiscal 2010. See our revenue recognition accounting policies above for additional information about our application of these ASUs. Although this adoption is not currently expected to have a material effect on the timing or amount of future revenues, the impact is dependent upon the prevalence of multi-element arrangements and the implementation of new sales arrangements.

Pro forma revenues that would have been reported under the prior accounting guidance are reflected in the table below.

	Quarter Ended June 30, 2010			Nine Months Ended June 30, 2010		
	As Reported	Pro Forma	Increase (decrease)*	As Reported	Pro Forma	Increase (decrease)*
(In millions)						
Revenues						
Gaming operations	$276.6	$276.6	$-	$834.4	$827.5	$ 6.9
Product Sales	213.1	205.2	7.9	658.1	633.3	24.8
Total	$489.7	$481.8	$7.9	$1,492.5	$1,460.8	$ 31.7

* Additional revenues recognized which would have been recognized in other periods under prior quidance

Fair Value Measurements

In September 2006, an accounting standard was issued which refined the definition of fair value, established a framework for measuring fair value, and expanded disclosures about fair value measurements. The adoption of this accounting standard for non-financial assets and liabilities at the beginning of fiscal 2010 did not have a material impact on our results of operations, financial position or cash flows.

In January 2010, the FASB issued an ASU requiring added disclosures related to assets and liabilities carried at fair value to identify significant transfers between Level 1 and Level 2, techniques and inputs used, and any significant changes to techniques and inputs. See Note 16 for additional information about fair value measurements. This adoption in our second quarter of fiscal 2010 did not have a material impact on our results of operations, financial position or cash flows.

Participating Securities in Share-Based Payment Transactions

At the beginning of fiscal 2010, we adopted an ASU issued in June 2008 for determining whether instruments granted in share-based payment transactions are participating securities which should be included in the computation of EPS using the two-class method (see Note 13). Certain restricted stock granted under our employee SIP (see Note 6) is considered a participating security because it carries non-forfeitable rights to dividends. This adoption did not have a material impact on our financial statements and the effect of the required retrospective application for prior periods presented is summarized in the table at the end of this section.

Business Combinations and Noncontrolling Interests

At the beginning of fiscal 2010, we adopted accounting standards issued in December 2007 revising the method of accounting for a number of aspects of business combinations and noncontrolling interests (i.e. minority interests), such that more assets and liabilities will be measured at fair value as of the acquisition date. Certain contingent consideration liabilities will require remeasurement at fair value in each subsequent reporting period. Noncontrolling interests will initially be measured at fair value and classified as a separate component of equity.

Acquisition related costs, such as fees for attorneys, accountants, and investment bankers, will be expensed as incurred and no longer be capitalized as part of the business purchase price. For all acquisitions, regardless of the consummation date, deferred tax assets and uncertain tax position adjustments occurring after the measurement period will be recorded as a component of income tax expense, rather than adjusted through goodwill. For business combinations and asset purchases, the impact of this guidance on our results of operations or financial position will vary depending on the specifics of each transaction.

This adoption did not have a material impact on our consolidated financial position, results of operations or cash flows. Income attributable to the noncontrolling interests is presented as a component of other income (expense) as it was not significant to our consolidated operating results. The required retrospective presentation of noncontrolling interests as a separate component of stockholders' equity, rather than liabilities, is summarized in the table at the end of this section.

Convertible Debt Instruments

At the beginning of fiscal 2010, we adopted an ASU issued in May 2008 requiring the separation of liability (debt) and equity (conversion option) components for convertible debt instruments that may settle in cash upon conversion to reflect an effective nonconvertible borrowing rate when the debt was issued. We estimated fair value of our Debentures (1.75% and 2.6%) and Notes using similar debt instruments at issuance that did not have a conversion feature and allocated an equity component included in paid-in capital that represents the estimated fair value of the conversion feature at issuance.

The effects of the required retrospective application for prior periods presented as it relates to our Debentures (1.75% and 2.6%) and Notes are summarized in the table at the end of this section. See Note 10 for additional information related to our 2.6% Debentures and Notes. The adjustment to long-term debt represents the unamortized balance of the revised discount. Additionally, this adoption decreased long-term debt, deferred tax assets and deferred offering costs and increased stockholders' equity.

In addition to the retrospective adjustments noted in the table at the end of this section, this adoption increased noncash interest expense for the three and nine months ended June 30, 2010 by $6.8 million and $22.8 million, respectively. On an annual basis, we expect this adoption to increase noncash interest by approximately $30.0 million for both fiscal years 2010 and 2009, decrease Debenture repurchase gains by $5.2 million for fiscal 2009, and reduce

diluted EPS $0.06 for fiscal 2010 and $0.08 for fiscal 2009.

Recently Issued Accounting Standards - Not Yet Adopted

Consolidation of Variable Interest Entities

In June 2009, the FASB issued an ASU which requires us to reassess our primary beneficiary position for all VIE arrangements based on qualitative factors on an on-going basis. This ASU is effective beginning with our first quarter of fiscal 2011 and must be adopted through a cumulative-effect adjustment (with a retrospective option). We continue to evaluate the extent to which this ASU will impact our results of operations, financial position, or cash flows.

Fair Value Measurement Disclosures

In January 2010, the FASB issued an ASU which will require supplemental disclosures related to purchases, sales, issuances, and settlements within the Level 3 reconciliation. This ASU is effective for interim and annual reporting periods beginning with our first quarter of fiscal 2012 and is not expected to have a material impact on our financial statements.

Accruals for Casino Jackpot Liabilities

In April 2010, the FASB issued an ASU on jackpot liabilities clarifying that an entity should not accrue jackpot liabilities (or portions thereof), specifically addressing base jackpot liabilities, before they are won if the payout can be avoided. The ASU will be applied prospectively with a cumulative-effect adjustment in retained earnings at the beginning of the period of adoption and is effective beginning with our first quarter of fiscal 2012. We continue to evaluate the extent to which this guidance will impact our results of operations, financial position, or cash flows.

Revenue Recognition – Milestone Method for Research and Development Transactions

In April 2010, the FASB issued an ASU related to defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition for research and development transactions. This ASU generally allows milestone payments to be recognized as revenue in their entirety when specific milestone results are achieved. The ASU will be applied prospectively to milestones achieved as of the beginning of our fiscal year 2011. We continue to evaluate this ASU, but do not expect it to have a material impact to our results of operations, financial position or cash flows.

Credit Quality of Financing Receivables and the Allowance for Credit Losses

In July 2010, the FASB issued an ASU to address concerns about the sufficiency, transparency, and robustness of credit risk disclosures for finance receivables and the related allowance for credit losses. This ASU is effective for disclosures as of our first quarter in fiscal 2011. Additional disclosures require information at disaggregated levels, including the nature of the credit risk and how it is analyzed in arriving at the allowance for credit losses, a roll-forward schedule of and reasons for changes in the allowance, credit quality indicators, an aging of past due amounts, the nature and extent of modifications, and significant purchases or sales. Other than the enhanced disclosures, this ASU will have no impact on our results of operations, financial position, or cash flows.

3. VARIABLE INTEREST ENTITIES AND AFFILIATES

Variable Interest Entities

As the primary beneficiary, we consolidate our VIE WAP trusts in New Jersey that are responsible for administering jackpot payments to winners. The VIE trust consolidations increase jackpot liabilities and related assets, as well as

interest income and equivalent offsetting interest expense. Consolidated VIE trust assets and equivalent liabilities totaled $83.0 million at June 30, 2010 and $91.3 million at September 30, 2009.

Investments in Unconsolidated Affiliates

China LotSynergy Holdings, Ltd.

At June 30, 2010, our investments in CLS stock and convertible notes were accounted for as available-for-sale securities reflected in the aggregate table below. We determined that no features of the convertible notes met the definition of a derivative requiring bifurcation at June 30, 2010. See Note 15 about related foreign currency derivatives and Note 16 for factors related to fair value measurements.

For our equity method joint ventures with CLS, IGT Synergy Holding Ltd. and Asiatic Group Ltd., as of and for the nine months ended June 30, 2010, we recognized a loss of $0.3 million and $8.4 million remains to be funded on our capital commitment.

Aggregate Available-for-sale Investments in Unconsolidated Affiliates

June 30, 2010	Adjusted Cost	Unrealized gain (loss)	Fair Value
(In millions)

Less accumulated depreciation	(856.6)	(881.0)
Property, plant and equipment, net	$574.1	$558.8

6. SHARE-BASED COMPENSATION

The amount, frequency, and terms of share-based awards may vary based on competitive practices, operating results, and government regulations. New IGT common shares are issued upon option exercises or restricted share grants and vesting of restricted share units. Our current practice is generally to grant restricted share awards in the form of units without dividends. Forfeitures are typically due to employee terminations.

On November 4, 2009, IGT granted 2.7 million employee stock options with an exercise price of $18.60 per share in exchange for the 5.3 million underwater employee stock options surrendered in a shareholder approved exchange offer that expired on November 3, 2009. The newly granted options have a six-year contractual term and will vest ratably over two years. The exchange ratio was calculated based on the fair values of the options surrendered and issued under a value-for-value exchange and incremental compensation expense recognized was not material. In connection with the exchange, we recorded $1.4 million of deferred tax benefits.

At June 30, 2010, shares available for grant under the IGT SIP totaled 17.2 million and we expect to recognize $79.9 million of unrecognized share-based compensation over a weighted average period of 1.8 years. SIP activity is reflected below as of and for the nine months ended June 30, 2010.

		Weighted Average		
			Remaining	Aggregate
		Exercise	Contractual	Intrinsic
Options	Shares	Price	Term	Value
	(thousands)	(per share)	(years)	(millions)
Outstanding at beginning of fiscal year	18,022	$26.88		
Granted	3,982	18.99		
Exercised	(579)	12.29		
Forfeited	(705)	19.17		
Expired	(907)	33.59		
Stock options exchange:				
Granted	2,653	18.60

Vested	(687)	24.91		
Forfeited	(255)	28.40		
Outstanding at end of period	2,430	$19.02	1.6	$37.6
Expected to vest	2,298	$19.01	1.7	$35.5

7. ALLOWANCE FOR RECEIVABLES

	June 30, 2010	September 30, 2009
(In millions)		
Allowance for doubtful accounts receivable	$28.2	$23.4
Allowance for doubtful notes and contracts		
Current	$41.2	$22.6
Non-current	39.5	10.6
	$80.7	$33.2

See Note 18 regarding allowance recorded for Alabama-related notes and accounts receivable.

8. CONCENTRATIONS OF CREDIT RISK

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash and equivalents, investments, and receivables. We place short-term investments in high credit quality financial institutions and in short-duration high-quality securities. With the exception of US Government and Agency securities, our short-term investment policy limits the amount of credit exposure in any one financial institution, industry group, or type of investment. Cash on deposit may be in excess of Federal Deposit Insurance Corporation limits.

Our receivables were concentrated in the following legalized gaming regions at June 30, 2010. See Note 18 regarding Alabama charitable bingo receivables.

North America			International		
Nevada	9	%	Argentina	24	%
Alabama	6		Europe	9	
Oklahoma	6		Other Latin America	8	
Pennsylvania	5		Other (less than 5% individually)	6	
Other (less than 5% individually)	27			47	%
	53	%			

Auction Rate Securities

We held no ARS or corresponding put rights at June 30, 2010. During the first nine months of fiscal 2010, we sold $21.6 million par of ARS. The following changes in fair value were included in other income (expense):

- zero net gain ($1.0 million ARS gain and $1.0 million put loss) for the quarter ended June 30, 2010 and $0.5 million net gain ($0.7 million ARS gain and $0.2 million put loss) for the prior year quarter

- $0.3 million net gain ($3.8 million ARS gain and $3.5 million put loss) for the nine months ended June 30, 2010 and $0.5 million net loss ($4.2 million ARS loss and $3.7 million put gain) for the prior year period

9. GOODWILL AND OTHER INTANGIBLES

Goodwill

Activity by Segment Nine Months Ended June 30, 2010 (In millions)	North America	International	Total
Beginning balance	$1,042.8	$108.7	$1,151.5
Foreign currency adjustments	-	(2.3)	(2.3)
Ending balance	$1,042.8	$106.4	$1,149.2

Other Intangibles

During the nine months ended June 30, 2010, we added $1.8 million for capitalized patent legal costs with a weighted average life of 6 years. Additionally, during the second quarter of fiscal 2010, we recorded $6.7 million of impairment, presented in impairment and restructuring, primarily related to uncertainties surrounding the usage of DigiDeal patents in our future product strategies (see Note 18).

	June 30, 2010			September 30, 2009		
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
(In millions)						
Patents	$397.4	$238.4	$159.0	$396.3	$205.7	$190.6
Developed technology	76.5	44.9	31.6	76.7	37.3	39.4
Contracts	26.4	17.4	9.0	26.4	15.7	10.7

7.5% Bonds discount	(2.5)	(2.6)
5.5% Bonds discount	(1.3)	-
7.5% Swap fair value adjustment (see Note 15)	23.5	15.1
5.5% Swap fair value adjustment (see Note 15)	4.7	-
Total outstanding debt, net	$1,813.2	$2,020.0

IGT was in compliance with all applicable debt covenants at June 30, 2010. Embedded features of all debt agreements were evaluated and did not require bifurcation or had nominal value at June 30, 2010.

At the beginning of fiscal 2010, we adopted accounting standards requiring the separation of liability (debt) and equity (conversion option) components of our convertible debt instruments to reflect an effective nonconvertible borrowing rate at issuance. See Note 2 for amounts retrospectively recast in conjunction with this recently adopted accounting standard.

Domestic Credit Facility

In conjunction with new bonds issued in June 2010 discussed below, we reduced the total amount of our domestic credit facility from $1.8 billion to $1.5 billion, leaving the non-extended portion due December 2010 at $0.2 billion and the extended portion due June 2012 at $1.3 billion. At June 30, 2010, $0.3 billion was drawn ($0.1 billion non-extended and $0.2 billion extended), $1.2 billion was available, and $3.6 million was reserved for letters of credit. The amounts drawn carried a 2.7% weighted average interest rate.

Interest under the credit facility is paid at least quarterly with rates and facility fees based on our public debt ratings or debt to capitalization ratio. As of June 30, 2010, extended commitments bear interest at LIBOR plus 260 bps with a facility fee of 65 bps and non-extended commitments bear interest at LIBOR plus 37.5 bps with a facility fee of 12.5 bps.

Foreign Credit Facilities

At June 30, 2010, $8.4 million was available under a revolving credit facility in Australia which generally renews annually with maturity in March and is guaranteed by the parent company, International Game Technology. No amounts were drawn at June 30, 2010. Our former credit facilities in Japan were cancelled during the second quarter of fiscal 2010 with the closure of operations (see Note 19).

2.6% Convertible Debentures

On December 15, 2009, 2.6% Debentures of $701.2 million aggregate principal were validly tendered under the holders' put option and accepted by IGT for payment. On February 4, 2010, IGT completed final redemption of the remaining $5.8 million aggregate outstanding principal of Debentures.

As recast, the equity component of the 2.6% Debentures totaled $43.7 million and the effective interest rate was 6.2% on the debt component. As of December 31, 2009, the discount was fully amortized. The table below reflects contractual interest expense, discount amortization in interest expense, and repurchase gain (loss) included in other income (expense), as recast for the prior year periods.

	Quarters Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
(In millions)				
Contractual interest expense	$-	$4.6	$3.8	$15.5
Discount amortization	-	5.0	2.7	14.8
Gain (loss) on repurchases	-	-	-	1.3

3.25% Convertible Notes

As recast, the equity component of the Notes totaled $99.7 million and the effective interest rate was 8.7% on the debt component. The remaining discount amortization period was 3.9 years at June 30, 2010. The table below reflects contractual interest expense and discount amortization in interest expense, as recast for the prior year periods.

	Quarters Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
(In millions)				
Contractual interest expense	$6.9	$4.1	$20.7	$4.1
Discount amortization	7.1	4.1	20.9	4.1

The market price condition for convertibility of our Notes was not met and there were no related note hedges or warrants exercised at June 30, 2010.

7.5% Bonds

Interest rate swaps executed in conjunction with our 7.5% Bonds due 2019 are described in Note 15.

5.5% Bonds

On June 8, 2010, we issued $300.0 million aggregate principal amount of 5.5% Bonds due 2020, under our March 2009 shelf registration statement and June 3, 2010 prospectus supplement pursuant to an underwriting agreement dated June 3, 2010. We received net proceeds of $295.7 million after a discount of $1.3 million and deferred offering costs of approximately $3.0 million, both of which will be amortized to interest expense over the bond term. Interest is payable semiannually on June 15 and December 15, beginning December 15, 2010. Net proceeds from the 5.5% Bonds were used to reduce outstanding amounts under our domestic credit facility.

The 5.5% Bonds are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The 5.5% Bonds rank junior to all existing and future liabilities, including trade payables, of our subsidiaries. The 5.5% Bonds mature on June 15, 2020, unless IGT redeems them earlier by paying the holders 100% of the principal amount plus a make-whole redemption premium as described further in the related indenture.

The 5.5% Bonds contain covenants which may, in certain circumstances:

- restrict our ability to incur additional debt
- limit our ability to enter into sale and leaseback transactions
- restrict our ability to sell, transfer, lease or dispose of substantially all assets
- require us to grant a lien on equity interests if certain downgrades by rating agencies occur

The 5.5% Bonds specify a number of events of default (some of which are subject to applicable grace or cure periods), including the failure to make timely principal and interest payments or satisfy the covenants. Upon the occurrence of an event of default under the 5.5% Bonds, the outstanding amounts may become immediately due and payable.

Interest rate swaps executed in conjunction with our 5.5% Bonds due 2020 are described in Note 15.

11. CONTINGENCIES

Litigation

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits, including the lawsuits described below, to have a material adverse effect on our future results of operations, financial position, or cash flows.

Bally

2004 Federal District Court of Nevada

On December 7, 2004, IGT filed a complaint in US District Court for the District of Nevada, alleging that defendants Alliance Gaming Corp., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed six US patents held by IGT: US Patent Nos. 6,827,646; 5,848,932; 5,788,573; 5,722,891; 6,712,698; and 6,722,985. On January 21, 2005, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted fourteen counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, and unenforceability of the asserted patents, and for antitrust violations and intentional interference with prospective business advantage. IGT has successfully moved for partial summary judgment on defendants’ counterclaims for intentional interference with prospective business advantage and defendants’ antitrust allegations related to the gaming machine market. IGT denies the remaining allegations. On May 9, 2007, the Court issued an order construing disputed terms of the asserted patent claims. On October 16, 2008, the Court issued summary judgment rulings finding certain of IGT’s patents, including patents that IGT believes cover bonus wheel gaming machines, invalid as obvious. The rulings also found that Bally was not infringing certain patents asserted by IGT. Bally’s antitrust and unfair competition counterclaims remain pending. On November 7, 2008, the Court issued an order staying the proceedings and certifying the summary judgment and claim construction rulings for immediate appeal. On December 1, 2008, IGT appealed the rulings to the US Court of Appeals for the Federal Circuit. On January 8, 2009, Bally moved to dismiss the appeal on jurisdictional grounds. On February 2, 2009, the Federal

Circuit denied the Bally motion without prejudice to the parties raising jurisdictional issues in their merits briefs. On October 22, 2009, the Federal Circuit affirmed the District Court's summary judgment rulings. On December 7, 2009, Bally filed a motion to lift the stay and schedule a trial on the remaining issues. A hearing on the motion was held on February 1, 2010, at which the Court indicated that it would revisit earlier motions for summary judgment on the issues not addressed on appeal, including IGT's motions for summary judgment on Bally's antitrust and unfair competition counterclaims. The Court has under consideration motions for summary judgment or dismissal of all remaining claims pending in the case.

2006 Federal District Court of Delaware

On April 28, 2006, IGT filed a complaint in US District Court for the District of Delaware, alleging that defendants Bally Technologies, Inc., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed nine US patents held by IGT: US Patent Nos. RE 38,812; RE 37,885; 6,832,958; 6,319,125; 6,244,958; 6,431,983; 6,607,441; 6,565,434; and 6,620,046. The complaint alleges that the “BALLY POWER BONUSING™” technology infringes one or more of the claims of the asserted IGT patents. The lawsuit seeks monetary damages and an injunction. On June 30, 2006, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT’s asserted claims. Defendants also asserted twelve counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, and unenforceability of the asserted patents, antitrust violations, unfair competition, and intentional interference with prospective business advantage. IGT denies these allegations. Pursuant to stipulation of the parties, all claims and counterclaims except those relating to US Patent Nos. RE 37,885 ("the '885 patent"), RE 38,812 ("the '812 patent"), and 6,431,983 have been dismissed. All proceedings relating to Bally’s antitrust, unfair competition, and intentional interference counterclaims have been stayed. On April 28, 2009, the court issued a summary judgment ruling finding the '885 and '812 patents valid. The court also ruled that Bally's "Power Rewards" and "ACSC Power Winners" products infringe certain claims of the '885 and '812 patents. The court granted Bally's motion for summary judgment that Bally's "SDS Power Winners" does not infringe the '885 patent and "Power Bank" and "Power Promotions" do not infringe the '983 patent. The court denied Bally's motion for summary judgment that the '983 patent is invalid. The parties have agreed that Bally's counterclaim for a declaratory judgment on invalidity of the '983 patent will be dismissed without prejudice. IGT’s motion for a permanent injunction against Bally’s infringing products was denied. On April 28, 2010, the court entered an order dismissing without prejudice Bally’s remaining counterclaims (antitrust, unfair competition and intentional interference with business relationships) and entered final judgment in favor of IGT and against the Bally defendants. An appeal from the liability judgment is proceeding. A trial to determine the amount of damages incurred by IGT, and related matters, as a result of Bally's infringement has not yet been scheduled.

Aristocrat

2006 Northern Federal District Court of California

On June 12, 2006, Aristocrat Technologies Australia PTY Ltd. and Aristocrat Technologies, Inc. filed a patent infringement lawsuit against IGT. Aristocrat alleged that IGT willfully infringed US Patent No. 7,056,215, which issued on June 6, 2006. On December 15, 2006, Aristocrat filed an amended complaint, adding allegations that IGT willfully infringed US Patent No. 7,108,603, which issued on September 19, 2006. The IGT products named in the original and amended complaints were the Fort Knox® mystery progressive slot machines. On June 13, 2007, the US District Court for the Northern District of California entered an order granting summary judgment in favor of IGT declaring both patents invalid. The US Court of Appeals for the Federal Circuit reversed this decision on September 22, 2008. IGT’s request for a rehearing was denied on November 17, 2008. This case has recommenced in the District Court. On May 13, 2010, the District Court entered an Order granting IGT’s motion for summary judgment of non-infringement. Aristocrat is appealing this judgment. Proceedings on IGT’s claim that Aristocrat committed inequitable conduct in reviving a related patent application are continuing in the District Court. A trial is set on this issue for April 4, 2011.

Brochu v. Loto Quebec

Loto Quebec commenced an action in warranty against VLC, Inc., a wholly-owned subsidiary of IGT, and another manufacturer of video lottery machines in October 2003, in the Superior Court of the Province of Quebec, District of Quebec, seeking indemnification for any damages that may be awarded against Loto Quebec in a class action suit, also filed in the Superior Court of the Province of Quebec. The class action claim against Loto Quebec, to which

neither IGT nor any of its affiliates are parties, was filed by Jean Brochu on behalf of himself and a class of other persons who allegedly developed pathological behaviors through the play of video lottery machines made available by Loto Quebec in taverns and other public locations. In this action, the plaintiff seeks to recover on behalf of the class damages of approximately CAD$578.7 million, representing CAD$4,863 per class member, and CAD$119.0 million in punitive damages. Loto Quebec filed its Plea in Defense in the main action in February 2006. On August 1, 2008, Loto Quebec filed a discontinuance of the action in warranty against VLC. Notwithstanding the discontinuance, Loto Quebec may still pursue the claims it asserted, or could have asserted, in the action in warranty through arbitration against VLC. Settlement of the class action was approved by the Superior Court on March 23, 2010. In a letter, dated May 5, 2010, Loto Quebec's counsel referred to the settlement of the class action and the settlement agreement between Loto Quebec and VLC under which Loto Quebec discontinued its warranty action against VLC but reserved a right to pursue claims via arbitration (the "Settlement Agreement") and advised VLC that "Loto Quebec does not intend to proceed against Video Lottery Consultants, Inc. under the terms of the Settlement Agreement.

Piercey v Atlantic Lotteries

In May 2010, Atlantic Lotteries commenced an action against International Game Technology, VLC, Inc. and IGT-Canada, wholly-owned subsidiaries of International Game Technology, and other manufacturers of video lottery machines in the Supreme Court of New Foundland and Labrador seeking indemnification for any damages that may be awarded against Atlantic Lotteries in a class action suit also filed in the Supreme Court of New Foundland and Labrador. A motion to certify the putative class is pending.

Shareholder Actions

Securities Class Action

On July 30, 2009, International Brotherhood of Electrical Workers Local 697 filed a putative securities fraud class action in the US District Court for the District of Nevada, alleging causes of action under Sections 10(b) and 20(a) of the Securities Exchange Act against IGT and certain of its officers, one of whom is a director. The complaint alleges that between November 1, 2007 and October 30, 2008, the defendants inflated IGT's stock price through a series of materially false and misleading statements or omissions regarding IGT's business, operations, and prospects. The Court has appointed a lead plaintiff. The plaintiffs filed an amended complaint on April 26, 2010 and the defendants moved to dismiss that complaint on June 17, 2010.

Derivative Actions

Between August 20, 2009 and September 17, 2009, the Company was nominally sued in a series of derivative lawsuits filed in the US District Court for the District of Nevada, captioned Fosbre v. Matthews et al., Case No. 3:09-cv-00467; Calamore v. Matthews et al., Case No. 3:09-cv-00489-ECR-VPC; Israni v. Bittman, et al., Case No. 3:09-cv-00536; and Aronson v. Matthews et al., Case No. 3:09-cv-00542-RCJ-VPC. Plaintiffs purportedly brought their respective actions on behalf of the Company. The complaints assert claims against various current and former officers and directors of the Company, for breaches of fiduciary duties, unjust enrichment, abuse of control, gross mismanagement, waste of corporate assets, and contribution and indemnification. The complaints seek an unspecified amount of damages and allege similar facts as the securities class action lawsuit. The complaints additionally allege that certain individual defendants engaged in insider trading and that the director defendants improperly handled Thomas J. Matthews' resignation as Chief Executive Officer of the Company. The actions were consolidated and subsequently a consolidated derivative complaint was filed in December 2009. Defendants have moved to dismiss that complaint. On July 6, 2010, the Court granted the defendants' motion to dismiss, with leave to amend.

On September 30, 2009, the Company was nominally sued in a derivative lawsuit filed in the Second Judicial District Court of the State of Nevada, County of Washoe. Plaintiff purportedly filed the action on behalf of the Company. The lawsuit, captioned Kurz et al. v. Hart et al., Case No. cv-0-9-02982, asserts claims against various current and former officers and directors for breach of fiduciary duties and unjust enrichment. The complaint generally makes the same allegations as the federal derivative complaints and seeks an unspecified amount of damages. The parties have stipulated to stay this action pending the motions to dismiss in the above-mentioned consolidated federal derivative action.

In a letter dated October 7, 2009 to the Company's Board of Directors, a shareholder made factual allegations similar to those set forth in the above derivative and securities class actions and demanded that the Board investigate, address and remedy the harm allegedly inflicted on IGT. In particular, the letter alleges that certain officers and directors grossly mismanaged the Company by overspending in the area of R&D of server-based game technology despite a looming recession to which the Company was particularly vulnerable; by making or allowing false and misleading statements regarding the Company's growth prospects and earnings guidance; and by wasting corporate assets by

causing the Company to repurchase Company stock at inflated prices. The letter asserts that this alleged conduct resulted in breaches of fiduciary duties and violations of Section 10(b) of the Exchange Act and SEC Rule 10b-5. On July 9, 2010, the Company was nominally sued in a derivative lawsuit filed in the US District Court for the District of Nevada, captioned Sprando v. Hart, et al., Case No. 3:10-cv-00415-RCJ-VPC and asserting claims as set forth above.

ERISA Actions

On October 2, 2009, two putative class action lawsuits were filed on behalf of participants in the Company's employee pension plans, naming as defendants the Company, the IGT Profit Sharing Plan Committee, and several current and former officers and directors. The complaints (which seek unspecified damages) allege breaches of fiduciary duty under the Employee Retirement Income Security Act, 29 U.S.C §§ 1109 and 1132. The complaints allege similar facts as the securities class action lawsuit. The complaints further allege that the defendants breached fiduciary duties to Plan Participants by failing to disclose material facts to Plan Participants, failing to exercise their fiduciary duties solely in the interest of the Participants, failing to properly manage Plan assets, failing to diversify Plan assets, and permitting Participants to elect to invest in Company stock. The actions, filed in the US District Court for the District of Nevada, are captioned Carr et al. v. International Game Technology et al., Case No. 3:09-cv-00584, and Jordan et al. v. International Game Technology et al., Case No. 3:09-cv-00585. In October 2009, plaintiffs moved for consolidation of the two actions which motion was granted. On April 9, 2010, defendants moved to dismiss the consolidated complaint.

Environmental Matters

CCSC, a casino operation sold by IGT in April 2003, is located in an area that has been designated by the EPA as an active Superfund site because of contamination from historic mining activity in the area. In order for Anchor Coin, an entity IGT acquired in December 2001, to develop the CCSC site, it voluntarily entered into an administrative order of consent with the EPA to conduct soil removal and analysis (a requirement imposed on similarly situated property developers within the region) in conjunction with re-routing mine drainage. The work and obligations contemplated by the agreement were completed by Anchor in June 1998, and the EPA subsequently issued a termination of the order.

The EPA, together with other property developers excluding CCSC, continues remediation activities at the site. While we believe our remediation obligations are complete, it is possible that additional contamination may be identified and we could be obligated to participate in remediation efforts. Under accounting guidance for environmental remediation liabilities, we determined the incurrence of additional remediation costs is neither probable nor reasonably estimable and no liability has been recorded.

OSHA / Wrongful Termination Matter

On July 8, 2004, two former employees filed a complaint with the US Department of Labor, OSHA alleging retaliatory termination in violation of the Sarbanes-Oxley Act of 2002. The former employees allege that they were terminated in retaliation for questioning whether Anchor and its executives failed to properly disclose information allegedly affecting the value of Anchor's patents in connection with IGT's acquisition of Anchor in December 2001. The former employees also allege that the acquired patents were overvalued on the financial statements of IGT. Outside counsel, retained by an independent committee of our Board of Directors, reviewed the allegations and found them to be entirely without merit.

On November 10, 2004, the employees withdrew their complaint filed with OSHA and filed a notice of intent to file a complaint in federal court. On December 1, 2004, a complaint was filed under seal in the US District Court for the District of Nevada, based on the same facts set forth above regarding their OSHA complaint. IGT filed a motion for summary judgment as to all claims in plaintiffs' complaint. On June 14, 2007, the US District Court for the District of Nevada entered an order granting summary judgment in favor of IGT as to plaintiffs' Sarbanes-Oxley whistle-blower claims and dismissed their state law claims without prejudice. Plaintiffs' motion for reconsideration of the District Court's decision was denied. Plaintiffs appealed to the US Court of Appeals for the Ninth Circuit. Oral argument was heard on March 12, 2009, and on August 3, 2009, the Ninth Circuit reversed the District Court's decision. IGT's motion

for summary judgment on plaintiffs' state law claims was argued on October 22, 2009 and granted in IGT's favor on December 8, 2009. On April 13, 2010, the District Court granted IGT's motion to strike the plaintiffs' jury demand and granted IGT's motion to retax costs and fees. It denied plaintiffs' motion for certification and/or reconsideration. Trial was scheduled to begin on June 1, 2010, but was rescheduled to begin on January 23, 2011.

In conjunction with the Anchor acquisition purchase price allocation as of December 31, 2001, IGT used the relief of royalty valuation methodology to estimate the fair value of the patents at $164.4 million. The carrying value of the patents at June 30, 2010 totaled $44.1 million.

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds and guarantees not reflected in our balance sheet. We do not expect any material losses to result from these arrangements and are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to gaming operations totaled $7.0 million at June 30, 2010. We are liable to reimburse the bond issuer in the event of exercise due to nonperformance.

Letters of Credit

Outstanding letters of credit issued under our domestic line of credit to ensure payment to certain vendors and governmental agencies totaled $3.6 million at June 30, 2010.

IGT Licensor Arrangements

Our sales agreements that include software and IP licensing arrangements may require IGT to indemnify the third-party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark infringement, or trade secret misappropriation. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Product Warranties

The majority of our products are generally covered by a warranty for periods ranging from 90 days to one year. We estimate accrued warranty costs in the table below based on historical trends in product failure rates and expected costs to provide warranty services.

Nine Months Ended June 30, (In millions)	2010	2009
Balance at beginning of year	$7.9	$8.4
Reduction for payments made	(7.9)	(5.6)
Accrual for new warranties issued	6.7	7.8
Adjustments for pre-existing warranties	(0.8)	(1.9)
Balance at end of period	$5.9	$8.7

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates for claims incurred but not reported.

State and Federal Taxes

We are subject to sales, use, income, gaming and other tax audits and administrative proceedings in various US federal, state, local, and foreign jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

12. INCOME TAXES

Our provision for income taxes is based on estimated effective annual income tax rates. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized.

Our effective tax rate for the nine months ended June 30, 2010 decreased to 22.5% from 30.3% for the same prior year period, primarily due to settlement of the IRS audit for fiscal years 2002 through 2005 partially offset by changes in our uncertain tax liabilities.

As of June 30, 2010, we had $39.6 million of gross unrecognized tax benefits excluding related accrued interest and penalties of $16.8 million. As of June 30, 2010, $48.1 million of our unrecognized tax benefits, including related accrued interest and penalties, would affect our effective tax rate, if recognized. During the nine months ended June 30, 2010, our unrecognized tax benefits decreased $28.2 million, and related interest and penalties decreased $29.7 million. The decrease in unrecognized tax benefits relating to settlements with tax authorities was $45.2 million. The increase in unrecognized tax benefits as a result of tax positions taken during a prior period was $13.0 million. The increase in unrecognized tax benefits as a result of tax positions taken in the current nine-month period was $4.0 million.

On April 30, 2010, the IRS concluded its examination of our consolidated US tax return for the fiscal years 2002 through 2005. In accordance with the final settlement reached with the IRS, we paid the IRS approximately $12.4 million, including interest of $4.3 million during the third quarter of fiscal 2010.

We are also subject to examination in state and foreign jurisdictions. We believe we have recorded all appropriate provisions for outstanding issues for all jurisdictions and open years. However, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

13. EARNINGS PER SHARE RECONCILIATION

	Quarters Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
(In millions, except per share amounts)				
Income from continuing operations available to common shares (1)	$ 94.6	$ 62.2	$ 189.3	$ 159.6
Basic weighted average shares outstanding	297.0	294.3	296.0	293.7
Dilutive effect of non-participating share-based awards	1.9	0.3	2.1	0.1
Diluted weighted average common shares outstanding	298.9	294.6	298.1	293.8
Basic earnings per share from continuing operations	$ 0.32	$ 0.21	$ 0.64	$ 0.54
Diluted earnings per share from continuing operations	$ 0.32	$ 0.21	$ 0.63	$ 0.54
Weighted average shares excluded from diluted EPS because the effect would be anti-dilutive:				

Share-based awards	9.5	15.6	10.2	19.7
Debentures	-	11.4	-	11.4
Notes	42.6	-	42.6	-
Note hedges	(42.6)	-	(42.6)	-
Warrants	42.6	-	42.6	-

(1) Net income available to participating securities was not significant

14. OTHER COMPREHENSIVE INCOME

	Quarters Ended June 30,		Nine Months Ended June 30,	
	2010	2009	2010	2009
(In millions)				
Net income	$92.1	$60.6	$166.1	$155.4
Currency translation adjustments	(9.8)	21.2	(12.1)	(8.8)
Investment unrealized gains (losses)	(4.5)	11.5	4.9	10.0
Comprehensive income	$77.8	$93.3	$158.9	$156.6

15. FINANCIAL DERIVATIVES

Foreign Currency Hedging

We hedge our net foreign currency exposure related to monetary assets and liabilities denominated in nonfunctional currency. The notional amount of foreign currency contracts hedging this exposure totaled $37.9 million at June 30, 2010 and $24.9 million at September 30, 2009.

In May 2007, we executed five-year forward contracts designated as a fair value hedge to protect a portion of the US dollar value of our Hong Kong dollar investment in the CLS convertible note (see Note 3). The notional amount of foreign currency contracts hedging this exposure totaled $49.9 million for which there was no ineffectiveness for the three months and the nine months ended June 30, 2010. The component of gain/loss excluded from our assessment of hedge effectiveness was immaterial.

Interest Rate Management

In conjunction with our 7.5% Bonds issued in June 2009, we executed $250.0 million notional value of interest rate swaps that terminate on June 15, 2019. These swaps effectively exchange 7.5% fixed interest payments for variable rate interest payments at one-month LIBOR plus 342 bps reset on the 15th of each month. Net amounts receivable or payable under the swaps settle semiannually on June 15 and December 15. The interest rate swaps are designated fair value hedges against changes in the fair value of a portion of our 7.5% Bonds. Our assessment determined that the interest rate swaps are highly effective.

In conjunction with our 5.5% Bonds issued in June 2010, we executed $300.0 million notional value of interest rate swaps that terminate on June 15, 2020. These swaps effectively exchange 5.5% fixed interest payments for variable rate interest payments based on the six-month LIBOR plus 186 bps set in arrears on June 13 and December 13 of each year. Net amounts receivable or payable under the swaps will be settled semiannually on June 15 and December 15. The interest rate swaps are designated fair value hedges against changes in the fair value of a portion of our 5.5% Bonds. Our assessment determined that the interest rate swaps are highly effective.

Presentation of Derivative Amounts

Reconciliation of Items Carried at Fair Value Using Significant Unobservable Inputs (Level 3)

	Nine Months Ended June 30, 2010		2009	
	Investments in Unconsolidated Affiliates	Investments in ARS and Put Rights	Investments in Unconsolidated Affiliates	Investments in ARS and Put Rights
(In millions)				
Beginning balance	$78.4	$21.3	$80.4	$19.6
Total gain (loss):				
Included in other income (expense) - other	-	0.3	(1.7)	(0.5)
Included in other comprehensive income	5.6	-	2.4	2.0
Purchases, issuances, accretion, settlements	1.9	(21.6)	(3.9)	-
Ending balance	$85.9	$-	$77.2	$21.1
Net change in unrealized gain (loss) included in earnings related to instruments still held	$-	$-	$-	$(0.5)

Valuation Techniques and Balance Sheet Presentation

Investments in unconsolidated affiliates carried at fair value are estimated using quoted market prices when available or DCF models incorporating market participant assumptions, including credit quality and market interest rates and/or a Black-Scholes formula and lattice models with certain assumptions, such as stock price and volatility. These investments are presented as a component of other assets. See Note 3.

Investments in ARS were valued using DCF, with certain assumptions related to lack of liquidity and observable market transactions. Related put rights were valued based on the difference between the ARS par and fair value, discounted for the broker's non-performance risk and the time remaining until the exercise period. The ARS and related put rights were presented in short-term investment securities. See Note 8.

Derivative assets and liabilities are valued using quoted forward pricing from bank counterparties and LIBOR credit default swap rates for non-performance risk, and approximate the net settlement amount if the contracts were settled at the reporting date. These are presented primarily as components of other assets, other liabilities, and notes payable. See Note 15.

Financial Assets (Liabilities) Not Carried at Fair Value

June 30, 2010 (In millions)	Carrying Amount	Fair Value	Unrealized Gain	Unrealized Loss
Jackpot investments	$438.1	$498.4	$60.3	$-
Notes & contracts receivable	376.4	378.9	2.5	-
Jackpot liabilities	(570.9)	(554.2)	16.7	-
Credit facilities & indebtedness	(1,785.0)	(2,084.0)	-	299.0

September 30, 2009 (In millions)	Carrying Amount	Fair Value	Unrealized Gain	Unrealized Loss
Jackpot investments	$464.1	$518.0	$54.1	$0.2
Notes & contracts receivable	404.2	413.8	9.6	-
Jackpot liabilities	(588.1)	(595.5)	-	7.4
Credit facilities & indebtedness	(2,004.9)	(2,435.0)	-	430.1

Valuation Techniques and Balance Sheet Presentation

Jackpot investments are valued based on quoted market prices.

Notes and contracts receivable are valued using DCF incorporating expected payments and current market interest rates relative to the credit risk of each customer.

Jackpot liabilities are valued using DCF models incorporating estimated funding rates, future payment timing, and IGT's nonperformance credit risk.

Credit facilities and indebtedness are valued at quoted market prices or dealer quotes for the identical liability when traded as an asset in an active market when available. Otherwise, the fair value is determined using DCF models of expected payments on outstanding borrowings at current borrowing rates. The swap fair value adjustment presented as a component of notes payable is excluded from the credit facilities amounts not carried at fair value in the table above. The prior period reflects the retrospective application of accounting guidance for convertible debt instruments adopted at the beginning of fiscal 2010. See Note 2 and Note 10.

17. BUSINESS SEGMENTS

We view our business in the following two operating segments:

- ♠ North America includes our operations associated with customers located in the US and Canada
- ♠ International includes our operations associated with customers located in all other jurisdictions

Certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to any operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming products between operating segments. Segment accounting policies are consistent with those of our consolidated financial statements and segment profit is measured on the basis of operating income. Restructuring charges are reflected within the segment where actions occurred (see Note 18).

Our business segments below are designed to allocate resources within a framework of management responsibility. Operating costs from one segment may benefit other segments. Realignment of our business development and administrative functions, as well as discontinued operations, during fiscal 2010 resulted in changes to segment allocations. Operating income and income from continuing operations before tax for prior periods presented have been recast accordingly.

	2010	2009	2010	2009
(In millions)				
Impairment - Alabama	$-	$-	$53.1	$-
Impairment - DigiDeal	-	-	6.7	-
Restructuring - Other	2.7	3.0	3.6	28.7
Total included in continuing operations	$2.7	$3.0	$63.4	$28.7

Alabama Impairment

The legality of electronic charitable bingo in Alabama continues to be challenged by the state Governor's task force on gambling. Legislation that would have allowed Alabama voters to decide on the addition of a state constitutional amendment authorizing electronic bingo failed to pass the legislative session concluded in April 2010. Additionally, several Alabama Supreme Court cases have negatively impacted the ability of electronic charitable bingo properties to continue operations.

As the legal and political climate continues to deteriorate, we have determined the recoverability of our assets in this market is impaired. In the second quarter of fiscal 2010, we recognized $53.1 million of impairment charges, including note allowances of $47.6 million, accounts receivable allowances of $2.8 million, and gaming operations equipment impairment of $2.7 million. The fair value was determined using a DCF model and risk-based market discount rates, with consideration for associated property collateral. Based on our third quarter evaluation, there was no change in our expectations.

As of June 30, 2010, two of the three locations where IGT placed electronic bingo machines, Country Crossing and Greenetrack, had ceased operations. The third location, VictoryLand, voluntarily closed operations on August 9, 2010. Prior to its voluntary closure, VictoryLand was operating under a temporary restraining order entered by the circuit court. The temporary restraining order was subsequently dissolved by an Alabama Supreme Court opinion on July 30, 2010, which will become final on August 17, 2010 unless VictoryLand files an application for reconsideration. On August 5, 2010, the Governor's task force filed an emergency motion with the Alabama Supreme Court seeking immediate certification of the Court's judgment dissolving the Circuit Court's temporary restraining order.

Our net carrying amounts at June 30, 2010 totaled $37.3 million for development financing and accounts receivable extended to Alabama charitable bingo properties and $5.1 million for related gaming operations equipment. Revenues and interest income related to these assets were recorded on a cash basis subsequent to the first quarter of fiscal 2010 as collectability is not reasonably assured.

DigiDeal Impairment

During the second quarter of fiscal 2010, we recognized $6.7 million of intellectual property impairment primarily related to uncertainties surrounding the usage of DigiDeal patents in our future product strategies. After concluding that our carrying value was not recoverable from estimated future cash flows to be generated by these intangible assets, the fair value was determined using a relief from royalty method to calculate the present value of market-based royalty license fees avoided by owning the patents.

In July 2010, we executed a definitive agreement with DigiDeal, under which we will divest our equity interest in DigiDeal and cease to manufacture and distribute DigiDeal products. The transaction is anticipated to close by September 30, 2010 and we expect to recognize between $6.0 million and $8.0 million of additional charges related to DigiDeal's deconsolidation in the fourth quarter of fiscal 2010. Excluding impairment, DigiDeal contributed net losses of $3.3 million for the first nine months of fiscal 2010 and $3.6 million for the comparable prior year period to our consolidated income from continuing operations.

Restructuring

In response to reduced demand, we continue to restructure our organization to maximize efficiency and align expenses with the current and long-term business outlook. During the second quarter of fiscal 2010, we initiated the closure of our international operations in Japan due to ongoing difficult market conditions and changes in our core business strategy. We also began the process of closing and consolidating certain North America facilities.

During the third quarter of fiscal 2010, we recorded restructuring charges in continuing operations of $2.7 million related to our North America reorganization. These restructuring charges were comprised of $0.9 million in severance and employee termination costs, $0.4 million in accelerated stock compensation, and $1.4 million in lease termination and other fees. In addition, we recorded third quarter restructuring charges in discontinued operations of $2.3 million related to the closure of our Japan operations, comprised of $0.4 million in lease cancellation fees and $1.9 million for abandoned assets.

We expect to incur additional restructuring charges in continuing operations of $1.9 million over the next three quarters.

Restructuring Charges and Liability As Of and For the Nine Months Ended June 30, 2010

19. DISCONTINUED OPERATIONS

In February 2010, we initiated the closure of our international operations in Japan due to ongoing difficult market conditions and changes in our future core business strategy. Other than the final resolution of certain third-party agreements, the closure was substantially complete and Japan's results were reclassified to discontinued operations for all periods presented. At June 30, 2010, total assets of discontinued operations were presented as a component of current other assets and deferred costs, and total liabilities of discontinued operations were presented as a component of other accrued liabilities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

MDA is intended to enhance the reader's understanding of our business. The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2009, our Current Report on Form 8-K filed on June 3, 2010, which revised and recast certain financial information from our Annual Report on Form 10-K for the year ended September 30, 2009, to reflect the retrospective application of accounting standards adopted at the beginning of fiscal 2010, as well as the accompanying Unaudited Condensed Consolidated Financial Statements and Notes included in Item 1 of this Form 10-Q.

Unless the context indicates otherwise, International Game Technology, IGT, we, our, or the Company refers to International Game Technology and its consolidated entities. Italicized text in this document with an attached superscript trademark or copyright notation indicates trademarks of IGT or its licensors. All comparisons herein refer to the third quarter and nine months ended June 30, 2010 as compared with the third quarter and nine months ended June 30, 2009, unless otherwise noted. As used in this report, "current" refers to the fiscal periods ended June 30, 2010.

FORWARD LOOKING STATEMENTS

This report contains statements that do not relate to historical or current facts, but are "forward looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments, or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, appear, believe, could, would, estimate, expect, indicate, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

- ♠ our ability to introduce new products and their impact on replacement demand
- ♠ the timing, features, benefits, and expected continued or future success of new product introductions and ongoing product and marketing initiatives
- ♠ our leadership position in the market
- ♠ the advantages offered to customers by our anticipated products and product features
- ♠ gaming growth, expansion, and new market opportunities
- ♠ fluctuations in future gross margins and tax rates
- ♠ increasing product sales or machine placements
- ♠ legislative or regulatory developments and related market opportunities
- ♠ available capital resources to fund future operating requirements, capital expenditures, payment obligations, and share repurchases
- ♠ expectations related to the timing and cost associated with restructuring efforts and deconsolidations

- losses from off-balance sheet arrangements
- financial returns to shareholders related to management of our costs
- the impact of recently adopted accounting pronouncements
- the outcome and expense of litigation
- anticipated increased revenue yields and operating margin if general economic conditions improve

Actual results could differ materially from those expressed or implied in our forward looking statements. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. See Item 1A, Risk Factors, in this report for a discussion of these and other risks and uncertainties. You should not assume at any point in the future that the forward looking statements in this report are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

OVERVIEW

International Game Technology is a global company specializing in the design, manufacture, and marketing of electronic gaming equipment and systems products. We are a leading supplier of gaming products in essentially all legal jurisdictions worldwide and provide a diverse offering of quality products and services at competitive prices, designed to increase the potential for gaming operator profits by enhancing the player's experience.

We manage our operations in two geographic segments, North America and International, with certain unallocated company-wide income and expenses managed at the corporate level. See BUSINESS SEGMENT RESULTS below and Note 17 of our Unaudited Condensed Consolidated Financial Statements for additional segment information.

Demand for our gaming equipment, software, and services is affected by global macroeconomic factors, as well as intense competition among suppliers. While our customers' capital spending remains conservative due to continued economic uncertainty, we continue to focus our efforts on making IGT financially stronger and operationally more efficient.

- ♠ During the current quarter, we refinanced $300.0 million of debt to improve our borrowing flexibility by extending maturities. We issued 5.5% bonds due 2020 under our shelf registration statement and reduced the size of our domestic credit facility. We have also reduced our outstanding debt obligations by $242.3 million since September 30, 2009.

- ♠ We are aggressively managing our cost structure and third quarter operating expense decreased 8% from the prior year quarter. We expect to realize ongoing operational efficiencies from our restructuring efforts, working toward reaching our long-term goal of a 30% operating margin when business conditions improve.

- ♠ We are addressing the need for increased efficiency among our global research and development resources by unifying and standardizing platforms and processes, reducing the complexity of our hardware portfolio, and increasing engineering efforts on sbX™ applications and content. Through June 30, 2010, we had completed fourteen sbX™ installations to date, with an additional four in-process, and numerous others in various stages of contract negotiation.

- ♠ We continued to develop and deliver our latest product innovations. Current quarter gaming operations revenue yields overall improved slightly compared to the prior year quarter. Our Sex and the City participation placements (non-WAP), with approximately 1,300 units deployed, continued to perform well during the third quarter. During the first nine months, we also developed and released twice as many for-sale game titles compared to the same period last year. Under our customer promotion introduced in November 2009 that ended June 30, 2010, we sold 6,300 Dynamix™ packages, which included one AVP® slot machine with two free 80960 platform conversions. This promotion allowed our customers to refresh three machines concurrently and enabled IGT to preserve floor space.

- ♠ During the current quarter, we continued to build and strengthen our senior management team, with the appointment of Eric Tom as our Chief Operating Officer and the expansion of responsibilities for our Chief Technology Officer, Chris Satchell, to include the leadership of research and development. Additionally, an experienced media executive, Vincent Sadusky, was appointed to our Board of Directors.

We believe new market opportunities will grow when the economy improves and new jurisdictions consider gaming tax revenues as a means to address budget shortfalls. We may also be negatively impacted by changes in existing gaming regulations or new interpretations of existing gaming laws that may hinder or prevent us from continuing to operate in jurisdictions where we currently do business. We are closely monitoring ongoing gaming actions in Ohio, Illinois, Massachusetts, Kentucky, New Hampshire, Canada, Italy, Brazil, and Greece. See further discussion

surrounding regulatory challenges in Alabama in CONSOLIDATED OPERATING RESULTS and BUSINESS SEGMENT RESULTS later in this MDA.

As part of our ongoing evaluation of long-term strategic goals, it is necessary to assess if and how existing investments will fit into our future organizational structure. The resulting recognition of material losses or impairment and discontinued operations during the periods of this analysis is further discussed under CONSOLIDATED OPERATING RESULTS and BUSINESS SEGMENT RESULTS later in this MDA.

RECENTLY ISSUED ACCOUNTING STANDARDS

Other recently issued accounting standards that may impact our financial statements, as well as those noted below in this MDA, are discussed further in Note 2 of our Unaudited Condensed Consolidated Financial Statements.

Revenue Recognition For Software-enabled Products and Multi-element Arrangements

In October 2009, the FASB issued ASUs about revenue recognition for certain software-enabled products and multi-element arrangements. Under these ASUs, tangible products, containing both software and nonsoftware components that function together to deliver a tangible product's essential functionality, are no longer subject to software revenue accounting. These ASUs also established a more economically aligned model for allocating revenues among deliverables in a multi-element arrangement, based on relative selling prices.

We elected to early adopt these ASUs prospectively for new or materially modified arrangements entered into on or after the beginning of our first quarter of fiscal 2010. Revenues recognized in the current year periods which would have been recognized in different periods under the prior accounting guidance are reflected in the discussion below under CONSOLIDATED OPERATING RESULTS. Although this adoption is not currently expected to have a significant effect on the timing or amount of future revenues, the impact is dependent upon the prevalence of multi-element arrangements and the evolution of new sales strategies.

Convertible Debt Instruments

At the beginning of fiscal 2010, we adopted an ASU issued in May 2008 requiring the separation of liability (debt) and equity (conversion option) components for convertible debt instruments that may settle in cash upon conversion to reflect an effective nonconvertible borrowing rate when the debt was issued. We estimated the fair value of our Debentures (1.75% and 2.6%) and Notes using similar nonconvertible debt instruments at issuance and allocated an equity component included in paid-in capital that represents the estimated fair value of the conversion feature at issuance.

The adoption of this ASU is expected to increase annual noncash interest expense approximately $30.0 million for fiscal years 2010 and 2009, and Debenture repurchase gains are expected to decrease $5.2 million for fiscal 2009, collectively reducing diluted EPS $0.06 for fiscal 2010 and $0.08 for 2009. Additional noncash interest for the periods covered in this report are reflected in the discussion below under CONSOLIDATED OPERATING RESULTS—Other Income (Expense).

Additionally, the adoption of this ASU decreased long-term debt, deferred tax assets and deferred offering costs and increased stockholders' equity. See Note 2 and Note 10 of our Unaudited Condensed Consolidated Financial Statements for a comprehensive list of adjustments related to the retrospective application of this ASU and additional information about our Debentures and Notes.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the US. Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understand and evaluate our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. The following accounting estimates are considered the most sensitive to changes from external factors:

- revenue recognition
- goodwill, other intangible assets, royalties, and affiliate investments
- jackpot liabilities and expenses
- inventory and gaming operations equipment
- income taxes

Except for the prospective adoption of accounting standards related to revenue recognition for new arrangements that include software-enabled products and multiple deliverables as discussed above, there have been no significant changes in our critical accounting estimates since those presented in Item 7 of our Annual Report on Form 10-K for the fiscal year ended September 30, 2009.

CONSOLIDATED RESULTS – A Year Over Year Comparative Analysis

	Quarters Ended June 30,		Favorable (Unfavorable)		Nine Months Ended June 30,		Favorable (Unfavorable)

Net income	$ 0.31	$ 0.20	$ 0.11	55 %	$ 0.55	$ 0.53	$ 0.02	4 %

Three months ended June 30, 2010 compared with three months ended June 30, 2009

Operating income decreased with revenue declines in both gaming operations and product sales, primarily attributable to fewer new casino openings, strong competition, and conservative casino capital spending in an uncertain economy. Revenue declines were partially offset by changes in foreign exchange rates, which increased current quarter revenues by approximately $6.6 million. Savings in operating costs and material costs were partially offset by increased jackpot expense resulting from unfavorable interest rate changes during the current quarter.

The current quarter income from continuing operations was significantly impacted by certain favorable discrete tax items of $36.7 million, primarily related to the IRS audit settlement for fiscal years 2002 through 2005, partially offset by changes in uncertain tax liabilities.

With the early adoption of revenue recognition ASUs for certain software-enabled products and multi-element arrangements, we recognized revenues of $7.9 million during the current quarter which would have been recognized in different periods under prior accounting guidance. See additional discussion about these ASUs under RECENTLY ISSUED ACCOUNTING STANDARDS above in this MDA.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

Significant items affecting comparability included:

- impairment charges of $59.8 million ($40.1 million after tax) in the current nine months, including $53.1 million related to the Alabama charitable bingo market and $6.7 million for DigiDeal patents, as further discussed below under “Operating Expenses”

- restructuring charges of $3.6 million ($2.2 million after tax) in current nine months and $28.7 million ($17.9 million after tax) in the prior year period, as further discussed below under “Operating Expenses”

- certain discrete tax benefits of $36.7 million in the current nine months and $17.1 million in the prior year period, as further discussed below under “Income Tax Provision”

Increased operating income was largely the result of cost saving initiatives. Revenue declines in both gaming operations and product sales were primarily attributable to fewer new casino openings, strong competition and conservative casino capital spending in an uncertain economy. Revenue declines were partially offset by changes in foreign exchange rates, which increased revenues by approximately $27.2 million.

Impairment charges in the current year were partially offset by reduced restructuring charges. Restructuring charges included in operating expenses related to the reorganization of certain US facilities in the fiscal 2010 period and to our global workforce reduction in the fiscal 2009 period. Additionally, the prior year period included an extra week due to our 52/53-week accounting year, primarily increasing gaming operations revenues and gross profit, as well as operating expenses.

The early adoption of revenue recognition ASUs for certain software-enable products and multi-element arrangements at the beginning of fiscal 2010 resulted in the recognition of $31.7 million in the first nine months of fiscal 2010 that would have been recognized in later periods under the prior accounting guidance.

Loss from Discontinued Operations

In February 2010, we announced our decision to close international operations in Japan due to ongoing difficult market conditions and changes in our future core business strategy. During the quarter ended June 30, 2010, the closure of Japan’s operations was substantially complete and its results were reclassified to discontinued operations for all periods presented. Restructuring charges included in discontinued operations totaled $2.3 million and $17.8 million for the three months and nine months ended June 30, 2010, respectively, and $1.1 million for both the quarter and nine months ended June 30, 2009. See Note 19 of our Unaudited Condensed Consolidated Financial Statements for additional information about discontinued operations.

Alabama

The legality of electronic charitable bingo in Alabama continues to be challenged by the Governor’s task force on gambling. As of June 30, 2010, two of the three locations where IGT placed electronic bingo machines, Country Crossing and Greenetrack, had ceased operations. The third location, VictoryLand, voluntarily closed operations on August 9, 2010. Prior to its voluntary closure, VictoryLand was operating under a temporary restraining order entered by the circuit court. The temporary restraining order was subsequently dissolved by an Alabama Supreme Court opinion on July 30, 2010, which will become final on August 17, 2010 unless VictoryLand files an application for reconsideration. On August 5, 2010, the Governor’s task force filed an emergency motion with the Alabama Supreme Court seeking immediate certification of the Court’s judgment dissolving the Circuit Court’s temporary restraining

order.

Consolidated Gaming Operations

Three months ended June 30, 2010 compared with three months ended June 30, 2009

Gaming operations revenues and gross profit declined primarily due to a lower installed base and the continued shift toward lower price-point machines. Installed base decreases in North America, largely related to regulatory challenges in Alabama, were partially offset by increases in international markets.

Gross margin declined primarily due to increased jackpot expense resulting from unfavorable interest rate changes. Interest rate changes include amounts recorded on jackpot liabilities outstanding since the beginning of the third quarter 2010, as well as the variance due to amounts recorded for meter growth from new play during the period. Jackpot expense increased $10.3 million due to unfavorable interest rate movement and $2.7 million due to variations in slot play, partially offset by a decrease of $4.0 million due to fewer WAP units, for an overall net increase of $9.0 million.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

Gaming operations revenues and gross profit decreased primarily due to a lower installed base, largely from the removal or shut-down of electronic charitable bingo terminals in Alabama, as well as the continued shift toward lower price-point machines. Additionally, the extra week in the prior year period contributed approximately $22.4 million in consolidated gaming operations revenues and approximately $11.5 million in gross profit. Growth in our International installed base partially offset declines in North America. Decreased average revenues per unit reflect our continued shift toward lower price-point non-WAP machines.

Gross margins improved from reduced costs, primarily depreciation, royalties, and jackpot expense. Jackpot expense decreased $17.3 million overall, $14.3 million due to fewer WAP units and $4.9 million due to favorable interest rate effect, partially offset by variations in slot play.

Deferred revenue decreased $10.2 million during the third quarter of fiscal 2010 to $91.8 million at June 30, 2010, primarily related to the completion of obligations under multi-element contracts. During the third quarter of fiscal 2010, we shipped 200 units for which revenues were deferred and recognized revenues for 1,100 units previously shipped, for a net decrease of 900 units in deferred revenue. “Units shipped” represent all units shipped to customers during the period and includes units shipped for which revenues were deferred to future periods. Product sales units recognized (as presented in the table above) include units previously shipped for which revenues were recognized during the period and exclude units shipped during the period for which revenues were deferred. Certain units associated with a systems lease are prorated based on revenues recognized.

Consolidated Product Sales

Three months ended June 30, 2010 compared with three months ended June 30, 2009

Product sales revenues and gross profit decreased with lower unit volume in North America with fewer new openings, partially offset by favorable changes in foreign exchange rates. Gross margin improved primarily due to reduced material costs and an increased mix of higher-margin non-machine revenues.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

Product sales revenues and gross profit decreased primarily on decreased units in North America, partially offset by increased International units and favorable changes in foreign exchange rates. Gross margin improvement was

attributable to reduced material costs.

Deferred revenue decreased $30.2 million during the first nine months of fiscal 2010, primarily related to the completion of obligations under multi-element contracts. During the nine months ended June 30, 2010, we shipped 2,400 units for which revenues were deferred and recognized revenues for 4,900 units previously shipped, for a net decrease of 2,500 units in deferred revenue.

Operating Expenses

	Quarters Ended June 30,		Favorable (Unfavorable)		Nine Months Ended June 30,		Favorable (Unfavorable)	
	2010	2009	Amount	%	2010	2009	Amount	%
(In millions)								
Selling, general and administrative	$82.3	$94.8	$12.5	13 %	$254.4	$315.2	$60.8	19 %
Research and development	51.6	51.3	(0.3)	-1 %	149.4	155.2	5.8	4 %
Depreciation and amortization	19.1	19.7	0.6	3 %	57.5	58.8	1.3	2 %
Impairment and restructuring	2.7	3.0	0.3	*	63.4	28.7	(34.7)	*
Total operating expenses	$155.7	$168.8	$13.1	8 %	$524.7	$557.9	$33.2	6 %
Percent of revenues	32 %	33 %			35 %	35 %		

Three months ended June 30, 2010 compared with three months ended June 30, 2009

The 8% decrease in third quarter operating expenses was primarily due to our cost saving efforts initiated at the beginning of fiscal 2009. Professional fees in the prior year also included debt refinancing costs of $1.8 million.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

The decrease in operating expenses for the nine months was primarily attributable to cost savings initiatives. Bad debt provisions decreased $19.2 million, excluding the Alabama impairment discussed below, as the prior year included higher customer reserves resulting from the economic downturn. Additionally, the prior year period included an extra week, which added approximately $12.6 million to operating expenses.

With the Alabama regulatory challenges as previously discussed, we recognized $53.1 million of impairment charges in the second quarter of fiscal 2010, including allowances for notes and accounts receivable of $50.4 million and gaming operations equipment impairment of $2.7 million. The remaining net carrying amount of our related assets at June 30, 2010 totaled $42.4 million.

During the second quarter of fiscal 2010, we recognized $6.7 million of intellectual property impairment primarily related to uncertainties surrounding the usage of DigiDeal patents. In July 2010, we executed a definitive agreement with DigiDeal, under which we will divest our equity interest in DigiDeal and cease to manufacture and distribute DigiDeal products. The transaction is anticipated to close by September 30, 2010 and we expect to recognize between $6.0 million and $8.0 million of additional charges related to Digideal's deconsolidation in the fourth quarter of fiscal 2010. Excluding impairment, Digideal contributed net losses of $3.3 million for the nine months of fiscal 2010 and $3.6 million for the nine months of fiscal 2009 to our consolidated income from continuing operations.

Impairment charges in the current year were partially offset by reduced restructuring charges. Restructuring charges included in operating expenses for the nine months of fiscal 2010 totaled $3.6 million and related primarily to the reorganization of certain US facilities. Restructuring charges of $28.7 million included in the prior year period related primarily to global workforce reduction. See Note 18 of our Unaudited Condensed Consolidated Financial Statements for additional information about our impairment and restructuring charges.

Other Income (Expense)

	Quarters Ended June 30,		Favorable (Unfavorable)		Nine Months Ended June 30,		Favorable (Unfavorable)	
	2010	2009	Amount	%	2010	2009	Amount	%
(In millions)								
Interest Income	$15.2	$15.1	$0.1	1%	$46.6	$46.4	$0.2	-
WAP	6.2	6.8	(0.6)	-9%	19.0	21.4	(2.4)	-11%
Receivables and investments	9.0	8.3	0.7	8%	27.6	25.0	2.6	10%
Interest Expense	(42.7)	(43.2)	0.5	1%	(124.9)	(110.8)	(14.1)	-13%
WAP	(6.1)	(6.7)	0.6	9%	(18.7)	(20.9)	2.2	11%
Borrowings	(36.6)	(36.5)	(0.1)	-	(106.2)	(89.9)	(16.3)	-18%
Other	3.3	2.1	1.2	57%	3.2	(7.7)	10.9	142%
Total other income (expense)	$(24.2)	$(26.0)	$1.8	7%	$(75.1)	$(72.1)	$(3.0)	-4%

Three months ended June 30, 2010 compared with three months ended June 30, 2009

The favorable variance in total other income (expense) was primarily due to foreign currency gain. Third quarter interest expense included debt refinancing charges of $4.0 million in 2010 related to a $300.0 million reduction in the total size of our domestic credit facility and $4.4 million in 2009 related to early breakage fees.

Nine months ended June 30, 2010 compared with Nine months ended June 30, 2009

The unfavorable variance in total other income (expense) was primarily due to increased interest expense resulting from higher borrowing costs, partially offset by foreign currency exchange gains and reduced investment losses. WAP interest income and expense relates to previous jackpot winner liabilities and accretes at approximately the same rate. WAP interest income also includes earnings on restricted cash and investments held for future winners.

All prior year periods presented included the retrospective application of an ASU adopted at the beginning of fiscal 2010 requiring the separation of liability and equity components of our convertible debt to reflect an effective nonconvertible borrowing rate at issuance. Additional convertible debt amortization required under this ASU increased interest expense for the quarter and nine month periods of fiscal 2010 by $6.8 million and $22.8 million, respectively, and for the quarter and nine month periods of fiscal 2009 by $9.0 million and $18.3 million, respectively. See Note 2 and Note 10 of our Unaudited Condensed Consolidated Financial Statements for additional information about the impact of this ASU.

Income Tax Provision

	Quarters Ended June 30,		Favorable (Unfavorable)	Nine Months Ended June 30,		Favorable (Unfavorable)
	2010	2009	Amount	2010	2009	Amount
(In millions)						
Income tax provision	$1.4	$38.8	$ 37.4	$55.1	$69.4	$ 14.3
Effective tax rate	1.5%	38.4%	36.9pp	22.5%	30.3%	7.8pp

Our effective tax rate on income from continuing operations for the third quarter and nine months of fiscal 2010 and the nine months of fiscal 2009 benefited significantly from certain favorable discrete tax items. The quarter and nine

months of fiscal 2010 included certain favorable tax items of $36.7 million, related to the settlement of our IRS audit for fiscal years 2002 through 2005, partially offset by other changes in our uncertain tax liabilities. The nine months of fiscal 2009 included certain favorable tax items of $17.1 million, including the IRS audit settlement for fiscal years 2000 and 2001. These tax items are also described in Note 12 of our Unaudited Condensed Consolidated Financial Statements. Differences between our effective tax rate and the US federal statutory rate of 35% principally result from the geographical distribution of taxable income, differences between the book and tax treatment of certain items, and changes in uncertain tax positions. We expect our fourth quarter tax rate, excluding discrete tax items, will be in the approximate range of 37% to 39%

BUSINESS SEGMENT RESULTS – A Year Over Year Comparative Analysis

Operating income for each regional segment below reflects applicable operating expenses. See Note 17 of our Unaudited Condensed Consolidated Financial Statements for additional business segment information.

Three months ended June 30, 2010 compared with three months ended June 30, 2009

North America operating income decreased due to declines in both gaming operations and product sales primarily from fewer new casino openings, the prolonged weakness in the economy, and increased competition. Additionally, increased jackpot expense related to unfavorable interest rate change on jackpot liabilities also contributed to quarterly declines.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

North America operating income decreased primarily due to revenue declines coupled with impairment charges related to regulatory issues in Alabama’s charitable bingo markets and DigiDeal patents, partially offset by decreased jackpot expense, cost reduction efforts, and lower bad debt provisions.

North America Gaming Operations

Three months ended June 30, 2010 compared with three months ended June 30, 2009

Gaming operations revenues and gross profit declines were primarily due to decreases in our installed base, largely due to regulatory uncertainties in Alabama, and the continued shift toward lower price-point units. Approximately $5.7 million of the decrease in revenues was attributable to removals and shut-downs in Alabama's charitable bingo market. Current quarter revenues included $3.1 million from Alabama. Gross margin decline was primarily due to increased jackpot expense related to unfavorable interest rate changes in jackpot liabilities.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

Gaming operations revenues and gross profit decreased primarily due to our lower installed base, largely related to regulatory uncertainties in Alabama. Additionally, decreases of $19.1 million in revenues and $9.8 million in gross profit were attributable to the extra week in the prior year period. Approximately $12.8 million of the decrease in revenues was attributable to removals and shut-downs in Alabama's charitable bingo market. Current period revenues included $12.7 million from charitable bingo units Alabama. Slight improvement in gaming operations margin was attributable to lower costs, most significantly depreciation, royalties, and jackpot expense due to interest rate changes and fewer WAP units.

North America Product Sales

Three months ended June 30, 2010 compared with three months ended June 30, 2009

Product sales revenues and gross profit decreases were attributable to fewer new/expansion units, partially offset by increased non-machine sales. Gross margin improvement was primarily due to reduced material costs and increased contributions from higher-margin non-machine products. Lower new/expansion units were partially offset by higher replacement units shipped, which comprised 78% of shipments in the current quarter compared to 33% in the prior year quarter.

Nine months ended June 30, 2010 compared with nine months ended June 30, 2009

Product sales revenues and gross profit decreases were attributable to fewer new/expansion units and lower systems sales. Gross margin improvement was primarily due to reduced material costs and obsolescence. Lower new/expansion units were partially offset by higher replacement units shipped, which comprised 72% of shipments in the current period compared to 34% in the prior year period

Operating margin	35 %	25 %	10pp	40 %	32 %	20 %	12pp	60 %

Three and nine months ended June 30, 2010 compared with three and nine months ended June 30, 2009

International operating income growth was the result of higher revenues in both gaming operations and product sales, along with cost savings. Favorable foreign exchange rates increased international revenues by approximately $5.3 million for the third quarter and $23.9 million for the nine months. Operating results for Japan have been reclassified to discontinued operations for all periods presented, as discussed above under CONSOLIDATED OPERATING RESULTS.

International gaming operations revenues and gross profit increased with improved play levels and installed base growth, most significant in the UK. Gross profit and margin improved primarily due to lower depreciation. The extra week in the prior year nine months contributed approximately $3.3 million in revenues.

International product sales revenues and gross profit improved primarily due to a lower contribution from low-payout markets and favorable foreign exchange rates. Volume increases also contributed to improvement for the nine months. Gross margin also improved with lower material costs.

LIQUIDITY AND CAPITAL RESOURCES

Sources of Liquidity

Selected financial information and statistics	June 30, 2010	September 30, 2009	Change
(In millions)			
Cash and cash equivalents	$ 164.9	$ 146.7	$ 18.2
Accounts receivable, net	275.4	334.3	(58.9)
Inventories	114.6	157.8	(43.2)
Working Capital	609.1	609.2	(0.1)
Trailing-twelve month statistics, excluding discontinued operations:			
Average days sale outstanding (excluding notes and contracts)	50	58	(8)
Inventory turns	3.8	2.9	0.9

At June 30, 2010, our principal sources of liquidity were cash and equivalents and $1.2 billion available on our credit facilities worldwide. Other potential sources of capital include, but are not limited to, the issuance of public or private placement debt, bank credit facilities and the issuance of equity or convertible debt securities. Based on past performance and current expectations, we believe the combination of these resources will satisfy our needs for working capital, jackpot liabilities, capital expenditures, debt service, and other liquidity requirements associated with our existing operations for the foreseeable future. Restricted cash and investments, as well as jackpot annuity investments, are available only for funding jackpot winner payments.

Cash and equivalents increased $18.2 million during the nine months ended June 30, 2010, primarily due to cash generated from operations of $423.8 million, partially offset by capital expenditures of $178.2 million and net debt payments of $243.2 million. Net cash inflows from other investing activities of $52.2 million and net proceeds from employee stock plans of $23.5 million, partially offset by dividends paid of $53.5 million and unfavorable foreign currency exchange, also contributed to the increase.

Cost Savings Initiatives

In light of the economic downturn and reduced demand, we have been conducting a comprehensive strategic review of our costs and organizational structure to maximize efficiency and align expenses with the current and long-term business outlook. Beginning in early fiscal 2009, our cost savings initiatives included organizational restructurings at our corporate and subsidiary operations, reduction of employee headcount, reduction in third-party professional fees, reduction in employee incentives and benefits, reduction in capital spending, and rationalization of all other expenses. To-date, we have identified $200.0 million in estimated annual cost savings, as compared to the fourth quarter of fiscal 2008, from these initiatives that we expect to achieve in fiscal 2010.

Cash Flows Summary - A Year Over Year Comparative

Nine Months Ended June 30,	2010	2009	Favorable (Unfavorable)
(In millions)			
Operations	$423.8	$354.4	$69.4
Investing	(126.0)	(205.7)	79.7
Financing	(273.2)	(232.4)	(40.8)
Effects of exchange rates	(6.4)	1.3	(7.7)
Net Change	$18.2	$(82.4)	$100.6

Operating Cash Flows

The nine months of fiscal 2010 provided higher operating cash flows than the same prior year period, primarily due to net changes in operating assets and liabilities. Less cash used for other assets, jackpot liabilities and inventories, collectively, were partially offset by less cash provided from receivables and more cash used for income taxes. Cash flows related to jackpot liabilities fluctuate based on the timing of jackpots and winner payments, volume of play, and market variations in applicable interest rates.

Investing Cash Flows

We used less cash for investing during the nine months of fiscal 2010 compared to the prior year period, primarily due to decreased net development financing, proceeds from ARS investments sold, decreased acquisitions and affiliate investments, partially offset by increased cash used for jackpot funding. Increased capital spending to refresh our gaming operations installed base was partially offset by lower property, plant, and equipment spending.

Nine Months Ended June 30,	2010	2009	Increase (Decrease)
(In millions)			
Property, plant and equipment	$15.9	$33.2	$(17.3)
Gaming operations equipment	159.9	136.7	23.2
Intellectual property	2.4	5.9	(3.5)
Total capital expenditures	$178.2	$175.8	$2.4

Financing Cash Flows

The increase in cash used for financing in the nine months of fiscal 2010 compared to the prior year period was primarily due to increased net debt repayment, partially offset by decreased dividends paid and cash provided by employee stock plans.

Credit Facilities and Indebtedness
(See Note 10 of our Unaudited Condensed Consolidated Financial Statements)

In conjunction with new bonds issued in June 2010 discussed below, we reduced the total amount of our domestic credit facility from $1.8 billion to $1.5 billion, leaving the non-extended portion due December 2010 at $0.2 billion and the extended portion due June 2012 at $1.3 billion. At June 30, 2010, $0.3 billion was drawn ($0.1 billion non-extended and $0.2 billion extended), $1.2 billion was available, and $3.6 million was reserved for letters of credit. Also at June 30, 2010, $8.4 million was available with nothing drawn under our Australia revolving credit facility, which generally renews annually with maturity in March.

We were in compliance with all debt covenants at June 30, 2010. The domestic credit facility subjects us to a number of financial covenants and our ability to comply with these covenants may be adversely impacted by an extended economic downturn. At June 30, 2010, our financial covenants were ICR at 8.5 (minimum allowed 3.0) and TLR at 2.5 (maximum allowed 3.5, reducing to 3.25 on April 1, 2011). The covenants also include certain restrictions on our ability to:

- incur or guaranty additional debt, or enter into swap agreements
- incur liens
- merge with or acquire other companies, liquidate or dissolve
- sell, transfer, lease or dispose of substantially all assets
- change the nature of our business
- declare or make cash dividends or distributions or pay cash for the purchase, redemption, retirement, defeasance, acquisition, cancellation or termination of our capital stock or equity interests or any return of capital to shareholders, provided that we may, as long as no continuing default has occurred, pay dividends of up to the lesser of $0.06 per common share per fiscal quarter or $25.0 million in any fiscal quarter

Debentures of $701.2 million aggregate principal were tendered under the holders' put option and accepted by IGT for payment on December 15, 2009. The tender was funded with borrowings under our domestic credit facility. As a result of our call notice on December 21, 2009, we completed final redemption of the remaining $5.8 million aggregate outstanding principal on February 4, 2010 using cash on hand.

5.5% bonds issued

On June 8, 2010, we issued $300.0 million aggregate principal amount of 5.5% Bonds due 2020 under our March 2009 shelf registration statement and June 3, 2010 prospectus supplement pursuant to an underwriting agreement dated June 3, 2010. We received net proceeds of $295.7 million after a discount of $1.3 million and deferred offering costs of approximately $3.0 million, both of which will be amortized to interest expense over the bond term. Interest is payable semiannually on June 15 and December 15, beginning December 15, 2010. Net proceeds from the 5.5% Bonds were used to reduce outstanding amounts under our domestic credit facility.

The 5.5% Bonds are general unsecured obligations of IGT, ranking equal with all existing and future unsecured and unsubordinated obligations. The 5.5% Bonds rank junior to all existing and future liabilities, including trade payables, of our subsidiaries. The 5.5% Bonds mature on June 15, 2020, unless IGT redeems them earlier by paying the holders 100% of the principal amount plus a make-whole redemption premium as described further in the indenture.

The 5.5% Bonds contain restrictive covenants similar to those described above with our domestic credit facility. The 5.5% Bonds also specify a number of events of default (some of which are subject to applicable grace or cure periods), including the failure to make timely principal and interest payments or satisfy the covenants. Upon the occurrence of an event of default under the 5.5% Bonds, the outstanding amounts may become immediately due and payable.

In conjunction with the 5.5% Bonds issued in June 2010, we executed $300.0 million notional value of interest rate swaps that terminate on June 15, 2020, which effectively exchange 5.5% fixed interest payments for variable rate interest payments based on the six-month LIBOR plus 186 bps set in arrears on June 13 and December 13 of each year. Net amounts receivable or payable under the swaps will be settled semiannually on June 15 and December 15.

See Note 15 of our Unaudited Condensed Consolidated Financial Statements for additional information related to derivative values.

Financial Condition

(In millions)	June 30, 2010	September 30, 2009	Increase (Decrease)
Assets	$4,085.6	$4,328.1	$(242.5)
Liabilities	2,876.2	3,264.5	(388.3)
Total equity	1,209.4	1,063.6	145.8

Changes for the nine months ended June 30, 2010

Total assets decreased largely related to impairment and restructuring discussed above, as well as lower sales volume and prudent management of our working capital. Receivables decreased $86.7 million, inventory decreased $43.2 million, jackpot investments decreased $26.0 million, and the remaining decrease is primarily due to the reduction of other assets and deferred costs and intangibles.

Liabilities decreased primarily due to debt reductions of $206.8 million, a reduction in deferred revenues of $30.2 million and generally lower accrued liabilities. Stockholders’ equity increased primarily due to current period earnings.

Arrangements with Off-Balance Sheet Risk

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

- out of our breach of agreements with those parties
- from services to be provided by us
- from IP infringement claims made by third parties

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, which may cover our liabilities arising from these indemnification obligations in certain circumstances.

It is not possible to determine the maximum potential obligations under these indemnification undertakings due to the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

We do not expect any material losses to result from these arrangements, and we are not dependent on off-balance sheet financing arrangements to fund our operations. See also Note 11 of our Unaudited Condensed Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Except for changes described below, the Company's market risk profile has not changed materially during the first nine months of fiscal 2010 since those presented in Item 7A of our Annual Report on Form 10-K, as recast in our Current Report on Form 8-K filed June 3, 2010.

Debentures

We no longer have market risk associated with our 2.6% Debentures subsequent to the final redemption in February 2010, as further described in Note 10 of our Unaudited Condensed Consolidated Financial Statements.

5.5% Bonds issued June 2010

At June 30, 2010, the carrying value of our 5.5% Bonds including the interest rate swap bond adjustment totaled $303.4 million. The fair value of the 5.5% Bonds was $310.2 million, and the fair value of related interest rate swap assets totaled $5.5 million. The swaps effectively converted the 5.5% fixed rate interest to variable rate based on the six-month LIBOR, reducing the effective rate on the 5.5% Bonds hedged for the quarter ended June 30, 2010. Because we simultaneously reduced our outstanding borrowings and total commitment on our domestic credit facility, which also carried LIBOR rate risk, our overall interest rate risk is substantially unchanged. See Note 10 and Note 15 of our Unaudited Condensed Consolidated Financial Statements for additional information about the 5.5% Bonds and related swaps.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including our CEO and CFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

As a part of our normal operations, we update our internal controls as necessary to accommodate any modifications to our business processes or accounting procedures. No change occurred during the most recent fiscal quarter that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

For a description of our legal proceedings, see Note 11 of our Unaudited Condensed Consolidated Financial Statements, which is incorporated by reference in response to this item.

Item 1A. Risk Factors

Except for the updates to the first two risk factors below, there have been no material changes in our assessment of risk factors affecting our business since those presented in our Annual Report on Form 10-K, Item 1A, for the fiscal year ended September 30, 2009. For convenience, our updated risk factors are included below.

Our outstanding domestic credit facility subjects us to financial covenants which may limit our flexibility.

Our domestic credit facility subjects us to a number of financial covenants, including a minimum ratio of Adjusted EBITDA to interest expense minus interest on jackpot liabilities and a maximum ratio of debt to Adjusted EBITDA. Our failure or inability to comply with these covenants will cause an event of default that, if not cured, could cause the entire outstanding borrowings under our domestic credit facility, 5.5% Bonds, 7.5% Bonds and Notes to become immediately due and payable. In addition, our interest rate under the domestic credit facility can vary based on our public credit rating or our debt to capitalization ratio. Each of these measures may be adversely impacted by unfavorable economic conditions. The domestic credit facility also includes restrictions that may limit our flexibility in planning for, or reacting to, changes in our business and the industry.

Our obligations under our domestic credit facility are generally unsecured, except that we have agreed that, in the event of certain declines in our debt ratings as described in the domestic credit facility, as soon as reasonably practicable thereafter, we will grant a lien on 100% of the equity interests of IGT's direct and wholly-owned domestic subsidiaries and 66% of the equity interests of IGT's direct and wholly-owned foreign subsidiaries pursuant to the terms of a form of pledge and security agreement that was previously negotiated in connection with the execution our domestic credit facility. Additionally, the Notes issued and sold by us in May 2009, the 7.5% Bonds, 5.5% Bonds or similar securities issued by us and certain interest rate hedges provided by lenders under the our domestic credit facility or their affiliates are permitted to share in any collateral that may be granted pursuant to the form of pledge and security agreement in the event our debt rating declines. To the extent a lien is granted under the form of pledge and security such lien will be subsequently released if we thereafter satisfy the minimum debt rating requirements set forth in our domestic credit facility for at least three consecutive calendar months.

Initially, and in the future our 7.5% Bonds and 5.5% Bonds are not expected to, be secured by any of our assets. We may be required in connection with any future indebtedness, or the terms with respect to existing indebtedness including under our domestic credit facility, to provide a lien against some or all of our assets. To the extent that a lien on our assets is not also granted on an equal and ratable basis with our domestic credit facility in favor of the 7.5% Bonds and 5.5% Bonds, then if we become insolvent or are liquidated, or in the event that our existing indebtedness becomes secured, as described above, and payment of such secured indebtedness is accelerated, the holders of the secured indebtedness will be entitled to exercise the remedies available to them under applicable law, including the ability to foreclose on and sell the assets securing such indebtedness in order to satisfy such indebtedness. In any such case, any remaining assets may be insufficient to repay the notes and our other unsecured indebtedness.

Our ability to operate in our existing markets or expand into new jurisdictions could be adversely affected by changing regulations, new interpretations of existing laws or problems with obtaining or maintaining needed licenses or approvals.

We operate only in jurisdictions where gaming is legal. The gaming industry is subject to extensive governmental regulation by US federal, state and local governments, as well as tribal officials or organizations and foreign governments. While the regulatory requirements vary by jurisdiction, most require:

- licenses and/or permits
- findings of suitability
- documentation of qualifications, including evidence of financial stability
- other required approvals for companies who manufacture or distribute gaming equipment and services
- individual suitability of officers, directors, major stockholders and key employees

Any delays in obtaining or difficulty in maintaining regulatory approvals needed for expansion within existing markets or into new jurisdictions can negatively affect our opportunities for growth. Further, changes in existing gaming regulations or new interpretations of existing gaming laws may hinder or prevent us from continuing to operate in those jurisdictions where we currently do business, which would harm our operating results. In particular, the enactment of unfavorable legislation or government efforts affecting or directed at manufacturers or gaming operators, such as referendums to increase gaming taxes or requirements to use local distributors, would likely have a negative impact on our operations.

For example, in a case arising from the seizure of certain non-IGT charitable bingo machines by the Alabama Governor's Task Force on Illegal Gambling, the State Supreme Court recently established a six-part definition of "bingo" with which Alabama charitable gaming machines must comply. Modifications were made to our Alabama games that we believe comply with the court's standards. However, the legality of electronic charitable bingo continues to be challenged by the state's Governor. Legislation that would have allowed Alabama voters to decide on the addition of a state constitutional amendment authorizing electronic bingo failed to pass the legislative session concluded in April 2010.

Two of the three locations where IGT previously placed electronic bingo machines, Country Crossing and Greenetrack, have ceased operations. The third location, VictoryLand, voluntarily closed operations on August 9, 2010. Prior to its voluntary closure, VictoryLand was operating pursuant to a temporary restraining order entered by the circuit court. On July 30, 2010, the Alabama Supreme Court issued an opinion dissolving VictoryLand's restraining order, which becomes final on August 17, 2010, unless an application for reconsideration is filed by VictoryLand. On August 5, 2010, the Governor's task force filed an emergency motion with the Alabama Supreme Court seeking immediate certification of the Court's judgment dissolving the Circuit Court's temporary restraining order. IGT has supplied product and/or development financing to these properties.

As the legal and political climate continues to deteriorate, we have determined that the recoverability of our assets in the Alabama charitable bingo market has been impaired. As a result, in the second quarter ended March 31, 2010, we recognized $53.1 million of impairment charges related to our charitable bingo machines and investments in Alabama. As of and for the nine months ended June 30, 2010, our charitable bingo operations in Alabama represented approximately 1% of consolidated revenues and $42.4 million remains of associated assets. We can give no assurance that our machine modifications will be determined to comply with the new standards or that we will not encounter

further legal, regulatory, financial, or competitive issues, which could have further adverse impact on our Alabama operations.

Our business is vulnerable to changing economic conditions and to other factors that adversely affect the casino industry, which have negatively impacted and could continue to negatively impact the play levels of our participation games, our product sales, and our ability to collect outstanding receivables from our customers.

Demand for our products and services depends largely upon favorable conditions in the casino industry, which is highly sensitive to casino patrons' disposable incomes and gaming activities. Discretionary spending on entertainment activities could further decline for reasons beyond our control, such as continued negative economic conditions, natural disasters, acts of war or terrorism, transportation disruptions or health issues. Any prolonged or significant decrease in consumer spending on entertainment activities could result in reduced play levels on our participation games, causing our cash flows and revenues from a large share of our recurring revenue products to decline. Unfavorable economic conditions have also resulted in a tightening in the credit markets, decreased liquidity in many financial markets, and significant volatility in the credit and equity markets.

A decline in the relative health of the gaming industry and the difficulty or inability of our customers to obtain adequate levels of capital to finance their ongoing operations reduces their resources available to purchase our products and services, which adversely affects our revenues. If we experience a significant unexpected decrease in demand for our products, we could also be required to increase our inventory obsolescence charges.

Furthermore, the extended economic downturn has impacted and could continue to impact the ability of our customers to make timely payments to us. We have, and may continue, to incur additional provisions for bad debt related to credit concerns on certain receivables.

A decline in and/or sustained low interest rates causes an increase in our jackpot expense which could limit or reduce our future profits.

Changes in prime and/or treasury and agency interest rates during a given period cause fluctuations in jackpot expense largely due to the revaluation of future winner liabilities. When rates increase, jackpot liabilities are reduced as it costs less to fund the liability. However, when interest rates decline or remain low the value of the liability (and related jackpot expense) increases because the cost to fund the liability increases. Our results may continue to be negatively impacted by continuing low interest rates or further declines in interest rates, resulting in increased jackpot expense and a reduction of our investment income, which could limit or reduce our future profits.

Our outstanding Notes subject us to additional risks.

Our Notes issued in May 2009 contain a net settlement feature, which entitles holders to receive cash up to $1,000 per Note and shares for any excess conversion value as determined by the respective governing indentures. Consequently, if a significant number of Notes are converted or redeemed, we would be required to make significant cash payments to the holders who convert or redeem the Notes.

In connection with the offering of the Notes, we entered into additional separate transactions for note hedges and warrant transactions. In connection with these transactions, the hedge counterparties and/or their respective affiliates may enter into various derivative transactions with respect to our common stock and may enter into or unwind various derivative transactions and/or purchase or sell our common stock in secondary market transactions prior to maturity of the Notes. These activities could have the effect of increasing or preventing a decline in, or having a negative effect on, the value of our common stock and could have the effect of increasing or preventing a decline in the value of our common stock during any conversion reference period related to a conversion of the Notes. The warrant transactions could separately have a dilutive effect from the issuance of our common stock pursuant to the warrants.

Slow growth in the establishment of new gaming jurisdictions or the number of new casinos, declines in the rate of replacement of existing gaming machines and ownership changes and consolidation in the casino industry could limit or reduce our future profits.

Demand for our products is driven substantially by the establishment of new gaming jurisdictions, the addition of new casinos or expansion of existing casinos within existing gaming jurisdictions and the replacement of existing gaming machines. The establishment or expansion of gaming in any jurisdiction typically requires a public referendum or other legislative action. As a result, gaming continues to be the subject of public debate, and there are numerous active organizations that oppose gaming. Opposition to gaming could result in restrictions on or even prohibitions of gaming operations or the expansion of operations in any jurisdiction.

In addition, the construction of new casinos or expansion of existing casinos fluctuates with demand, general economic conditions and the availability of financing. The rate of gaming growth in North America has diminished and machine replacements are at historically low levels. Slow growth in the establishment of new gaming jurisdictions or delays in the opening of new or expanded casinos and continued declines in, or low levels of demand for, machine replacements could reduce the demand for our products and our future profits. Changes in ownership or business combinations in the casino industry could also lead to decreased spending on our products, downward pricing pressures, a slowing in the rate of gaming machine replacements, or require our current customers to switch to our competitors' products, any of which could negatively impact our results of operations.

Demand for our products and the level of play of our products could be adversely affected by changes in player and operator preferences.

As a supplier of gaming machines, we must offer themes and products that appeal to gaming operators and players. If we are unable to anticipate or react timely to any significant changes in player preferences, such as a negative change in the trend of acceptance of our newest systems innovations or jackpot fatigue (declining play levels on smaller jackpots), the demand for our gaming products and the level of play of our gaming products could decline. Further, our products could suffer a loss of floor space to table games and operators may reduce revenue sharing arrangements, each of which would harm our sales and financial results. In addition, general changes in consumer behavior, such as reduced travel activity or redirection of entertainment dollars to other venues, could result in reduced demand and reduced play levels for our gaming products.

Our success in the competitive gaming industry depends in large part on our ability to develop and manage frequent introductions of innovative products.

The gaming industry is intensely competitive, and many of our competitors have substantial resources and specialize in the development and marketing of their products. Increased competition has negatively impacted, and may continue to negatively impact, our results. Because the gaming industry is characterized by dynamic customer demand and rapid technological advances, we must continually introduce and successfully market new themes and technologies in order to remain competitive and effectively stimulate customer demand. We invest heavily in product development in various disciplines from hardware, software, and firmware engineering to game design, video, multimedia, graphics, and sound. There is no assurance that our investments in research and development will lead to successful new technologies or timely new products. Our customers will accept a new product only if it is likely to increase operator profits more than competitors' products. There is no certainty that our new products will attain this market acceptance or that our competitors will not more effectively anticipate or respond to changing customer preferences. In addition, any delays by us in introducing new products on schedule could negatively impact our operating results by providing an opportunity for our competitors to introduce new products and gain market share ahead of us. For example, our business and results could be adversely affected if we experience delays or problems in our continued deployment of sbX™ gaming management systems, or if we do not gain market acceptance for these or other systems that are currently under development.

New products require regulatory approval and may be subject to complex and dynamic revenue recognition standards, which could materially affect our financial results.

As we introduce new products and transactions become increasingly complex, additional analysis and judgment is required to account for and recognize revenues in accordance with generally accepted accounting principles. Transactions may include multiple element arrangements and/or software components and applicable accounting principles or regulatory product approval delays could further change the timing of revenue recognition and could adversely affect our financial results for any given period. Fluctuations may occur in our deferred revenues and reflect our continued shift toward more multiple element contracts that include systems and software.

Investments and development financing loans could adversely impact liquidity or cause us to incur loan losses or record a charge to earnings if our investments become impaired.

We invest in and/or provide financing for expansion or construction of gaming locations and other business purposes, including locations abroad. Such investment and financing activities subject us to increased credit risk in certain regions, which could be exacerbated by current unfavorable economic conditions or other political or economic instability in those regions. We monitor our investments and financing activities to assess impairment on a quarterly basis.

We have in the past and may in the future incur losses on these types of investments and loans. Our results of operations, liquidity or financial position may be negatively impacted if we are unable to collect on loans or derive benefit from our investments.

Our gaming machines and online operations may experience losses due to technical problems or fraudulent activities.

We incorporate security features into the design of our gaming machines and other systems, including those responsible for our online operations, which are designed to prevent us and our patrons from being defrauded. We also monitor our software and hardware to avoid, detect and correct any technical errors. However, there can be no guarantee that our security features or technical efforts will continue to be effective in the future. If our security systems fail to prevent fraud or if we experience any significant technical difficulties, our operating results could be adversely affected. Additionally, if third parties breach our security systems and defraud our patrons, or if our hardware or software experiences any technical anomalies, the public may lose confidence in our gaming machines and operations or we could become subject to legal claims by our customers or to investigation by gaming authorities.

We may be unable to protect our IP.

A significant portion of our revenues is generated from products using certain IP rights and our operating results would be negatively impacted if we are unsuccessful in protecting these rights from infringement. In addition, some of our most popular games and features are based on trademarks, patents and other IP licensed from third parties. The continued success of these games may depend upon our ability to retain or expand these licenses with reasonable terms. We also depend on trade secret law to protect certain proprietary knowledge and have entered into confidentiality agreements with those of our employees who have access to this information. However, there can be no guarantees that our employees will not breach these agreements, and if these agreements are breached it is unlikely that the remedies available to us will be sufficient to compensate us for the damages suffered.

We may be subject to claims of IP infringement or invalidity and adverse outcomes of litigation could unfavorably affect our operating results.

Periodically, we receive notification from others claiming that we are infringing upon their patent, trademark or other IP rights. Regardless of their merit, such claims may cause us to incur significant costs. Responding to these claims could also require us to stop selling or to redesign our products, to pay significant amounts in damages or to enter into agreements to pay significant licensing fees or royalties. Additionally, if any of these claims prove successful, it could limit our ability to bring new products to market in the future. Our assessment of current IP litigation could change in light of the discovery of facts not presently known to us or determinations by judges, juries or others that do not accord with our evaluation of the possible liability or outcome of such litigation.

Business combinations and investments in intellectual properties or affiliates present risk, and we may not be able to realize the financial and strategic goals that were contemplated at the time of the transaction, which could materially affect our financial results.

We have invested in strategic business combinations and acquisitions of important technologies and IP that we believe will expand our geographic reach, product lines, and/or customer base. We may encounter difficulties in the assimilation of acquired operations, technologies and/or products, or an acquisition may prove to be less valuable than the price we paid. Any of these events or circumstances may require us to record substantial impairment charges on goodwill and other intangible assets, resulting in a negative impact on our operating results.

Moreover, as we continue the process of evaluating our business in conjunction with an assessment of our long-term strategic goals, we will also further evaluate past and potential investments to determine if and how they will fit into

our organizational structure going forward. If an event or change occurs in affiliate relationships or agreements associated with business combinations, we may be required to reassess cash flows, recoverability, useful lives, and fair value measurements, which may result in material impairment charges.

Failure to attract, retain and motivate key employees may adversely affect our ability to compete.

Our success depends largely on recruiting and retaining talented employees. The market for qualified executives and highly skilled, technical workers is intensely competitive. The loss of key employees or an inability to hire a sufficient number of technical staff could limit our ability to develop successful products and cause delays in getting new products to market.

Current environmental laws and regulations, or those enacted in the future, could result in additional liabilities and costs.

The manufacturing of our products may require the use of materials that are subject to a variety of environmental, health and safety laws and regulations (such as climate change legislation). Compliance with these laws could increase our costs and impact the availability of components required to manufacture our products. Violation of these laws may subject us to significant fines, penalties or disposal costs, which could negatively impact our results of operations, financial position or cash flows.

The risks related to operations in foreign countries and outside of traditional US jurisdictions could negatively affect our results.

We operate in many countries outside of the US and in tribal jurisdictions with sovereign immunity which subjects us to certain inherent risks including:

- social, political or economic instability
- additional costs of compliance
- tariffs and other trade barriers
- fluctuations in foreign exchange rates outside the US
- adverse changes in the creditworthiness of parties with whom we have significant receivables or forward currency exchange contracts
- expropriation, nationalization and restrictions on repatriation of funds or assets
- difficulty protecting our intellectual property.

Such developments could adversely affect our financial condition and results of operations.
