EverBank Financial Corp and Subsidiaries

Notes to Condensed Consolidated Financial Statements (unaudited)

(Dollars in thousands, except per share data)

1. Organization and Basis of Presentation

a) Organization — EverBank Financial Corp (the Company) is a savings and loan holding company with two direct operating subsidiaries, EverBank (EB) and EverBank Funding, LLC (EBF). EB is a federally chartered thrift institution with its home office located in Jacksonville, Florida. Its direct banking services are offered nationwide. In addition, EB operates financial centers in Florida and commercial and consumer lending centers across the United States. EB (a) accepts deposits from the general public; (b) originates, purchases, services, sells and securitizes residential real estate mortgage loans, commercial real estate loans and commercial loans and leases; (c) originates consumer and home equity loans; and (d) offers full-service securities brokerage and investment advisory services. EB's subsidiaries are:

- AMC Holding, Inc., the parent of CustomerOne Financial Network, Inc.;
- Tygris Commercial Finance Group, Inc. (Tygris), the parent of EverBank Commercial Finance, Inc.;
- EverInsurance, Inc.;
- Elite Lender Services, Inc.;
- EverBank Wealth Management, Inc.; and
- Business Property Lending, Inc.

On February 14, 2013, the Company formed EverBank Funding, LLC, a Delaware limited liability company, to facilitate the pooling and securitization of mortgage loans for issuance into the secondary market.

b) Basis of Presentation — The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all information or footnotes necessary for a complete presentation of financial position, results of operations, comprehensive income, and cash flows in conformity with generally accepted accounting principles. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the audited consolidated financial statements and accompanying notes to the financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013. Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. The results of operations for acquired companies are included from their respective dates of acquisition. In management's opinion, all adjustments (which include normal recurring adjustments) necessary to present fairly the financial position, results of operations, comprehensive income, and changes in cash flows have been made. GAAP requires management to make estimates that affect the reported amounts and disclosures of contingencies in the condensed consolidated financial statements. Estimates by their nature are based on judgment and available information. Material estimates relate to the Company's allowance for loan and lease losses, loans and leases acquired with evidence of credit deterioration, repurchase obligations, contingent liabilities, and the fair values of investment securities, loans held for sale, MSR and derivative instruments. Because of the inherent uncertainties associated with any estimation process and future changes in market and economic conditions, it is possible that actual results could differ significantly from those estimates.

c) Supplemental Cash Flow Information - Noncash investing activities are presented in the following table:

	Three Months Ended March 31,	
	2014	2013
Supplemental Schedules of Noncash Activities:		
Loans transferred to foreclosure claims	\$ 119,353	\$ 142,289

Loans transferred from held for investment to held for sale	110,209	101,984
---	---------	---------

2. Recent Accounting Pronouncements

Presentation of Residential Mortgage Loans Upon Foreclosure — In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-04, Receivables- Troubled Debt Restructurings by Creditors (Subtopic 310-40), which will eliminate diversity in practice regarding the timing of derecognition for residential mortgage loans when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. Under ASU 2014-04, physical possession of residential real estate property is achieved when either the creditor obtains legal title to the residential real estate property upon completion of a foreclosure or the borrower conveys all interest in the residential real estate property through completion of a deed in lieu of foreclosure in order to satisfy that loan. Once physical possession has been achieved, the loan is derecognized and the property recorded within other assets at the lower of cost or fair value (less estimated costs to sell). In addition, the guidance requires both interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The additional disclosure requirements are effective for annual reporting periods beginning on or after December 15, 2014, and interim periods within those annual periods with retrospective disclosure necessary for all comparative periods presented. The adoption of this standard will result in additional disclosures but is not expected to have any impact on the Company's condensed consolidated financial statements or results of operations.

Table of Contents

3. Investment Securities

The amortized cost and fair value of investment securities with gross unrealized gains and losses were as follows as of March 31, 2014 and December 31, 2013:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Amount
March 31, 2014					
Available for sale:					
Residential collateralized mortgage obligations (CMO) securities - nonagency	\$ 1,101,296	\$ 13,445	\$ 3,264	\$ 1,111,477	\$ 1,111,477
Asset-backed securities (ABS)	3,260	—	640	2,620	2,620
Other	2,924	1,625	—	4,549	4,549

Residential MBS - agency	65,965	754	1,548	65,171	65,965
Total held to maturity securities	\$ 107,312	\$ 2,162	\$ 1,553	\$ 107,921	\$ 107,312

At March 31, 2014 and December 31, 2013, investment securities with a carrying value of \$187,240 and \$181,836, respectively, were pledged to secure other borrowings, securities sold under agreements to repurchase, and for other purposes as required or permitted by law.

For the three months ended March 31, 2014 and 2013, there were no gross gains or gross losses realized on available for sale investments.

The gross unrealized losses and fair value of the Company's investments in an unrealized loss position at March 31, 2014 and December 31, 2013, aggregated by investment category and the length of time individual securities have been in a continuous unrealized loss position, are as follows:

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
March 31, 2014						
Debt securities:						
Residential CMO securities - nonagency	\$ 263,146	\$ 3,039	\$ 10,262	\$ 225	\$ 273,408	\$ 3,264
Residential CMO securities - agency	633	2	—	—	633	2
Residential MBS - agency	51,957	917	2,237	127	54,194	1,044
Asset-backed securities	—	—	2,620	640	2,620	640
Total debt securities	\$ 315,736	\$ 3,958	\$ 15,119	\$ 992	\$ 330,855	\$ 4,950
December 31, 2013						
Debt securities:						
Residential CMO securities - nonagency	\$ 169,829	\$ 3,012	\$ 10,932	\$ 263	\$ 180,761	\$ 3,275

Edgar Filing: EverBank Financial Corp - Form 10-Q

Residential CMO securities - agency	887	5	—	—	887	5
Residential MBS - agency	54,355	1,548	—	—	54,355	1,548
Asset-backed securities	—	—	3,086	1,058	3,086	1,058
Total debt securities	\$225,071	\$4,565	\$14,018	\$1,321	\$239,089	\$5,886

The Company had unrealized losses at March 31, 2014 and December 31, 2013 on residential CMO securities, residential agency MBS, and ABS. These unrealized losses are primarily attributable to weak market conditions and interest rates. Based on the nature of the impairment, these unrealized losses are considered temporary. The Company does not intend to sell nor is it more likely than not that it will be required to sell these investments before their anticipated recovery.

Table of Contents

At March 31, 2014, the Company had 50 debt securities in an unrealized loss position. A total of 42 were in an unrealized loss position for less than 12 months. These 42 securities consisted of 27 residential nonagency CMO securities, one residential agency CMO security and 14 residential agency MBS. The remaining eight debt securities were in an unrealized loss position for 12 months or longer. These eight securities consisted of three ABS, one residential agency MBS and four residential nonagency CMO securities. Of the \$4,950 in unrealized losses, \$3,942 relate to debt securities that are rated investment grade with the remainder representing securities for which the Company believes it has both the intent and ability to hold to recovery.

At December 31, 2013, the Company had 36 debt securities in an unrealized loss position. A total of 29 were in an unrealized loss position for less than 12 months. These 29 securities consisted of 14 residential nonagency CMO securities, one residential agency CMO security and 14 residential agency MBS. The remaining seven debt securities were in an unrealized loss position for 12 months or longer. These seven securities consisted of three ABS and four non agency residential CMO securities. Of the \$5,886 in unrealized losses, \$4,659 relate to debt securities that are rated investment grade with the remainder representing securities for which the Company believes it has both the intent and ability to hold to recovery.

When certain triggers indicate the likelihood of an other-than-temporary-impairment (OTTI) or the qualitative evaluation performed cannot support the expectation of recovering the entire amortized cost basis of an investment, the Company performs cash flow analyses that project prepayments, default rates and loss severities on the collateral supporting each security. If the net present value of the investment is less than the amortized cost, the difference is recognized in earnings as a credit-related impairment, while the remaining difference between the fair value and the amortized cost is recognized in AOCI. There were no OTTI losses recognized on available for sale or held to maturity securities during the three months ended March 31, 2014 or 2013.

During the three months ended March 31, 2014 and 2013, interest and dividend income on investment securities was comprised of the following:

	Three Months Ended March 31,	
	2014	2013
Interest income on available for sale securities	\$8,805	\$14,865
Interest income on held to maturity securities	781	624
Other interest and dividend income	245	761
	\$9,831	\$16,250

All investment interest income recognized by the Company during the three months ended March 31, 2014 and 2013 was fully taxable.

4. Loans Held for Sale

Loans held for sale as of March 31, 2014 and December 31, 2013, consist of the following:

	March 31, 2014	December 31, 2013
Mortgage warehouse (carried at fair value)	\$488,976	\$613,459
Other residential (carried at fair value)	63,705	58,912
Total loans held for sale carried at fair value	552,681	672,371
Government insured pool buyouts	26,570	53,823
Other residential	7,699	8,939
Commercial and commercial real estate	9,779	56,249
Total loans held for sale carried at lower of cost or market	44,048	119,011
Total loans held for sale	\$596,729	\$791,382

The Company typically transfers originated or acquired residential mortgage loans to various financial institutions, government agencies, or government-sponsored enterprises. In addition, the Company enters into loan securitization transactions related to certain conforming and non-conforming residential mortgage loans. In connection with the conforming loan transactions, loans are converted into mortgage-backed securities issued primarily by the Federal

Home Loan Mortgage Corporation (FHLMC), the Federal National Mortgage Association (FNMA) and the Government National Mortgage Association (GNMA), and are subsequently sold to third party investors. For non-conforming transactions the Company either sells whole loans to qualified institutional buyers or the Company's special purpose wholly-owned subsidiary, EverBank Funding, LLC issues certificates that are offered and sold to qualified institutional buyers. Typically, the Company accounts for these transfers as sales and either retains or releases the right to service the loans. The servicing arrangement represents the Company's continuing involvement with these transferred loans.

In addition, the Company also may be exposed to limited liability related to recourse agreements and repurchase agreements made to our issuers and purchasers, which are included in commitments and contingencies in Note 13. Commitments and contingencies include amounts related to loans sold that we may be required to repurchase, or otherwise indemnify or reimburse the investor or insurer for losses incurred, due to material breach of contractual representations and warranties. Refer to Note 13 for the maximum exposure to loss for material breach of contractual representations and warranties.

Other residential loans held for sale carried at fair value represent preferred jumbo residential mortgage loans that the Company originated with the intent to market and sell in the secondary market either through third party sales or securitizations. The Company has elected the fair value option for these loans to provide a better offset of the changes in the fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting.

Other residential loans held for sale that are carried at lower of cost or market value represent loans acquired or originated by the Company with the intention to hold these loans for a short duration and subsequently sell in the near term. Commercial and commercial real

Table of Contents

estate loans held for sale carried at the lower of cost or market represent the portion of certain commercial lines of credit that the Company has the intent to market and sell.

The following is a summary of cash flows related to transfers accounted for as sales for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,	
	2014	2013
Proceeds received from agency securitizations	\$1,187,074	\$2,404,610
Proceeds received from nonagency sales - residential	76,387	341,882
Proceeds received from nonagency sales - commercial and commercial real estate	38,811	—
Proceeds received from nonagency sales	\$115,198	\$341,882
Repurchased loans from agency securitizations	\$301	\$1,092
Repurchased loans from nonagency sales	1,152	5,277

The Company periodically transfers conforming residential GNMA mortgages in exchange for mortgage-backed securities. As of March 31, 2014 and December 31, 2013, the Company retained \$22,785 and \$50,534, respectively, of these securities backed by the transferred loans and maintained effective control over these pools of transferred assets. Accordingly, the Company did not record these transfers as sales. These transferred assets were recorded in the condensed consolidated balance sheets as loans held for sale. The remaining securities were sold to unrelated third parties and were recorded as sales.

The gains and losses on the transfers which qualified as sales are recorded on the consolidated statements of income in gain on sale of loans, which includes the gain or loss on sale, change in fair value related to our fair value option loans, and the offsetting hedging positions.

In connection with these transfers, the Company recorded servicing assets in the amount of \$11,552 and \$23,501 for the three months ended March 31, 2014 and 2013, respectively. All servicing assets are initially recorded at fair value using a Level 3 measurement technique. Refer to Note 7 for information relating to servicing activities and MSR.

During the three months ended March 31, 2014, the Company transferred \$26,351 in residential mortgage loans from loans held for sale to loans held for investment at lower of cost or market. A majority of these loans were originated residential preferred jumbo adjustable rate mortgages (ARM) which were intended to be sold in the secondary market. As a result of changing economic conditions and the Company's capacity and desire to hold these loans on the balance sheet, the Company intends to hold these loans for the foreseeable future and has transferred these loans to the held for investment portfolio. During the three months ended March 31, 2013, the Company transferred \$24,440 in residential mortgage loans held for sale to loans held for investment at lower of cost or market as the Company had the intent to hold these loans for the foreseeable future.

During the three months ended March 31, 2014 and March 31, 2013, the Company transferred \$110,209 and \$101,984, respectively, of loans held for investment to held for sale at lower of cost or market. The majority of these loans were government insured pool buyouts initially originated for the held for investment portfolio. These loans were transferred to held for sale based upon a change in intent to no longer hold these loans for the foreseeable future.

Table of Contents

5. Loans and Leases Held for Investment, Net

Loans and leases held for investment as of March 31, 2014 and December 31, 2013 are comprised of the following:

	March 31, 2014	December 31, 2013
Residential mortgages	\$7,599,826	\$7,044,743
Commercial and commercial real estate	4,819,020	4,812,970
Lease financing receivables	1,292,750	1,237,941
Home equity lines	147,086	151,916
Consumer and credit card	5,427	5,154
Total loans and leases held for investment, net of discounts	13,864,109	13,252,724
Allowance for loan and lease losses	(62,969)	(63,690)
Total loans and leases held for investment, net	\$13,801,140	\$13,189,034

As of March 31, 2014 and December 31, 2013, the carrying values presented above include net purchased loan and lease discounts and net deferred loan and lease origination costs as follows:

	March 31, 2014	December 31, 2013
Net purchased loan and lease discounts	\$79,905	\$102,416
Net deferred loan and lease origination costs	64,688	54,107

Acquired Credit Impaired (ACI) Loans and Leases — At acquisition, the Company estimates the fair value of acquired loans and leases by segregating the portfolio into pools with similar risk characteristics. Fair value estimates for acquired loans and leases require estimates of the amounts and timing of expected future principal, interest and other cash flows. For each pool, the Company uses certain loan and lease information, including outstanding principal balance, probability of default and the estimated loss in the event of default to estimate the expected future cash flows for each loan and lease pool.

Acquisition date details of loans and leases acquired with evidence of credit deterioration during the three months ended March 31, 2014 and 2013 are as follows:

	March 31, 2014	March 31, 2013
Contractual payments receivable for acquired loans and leases at acquisition	\$308,426	\$78,496
Expected cash flows for acquired loans and leases at acquisition	207,240	45,914
Basis in acquired loans and leases at acquisition	193,177	41,944

Information pertaining to the ACI portfolio as of March 31, 2014 and December 31, 2013 is as follows:

	Residential	Commercial and Commercial Real Estate	Total
March 31, 2014			
Carrying value, net of allowance	\$757,833	\$307,806	\$1,065,639
Outstanding unpaid principal balance (UPB)	793,839	313,712	1,107,551
Allowance for loan and lease losses, beginning of period	4,925	9,834	14,759
Allowance for loan and lease losses, end of period	4,638	10,659	15,297
December 31, 2013			
Carrying value, net of allowance	\$646,470	\$331,771	\$978,241
Outstanding unpaid principal balance	696,222	339,179	1,035,401
Allowance for loan and lease losses, beginning of year	5,175	16,789	21,964
Allowance for loan and lease losses, end of year	4,925	9,834	14,759

The Company recorded \$534 and \$1,570 in provision for loan and lease losses for the ACI portfolio for the three months ended March 31, 2014 and 2013, respectively. The adjustments to provision are the result of changes in expected cash flows on ACI loans.

Table of Contents

The following is a summary of the accretable yield activity for the ACI loans during the three months ended March 31, 2014 and 2013:

	Residential	Commercial and Commercial Real Estate	Total
March 31, 2014			
Balance, beginning of period	\$ 101,183	\$ 59,663	\$ 160,846
Additions	14,063	—	14,063
Accretion	(13,034)	(5,563)	(18,597)
Reclassifications to accretable yield	2,056	17,916	19,972
Balance, end of period	\$ 104,268	\$ 72,016	\$ 176,284
March 31, 2013			
Balance, beginning of period	111,868	108,540	220,408
Additions	3,970	—	3,970
Accretion	(10,132)	(9,854)	(19,986)
Reclassifications (from) to accretable yield	2,034	10,551	12,585
Balance, end of period	\$ 107,740	\$ 109,237	\$ 216,977

Covered Loans and Leases — Covered loans and leases are acquired and recorded at fair value at acquisition, exclusive of the indemnification agreement with former shareholders of Tygris. All loans and leases acquired through the purchase of Tygris are considered covered during the applicable indemnification period. The recorded investment of loans covered under the Tygris indemnification agreement are \$17,458 and \$24,330 at March 31, 2014 and December 31, 2013, respectively. As of March 31, 2014, the Company does not expect to receive cash payments under these indemnification agreements due to the performance of the underlying loans.

(1) The primary difference between the unpaid principal balance and recorded investment represents charge offs previously taken.

Table of Contents

The following table presents the average investment and interest income recognized on impaired loans for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,			
	2014	2013	2014	2013
	Average Investment	Interest Income Recognized	Average Investment	Interest Income Recognized
With and without a related allowance recorded:				
Residential mortgages:				
Residential	\$86,856	\$617	\$95,534	\$770
Commercial and commercial real estate:				
Commercial	1	—	6,351	2
Commercial real estate	26,437	166	79,940	214
Total impaired loans	\$113,294	\$783	\$181,825	\$986

The following table presents the recorded investment for loans and leases on nonaccrual status by class and loans greater than 90 days past due and still accruing as of March 31, 2014 and December 31, 2013:

	March 31, 2014		December 31, 2013	
	Nonaccrual Status	Greater than 90 Days Past Due and Accruing	Nonaccrual Status	Greater than 90 Days Past Due and Accruing
Residential mortgages:				
Residential	\$44,391	\$—	\$56,517	\$—
Government insured pool buyouts	—	590,324	—	671,918
Commercial and commercial real estate:				
Commercial	57	—	1,005	—
Commercial real estate	23,828	—	17,544	—
Lease financing receivables	5,446	—	4,527	—
Home equity lines	3,462	—	3,270	—
Consumer and credit card	34	—	37	—
Total non-performing loans and leases	\$77,218	\$590,324	\$82,900	\$671,918

Troubled Debt Restructurings (TDR) — Modifications considered to be TDRs are individually evaluated for credit loss based on a discounted cash flow model using the loan's effective interest rate at the time of origination. The discounted cash flow model used in this evaluation is adjusted to reflect the modified loan's elevated probability of future default based on the Company's historical redefault rate. These loans are classified as nonaccrual and have been included in the Company's impaired loan disclosures in the tables above. A loan is considered to redefault when it is 30 days past due. Once a modified loan demonstrates a consistent period of performance under the modified terms, generally six months, the Company returns the loan to an accrual classification. If a modified loan defaults under the terms of the modified agreement, the Company measures the allowance for loan and lease losses based on the fair value of collateral less cost to sell.

Modifications made to residential loans during the period included extension of original contractual maturity date, extension of the period of below market rate interest only payments, or contingent reduction of past due interest. Commercial loan modifications made during the period included extension of original contractual maturity date, payment forbearance, reduction of interest rates, or extension of interest only periods.

Table of Contents

The following is a summary of information relating to modifications considered to be TDRs for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31, 2014		
	Number of Contracts	Pre-modification Recorded Investment	Post-modification Recorded Investment
Loan Type: Residential	2	\$474	\$474

	Three Months Ended March 31, 2013		
	Number of Contracts	Pre-modification Recorded Investment	Post-modification Recorded Investment
Loan Type: Residential	12	\$5,588	\$5,600
Commercial real estate	1	376	376
Total	13	\$5,964	\$5,976

The number of contracts and recorded investment of loans that were modified during the last 12 months and subsequently defaulted during the three months ended March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31, 2014	
	Number of Contracts	Recorded Investment
Loan Type: Residential	1	\$147

	Three Months Ended March 31, 2013	
	Number of Contracts	Recorded Investment
Loan Type: Residential	2	\$852

The recorded investment of TDRs as of March 31, 2014 and December 31, 2013 are summarized as follows:

	March 31, 2014	December 31, 2013
Loan Type: Residential mortgages	\$83,241	\$90,472
Commercial and commercial real estate	8,511	8,598
Total recorded investment of TDRs	\$91,752	\$99,070
Accrual Status:		
Current	\$67,631	\$73,180
30-89 days past-due accruing	5,824	3,732
90+ days past-due accruing	—	306
Nonaccrual	18,297	21,852
Total recorded investment of TDRs	\$91,752	\$99,070
TDRs classified as impaired loans	\$91,752	\$99,070

Valuation allowance on TDRs	8,630	9,134
-----------------------------	-------	-------

The Company included 119 and 119 loans with net recorded investments of \$12,883 and \$12,588 in Chapter 7 bankruptcy as TDRs at March 31, 2014 and 2013.

Table of Contents

7. Servicing Activities and Mortgage Servicing Rights

A summary of MSR activities for the three months ended March 31, 2014 and 2013 is as follows:

	Three Months Ended March 31,	
	2014	2013
Balance, beginning of period	\$506,680	\$375,859
Originated servicing rights capitalized upon sale of loans	11,552	23,501
Sale of servicing rights	(55,547)	—
Amortization	(20,572)	(35,078)
Decrease (increase) in valuation allowance	4,941	12,555
Other	(561)	(1,196)
Balance, end of period	\$446,493	\$375,641
Valuation allowance:		
Balance, beginning of period	\$8,012	\$102,963
Recoveries	(4,941)	(12,555)
Balance, end of period	\$3,071	\$90,408

Components of loan servicing fee income for the three months ended March 31, 2014 and 2013 are presented below:

	Three Months Ended March 31,	
	2014	2013
Contractually specified service fees, net	\$37,147	\$31,789
Other ancillary fees	8,899	9,737
Other	571	637
	\$46,617	\$42,163

Residential

On March 28, 2014, EverBank received investor approval and recognized the sale of \$55,547 in carrying value and \$9,945,965 in UPB of servicing rights to Green Tree Servicing LLC (GTS), which is expected to transfer in May 2014. The Company is subservicing these loans until the transfer date and the loans are therefore excluded from the Company's MSR portfolio at March 31, 2014.

For loans securitized and sold with servicing retained during the three months ended March 31, 2014 and 2013, management used the following assumptions to determine the fair value of residential MSR at the date of securitization:

	Three Months Ended March 31, 2014	
Average discount rates	9.32 %	— 9.49%
Expected prepayment speeds	11.73 %	— 12.12%
Weighted-average life in years	6.03	— 6.41
	Three Months Ended March 31, 2013	
Average discount rates	9.38 %	— 9.85%
Expected prepayment speeds	13.61 %	— 13.85%
Weighted-average life in years	5.57	— 5.69

At March 31, 2014 and December 31, 2013, the Company estimated the fair value of its capitalized residential MSR to be approximately \$453,814 and \$528,848, respectively. The carrying value of its residential MSR was \$440,934 and \$499,973 at March 31, 2014 and December 31, 2013, respectively. The unpaid principal balance below excludes \$6,943,000 and \$6,677,000 at March 31, 2014 and December 31, 2013, respectively, for residential loans with no related MSR basis.

The characteristics used in estimating the fair value of the residential MSR portfolio at March 31, 2014 and December 31, 2013 are as follows:

Edgar Filing: EverBank Financial Corp - Form 10-Q

	March 31, 2014	December 31, 2013	
Unpaid principal balance	\$42,264,000	\$52,816,000	
Gross weighted-average coupon	4.46	% 4.46	%
Weighted-average servicing fee	0.29	% 0.29	%
Expected prepayment speed ⁽¹⁾	11.95	% 14.87	%

The prepayment speed assumptions include a blend of prepayment speeds that are influenced by mortgage interest (1) rates, the current macroeconomic environment and borrower behaviors and may vary over the expected life of the asset.

Table of Contents

A sensitivity analysis of the Company's fair value of residential MSR portfolio to hypothetical adverse changes of 10% and 20% to the weighted-average of certain key assumptions as of March 31, 2014 and December 31, 2013 is presented below.

	March 31, 2014	December 31, 2013
Prepayment Rate		
10% adverse rate change	\$ 18,633	\$ 22,941
20% adverse rate change	35,973	44,156
Discount Rate		
10% adverse rate change	16,756	19,303
20% adverse rate change	32,348	37,294

In the previous table, the effect of a variation in a specific assumption on the fair value is calculated without changing any other assumptions. This analysis typically cannot be extrapolated because the relationship of a change in one key assumption to the change in the fair value of the Company's residential mortgage servicing rights usually is not linear. The effect of changing one key assumption will likely result in the change of another key assumption which could impact the sensitivities.

Commercial

The carrying value and fair value of our commercial MSR was \$5,559 at March 31, 2014. As of December 31, 2013, the carrying value and fair value of our commercial MSR was \$6,707. The Company recognized \$2,630 and \$3,175 of prepayment penalty income in other noninterest income during the three months ended March 31, 2014 and 2013, respectively, related to serviced loans in the Business Lending Trusts acquired with the Business Property Lending, Inc. acquisition.

8. Income Taxes

The Company's effective income tax rate was 37.9% and 38.2% for the three months ended March 31, 2014 and 2013, respectively. The Company's effective income tax rate differs from the federal statutory income tax rate primarily due to state income taxes.

9. Share-Based Compensation

Option Plans - On March 7, 2014, the Company granted 675,463 options with a fair value on the grant date of \$6.51. The fair value of each option award was estimated as of the grant date using the Black-Scholes option-pricing model. Significant assumptions used in the Black-Scholes option-pricing model to determine the fair value of stock options are as follows:

Risk-free interest rate	2.04	%
Expected volatility	35	%
Expected term (years)	6.5	
Dividend yield	0.86	%

The risk-free interest rate is based on the U.S. Treasury constant maturity yield for treasury securities with maturities approximating the expected life of the options granted on the date of grant. The expected option terms were based on the vesting term and contractual term of the options using the simplified approach under GAAP. The Company analyzes a group of publicly-traded peer institutions to determine the expected volatility of its stock. The peer group is assessed for adequacy annually, or as circumstances indicate significant changes to the composition of the peer group are warranted. Volatility for the Company's stock is estimated utilizing the average volatility calculated for the peer group, which is based upon daily price observations over the estimated term of the options granted.

During the three months ended March 31, 2014, 31,239 options were exercised with a total intrinsic value of \$255.

Nonvested Stock - The Company issued 245,645 nonvested shares of stock to certain employees as an incentive for continued employment and certain directors in lieu of cash payouts for compensation during the three months ended March 31, 2014. The weighted-average grant date fair value of these shares was \$18.09, which is the fair value of the Company's common stock at grant date adjusted for expected dividends as our restricted shares do not accrue dividends.

Table of Contents

10. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per common share for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,	
	2014	2013
Net income	\$31,760	\$39,146
Less dividends on preferred stock	(2,531)	(2,531)
Net income allocated to common shareholders (Units in Thousands)	\$29,229	\$36,615
Average common shares outstanding	122,684	121,583
Common share equivalents:		
Stock options	2,192	1,777
Nonvested stock	162	79
Average common shares outstanding, assuming dilution	125,038	123,439
Basic earnings per share	\$0.24	\$0.30
Diluted earnings per share	\$0.23	\$0.30

Certain securities were antidilutive and were therefore excluded from the calculation of diluted earnings per share.

Common shares attributed to these antidilutive securities had these securities been exercised or converted as of March 31, 2014 and 2013 are as follows:

	Three Months Ended March 31,	
	2014	2013
Stock Options	942,570	6,431,741

Table of Contents

11. Derivative Financial Instruments

The fair values of derivatives are reported in other assets, deposits, or accounts payable and accrued liabilities. The fair values are derived using the valuation techniques described in Note 12. The total notional or contractual amounts and fair values as of March 31, 2014 and December 31, 2013 are as follows:

	Notional Amount	Fair Value Asset Derivatives	Liability Derivatives
March 31, 2014			
Qualifying hedge contracts accounted for under Accounting Standards Codification (ASC) 815, Derivatives and Hedging			
Cash flow hedges:			
Forward interest rate swaps	\$178,000	\$—	\$22,360
Derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging			
Freestanding derivatives:			
Interest rate lock commitments (IRLCs)	908,689	1,931	1,887
Forward and optional forward sales commitments	1,376,431	4,648	2,587
Interest rate swaps and futures	263,115	—	420
Foreign exchange contracts	769,871	11,595	2,814
Foreign currency, commodity and metals indexed options	171,405	8,055	—
Options embedded in client deposits	169,951	—	8,013
Indemnification assets	122,021	7,304	—
Total freestanding derivatives		33,533	15,721
Netting and cash collateral adjustments ⁽¹⁾		(9,110)	(24,800)
Total derivatives		\$24,423	\$13,281
	Notional Amount	Fair Value Asset Derivatives	Liability Derivatives
December 31, 2013			
Qualifying hedge contracts accounted for under ASC 815, Derivatives and Hedging			
Cash flow hedges:			
Forward interest rate swaps	\$253,000	\$—	\$27,897
Derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging			
Freestanding derivatives:			
IRLCs	590,020	896	2,566
Forward and optional forward sales commitments	1,001,489	12,228	2,948
Interest rate swaps	75,239	—	347
Foreign exchange contracts	807,732	4,073	14,318
Foreign currency, commodity and metals indexed options	171,405	7,719	—
Options embedded in client deposits	170,176	—	7,689
Indemnification assets	147,897	7,531	—
Total freestanding derivatives		32,447	27,868
Netting and cash collateral adjustments ⁽¹⁾		(4,277)	(40,367)
Total derivatives		\$28,170	\$15,398

(1) Amounts represent the effect of legally enforceable master netting agreements that allow the Company to settle positive and negative positions as well as cash collateral and related accrued interest held or placed with the same counterparties. Amounts as of March 31, 2014 and December 31, 2013 include derivative positions netted totaling

\$2,440 and \$1,763, respectively.

Cash Flow Hedges

As of March 31, 2014, AOCI included \$17,141 of deferred pre-tax net losses expected to be reclassified into earnings during the next 12 months for derivative instruments designated as cash flow hedges of forecasted transactions. The Company is hedging its exposure to the variability of future cash flows for forecasted transactions of fixed-rate debt for a maximum of 10 years.

Table of Contents

Freestanding Derivatives

The following table shows the net gains and losses recognized for the three months ended March 31, 2014 and 2013 in the condensed consolidated statements of income related to derivatives not designated as hedging instruments under ASC 815, Derivatives and Hedging. These gains and losses are recognized in other noninterest income, except for the indemnification assets which are recognized in general and administrative expense.

	Three Months Ended	
	March 31,	
	2014	2013
Freestanding derivatives		
Gains (losses) on interest rate contracts ⁽¹⁾	\$(15,163)	\$21,960
Losses on indemnification assets ⁽²⁾	(227)	(177)
Other	(10)	(140)
Total	\$(15,400)	\$21,643

(1) Interest rate contracts include interest rate lock commitments, forward and optional forward sales commitments, and interest rate swaps and futures.

(2) Refer to Note 12 for additional information relating to the indemnification asset.

Interest rate contracts are predominantly used as economic hedges of interest rate lock commitments and loans held for sale. Other derivatives are predominantly used as economic hedges of foreign exchange, commodity and metals risk.

Credit Risk Contingent Features

Certain of the Company's derivative instruments contain provisions that require the Company to post collateral when derivatives are in a net liability position. The provisions generally are dependent upon the Company's credit rating based on certain major credit rating agencies or dollar amounts in a liability position at any given time which exceed specified thresholds, as indicated in the relevant contracts. In these circumstances, the counterparties could demand additional collateral or require termination or replacement of derivative instruments in a net liability position. The aggregate fair value of all derivative instruments with such credit-risk-related contingent features in a net liability position on March 31, 2014 and December 31, 2013 was \$25,594 and \$42,562, respectively. The Company offsets derivative instruments against the rights to reclaim cash collateral or the obligations to return cash collateral in the balance sheet. As of March 31, 2014 and December 31, 2013, \$27,240 and \$42,130, respectively, in collateral was netted against liability derivative positions subject to master netting agreements. As of March 31, 2014 and December 31, 2013, \$13,820 and \$6,370, respectively, of collateral was posted for positions not subject to master netting agreements.

Counterparty Credit Risk

The Company is exposed to counterparty credit risk if counterparties to the derivative contracts do not perform as expected. If the counterparty fails to perform, counterparty credit risk equals the amount reported as derivative assets in the balance sheet. The amounts reported as derivative assets are derivative contracts in a gain position, and to the extent subject to master netting arrangements, net of derivatives in a loss position with the same counterparty and cash collateral received. The Company minimizes this risk through obtaining credit approvals, monitoring credit limits, monitoring procedures, and executing master netting arrangements and obtaining collateral, where appropriate. The Company offsets derivative instruments against the rights to reclaim cash collateral or the obligations to return cash collateral in the balance sheet. As of March 31, 2014 and December 31, 2013, \$11,550 and \$6,040, respectively, in collateral was netted against asset derivative positions subject to master netting agreements. As of March 31, 2014 and December 31, 2013, the Company held \$11,550 and \$6,040, respectively, in collateral from its counterparties. Counterparty credit risk related to derivatives is considered in determining fair value.

12. Fair Value Measurements

Asset and liability fair value measurements have been categorized based upon the fair value hierarchy described below:

Level 1 – Valuation is based upon quoted market prices for identical instruments in active markets.

Level 2 – Valuation is based upon quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 – Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect estimates or assumptions that market participants would use in pricing the assets or liabilities. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Table of Contents

Recurring Fair Value Measurements

As of March 31, 2014 and December 31, 2013, assets and liabilities measured at fair value on a recurring basis, including certain loans held for sale for which the Company has elected the fair value option, are as follows:

	Level 1 ⁽¹⁾	Level 2	Level 3	Netting	Total
March 31, 2014					
Financial assets:					
Available for sale securities:					
Residential CMO securities - nonagency	\$—	\$1,111,477	\$—		\$1,111,477
Asset-backed securities	—	2,620	—		2,620
Other	388	4,161	—		4,549
Total available for sale securities	388	1,118,258	—		1,118,646
Loans held for sale	—	488,976	63,705		552,681
Derivative financial instruments:					
Derivative assets (Note 11)	—	24,298	9,235	(9,110)) 24,423
Derivative liabilities (Note 11)	—	36,194	1,887	(24,800)) 13,281
	Level 1	Level 2	Level 3	Netting	Total
December 31, 2013					
Financial assets:					
Available for sale securities:					
Residential CMO securities - nonagency	\$—	\$1,109,271	\$—		\$1,109,271
Asset-backed securities	—	3,086	—		3,086
Other	399	2,871	—		3,270
Total available for sale securities	399	1,115,228	—		1,115,627
Loans held for sale	—	613,459	58,912		672,371
Derivative financial instruments:					
Derivative assets (Note 11)	—	24,020	8,427	(4,277)) 28,170
Derivative liabilities (Note 11)	—	53,199	2,566	(40,367)) 15,398

Level 1 derivative assets include interest rate swap futures. These futures are settled on a daily basis between the (1) counterparty and the Company, resulting in the Company holding an outstanding notional balance and a zero derivative balance. See Note 11 for additional information regarding the interest rate future.

Table of Contents

Changes in assets and liabilities measured at Level 3 fair value on a recurring basis for the three months ended March 31, 2014 and 2013 are as follows:

	Loans Held for Sale ⁽¹⁾	FDIC Clawback Liability ⁽²⁾	Freestanding Derivatives, net ⁽³⁾
Three Months Ended March 31, 2014			
Balance, beginning of period	\$58,912	\$—	\$5,861
Issuances	76,495	—	5,139
Sales	(55,597) —	—
Settlements	(17,445) —	(7,015
Gains (losses) included in earnings for the period	1,340	—	3,363
Balance, end of period	\$63,705	\$—	\$7,348
Change in unrealized net gains (losses) included in net income related to assets and liabilities still held as of March 31, 2014	\$73	\$—	\$1,486
Three Months Ended March 31, 2013			
Balance, beginning of period	\$—	\$(50,720) \$9,092
Transfers into Level 3	—	—	6,628
Gains (losses) included in earnings for the period	—	(1,468) (176
Balance, end of period	\$—	\$(52,188) \$15,544
Change in unrealized net gains (losses) included in net income related to assets and liabilities still held as of March 31, 2013	\$—	\$(1,468) \$(176

(1) Net realized and unrealized gains on loans held for sale are included in gain on sale of loans.

(2) Changes in fair value of the Federal Deposit Insurance Corporation (FDIC) clawback liability are recorded in general and administrative expense.

(3) Net realized and unrealized gains (losses) on IRLCs are included in gain on sale of loans. Changes in the fair value of the indemnification assets are recorded in general and administrative expense.

The Company monitors the availability of observable market data to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the Company reports the transfer at the end of the reporting period.

Table of Contents

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a recurring basis at March 31, 2014 and December 31, 2013:

Level 3 Fair Value Measurement	Fair Value	Valuation Technique	Unobservable Inputs	Significant Unobservable Input Value		
				Min.	Max.	Weighted Avg.
March 31, 2014						
Indemnification asset	\$ 7,304	Discounted cash flow	Discount rate	4.35	% - 4.35%	4.35%
			Reinstatement rate	3.58	% - 66.09%	25.41% (1)
			Loss duration (in months)	9	- 82	37 (1)
			Loss severity	1.67	% - 13.47%	6.76% (1)
IRLCs, net	44	Discounted cash flow	Loan closing ratio	0.00	% - 99.00%	79.93% (2)
Loans held for sale	63,705	Discounted cash flow	Cost of funds	2.45	% - 3.22%	3.00%
			Prepayment rate	4.77	% - 15.46%	9.00%
			Default rate	0.00	% - 1.39%	0.20%
			Weighted average life (in years)	5.20	- 10.70	7.95
			Cumulative loss	0.00	% - 0.38%	0.05%
			Loss severity	15.13	% - 28.23%	20.42%
			December 31, 2013			
Indemnification asset	7,531	Discounted cash flow	Discount Rate	4.35	% - 4.35%	4.35%
			Reinstatement rate	0.00	% - 68.98%	23.61% (1)
			Loss duration (in months)	9	- 100	36 (1)
			Loss severity	(4.96))% - 19.70%	6.54% (1)
IRLCs, net	(1,670)	Discounted cash flow	Loan closing ratio	0.00	% - 99.00%	79.74% (2)
Loans held for sale	58,912	Discounted cash flow	Cost of funds	2.81	% - 3.75%	3.45%
			Prepayment rate	4.68	% - 14.78%	7.58%
			Default rate	0.00	% - 2.25%	0.18%
			Weighted average life (in years)	5.05	- 10.74	8.25
			Cumulative loss	0.00	% - 0.61%	0.04%
			Loss severity	0.00	% - 27.20%	19.68%

(1) The range represents the sum of the highest and lowest values for all tranches that we use in our valuation process.

The range represents the highest and lowest loan closing rates used in the IRLC valuation. The range includes the (2) closing ratio for rate locks unclosed at the end of the period, as well as the closing ratio for loans which have settled during the period.

Loans Held for Sale Accounted for under the Fair Value Option

The following table presents information on loans held for sale reported under the fair value option at March 31, 2014 and December 31, 2013:

March 31, 2014	
Fair value carrying amount	\$552,681
Aggregate unpaid principal balance	535,931
Fair value carrying amount less aggregate unpaid principal	\$16,750
December 31, 2013	

Fair value carrying amount	\$672,371
Aggregate unpaid principal balance	659,592
Fair value carrying amount less aggregate unpaid principal	\$12,779

No loans recorded under the fair value option were on nonaccrual status at March 31, 2014 or December 31, 2013.

Differences between the fair value carrying amount and the aggregate unpaid principal balance include changes in fair value recorded at and subsequent to funding, gains and losses on the related loan commitment prior to funding and premiums or discounts on acquired loans.

The net gains from initial measurement of loans accounted for under the fair value option and subsequent changes in fair value for loans outstanding were \$17,209 for the three months ended March 31, 2014 and are included in gain on sale of loans. The net gains from initial measurement of loans accounted for under the fair value option and subsequent changes in fair value were \$61,631 for the three months ended March 31, 2013 and are included in gain on sale of loans. These amounts exclude the impact from offsetting hedging arrangements which are also included in gain on sale of loans in the condensed consolidated statements of income. An immaterial portion of the change in fair value was attributable to changes in instrument-specific credit risk.

Table of Contents

Non-recurring Fair Value Measurements

Certain assets and liabilities are measured at fair value on a non-recurring basis and therefore are not included in the tables above. These measurements primarily result from assets carried at the lower of cost or fair value or from impairment of individual assets. Gains and losses disclosed below represent changes in fair value recognized subsequent to initial classification. The change in the MSR value represents a change due to impairment or recoveries on previous write downs. The carrying value of assets measured at fair value on a non-recurring basis and held at March 31, 2014 and December 31, 2013 and related changes in fair value are as follows:

	Level 1	Level 2	Level 3	Total	Loss (Gain) Due to Change in Fair Value
March 31, 2014					
Collateral-dependent loans	\$—	\$—	\$8,340	\$8,340	\$558
Other real estate owned ⁽¹⁾	—	—	5,462	5,462	1,014
Mortgage servicing rights ⁽²⁾	—	—	71,998	71,998	(4,941)
Loans held for sale	—	—	5,564	5,564	79
December 31, 2013					
Collateral-dependent loans	\$—	\$—	\$907	\$907	\$248
Other real estate owned ⁽¹⁾	—	—	7,009	7,009	2,008
Mortgage servicing rights ⁽²⁾	—	—	448,925	448,925	(94,951)
Loans held for sale	—	—	9,123	9,123	424

Gains and losses resulting from subsequent measurement of OREO are included in the condensed consolidated (1) statements of income as general and administrative expense. OREO is included in other assets in the condensed consolidated balance sheets.

(2) The fair value for mortgage servicing rights represents the value of the strata with impairment or recoveries on previous valuation allowances.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at March 31, 2014 and December 31, 2013:

Level 3 Fair Value Measurement	Fair Value	Valuation Technique	Unobservable Inputs	Significant Unobservable Input Value		
				Min.	Max.	Weighted Avg.
March 31, 2014						
Collateral-dependent loans	\$8,340	Appraised value	Appraised value	NM	-NM	N/A ⁽¹⁾
Other real estate owned	5,462	Appraised value	Appraised value	NM	-NM	N/A ⁽¹⁾
Mortgage servicing rights	71,998	Discounted cash flow	Prepayment speed	16.89	%- 18.20%	17.36% ⁽²⁾
			Discount rate	9.87	%- 9.87%	9.87% ⁽³⁾
Loans held for sale	5,564	Discounted cash flow	Cost of funds	2.45	%- 3.22%	3.00%
			Prepayment rate	4.77	%- 15.46%	9.00%
			Default rate	0.00	%- 1.39%	0.20%
			Weighted average life (in years)	5.20	- 10.70	7.95
			Cumulative loss	0.00	%- 0.38%	0.05%
			Loss severity	15.13	%- 28.23%	20.42%
December 31, 2013						
Collateral-dependent loans	907	Sales comparison approach	Appraisal value adjustment	0.00	%- 47.00%	N/A ⁽¹⁾
	7,009			0.00	%- 82.00%	N/A ⁽¹⁾

Edgar Filing: EverBank Financial Corp - Form 10-Q

Other real estate owned		Sales comparison approach	Appraisal value adjustment			
Mortgage servicing rights	448,925	Discounted cash flow	Prepayment speed	16.50	%-19.80%	19.25% (2)
			Discount rate	9.20	%-9.80%	9.37% (3)
Loans held for sale	9,123	Discounted cash flow	Cost of funds	2.81	%-3.75%	3.45%
			Prepayment rate	4.68	%-14.78%	7.58%
			Default rate	0.00	%-2.25%	0.18%
			Weighted average life (in years)	5.05	-10.74	8.25
			Cumulative loss	0.00	%-0.61%	0.04%
			Loss severity	0.00	%-27.20%	19.68%

(1) NM - Not Meaningful or N/A Not Applicable

(2) The prepayment speed assumptions include a blend of prepayment speeds that are influenced by mortgage interest rates, the current macroeconomic environment and borrower behaviors and may vary over the expected life of the asset. The range represents the highest and lowest values for the strata with recoveries on previous valuation allowances.

(3) The discount rate range represents the highest and lowest values for the MSR strata with recoveries on previous valuation allowances.

Disclosures about Fair Value of Financial Instruments

The following table presents the carrying amount, estimated fair value, and placement in the fair value hierarchy of the Company's financial instruments as of March 31, 2014 and December 31, 2013. This table excludes financial instruments with short-term or no stated maturity, prevailing market rates and limited credit risk, where carrying amounts approximate fair value. For financial assets such as cash and due from banks, FHLB restricted stock, and other investments, the carrying amount is a reasonable estimate of fair value. For financial liabilities such as noninterest-bearing demand, interest-bearing demand, and savings and money market deposits, the carrying amount is a reasonable estimate of fair value as these liabilities have no stated maturity.

	Carrying Amount	Estimated Fair Value	Level 1	Level 2	Level 3
March 31, 2014					
Financial assets:					
Investment securities:					
Held to maturity	\$116,984	\$117,910	\$—	\$117,910	\$—
Loans held for sale ⁽¹⁾	44,048	45,635	—	22,437	23,198
Loans held for investment ⁽²⁾	12,704,339	12,881,034	—	—	12,881,034
Financial liabilities:					
Time deposits	\$3,835,182	\$3,862,092	\$—	\$3,862,092	\$—
Other borrowings	2,377,000	2,356,826	—	2,356,826	—
Trust preferred securities	103,750	89,567	—	—	89,567
December 31, 2013					
Financial assets:					
Investment securities:					
Held to maturity	\$107,312	\$107,921	\$—	\$107,921	\$—
Loans held for sale ⁽¹⁾	119,011	121,092	—	49,619	71,473
Loans held for investment ⁽²⁾	12,153,835	12,266,499	—	—	12,266,499
Financial liabilities:					
Time deposits	\$3,654,179	\$3,680,868	\$—	\$3,680,868	\$—
Other borrowings	2,377,000	2,353,858	—	2,353,858	—
Trust preferred securities	103,750	86,220	—	—	86,220

(1) The carrying value of loans held for sale excludes \$552,681 and \$672,371 in loans measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2013, respectively.

The carrying value of loans held for investment is net of the allowance for loan loss of \$58,657 and \$59,417 as of (2) March 31, 2014 and December 31, 2013, respectively. In addition, the carrying values excludes \$1,096,801 and \$1,035,199 of lease financing receivables as of March 31, 2014 and December 31, 2013, respectively.

Disclosures about Fair Value of Financial Instruments

Following are descriptions of the valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not carried at fair value:

Investment Securities — Fair values are derived from quoted market prices and values from third party pricing services for which management understands the methods used to determine fair value and is able to assess the values. The Company also performs an assessment on the pricing of investment securities received from third party pricing services to ensure that the prices represent a reasonable estimate of fair value. The procedures include, but are not limited to, initial and on-going review of pricing methodologies and trends. The Company has the ability to challenge values and discuss its analysis with the third party pricing service provider in order to ensure that investments are recorded or disclosed at the appropriate fair value.

When the level and volume of trading activity for certain securities has significantly declined and/or when the Company believes that third party pricing may be based in part on forced liquidations or distressed sales, the Company analyzes each security for the appropriate valuation methodology based on a combination of the market approach reflecting third party pricing information and a discounted cash flow approach. In calculating the fair value

derived from the income approach, the Company makes certain significant assumptions in addition to those discussed above related to the liquidity risk premium, specific non-performance and default experience in the collateral underlying the security. The values resulting from each approach (i.e., market and income approaches) are weighted to derive the final fair value for each security trading in an inactive market. As of March 31, 2014 and December 31, 2013, management did not make any adjustments to the prices provided by the third party pricing service as a result of illiquid or inactive markets.

Loans Held for Sale — Fair values for loans held for sale valued under the fair value option were derived from quoted market prices or from models using loan characteristics including product type, pricing features and loan maturity dates and economic assumptions including prepayment estimates and discount rates based on prices currently offered in secondary markets for similar loans. Certain conforming residential mortgage loans carried at the lower of cost or market are valued using market observable pricing inputs, which are derived from third party loan sales and securitizations and, therefore, are classified within level 2 of the valuation hierarchy. Fair values for non-conforming residential mortgage loans and commercial and commercial real estate loans carried at lower of cost or market were derived from models using characteristics of the loans including product type, pricing features and loan maturity dates and economic assumptions including prepayment estimates, discount rates and estimated credit losses and, therefore, are classified within level 3 of the valuation hierarchy. The Company estimates the fair value of loans held for sale utilizing a discounted cash flow approach which includes an evaluation of the collateral and underlying loan characteristics, as well as assumptions to determine the discount rate such as credit loss and prepayment forecasts, and

Table of Contents

servicing costs. In determining the appropriate discount rate, prepayment and credit assumptions, the Company monitors other capital markets activity for similar collateral being traded and/or interest rates currently being offered for similar products. Discussions related to the fair value of these loans held for sale are held between our internal valuation specialists and executive and business unit management to discuss the key assumptions used in arriving at our estimates. Significant increases (decreases) in any of those assumptions in isolation could result in a significantly lower (higher) fair value measurement.

Loans Held for Investment — Fair value of loans held for investment is derived using a discounted cash flow approach which includes an evaluation of the collateral, and underlying loan characteristics. The valuation model uses loan characteristics which includes product type, maturity dates, credit profile of the loans, and the underlying interest rate of the portfolio. This information is input into the valuation models along with various forecast valuation assumptions including credit loss assumptions, servicing cost (if any), prepayment forecasts, and risk adjusted capital to determine the discount rate. These assumptions are derived from internal and third party databases. Noting the valuation is derived from model-based techniques, the Company includes loans held for investment within level 3 of the valuation hierarchy.

Impaired Loans — At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Fair value is determined primarily by using an income, cost, or market approach and is normally provided through appraisals. Impaired loans carried at fair value generally receive specific allocations within the allowance for loan and lease losses. For collateral-dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a level 3 classification of the inputs for determining fair value. For collateral-dependent loans in which a new appraisal is expected in the next quarter, the appraisal is reviewed by an officer and an adjustment is made based on a review of the property, historical changes, and current market rates. Appraisals are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a level 3 fair value classification. Impaired loans are evaluated at least quarterly for additional impairment and adjusted accordingly.

Other Real Estate Owned — Foreclosed assets are carried at the lower of cost or fair value (less estimated costs to sell). Fair value is generally based upon appraisals or independent market prices that are periodically updated subsequent to classification as OREO. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments on commercial properties are usually significant and typically result in a level 3 classification of the inputs for determining fair value. Appraisals for OREO are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Once received, a member of the Company's valuation services group reviews the assumptions and approaches utilized in the appraisal. To assess the reasonableness of the fair value, the Company's valuation services group compares the assumptions to independent data sources such as recent market data or industry-wide statistics. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a level 3 fair value classification.

Mortgage Servicing Rights — Mortgage servicing rights are evaluated for impairment on a quarterly basis. If the carrying amount of an individual stratum exceeds fair value, impairment is recorded on that stratum so that the servicing asset is carried at fair value. In addition, a third-party valuation is obtained quarterly. The servicing portfolio has been valued using all relevant positive and negative cash flows including servicing fees; miscellaneous income

and float; costs of servicing; the cost of carry of advances; foreclosure losses; and applying certain prevailing assumptions used in the marketplace. Mortgage servicing rights do not trade in an active, open market with readily observable prices. Due to the nature of the valuation inputs, mortgage servicing rights are classified within level 3 of the valuation hierarchy. The fair value of mortgage servicing rights is determined by using a discounted cash flow model to calculate the present value of estimated future net servicing income. The assumptions are a combination of market and Company specific data. On a quarterly basis, the portfolio management group compares the Company's estimated fair value of the mortgage servicing rights to a third-party valuation as part of the valuation process. Discussions are held between executive management and the independent third-party to review the key assumptions used by the respective parties in arriving at those estimates.

Time Deposits — The fair value of fixed-rate certificates of deposit is estimated using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate continuous yield or pricing curves, and volatility factors. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. The Company considers the impact of its own credit spreads in the valuation of these liabilities. The credit risk is determined by reference to observable credit spreads in the secondary cash market and therefore are classified within level 2 of the valuation hierarchy.

Other Borrowings — For advances that bear interest at a variable rate, the carrying amount is a reasonable estimate of fair value. For fixed-rate advances and repurchase agreements, fair value is estimated using quantitative discounted cash flow models that require the use of interest rate inputs that are currently offered for fixed-rate advances and repurchase agreements of similar remaining maturities. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. For hybrid advances, fair value is obtained from an FHLB proprietary model mathematical approximation of the market value of the underlying hedge. The terms of the hedge are similar to the advances and therefore classified as level 2 within the valuation hierarchy.

Trust Preferred Securities — Fair value is estimated using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate pricing curves. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. The Company interpolates its own credit spreads in the valuation of these liabilities. Due to the significance of the credit spread in the valuation inputs, trust preferred securities are classified within level 3 of the valuation hierarchy.

Interest Rate Swaps, Forward Interest Rate Swaps and Interest Rate Swap Futures — The fair value of interest rate swaps and forward interest rate swaps are determined by a third party using a derivative valuation model. The inputs used in the valuation model are based

Table of Contents

on contract terms which primarily include start and end swap dates, swap coupon, interest rate curve and notional amounts, and other standard methodologies which are obtained from similar instruments in active markets and, therefore, are classified within level 2 of the valuation hierarchy. See Note 11 for additional information on cash flow hedges.

The fair value of interest rate swap futures is determined based upon quotes provided by the Chicago Mercantile Exchange on which these instruments are traded. As such quotes represent valuations for identical instruments in active markets they would be classified within level 1 of the valuation hierarchy. Such pricing is utilized for both active trading and daily settlement of pricing adjustments on outstanding positions. As these pricing adjustments are settled daily between the exchange and the Company, the result as of the balance sheet date is that the Company holds interest futures with an outstanding notional and a level 1 fair value of zero.

Interest Rate Lock Commitments — Fair values of interest rate lock commitments are derived by using valuation models incorporating current market information or by obtaining market or dealer quotes for instruments with similar characteristics, subject to anticipated loan funding probability or fallout. The significant unobservable inputs used in the fair value measurement of IRLCs is the closing ratio, which represents management's estimate of the percentage of loans currently in a lock position which will ultimately close. The loan closing ratio is largely dependent on the loan processing stage that a loan is currently in and the change in prevailing interest rates from the time of the rate lock through the time the loan closes. The closing ratio is computed by our secondary marketing system using historical data and the ratio is periodically reviewed by the secondary marketing group for reasonableness and therefore IRLCs are classified within level 3 of the valuation hierarchy. Generally, the fair value of an IRLC is positive (negative) if the prevailing interest rate is lower (higher) than the IRLC rate. Therefore, an increase in the loan closing probability (i.e., higher percentage of loans estimated to close) will result in the fair value of the IRLC to increase if in a gain position, or decrease if in a loss position.

Forward Sales Commitments and Optional Forward Sales Commitments — The fair value of forward sales and optional forward sales commitments is determined based upon the difference between the settlement values of the commitments and the quoted market values of the securities, which can be quoted using similar instruments in the active market and therefore are classified within level 2 of the valuation hierarchy.

Foreign Exchange Contracts — Fair values of foreign exchange contracts are based on quoted prices for each foreign currency at the balance sheet date. The quoted prices are for similar instruments and therefore, these contracts are classified as level 2 of the valuation hierarchy.

Options and Options Embedded in Client Deposits — For options and embedded options in client deposits, the fair value is determined by obtaining market or dealer quotes for instruments with similar characteristics in active markets and therefore both options and options embedded in client deposits are classified within level 2 of the valuation hierarchy.

Indemnification Asset — To determine the fair value of the indemnification asset the Company uses a cash flow model to project cash flows for GNMA pool buyouts with and without recourse. The significant unobservable inputs used in the fair value measurement of the indemnification asset are the reinstatement rate, loss severity and duration. Significant increases (decreases) in any of those inputs in isolation could result in a significantly lower (higher) fair value measurement. The reinstatement rate is determined by analyzing historical default activity of similar loans. Loss severity is estimated as the interest rate spread between the note and debenture rate of the government insured loans as well as advance costs that are not reimbursable by the Federal Housing Administration (FHA), which is then extrapolated over the expected duration. Loss severity represents the interest loss severity as a percentage of UPB. Negative loss severity results from the indemnifying party receiving a debenture rate interest from the insuring agency that more than offsets the lower note rate interest payments due from the indemnifying party under the indemnification agreement. As the Company calculates the fair value of the indemnification asset using unobservable inputs the Company classifies the indemnification asset within level 3 of the valuation hierarchy. The Company's portfolio management group is responsible for analyzing and updating the assumptions and cash flow model of the underlying loans on a quarterly basis, which includes corroboration with historical experience. Counterparty credit risk is taken into account when determining fair value.

See Note 11 for additional information on freestanding derivatives.

13. Commitments and Contingencies

Commitments — Commitments to extend credit are agreements to lend to customers in accordance with predetermined contractual provisions. These commitments, predominantly at variable interest rates, are for specific periods or contain termination clauses and may require the payment of a fee. The total amounts of unused commitments do not necessarily represent future credit exposure or cash requirements, as commitments often expire without being drawn upon.

In order to meet the needs of its clients, the Company also issues standby letters of credit, which are conditional commitments generally to provide credit support for some creditors in case of default. The credit risk and potential cash requirements involved in issuing standby letters of credit are essentially the same as those involved in extending loan facilities to clients.

Unfunded credit extension commitments at March 31, 2014 and December 31, 2013 are as follows:

	March 31, 2014	December 31, 2013
Commercial lines of credit ⁽¹⁾	\$1,463,370	\$1,467,894
Home equity lines of credit	26,837	28,780
Credit card lines of credit	32,991	34,627
Standby letters of credit	1,147	1,140
Total unfunded credit extension commitments	\$1,524,345	\$1,532,441

Unfunded commercial commitments include \$1,105,539 and \$1,075,781 of conditional commitments for which certain requirements must be met in order to obtain an advance under the existing commitment as of March 31, 2014 and December 31, 2013, respectively. Of these commitments, \$583,164 and \$360,165 were cancellable by the Company at March 31, 2014 and December 31, 2013, respectively.

The Company also has entered into commitments to lend related to loans in the origination pipeline. These commitments represent arrangements to lend funds or provide liquidity subject to specified contractual provisions.

Table of Contents

The contractual amounts of the Company's commitments to lend in the held for investment origination pipeline at March 31, 2014 and December 31, 2013 are as follows:

	March 31, 2014	December 31, 2013
Residential	\$569,021	\$531,642
Commercial	296,740	208,480
Leasing	205,064	168,857
Total commitments to lend in the pipeline	\$1,070,825	\$908,979

Standby letters of credit issued by third party entities, are used to guarantee the Company's performance under various contracts. At March 31, 2014 and December 31, 2013, the Company had approximately \$100,018 and \$60,018, respectively, in letters of credit outstanding.

During September 2013, EverBank entered into a forward-dated borrowing agreement with the FHLB to borrow \$50,000 as a fixed-rate FHLB advance at an interest rate of 2.10%, which will fund in September 2014 maturing in September 2018. During January 2014, EverBank entered into an additional forward-dated borrowing agreement with the FHLB to borrow \$100,000 as a fixed-rate FHLB advance at an interest rate of 2.91%, which will fund in November 2014 maturing in February 2021. Prior to the funding date, EverBank has the right to terminate either of the advances subject to voluntary termination fees.

In the ordinary course of business, the Company enters into commitments to originate residential mortgage loans held for sale at interest rates determined prior to funding. Interest rate lock commitments for loans that the Company intends to sell are considered freestanding derivatives and are recorded at fair value. See Note 11 for information on interest rate lock commitments as they are not included in the table above.

The Company also has an agreement with the Jacksonville Jaguars of the National Football League whereby the Company obtained the naming rights to the football stadium in Jacksonville, Florida. Under the agreement, the amount due in 2014, which is the final year of the contract, is \$3,647, a 5% increase from the total obligation due in 2013. The Company is obligated to pay \$400 during the remainder of 2014.

Guarantees — The Company sells and securitizes conventional conforming and federally insured single-family residential mortgage loans predominantly to government-sponsored entities (GSEs), such as Fannie Mae and Freddie Mac. The Company also sells residential mortgage loans, primarily those that do not meet criteria for whole loan sales to GSEs, through whole loan sales to private non-GSE purchasers. In doing so, representations and warranties regarding certain attributes of the loans are made to the GSE or the third-party purchaser. Subsequent to the sale, if it is determined that the loans sold are (1) with respect to the GSEs, in breach of these representations or warranties or (2) with respect to non-GSE purchasers, in material breach of these representations and warranties, the Company generally has an obligation to either: (a) repurchase the loan for the UPB, accrued interest and related advances, (b) indemnify the purchaser or (c) make the purchaser whole for the economic benefits of the loan. From 2004 through March 31, 2014, the Company originated and securitized approximately \$59,848,223 of mortgage loans to GSEs and private non-GSE purchasers. A majority of the loans sold to non-GSEs were agency deliverable products that were eventually sold by large aggregators of agency product who eventually securitized and sold to the agencies.

In some cases, the Company also has an obligation to repurchase loans in the event of early payment default (EPD) which is typically triggered if a borrower does not make the first several payments due after the loan has been sold to an investor. The Company is subject to EPD provisions on certain jumbo loan products and the community reinvestment loans the Company originates and sells under the State of Florida housing program. The total non-conforming UPB sold subject to early prepayment default protection was \$54,210 at March 31, 2014. Total originations of community reinvestment loans sold under the State of Florida housing program were minimal. The reserve for early payment default is limited to 90 days and is estimated based on historical default factors.

The Company's obligations vary based upon the nature of the repurchase demand and the current status of the mortgage loan. The Company establishes reserves for estimated losses inherent in the Company's origination of mortgage loans. In estimating the accrued liability for loan repurchase and make-whole obligations, the Company estimates probable losses inherent in the population of all loans sold based on trends in claims requests and actual loss severities experienced. The liability includes accruals for probable contingent losses in addition to those identified in

the pipeline of repurchase or make-whole requests. There is additional inherent uncertainty in the estimate because the Company historically sold a majority of loans servicing released prior to 2009 and currently does not have servicing performance metrics on a majority of those loans it originated and sold. The estimation process is designed to include amounts based on actual losses experienced from actual repurchase activity. The baseline for the repurchase reserve uses historical loss factors that are applied to loan pools originated in 2003 through March 31, 2014 and sold in years 2004 through March 31, 2014. Loss factors, tracked by year of loss, are calculated using actual losses incurred on repurchase or make-whole arrangements. The historical loss factors experienced are accumulated for each sale vintage (year loan was sold) and are applied to more recent sale vintages to estimate inherent losses not yet realized. The Company's estimated recourse related to these loans was \$24,428 and \$20,225 at March 31, 2014 and December 31, 2013, respectively, and is recorded in accounts payable and accrued liabilities.

In the ordinary course of its loan servicing activities, the Company routinely initiates actions to foreclose real estate securing serviced loans. For certain serviced loans, there are provisions in which the Company is either obligated to fund foreclosure-related costs or to repurchase loans in default. Additionally, as servicer, the Company could be obligated to repurchase loans from or indemnify GSEs for loans originated by defunct originators. The outstanding principal balance on loans serviced at March 31, 2014 and December 31, 2013, was \$59,152,669 and \$59,492,239, respectively, including residential mortgage loans held for sale, and \$9,945,965 of UPB related to the sale of MSR to GTS. The Company will subservice these loans until transfer in May 2014. The amount of estimated recourse recorded in accounts payable and accrued liabilities related to servicing activities at March 31, 2014 and December 31, 2013, was \$10,796 and \$23,668, respectively.

Federal Reserve Requirement — The Federal Reserve Board (FRB) requires certain institutions, including EB, to maintain cash reserves in the form of vault cash and average account balances with the Federal Reserve Bank. The reserve requirement is based on average deposits outstanding and was approximately \$143,972 and \$149,381 at March 31, 2014 and December 31, 2013, respectively.

Legal Actions — On April 13, 2011, each of the Company and EverBank entered into a consent order with the Office of Thrift Supervision (OTS) with respect to EverBank's mortgage foreclosure practices and the Company's oversight of those practices. The Office of the Comptroller of the Currency (OCC) succeeded the OTS with respect to EverBank's consent order, and the Board of Governors of the FRB

Table of Contents

succeeded the OTS with respect to the Company's consent order. The consent orders require, among other things, that the Company establish a new compliance program for mortgage servicing and foreclosure operations and that the Company ensures that it has dedicated resources for communicating with borrowers, policies and procedures for outsourcing foreclosure or related functions and management information systems that ensure timely delivery of complete and accurate information. The Company was also required to retain an independent firm as part of an "Independent Foreclosure Review" program to conduct a review of residential foreclosure actions that were pending from January 1, 2009 through December 31, 2010 in order to determine whether any borrowers sustained financial injury as a result of any errors, misrepresentations or deficiencies and to provide remediation as appropriate. In August 2013, EverBank reached an agreement with the OCC that would end its participation in the Independent Foreclosure Review program mandated by the April 2011 consent order and replace it with an accelerated remediation process. The agreement includes a cash payment of \$39,932, which was paid in 2013 by EverBank to a settlement fund, which would provide relief to qualified borrowers and approximately \$6,344, which was substantially paid in the first quarter of 2014 to organizations certified by the U.S. Department of Housing and Urban Development or other tax-exempt organizations that have as a principal mission providing affordable housing, foreclosure prevention and/or educational assistance to low and moderate income individuals and families. This agreement has not eliminated all of our risks associated with foreclosure-related practices, and it does not protect EverBank from potential individual borrower claims or class action lawsuits, any of which could result in additional expenses. Consistent with the agreement, an amendment to the April 2011 consent order was entered into on October 15, 2013. All terms of the April 2011 consent order that were not explicitly superseded by the amendment remain in effect without modification. In October 2013, EverBank received a letter from the OCC requesting, in connection with the April 2011 consent order, that EverBank provide the OCC with an action plan, along with other mortgage servicers, to identify errors and remediate borrowers serviced by EverBank for the period from January 1, 2011 through the present day, that may have been harmed by the same errors identified in the Independent Foreclosure Review. As of March 31, 2014, EverBank accrued \$4,000 for potential future remediation payments to borrowers as a result of the implementation of the action plan.

In addition, other government agencies, including state attorneys general and the U.S. Department of Justice, continue to investigate various mortgage related practices of the Company and other major mortgage servicers. The Company continues to cooperate with these investigations. These investigations could result in material fines, penalties, equitable remedies (including requiring default servicing or other process changes), or other enforcement actions, as well as significant legal cost in responding to governmental investigations and additional litigation. The Company has evaluated subsequent events through the date in which financial statements are available to be issued and currently, the Company is unable to estimate any loss that may result from penalties or fines imposed by the OCC or other governmental agencies and hence, no amounts have been accrued.

In light of the uncertainties involved in these government proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves currently accrued by the Company. In the ordinary course of business, the Company and its subsidiaries are routinely involved in various claims and legal actions.

14. Variable Interest Entities

The Company, in the normal course of business, engages in certain activities that involve variable interest entities (VIEs), which are legal entities that lack sufficient equity to finance their activities, or the equity investors of the entities as a group lack any of the characteristics of a controlling interest. The primary beneficiary of a VIE is generally the enterprise that has both the power to direct the activities most significant to the economic performance of the VIE and the obligation to absorb losses or receive benefits that could potentially be significant to the VIE. The Company evaluates its interest in certain entities to determine if these entities meet the definition of a VIE and whether the Company is the primary beneficiary and should consolidate the entity based on the variable interests it held both at inception and when there is a change in circumstances that requires a reconsideration. If the Company is determined to be the primary beneficiary of a VIE, it must account for the VIE as a consolidated subsidiary. If the Company is determined not to be the primary beneficiary of a VIE but holds a variable interest in the entity, such variable interests are accounted for under accounting standards as deemed appropriate.

Non-consolidated VIEs

The table below summarizes select information related to variable interests held by the Company at March 31, 2014 and December 31, 2013:

Non-consolidated VIEs	March 31, 2014		December 31, 2013	
	Total Assets	Maximum Exposure	Total Assets	Maximum Exposure
Loans provided to VIEs	\$140,444	\$140,444	\$150,749	\$150,749
On-balance-sheet securitizations	22,785	22,785	50,534	50,534
Debt securities	1,231,317	1,231,317	1,219,915	1,219,915

Loans provided to VIEs

The Company has provided funding to certain unconsolidated VIEs sponsored by third parties. These VIEs are generally established to finance certain small business loans originated by third parties and are not considered to have significant equity at risk. The entities are primarily funded through the issuance of loans from the Company and a certified development company (CDC). The Company's loan is secured by a first lien. Although the Company retains the servicing rights to the loan, the Company is unable to unilaterally make all decisions necessary to direct the activities that most significantly impact the VIE; therefore, it is not the primary beneficiary. The principal risk to which these entities are exposed is credit risk related to the underlying assets. The loans to these VIEs are included in the Company's overall analysis of the allowance for loan and lease losses and reserve for unfunded commitments, respectively. The Company does not provide any implicit or explicit liquidity guarantees or principal value guarantees to these VIEs. The Company records these commercial loans on its condensed consolidated balance sheet as loans held for investment.

On-balance sheet securitizations

The Company engages in on-balance-sheet securitizations which are securitizations that do not qualify for sales treatment; thus, the assets remain on the Company's condensed consolidated balance sheet. The Company securitizes mortgage loans generally through a GSE,

such as GNMA, FNMA or FHLMC (U.S. agency-sponsored mortgages). Occasionally, the Company will transfer conforming residential mortgages to GNMA in exchange for mortgage-backed securities. The Company maintains effective control over pools of transferred assets that remain unsold at the end of the period. Accordingly, the Company has not recorded these transfers as sales. These transferred assets are recorded in the condensed consolidated balance sheet as loans held for sale.

Debt securities

All MBS, CMO and ABS securities owned by the Company are issued through VIEs. The related VIEs were not consolidated, as the Company was not determined to be the primary beneficiary. See Note 3 for information related to debt securities.

Mortgage securitizations

The Company provides a variety of mortgage loan products to a diverse customer base. Once originated, the Company often securitizes these loans through the use of VIEs. These VIEs are funded through the issuance of trust certificates backed solely by the transferred assets. These mortgage loan securitizations are non-recourse except in accordance with the Company's standard obligations under representations and warranties. Thereby, the transaction effectively transfers the risk of future credit losses to the purchasers of the securities issued by the trust. The Company generally retains the servicing rights of the transferred assets but does not retain any other interest in the entities.

As noted above, the Company securitizes mortgage loans through government-sponsored entities or through private label (non-agency sponsored) securitizations. The Company is not the primary beneficiary of its U.S. agency-sponsored mortgage securitizations, because the Company does not have the power to direct the activities of the VIE that most significantly impact the entity's economic performance. Therefore, the Company does not consolidate these U.S. agency-sponsored mortgage securitizations. Additionally, the Company does not consolidate VIEs of private label securitizations. Although the Company is the servicer of the VIE, the servicing relationship is deemed to be a fiduciary relationship and, therefore, the Company is not deemed to be the primary beneficiary of the entity. Refer to Note 4 for information related to sales of residential mortgage receivables and Note 7 for information related to mortgage servicing rights.

15. Segment Information

The Company has three reportable segments: Banking and Wealth Management, Mortgage Banking, and Corporate Services. The Company's reportable business segments are strategic business units that offer distinctive products and services marketed through different channels. These segments are managed separately because of their marketing and distribution requirements.

The Banking and Wealth Management segment includes all banking, lending and investing products and services offered to customers either over the web or telephone or through financial centers or financial advisors.

The Mortgage Banking segment includes the origination and servicing of mortgage loans and focuses primarily on residential loans for purposes of resale to GSEs, institutional investors or for investment by the Banking and Wealth Management segment.

The Corporate Services segment consists of services provided to the Banking and Wealth Management and Mortgage Banking segments including executive management, technology, legal, human resources, marketing, corporate development, treasury, accounting, finance and other services and transaction-related items. Direct expenses are allocated to the operating segments. Unallocated expenses are included in Corporate Services. Certain other expenses, including interest expense on trust preferred debt and transaction-related items, are included in the Corporate Services segment.

The chief operating decision maker's review of each segment's performance is based on segment income, which is defined as income from operations before income taxes and certain corporate allocations. Additionally, total net revenue is defined as net interest income before provision for loan and lease losses and total noninterest income. Intersegment revenue among the Company's business units reflects the results of a funds transfer pricing (FTP) process, which takes into account assets and liabilities with similar interest rate sensitivity and maturity characteristics and reflects the allocation of net interest income related to the Company's overall asset and liability management activities. This provides for the creation of an economic benchmark, which allows the Company to determine the profitability of the Company's products and cost centers by calculating profitability spreads between product yields and internal references. However, business segments have some latitude to retain certain interest rate exposures

related to customer pricing decisions within guidelines.

FTP serves to transfer interest rate risk to the treasury function through a transfer pricing methodology and cost allocating model. The basis for the allocation of net interest income is a function of the Company's methodologies and assumptions that management believes are appropriate to accurately reflect business segment results. These factors are subject to change based on changes in strategy, current interest rates and market conditions.

The results of each segment are reported on a continuing basis. The following table presents financial information of reportable segments as of and for the three months ended March 31, 2014 and 2013. The eliminations column includes intersegment eliminations required for consolidation purposes.

Table of Contents

	As of and for the Three Months Ended March 31, 2014				
	Banking and Wealth Management	Mortgage Banking	Corporate Services	Eliminations	Consolidated
Net interest income (expense)	\$126,512	\$5,916	\$(1,584)) \$—	\$130,844
Total net revenue	141,070	75,805	(1) ⁽¹⁾ (1,447)) —	215,428
Intersegment revenue	1,410	(1,410)) —	—	—
Depreciation and amortization	5,828	1,009	1,916	—	8,753
Income before income taxes	90,687	(12,524)	(1) ⁽¹⁾ (27,018)) —	51,145
Total assets	16,088,952	1,570,995	228,086	(257,085)) 17,630,948

	As of and for the Three Months Ended March 31, 2013				
	Banking and Wealth Management	Mortgage Banking	Corporate Services	Eliminations	Consolidated
Net interest income (expense)	\$132,373	\$13,014	\$(1,571)) \$—	\$143,816
Total net revenue	160,154	118,383	(2) ⁽²⁾ (1,412)) —	277,125
Intersegment revenue	3,155	(3,155)) —	—	—
Depreciation and amortization	7,051	1,304	1,546	—	9,901
Income before income taxes	76,430	13,447	(2) ⁽²⁾ (26,487)) —	63,390
Total assets	15,251,578	3,152,487	158,767	(256,344)) 18,306,488

(1) Segment earnings in the Mortgage Banking segment included a \$4,941 recovery on the MSR valuation allowance for the three months ended March 31, 2014.

(2) Segment earnings in the Mortgage Banking segment included a \$12,555 recovery on the MSR valuation allowance for the three months ended March 31, 2013.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is intended to assist readers in understanding the financial condition and results of operations of the Company during the three month period ended March 31, 2014 and should be read in conjunction with the condensed consolidated financial statements and notes thereto included in this Quarterly Report on Form 10-Q and the Company's Annual Report on Form 10-K for the period ended December 31, 2013, as filed with the Securities and Exchange Commission (SEC) on February 28, 2014.

Forward-Looking Statements

This report contains certain statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995 and are intended to be protected by the safe harbor provided therein. We generally identify forward-looking statements by terminology such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “seeks,” “approximately,” “predicts,” “intends,” “plans,” “estimates,” “anticipates” or the negative version of those words or other comparable words. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, you are cautioned that any such forward-looking statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Although we believe that the expectations reflected in such forward-looking statements are reasonable as of the date made, expectations may prove to have been materially different from the results expressed or implied by such forward-looking statements. Unless otherwise required by law, we also disclaim any obligation to update our view of any such risks or uncertainties or to announce publicly the result of any revisions to the forward-looking statements contained in this report. A number of important factors could cause actual results to differ materially from those indicated by the forward-looking statements, including, but not limited to, those factors described in Part I, Item 1A “Risk Factors” contained in our Annual Report on Form 10-K for the period ended December 31, 2013, as filed with the SEC on February 28, 2014 and in Part II, Item 1A “Risk Factors” contained in this report, and include risks discussed in this Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and in other periodic reports we file with the SEC. These factors include without limitation:

- deterioration of general business and economic conditions, including the real estate and financial markets, in the United States and in the geographic regions and communities we serve;
- risks related to liquidity, including the adequacy of our cash flow from operations and borrowings to meet our short-term liquidity needs;
- changes in interest rates that affect the pricing of our financial products, the demand for our financial services and the valuation of our financial assets and liabilities, mortgage servicing rights and mortgage loans held for sale;
- risk of higher loan and lease charge-offs;
- legislative or regulatory actions affecting or concerning mortgage loan modification, refinancing and foreclosure;
- risk of individual claims or further fines, penalties, equitable remedies, or other enforcement actions relating to our mortgage related practices;
- our ability to comply with any supervisory actions to which we are or become subject as a result of examination by our regulators;
- our ability to comply with the amended consent order and the terms and conditions of our settlement of the Independent Foreclosure Review, including the associated costs;
- concentration of our commercial real estate loan portfolio;
- higher than normal delinquency and default rates affecting our mortgage banking business;
- execution of current or future acquisition, reorganization or disposition transactions including, the risk that we may not realize the anticipated benefits of such transactions;
- limited ability to rely on brokered deposits as a part of our funding strategy;
- concentration of mass-affluent clients and jumbo mortgages;
- the effectiveness of the hedging strategies we use to manage our mortgage pipeline;
- the effectiveness of our derivatives to manage interest rate risk;
- delinquencies on our equipment leases and reductions in the resale value of leased equipment;

increases in loan repurchase requests and our reserves for loan repurchases;
failure to prevent a breach to our Internet-based system and online commerce security;
soundness of other financial institutions;
changes in currency exchange rates or other political or economic changes in certain foreign countries;
disruptions in the credit and financial markets in the United States and globally, including the effects of any
downgrade in the United States government's sovereign debt rating and the continued effects of the European
sovereign debt crisis and declining currencies in certain emerging markets;
the competitive industry and market areas in which we operate;
historical growth rate and performance may not be a reliable indicator of future results;
loss of key personnel;
fraudulent and negligent acts by loan applicants, mortgage brokers, other vendors and our employees;
costs of compliance or failure to comply with laws, rules, regulations and orders that govern our operations;
failure to establish and maintain effective internal controls and procedures;
impact of current and future legal and regulatory changes, including the Dodd-Frank Wall Street Reform and
Consumer Protection Act of 2010 (the Dodd-Frank Act) and the capital requirements promulgated by the Basel
Committee on Banking Supervision ("Basel Committee");
effects of changes in existing U.S. government or government-sponsored mortgage programs;
changes in laws and regulations that may restrict our ability to originate or increase our risk of liability with respect to
certain mortgage

Table of Contents

loans;

legislative action regarding foreclosures or bankruptcy laws;

changes to generally accepted accounting principles (GAAP);

environmental liabilities with respect to properties that we take title to upon foreclosure; and

inability of EverBank, our banking subsidiary, to pay dividends.

Reclassifications

Certain prior period information in this MD&A has been reclassified to conform to current period classifications.

Introduction and Overview

We are a thrift holding company which operates primarily through our direct subsidiary, EverBank (EB or EverBank). EB is a federally chartered thrift institution with its home office located in Jacksonville, Florida. References to “we,” “our,” “us,” or the “Company” refer to the holding company and its subsidiaries that are consolidated for financial reporting purposes. We are a diversified financial services company that provides innovative banking, lending and investment products and services to clients nationwide through scalable, low-cost distribution channels. Our business model attracts financially sophisticated, self-directed, mass-affluent clients and a diverse base of small and medium-sized business clients. We market and distribute our products and services primarily through our integrated on-line financial portal, which is augmented by our nationwide network of independent financial advisors, high-volume financial centers in targeted Florida markets and other business offices throughout the country. These channels are connected by technology-driven centralized platforms, which provide operating leverage throughout our business.

We have a suite of asset origination and fee income businesses that individually generate attractive financial returns and collectively leverage our core deposit franchise and client base. We originate, invest in, sell and service residential mortgage loans, equipment leases, and various other consumer and commercial loans, as market conditions warrant.

Our organic origination activities are scalable, significant relative to our balance sheet size and provide us with substantial growth potential. Our origination, lending and servicing expertise positions us to acquire assets in the capital markets when risk-adjusted returns available through acquisition exceed those available through origination. Our rigorous analytical approach provides capital markets discipline to calibrate our levels of asset origination, retention and acquisition. These activities diversify our earnings, strengthen our balance sheet and provide us with flexibility to capitalize on market opportunities.

Our deposit franchise fosters strong relationships with a large number of financially sophisticated clients and provides us with a stable and flexible source of low, all-in cost funding. We have a demonstrated ability to grow our client deposit base significantly with short lead time by adapting our product offerings and marketing activities rather than incurring the higher fixed operating costs inherent in more branch-intensive banking models. Our extensive offering of deposit products and services includes proprietary features that distinguish us from our competitors and enhance our value proposition to clients. Our products, distribution and marketing strategies allow us to generate substantial deposit growth while maintaining an attractive mix of high-value transaction and savings accounts.

Key Factors Affecting Our Business and Financial Statements

Economic and Interest Rate Environment

The results of our operations are highly dependent on economic conditions and market interest rates. Beginning in 2007, turmoil in the financial sector resulted in a reduced level of confidence in financial markets among borrowers, lenders and depositors, as well as extreme volatility in the capital and credit markets. In response to these conditions, the Board of Governors of the FRB began decreasing short-term interest rates, with 11 consecutive decreases totaling 525 basis points between September 2007 and December 2008. To stimulate economic activity and stabilize the financial markets, the FRB maintained historically low market interest rates from 2009 to 2013. Market conditions have improved during the first quarter of 2014 as unemployment rates have remained stable in March 2014 after declining to 6.7% in December 2013, and consumer confidence, GDP and average home prices have all risen. Despite cumulative progress and an improved outlook in March 2014, the FRB has indicated that it would maintain its federal funds rate target at a near-zero range, which indicates low market interest rates will likely continue throughout 2014. Net interest income is our largest source of income and is driven primarily as a function of the average balance of interest-earning assets, the average balance of interest-bearing liabilities and the spread between the contractual yield on such assets and the contractual cost of such liabilities. These factors are influenced by both the pricing and mix of

interest-earning assets and interest-bearing liabilities which, in turn, are impacted by external factors such as the local economy, competition for loans and deposits, the monetary policy of the FRB and market interest rates. The cost of our deposits is largely based on short-term interest rates which are driven primarily by the FRB's actions. However, the yields generated by our loans and securities are typically driven by longer-term interest rates which are set by the market, or, at times by the FRB's actions. Our net interest income is therefore influenced by movements in interest rates and the pace at which these movements occur.

In the latter half of the second quarter of 2013, the FRB indicated their intention to reduce their bond buying activities associated with quantitative easing 3 (QE3) if the economy continued to show improvement. The uncertainty around the FRB's intent created volatility in the capital markets and resulted in a market sell-off which drove the 10-year treasury yield from 1.7% on May 2, 2013 to 2.6% on June 25, 2013. These events had a direct impact on mortgage rates which increased sharply from 3.7% at the beginning of the second quarter 2013 to 4.4% at the end of the second quarter. Mortgage interest rates increased to a high of 4.7% in early September 2013, however were down slightly throughout the end of 2013 and ended the first quarter at 4.4%. In addition, the spreads over the treasury curve widened to levels experienced earlier in the year. Increases in mortgage rates impacted our origination volume as the number of borrowers eligible to refinance into lower rates was reduced. While we did see mortgage rates decrease in late first quarter, rates are still significantly higher than in the first and second quarters of 2013. We have made substantial investments in our retail platform focusing on purchase money transactions in anticipation of the higher rate environment and slowed refinancing activity. Moreover, the expectation of slower prepayments due to refinancing has had a positive impact on the fair value and amortization of our mortgage servicing rights.

In the first quarter of 2014, our residential mortgage and commercial lending businesses experienced seasonal slowdowns and were impacted by the various affects that the winter weather patterns had in the Southeast and Northeast. We continue to monitor the status of the economy as well as the expected interest rate environment both in the near term and over the long term to best position our balance sheet to optimize risk-adjusted returns.

Table of Contents

Performance Highlights

First Quarter 2014 Key Highlights¹

GAAP net income was \$32 million for the first quarter 2014, compared to \$39 million for the first quarter 2013 and \$18 million for the fourth quarter 2013.

GAAP diluted earnings per share was \$0.23, a 23% decrease from \$0.30 in the first quarter 2013 and a 77% increase from \$0.13 in the fourth quarter 2013.

Tangible common equity per common share increased 11% year over year to \$11.78 at March 31, 2014.

Retained asset generation of \$1.1 billion in the quarter, or \$4.6 billion annualized.

Portfolio loans held for investment (HFI) grew to \$13.9 billion, an increase of 4.6% compared to the prior quarter, or 18.4% annualized.

Core net interest margin (NIM) was 3.36% compared to 3.30% in the prior quarter.

Adjusted non-performing assets to total assets of 0.62% at March 31, 2014. Annualized net charge-offs to total loans and leases held for investment of 0.12% for the quarter.

Strong capital position with bank tier 1 leverage ratio of 9.1% and bank total risked-based capital ratio of 14.3%.

- Completed the sale of approximately \$10 billion unpaid principal balance of mortgage servicing rights to Green Tree Servicing LLC ("Green Tree").

¹ Reconciliations of Non-GAAP financial measures can be found in Table 1, Table 1A, Table 1B, Table 7A, Table 7B, and Table 17.

Strategic Business Activities

- Subsequent to quarter end, EverBank announced that Ginnie Mae had approved the previously disclosed partnership between EverBank and Green Tree, which will allow Green Tree to subservice EverBank's Ginnie Mae and government loan servicing portfolio commencing on May 1, 2014, concurrent with the default servicing platform transfer to Green Tree.

Balance Sheet

Strong Portfolio Loan Growth

Total portfolio loans HFI were \$13.9 billion at March 31, 2014, an increase of \$1.6 billion, or 13%, year over year. Compared to the prior quarter, this represents an increase of \$0.6 billion, or 5%. Total assets were \$17.6 billion at March 31, 2014, flat compared to \$17.6 billion at December 31, 2013.

Table of Contents

Loans HFI for the first quarter 2014, as compared to the first and fourth quarters of 2013, were comprised of:

(\$ in millions)	Mar 31, 2014	Dec 31, 2013	Mar 31, 2013	% Change (Q/Q)	% Change (Y/Y)	
Residential loans	\$5,688	\$5,153	\$3,677	10	% 55	%
Mortgage pool buyouts	1,912	1,892	2,603	1	% (27))%
Total residential mortgages	7,600	7,045	6,280	8	% 21	%
Commercial real estate	3,153	3,190	3,314	(1))% (5)%
Commercial finance	2,048	1,917	1,319	7	% 55	%
Total commercial finance & CRE	5,201	5,107	4,633	2	% 12	%
Warehouse finance	911	944	1,161	(3))% (22)%
Other	152	157	181	(3))% (16)%
Total HFI	\$13,864	\$13,253	\$12,255	5	% 13	%

During the first quarter of 2014, total residential mortgages HFI increased \$0.6 billion, or 8%, compared to the prior quarter and \$1.3 billion, or 21%, year over year to \$7.6 billion, driven by strong growth in our high quality jumbo hybrid ARM portfolio. Total commercial finance and CRE balances increased \$0.1 billion, or 2%, compared to the prior quarter and \$0.6 billion, or 12%, year over year to \$5.2 billion, driven by strong commercial finance activity.

Loan Origination Activities

Organic asset generation totaled \$2.0 billion and retained organic originations totaled \$1.1 billion for the first quarter of 2014. Total commercial finance and CRE originations during the quarter were \$326 million, an increase of 30% year over year. Compared to the prior quarter, commercial finance and CRE originations declined 53% driven primarily by seasonal differences.

Residential loan originations were \$1.7 billion for the first quarter of 2014, a decrease of 15% compared to the prior quarter and a decrease of 41% year over year. Excluding the impact of our exit from the wholesale broker channel in the third quarter 2013, origination volume decreased 23% year over year. Jumbo origination volume was \$808 million in the first quarter, flat compared to the prior quarter and an increase of 5% year over year. The mix of purchase transactions increased to 47% of total originations and 70% of retail channel originations compared to 43% and 67%, respectively, in the prior quarter. Our gain on sale margin increased 11 basis points compared to the prior quarter, to 2.99%.

The following table presents total organic loan and lease origination information by product type:

(\$ in millions)	Mar 31, 2014	Dec 31, 2013	Mar 31, 2013	% Change (Q/Q)	% Change (Y/Y)	
Residential origination volume						
Conventional loans	\$892	\$1,188	\$2,135	(25))% (58)%
Jumbo loans	808	808	768	—	% 5	%
	1,700	1,996	2,903	(15))% (41)%
Commercial origination volume						
Commercial real estate	123	266	63	(54))% 95	%
Commercial finance	203	435	187	(53))% 9	%
Total commercial finance & CRE	326	701	250	(53))% 30	%
Warehouse finance	—	—	144	NM	(100))%
Total organic originations	\$2,026	\$2,697	\$3,297	(25))% (39)%

Deposits

Total deposits were \$13.3 billion at March 31, 2014, flat quarter over quarter and down 3% year over year. Time deposits, excluding market-based deposits, represented 24% of total deposits in the first quarter. Business deposits grew 6% year over year and represented 13% of total deposits at quarter end.

Table of Contents

At March 31, 2014, as compared to the first and fourth quarters of 2013, our deposits were comprised of the following:

(\$ in millions)	Mar 31, 2014	Dec 31, 2013	Mar 31, 2013	% Change (Q/Q)	% Change (Y/Y)
Noninterest-bearing demand	\$1,055	\$1,077	\$1,287	(2)%	(18)%
Interest-bearing demand	2,962	3,006	2,933	(1)%	1%
Savings and money market accounts	5,023	5,111	4,902	(2)%	2%
Global market-based accounts	997	1,011	1,136	(1)%	(12)%
Time, excluding market-based	3,251	3,056	3,416	6%	(5)%
Total deposits	\$13,288	\$13,261	\$13,674	—%	(3)%
Consumer deposits	\$11,522	\$11,434	\$12,007	1%	(4)%
Business deposits	1,766	1,827	1,667	(3)%	6%
Total deposits	\$13,288	\$13,261	\$13,674	—%	(3)%

Other Funding Sources

Total other borrowings were \$2.4 billion at March 31, 2014, flat quarter over quarter and down 12% year over year.

Adjusted net income includes adjustments to our net income for certain material items that we believe are not (1) reflective of our ongoing business or operating performance. For a reconciliation of adjusted net income to net income, which is the most directly comparable GAAP measure, see Table 1A.

Both basic and diluted adjusted net earnings per common share are calculated using a numerator based on adjusted net income. Adjusted net earnings per common share, basic is a non-GAAP financial measure and its most directly (2) comparable GAAP measure is net earnings per common share, basic. Adjusted net earnings per common share, diluted is a non-GAAP financial measure and its most directly comparable GAAP measure is net earnings per common share, diluted.

Return on average equity is calculated as net income less dividends declared on the Series A 6.75% (3) Non-Cumulative Perpetual Preferred Stock divided by average common shareholders' equity (average shareholders' equity less average Series A 6.75% Non-Cumulative Perpetual Preferred Stock).

Adjusted return on average assets equals adjusted net income divided by average total assets. Adjusted net income (4) is a non-GAAP measure of our financial performance and its most directly comparable GAAP measure is net income. For a reconciliation of net income to adjusted net income, see Table 1A.

Adjusted return on average equity is calculated as adjusted net income less dividends declared on the Series A (5) 6.75% Non-Cumulative Perpetual Preferred Stock divided by average common shareholders' equity. Adjusted net income is a non-GAAP measure of our financial performance and its most directly comparable GAAP measure is net income. For a reconciliation of net income to adjusted net income, see Table 1A.

(6)

The efficiency ratio represents noninterest expense from our Banking and Wealth Management segment as a percentage of total revenues from our Banking and Wealth Management segment. We use the efficiency ratio to measure noninterest costs expended to generate a dollar of revenue. Because of the significant costs we incur and fees we generate from activities related to our mortgage production and servicing operations, we believe the efficiency ratio is a more meaningful metric when evaluated within our Banking and Wealth Management segment. Calculated as tangible common shareholders' equity divided by shares of common stock. Tangible common shareholders' equity equals shareholders' equity less goodwill, other intangible assets and perpetual preferred stock (7)(see Table 1B). Tangible common equity per common share is calculated using a denominator that includes actual period end common shares outstanding. Tangible common equity per common share is a non-GAAP financial measure, and its most directly comparable GAAP financial measure is book value per common share. A reconciliation of adjusted net income to net income, which is the most directly comparable GAAP measure, is as follows:

(1) The average balances are principally daily averages, and for loans, include both performing and non-performing balances.

(2) Interest income on loans includes the effects of discount accretion and net deferred loan origination costs accounted for as yield adjustments.

(3) All interest income was fully taxable for all periods presented.

Table of Contents

Increases and decreases in interest income and interest expense result from changes in average balances (volume) of interest-earning assets and interest-bearing liabilities, as well as changes in average interest rates. The following table shows the effect that these factors had on the interest earned on our interest-earning assets and the interest incurred on our interest-bearing liabilities.

Analysis of Change in Net Interest Income

Trust preferred securities	—	2	2
FHLB advances	(4,316)	(147)	(4,463)
Repurchase agreements	(222)	—	(222)
Other	—	—	—
Total change in interest expense	(6,155)	(2,744)	(8,899)
Total change in net interest income	\$2,389	\$(15,361)	\$(12,972)

The effect of changes in volume is determined by multiplying the change in volume by the previous period's (1) average yield/cost. Similarly, the effect of rate changes is calculated by multiplying the change in average yield/cost by the previous period's volume. Changes applicable to both volume and rate have been allocated to rate.

Net Interest Income

First Quarter of 2014 compared to First Quarter of 2013

Net interest income is affected by both changes in interest rates and the amount and composition of earning assets and interest-bearing liabilities. Net interest margin is defined as net interest income as a percentage of average interest-earning assets. Net interest income decreased by \$13.0 million, or 9%, in the first quarter of 2014 compared to the same period in 2013 due to a decrease in interest income of \$21.9 million, or 11%, partially offset by a decrease in interest expense of \$8.9 million, or 19%. Our net interest margin decreased by one basis point in the first quarter of

2014 compared to the same period in 2013, which was led by a decrease in yields in our interest-earning assets mostly offset by a decrease in interest bearing liabilities.

Yields on our interest-earning assets decreased by 14 basis points in the first quarter of 2014 compared to the same period in 2013, primarily due to a decrease in yields from our investment securities and loans and leases held for investment. The decrease in yields on our investment securities is due to paydowns of higher yielding investment securities with a weighted average rate of 3.69% offset by the purchase of investment securities at lower yields with a weighted average rate of 2.98%. The lower yields on these securities are consistent with the tightening of spreads as well as the continued low interest rates prevalent in the market.

The decrease in our loans held for investment yields was consistent across most of our portfolios. The yield on our residential mortgages held for investment decreased 20 basis points in the first quarter of 2014 compared to the same period in 2013 due to continued production of current market rate assets coupled with paydowns of higher yielding assets originated or purchased in a higher interest rate environment. The yield on our commercial and commercial real estate portfolio decreased 27 basis points due to production of current market

Table of Contents

rate commercial assets coupled with paydowns of higher yielding assets, as well as the sale of certain non-performing assets in the fourth quarter of 2013. Some of the assets sold were high yielding assets as a result of the discount accretion associated with ASC 310-30 assets acquired however we saw declines in noninterest expense due to the reduction of non-performing assets including salaries and commissions related to management of those NPAs as well as a reduction in our Federal Deposit Insurance Corporation (FDIC) deposit insurance assessment fees related to those assets. Yields on our lease financing receivables decreased 319 basis points in the first quarter of 2014 compared to the same period in 2013 due primarily to continued production of leases at current market interest rates coupled with a decline in the leases acquired in the 2010 acquisition of our leasing business which we acquired at a substantial discount to par due to market dislocation.

The yields on our loans held for sale increased 42 basis points in the first quarter of 2014 compared to the same period in 2013 due primarily to the increase in the current market mortgage rates. Due to the nature of the loans held for sale account and the turnover of that account, the yields on these assets can vary depending on the current market interest rates available in the market.

The rate on our interest-bearing liabilities decreased 15 basis points in the first quarter of 2014 compared to the same period in 2013 which was led by a decrease in the rate paid on deposits as well as the relative make-up of our interest bearing liabilities as other borrowings made up a smaller percentage of our interest-bearing liability position in the first quarter of 2014 compared to the same period in 2013. The rates paid on our deposits decreased 10 basis points in the first quarter of 2014 compared to the same period in 2013 due to the reduction of interest rates as we slowed deposit gathering activities given the balance sheet repositioning activities undergone in late 2013. This decrease was partially offset by an increase in non-market-based time deposits which increased 19 basis points. The rates paid on other borrowings increased two basis points in the first quarter of 2014 compared to the same period in 2013.

Average balances of our interest-earning assets decreased by \$1.5 billion, or 9%, in the first quarter of 2014 compared to the same period in 2013 primarily due to a \$1.5 billion decrease in loans held for sale, a \$0.5 billion decrease in investment securities and a \$0.3 billion decrease in cash and cash equivalents. This was partially offset by a \$0.8 billion increase in loans and leases held for investment.

The decrease in the average balance of our loans held for sale is primarily a result of the increase in market interest rates which has decreased the incentive for certain borrowers to refinance and slowed mortgage origination activity industry wide. In addition, we continue to focus on balance sheet growth and have retained a majority of our preferred ARM originations into loans held for investment which had an effect on the balance of loans held for sale in the first quarter of 2014 compared to the same period in 2013. Please see "Analysis of Statement of Condition" for additional information on our loans held for sale.

The decrease in the average balance of our investment securities portfolio is driven primarily by continued principal paydowns as well as the sale of certain investments during 2013. The decrease in the average balance of our cash and cash equivalents balance in the first quarter of 2014 compared to the same period in 2013 is due to the increase in our loans held for investment balance, including the purchase of third party GNMA pool buyout loans and strong retained organic loan growth. This was partially offset by a reduction in our loans held for sale balances.

The increase in the average balance of our loans held for investment was driven primarily by increases in our residential and lease financing portfolios. The increase in the average balance of our residential mortgage portfolio is primarily due to the continued origination of our preferred jumbo adjustable rate mortgage (ARM) product for investment. As the market for fixed rate mortgages declined during the second quarter of 2013, we adjusted our origination strategy to increase preferred jumbo ARM products which we intend to hold in our loans held for investment for the foreseeable future. The increase in our lease financing receivable portfolio is due to continued traction in the origination of leases which we have seen the last several quarters as the balance has consistently grown from \$837 million at December 31, 2012 to \$1.3 billion at March 31, 2014.

Average balances in our interest-bearing liabilities decreased by \$1.2 billion, or 8%, in the first quarter of 2014 compared to the same period in 2013 primarily due to a decrease in the average balance of our non-market-based time deposits coupled with a decrease in the average balance of FHLB advances.

Provision for Loan and Lease Losses

We assess the allowance for loan and lease losses and make provisions for loan and lease losses as deemed appropriate in order to maintain the adequacy of the allowance for loan and lease losses. Increases in the allowance for loan and lease losses are achieved through provisions for loan and lease losses that are charged against net interest income. Additional allowance may result from a reduction of the net present value (NPV) of our acquired credit impaired (ACI) loans in instances where we have a decrease in our cash flow expectations.

First Quarter of 2014 compared to First Quarter of 2013

We recorded a provision for loan and lease losses of \$3.1 million in the first quarter of 2014, which is an increase of 60% from \$1.9 million in the same period in 2013. Provision expense increased \$1.2 million from the first quarter of 2014 as compared to the same period in 2013, however remains low primarily due to improving loan performance as a result of a more stable market, increasing property values, which continues to decrease severity upon default, as well as an improvement in the portfolio composition that includes higher credit quality EverBank originated loans. Net charge-offs were \$3.8 million in the first quarter of 2014 compared to \$7.0 million in the same period in 2013. The net charge-off ratio was 0.12% in the first quarter of 2014 compared to 0.23% in the same period in 2013.

For further discussion of changes in our allowance for loan and lease losses, please see the "Loan and Lease Quality" section for information on net charge-offs, non-performing assets, and other factors considered by management in assessing the credit quality of the loan portfolio and establishing our allowance for loan and lease losses.

Table of Contents

Noninterest Income

The following table illustrates the primary components of noninterest income for the periods indicated.

Noninterest Income	Table 4	
	Three Months Ended March 31,	
(dollars in thousands)	2014	2013
Loan servicing fee income	\$46,617	\$42,163
Amortization of MSR	(20,572)	(35,078)
Recovery (impairment) of MSR	4,941	12,555
Net loan servicing income	30,986	19,640
Gain on sale of loans	33,851	82,311
Loan production revenue	4,579	9,489
Deposit fee income	3,335	5,925
Other lease income	4,905	6,411
Other	6,928	9,533
Total Noninterest Income	\$84,584	\$133,309

First Quarter of 2014 compared to First Quarter of 2013

Noninterest income decreased by \$48.7 million, or 37%, in the first quarter of 2014 compared to the same period in 2013. The decrease in noninterest income was driven primarily by a reduction in gain on sale of loans, loan production revenue and other noninterest income partially offset by an increase in net loan servicing income.

Net loan servicing income increased by \$11.3 million in the first quarter of 2014 compared to the same period in 2013. The increase was primarily due to a decrease in amortization of \$14.5 million due to lower projected prepayment speeds as a result of increases in mortgage interest rates, which led to lower refinancing activity along with a decreased impact of government-sponsored refinancing programs, which were elevated in early 2013. In addition, servicing fees increased by \$4.5 million in the first quarter of 2014 primarily due to the acquisition of \$13.0 billion of residential servicing rights on April 1, 2013. These increases are partially offset by a \$7.6 million decrease in recoveries recognized on the MSR valuation allowance in the first quarter of 2014 compared to the first quarter of 2013. The additional recovery is a result of continued decreases in the expected prepayment rates at March 31, 2014. Gain on sale of loans decreased by \$48.5 million, or 59%, in the first quarter of 2014 compared to the same period in 2013, primarily driven by lower mortgage lending volume. Mortgage lending volume decreased by \$1.2 billion, or 41%, to \$1.7 billion in the first quarter of 2014 compared to the same period in 2013. The decrease in mortgage lending volume and the increased pricing competition is consistent with the overall mortgage origination market. The overall refinance activity in the market continues to decline as the incentive for refinance activity has fallen as interest rates have risen. Our refinance volume was \$909 million in the first quarter of 2014 compared to \$2.3 billion in the first quarter of 2013. The decrease in gain on sale of loans was also driven by the increased originations of our preferred ARM products which we plan to hold for the foreseeable future. Of the \$1.7 billion originated in the first quarter of 2014, \$791 million was from purchase money business compared to \$559 million in the first quarter of 2013. In addition, we continue to focus on organic growth of our balance sheet and originated \$808 million of our preferred ARM product in the first quarter of 2014. The continued focus on the organic growth of our balance sheet has an impact on the absolute value of our gain on sale income, however it also has an ongoing effect to our net interest income and earnings in the future.

Loan production revenue decreased by \$4.9 million, or 52%, in the first quarter of 2014 compared to the same period in 2013. This decrease is a result of decreased origination volume.

Other noninterest income decreased by \$2.6 million in the first quarter of 2014 compared to the same period in 2013 primarily due to \$4.0 million in income in the first quarter of 2013 related to the recovery of losses experienced on loans and servicing rights previously acquired as well as a decrease of \$0.6 million in income related to prepayment fees on certain serviced commercial loans acquired in the Business Property Lending, Inc. (BPL) acquisition. These decreases were partially offset by a \$2.0 million gain on sale of MSR related to the Green Tree Servicing LLC (GTS) sale in the first quarter of 2014.

On March 28, 2014, we recognized the transfer of servicing rights to GTS as a sale which resulted in a net loss of \$3.9 million recognized in other noninterest income, of which a loss of \$5.9 million was recorded in the fourth quarter of 2013 and a gain of \$2.0 million was recorded in the first quarter of 2014. The sales agreement included a customary, temporary subservicing arrangement. Also, we obtained the necessary investor approvals related to the sale of our default servicing platform. The loans associated with both the sale of MSR and the subserviced portfolio are expected to transfer in May 2014. We expect that the sale and the subservicing arrangement will affect our noninterest expense beginning at the end of the second quarter of 2014. The sale will also have an impact on both servicing fees and amortization of MSR.

Table of Contents

Noninterest Expense

The following table illustrates the primary components of noninterest expense for the periods indicated.

Noninterest Expense	Table 5	
	Three Months Ended March 31,	
(dollars in thousands)	2014	2013
Salaries, commissions and other employee benefits expense	\$97,694	\$110,479
Equipment expense	18,648	19,852
Occupancy expense	8,072	7,384
General and administrative expense:		
Legal and professional fees, excluding consent order expense	7,116	7,023
Foreclosure and other real estate owned (OREO) expense	8,693	7,027
Other credit-related expenses	(1,086)	2,328
Advertising and marketing expense	4,431	10,381
Loan origination expense, net of deferred cost	367	1,807
Portfolio expense	1,572	3,275
Consent order expense	756	12,931
Other	14,949	29,329
Total general and administrative expense	36,798	74,101
Total Noninterest Expense	\$161,212	\$211,816

First Quarter of 2014 compared to First Quarter of 2013

Noninterest expense decreased by \$50.6 million, or 24%, in the first quarter of 2014 compared to the same period in 2013. The decrease in noninterest expense was driven by decreases in salaries, commissions and employee benefits and general and administrative expense.

Salaries, commissions and employee benefits decreased by \$12.8 million, or 12%, in the first quarter of 2014 compared to the same period in 2013. The decrease is primarily due to lower headcount in our business as a result of the restructuring and repositioning activities we have executed over the last several quarters. In addition, lower production volumes related to slowed refinance activity continue to drive the decline in commissions expense.

Mortgage Banking salaries, commissions and employee benefits decreased by \$4.7 million in the first quarter of 2014, which included a decrease in production partially offset by an increase in our servicing headcount due to the servicing rights purchased on April 1, 2013. Headcount was down 5% and 8% and up 1% in our Mortgage Banking, Banking and Wealth Management and Corporate Services reporting segments, respectively, as of March 31, 2014 compared to the same period in 2013. Due to the expected transfer of the default servicing platform, we expect further headcount reductions in the second quarter of 2014.

General and administrative expense decreased by \$37.3 million, or 50%, in the first quarter of 2014 compared to the same period in 2013 primarily due to decreases in other credit-related expenses, advertising and marketing expense, consent order expense and other general and administrative expense compared to the same period in 2013.

Other credit-related expenses decreased by \$3.4 million, or 147%, in the first quarter of 2014 compared to the same period in 2013 primarily due to a \$5.3 million decrease in our repurchase reserve expenses related to our serviced loans, which was partially offset by an increase of \$4.0 million in our repurchase reserve expenses related to our originated loans. We describe our reserves for loans subject to representations and warranties in Note 13 in our condensed consolidated financial statements and in the "Loans Subject to Representations and Warranties" section of this Quarterly Report on Form 10-Q.

Advertising and marketing expense decreased by \$6.0 million, or 57%, in the first quarter of 2014, compared to the same period in 2013. The decrease in the first quarter of 2014 was due to a reduction in overall marketing spending due to the balance sheet and business repositioning activities we executed.

Consent order expenses decreased by \$12.2 million in the first quarter of 2014 compared to the same period in 2013, due to decreases in professional fee costs associated with the review and estimated remediation payments as a result of the settlement of the consent orders with the Office of the Comptroller of the Currency (OCC) in 2013.

Other general and administrative expense decreased by \$14.4 million, or 49%, in the first quarter of 2014 compared to the same period in 2013 primarily due to lower FDIC insurance premium assessment and other agency fees, which decreased by \$14.1 million, due to the balance sheet repositioning activities that occurred during the third quarter of 2013 including the sale of non-agency securities with high interest only concentration and the sale of \$911.1 million of fixed rate jumbo preferred ARMs as well as an adjustment to our risk assignment in prior quarters, which resulted in a \$5.4 million refund of our insurance premium assessments. The decrease in other general and administrative expense is also due to a decrease of \$1.4 million in clawback expense related to the settlement of our FDIC clawback liability in 2013.

For the three months ended March 31, 2014 and 2013, our effective income tax rate differs from the statutory federal income tax rate primarily due to state income taxes.

Segment Results

We evaluate our overall financial performance through three financial reporting segments: Banking and Wealth Management, Mortgage Banking and Corporate Services. To generate financial information by operating segment, we use an internal profitability reporting system which is based on a series of management estimates and allocations. We continually review and refine many of these estimates and allocations, many of which are subjective in nature. Any changes we make to estimates and allocations that may affect the reported results of any business segment do not affect our consolidated financial position or consolidated results of operations. Beginning in 2013, we updated our intersegment allocation of expenses for legal, human resources, and marketing expenses from the Corporate Services segment to the Banking and Wealth Management and Mortgage Banking segments, as applicable.

We use funds transfer pricing in the calculation of the respective operating segment's net interest income to measure the value of funds used in and provided by an operating segment. The difference between the interest income on earning assets and the interest expense on funding liabilities and the corresponding funds transfer pricing charge for interest income or credit for interest expense results in net interest income. We allocate risk-adjusted capital to our segments based upon the credit, liquidity, operating and interest rate risk inherent in the segment's asset and liability composition and operations. These capital allocations are determined based upon formulas that incorporate regulatory, GAAP and economic capital frameworks including risk-weighting assets, allocating noninterest expense and incorporating economic liquidity premiums for assets deemed by management to lower liquidity profiles.

Our Banking and Wealth Management segment often invests in loans originated from asset generation channels contained within our Banking and Wealth Management and Mortgage Banking segments as well as third party loan acquisitions. When intersegment acquisitions take place, we assign an estimate of the market value to the asset and record the transfer as a market purchase. In addition, intersegment cash balances are eliminated in segment reporting. The effects of these intersegment allocations and transfers are eliminated in consolidated reporting.

The following table summarizes segment income and total assets for each of our segments as of and for each of the periods shown:

(2) Other interest expense represents intersegment interest expense.

Table of Contents

First Quarter of 2014 compared to First Quarter of 2013

Banking and Wealth Management segment earnings increased by \$14.3 million, or 19%, in the first quarter of 2014 compared to the same period in 2013 primarily due to a decrease in noninterest expense partially offset by decreases in net interest income and noninterest income.

Net interest income decreased by \$5.9 million, or 4%, in the first quarter of 2014 compared to the same period in 2013 due to a decrease in interest income of \$16.5 million in the first quarter of 2014 partially offset by a decrease in interest expense of \$10.6 million in the first quarter of 2014. Please see "Analysis of Statements of Income" for an explanation of changes in average balances and yields/rates.

Noninterest income in our Banking and Wealth Management segment decreased by \$13.2 million, or 48%, in the first quarter of 2014 compared to the same period in 2013. This decrease is primarily due to an increase in our loans held for investment as a result of organic originations of our preferred ARM products. Given the intention to hold these loans in our portfolio, our mortgage banking segment receives revenue associated with the origination of the loan from our banking segment which is then eliminated. The decrease is also driven by certain non-recurring transactions that occurred in the first quarter of 2013 which included a \$4.0 million gain associated with the recovery of previously experienced losses on loans and MSR acquired as well as elevated prepayment income associated with commercial loans serviced.

Noninterest expense decreased by \$34.3 million, or 41%, in the first quarter of 2014 compared to the same period in 2013. The decrease in the first quarter of 2014 was primarily due to decreases in salaries, commissions and employee benefits, foreclosure and OREO expenses and other general and administrative expenses.

Salaries, commissions, and employee benefits decreased by \$8.8 million, or 28%, in the first quarter of 2014 compared to the same period in 2013 due to certain restructuring activities including the alignment and integration of our commercial lending platforms and the sale of non-performing assets consummated in the fourth quarter of 2014. Foreclosure and OREO expense decreased by \$3.3 million, or 62%, in the first quarter of 2014 compared to the same period in 2013 primarily due to stabilizing property values and declining losses on OREO properties as a result. Other general and administrative expense decreased by \$20.4 million, or 60%, in the first quarter of 2014 compared to the same period in 2013. The decrease in the first quarter of 2014 was driven primarily by decreases in advertising expenses and FDIC insurance assessment, partially offset by an increase in corporate allocations. Advertising expenses decreased \$5.0 million as a result of a decrease in marketing spend as we slowed deposit gathering initiatives to correspond with the repositioning of our balance sheet. FDIC insurance assessment decreased by \$8.7 million in the first quarter 2014, compared to the same period in 2013, due to balance sheet repositioning in 2013, including the sale of certain investment securities and the sale of nonperforming assets, which impacts our ongoing FDIC assessment. The FDIC assessment expense was also impacted by a positive adjustment to our risk assessment in prior quarters, which resulted in a \$5.4 million refund of our previously paid insurance assessments.

Table of Contents

First Quarter of 2014 compared to First Quarter of 2013

Mortgage Banking segment earnings decreased by \$26.0 million in the first quarter of 2014 compared to the same period in 2013 primarily due to a decrease in noninterest income partially offset by a decrease in noninterest expense. Noninterest income decreased by \$35.5 million, or 34%, in the first quarter of 2014 compared to the same period in 2013. The decrease was driven by a decrease in gain on sale of loans of \$43.4 million partially offset by an increase in net loan servicing income of \$10.2 million in the first quarter of 2014 compared to the same period in 2013.

Gain on sale of loans decreased by \$43.4 million in the first quarter of 2014 compared to the same period in 2013 primarily due to lower mortgage lending volume. Mortgage lending volume decreased by \$1.2 billion, or 41%, to \$1.7 billion in the first quarter of 2014 compared to the same period in 2013. The decrease in mortgage lending volume and the increased pricing competition is consistent with the overall mortgage origination market. The overall refinance activity in the market continues to decline as the incentive for refinance activity has fallen as interest rates have risen. Our refinance volume was \$909 million in the first quarter of 2014 compared to \$2.3 billion in the first quarter of 2013. The decrease in gain on sale of loans was also driven by the increased originations of our preferred ARM products which we plan to hold for the foreseeable future. Of the \$1.7 billion originated in the first quarter of 2014, \$791 million was from purchase money business compared to \$559 million in the first quarter of 2013. In addition, we continue to focus on organic growth of our balance sheet and originated \$808 million of our preferred ARM loans in the first quarter of 2014. The continued focus on the organic growth of our balance sheet has an impact on the absolute value of our gain on sale income, however it also increases our interest earning asset base.

Net loan servicing income increased by \$10.2 million in the first quarter of 2014 compared to the same period in 2013 primarily due to a decrease in amortization expense partially offset by a reduction in the recovery of our valuation allowance. The reduction of amortization expense of \$13.9 million was driven primarily by slower actual prepayment speeds as a result of increases in mortgage interest rates. Recovery of our valuation allowance on our MSR decreased by \$7.6 million in the first quarter of 2014. We recognized a \$12.6 million recovery during the first quarter of 2013 compared to a recovery of \$4.9 million in the first quarter of 2014. The recoveries were also a result of slower expected prepayment speeds due to increases in mortgage interest rates.

Additionally, loan servicing fees increased by \$3.9 million, or 9%, in the first quarter of 2014 compared to the same period in 2013. The increase in loan servicing fees is due to an increase in the UPB of loans serviced as a result of the residential MSR portfolio acquisition in the second quarter of 2013.

Noninterest expense decreased by \$16.8 million, or 16%, in the first quarter of 2014 compared to the same period in 2013 primarily due to decreases in salaries, commissions, and employee benefits, consent order expenses and other general and administrative costs.

Salaries, commissions, and employee benefits decreased \$4.7 million, or 8%, in the first quarter of 2014 compared to the same period in 2013. The decrease was primarily due to a decrease in headcount of 5% at March 31, 2014 compared to the same period in 2013 in addition to decreases in mortgage lending volumes which decreased commissions in the first quarter of 2014.

Consent order expenses decreased by \$10.5 million in the first quarter of 2014, compared to the same period in 2013, as a result of the settlement of our consent order in 2013, which required significant third party costs in the first quarter of 2013.

Foreclosure, OREO and other credit related expenses increased by \$2.0 million in the first quarter of 2014, compared to the same period in 2013, due to a \$2.9 million increase in our reserves related to potential nonrecoverable advances associated with the transfer of MSR to GTS. This was partially offset by a reduction of expenses associated with our repurchase reserves. Please see "Loan and Lease Quality" for additional discussion of our repurchase reserves.

Other general and administrative expenses decreased by \$4.6 million, or 21%, in the first quarter of 2014 compared to the same period in 2013. This was due primarily to decreases in MBS interest losses as a result of declining prepayments, advertising expenses and direct corporate allocations due to reductions in headcount.

Corporate Services

Corporate Services

Table 10
Three Months Ended
March 31,

Edgar Filing: EverBank Financial Corp - Form 10-Q

(dollars in thousands)	2014	2013
Net interest income	\$(1,584)	\$(1,571)
Noninterest income	137	159
Noninterest expense		
Salaries, commissions and employee benefits	23,839	23,208

Total noninterest expense	25,571	25,075
Loss before income taxes	\$(27,018)	\$(26,487)

First Quarter of 2014 compared to First Quarter of 2013

Corporate Services segment loss increased by \$0.5 million, or 2%, in the first quarter of 2014 compared to the same period in 2013. Noninterest expense increased by \$0.5 million, or 2%, in the first quarter of 2014 compared to the same period in 2013.

Other general and administrative costs decreased by \$6.3 million, or 37%, in the first quarter of 2014, compared to the same period in 2013, primarily due to a decrease in advertising expenses of \$4.8 million, but offset by a decrease in corporate allocations of \$5.9 million in the

Table of Contents

first quarter of 2014, compared to the same period in 2013, also related to advertising expenses.

Salaries, commissions and employee benefits increased by \$0.6 million, or 3%, due to an increase in headcount of 1% as of March 31, 2014 compared to the same period in 2013. The increase was due to continued business development and the need for additional support services due to increased governance and regulatory requirements.

Analysis of Statements of Condition

Investment Securities

Our overall investment strategy focuses on acquiring investment-grade senior mortgage-backed securities backed by seasoned loans with high credit quality and credit enhancements to generate earnings in the form of interest and dividends while offering liquidity, credit and interest rate risk management opportunities to support our asset and liability management strategy. Within our investment strategy, we also utilize highly rated structured products including Re-securitized Real Estate Mortgage Investment Conduits (Re-REMICs) for the added protection from credit losses and ratings deteriorations that accompany alternative securities. All securities investments satisfy our internal guidelines for credit profile and generally have a relatively short duration which helps mitigate interest rate risk arising from changes in market interest rates.

Available for sale securities are used as part of our asset and liability management strategy and may be sold in response to, or in anticipation of, factors such as changes in market conditions and interest rates, changes in security prepayment rates, liquidity considerations and regulatory capital requirements.

The following tables show the amortized cost and fair value of investment securities as of March 31, 2014 and December 31, 2013:

Total investment securities	\$1,211,682	\$17,752	\$5,886	\$1,223,548	\$1,222,939

Residential — Nonagency

At March 31, 2014, our residential nonagency portfolio consisted entirely of investments in residential nonagency CMO securities. Investments in residential nonagency CMO securities totaled \$1.1 billion, or 90%, of our investment

securities portfolio. Our residential nonagency CMO securities remained consistent totaling \$1.1 billion at March 31, 2014 and December 31, 2013 as purchases of additional securities offset reductions created by principal payments received, the amortization of premiums and discounts and changes in the fair value of the portfolio driven by macroeconomic factors.

Our residential nonagency CMO securities are secured by seasoned first-lien fixed and adjustable rate residential mortgage loans. Mortgage collateral is structured into a series of classes known as tranches, each of which contains a different maturity profile and pay-down priority in order to suit investor demands for duration, yield, credit risk and prepayment volatility. We have primarily invested in CMO securities rated in the highest category assigned by a nationally recognized statistical ratings organization. Many of these securities are Re-REMICs, which adds credit subordination to provide protection against future losses and rating downgrades. Re-REMICs constituted \$750.4 million, or 68%, of our residential nonagency CMO investment securities at March 31, 2014.

Table of Contents

We have internal guidelines for the credit quality and duration of our residential nonagency CMO securities portfolio and monitor these on a regular basis. At March 31, 2014, the portfolio carried a weighted average Fair Isaac Corporation, or FICO, score of 730, a weighted average amortized loan-to-value ratio, or LTV, of 62%, and was seasoned an average of 112 months. This portfolio includes protection against credit losses through subordination in the securities structures and borrower equity.

Residential — Agency

At March 31, 2014, our residential agency portfolio consisted of both residential agency CMO securities and residential agency MBS securities. Investments in residential agency CMO securities totaled \$38.3 million, or 3%, of our investment securities portfolio. Our residential agency MBS portfolio totaled \$78.9 million, or 6%, of our investment securities portfolio. The residential agency CMO and MBS available for sale securities are included in Other in the table above. Our residential agency portfolio is secured by seasoned first-lien fixed and adjustable rate residential mortgage loans insured by government sponsored entities (GSEs).

Our residential agency CMO securities decreased by \$3.1 million, or 7%, to \$38.3 million at March 31, 2014 from \$41.4 million at December 31, 2013 due to principal payments received and the amortization of premiums and discounts. Our residential agency MBS securities increased by \$12.7 million, or 19%, to \$78.9 million at March 31, 2014, from \$66.2 million at December 31, 2013 primarily due to purchases of additional securities partially offset by principal payments received and the amortization of premiums and discounts.

Loans Held for Sale

The following table presents the balance of each major category in our loans held for sale portfolio at March 31, 2014 and December 31, 2013:

Loans Held for Sale

	Table 12A	
	March 31,	December 31,
(dollars in thousands)	2014	2013
Mortgage warehouse (carried at fair value)	\$488,976	\$613,459
Other residential (carried at fair value)	63,705	58,912
Total loans held for sale carried at fair value	552,681	672,371
Government insured pool buyouts	26,570	53,823
Other residential	7,699	8,939
Commercial and commercial real estate	9,779	56,249
Total loans held for sale carried at lower of cost or market	44,048	119,011
Total loans held for sale	\$596,729	\$791,382

Mortgage Warehouse

At March 31, 2014, our fair value, agency mortgage warehouse loans accounted for at fair value totaled \$489.0 million, or 82%, of our total loans held for sale portfolio. Our mortgage warehouse loans are comprised of agency deliverable products that we typically sell within three months subsequent to origination. We hedge our mortgage warehouse portfolio with forward sales commitments designed to protect against potential changes in fair value. Given the short duration that these loans are present on our balance sheet, we have elected fair value accounting on this portfolio of loans due to the burden of complying with the requirements of hedge accounting. Mortgage warehouse loans accounted for at fair value decreased by \$124.5 million, or 20%, from December 31, 2013 due to a decrease in the amount of agency deliverable loans originated in the quarter compared to the fourth quarter of 2013. The following table represents the length of time the mortgage warehouse loans have been classified as held for sale:

Mortgage Warehouse

	Table 12B	
	March 31,	December 31,
(dollars in thousands)	2014	2013
30 days or less	\$352,821	\$378,736
31- 90 days	113,124	199,743
Greater than 90 days	23,031	34,980
	\$488,976	\$613,459

Subsequent to March 31, 2014, we sold \$8.9 million of the mortgage warehouse loans classified as held for sale that were held for more than 90 days. The remaining \$480.1 million of warehouse loans were made up of conforming or government product and were current at March 31, 2014.

Other Residential Loans Carried at Fair value

At March 31, 2014, our other residential loans carried at fair value totaled \$63.7 million, or 11%, of our total loans held for sale portfolio. The Company has elected the fair value option of accounting under U.S. GAAP for certain longer duration residential jumbo mortgage loans held for sale. Electing to use fair value accounting allows a better offset of the changes in the fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting. During the three months ended March 31, 2014, we sold \$54.6 million of other residential loans carried at fair value.

Government Insured

At March 31, 2014, our government insured pool buyout loans totaled \$26.6 million, or 4%, of our total loans held for sale portfolio. During the three months ended March 31, 2014, we transferred \$137.5 million of conforming mortgages to GNMA in exchange for mortgage-backed securities. At March 31, 2014, there were \$22.8 million in GNMA securities that were transferred and included in the loans held for sale

Table of Contents

balance above for which we retained effective control of the assets. In addition to the ability to work-out these assets and securitize into GNMA pools, we have acquired a significant portion of these assets at a discount to UPB. The UPB and a portion of the interest is government insured which provides an attractive overall return on the underlying delinquent assets.

Other Residential Loans Carried at Lower of Cost or Market Value (LOCOM)

Our other residential loans carried at LOCOM totaled \$7.7 million, or 1%, of our total loans held for sale portfolio.

Other residential loans carried at LOCOM consist of mortgage loans originated or acquired by the Company with the intent to modify and redeliver these loans into the secondary market.

Commercial and Commercial Real Estate

At March 31, 2014, our commercial and commercial real estate loans totaled \$9.8 million, or 2%, of our total loans held for sale portfolio. Commercial and commercial real estate loans represent revolving credit facilities to other specialty finance companies, where the Company is lead agent. As lead agent the Company holds a portion of each facility within its commercial loans held for investment portfolio with the remaining portion being held with the intent to sell. During the three months ended March 31, 2014, we sold \$38.8 million of our commercial and commercial real estate loans.

Loans and Leases Held for Investment

The following table presents the balance of each major category in our loans and leases held for investment portfolio at March 31, 2014 and at December 31, 2013:

Loans and Leases Held for Investment	Table 13	
(dollars in thousands)	March 31, 2014	December 31, 2013
Residential mortgages:		
Residential	\$5,688,053	\$5,153,106
Government insured pool buyouts	1,911,773	1,891,637
Commercial and commercial real estate	4,819,020	4,812,970
Lease financing receivables	1,292,750	1,237,941
Home equity lines	147,086	151,916
Consumer and credit card	5,427	5,154
Total loans and leases, net of discounts	13,864,109	13,252,724
Allowance for loan and lease losses	(62,969)	(63,690)
Total loans and leases, net	\$13,801,140	\$13,189,034
The balances presented above include:		
Net purchase loan and lease discounts	\$79,905	\$102,416
Net deferred loan and lease origination costs	64,688	54,107

Residential Mortgage Loans

At March 31, 2014, our residential mortgage loans totaled \$5.7 billion, or 41%, of our total held for investment loan and lease portfolio. We primarily offer our customers residential closed-end mortgage loans typically secured by first liens on one-to-four family residential properties.

Residential mortgage loans increased by \$534.9 million, or 10%, to \$5.7 billion at March 31, 2014 from \$5.2 billion at December 31, 2013. The increase was due primarily to retained originations of \$732.7 million partially offset by paydowns and payoffs of existing loans. The retention of these residential mortgages is the result of a change in strategy made during 2013 to retain originated preferred jumbo ARM residential mortgages due to changing economic conditions and our capacity and desire to hold these loans on the balance sheet.

Government Insured Buyouts

At March 31, 2014, our government insured buyout loan portfolio totaled \$1.9 billion, or 14%, of our total loans held for investment portfolio. Government insured pool buyouts increased by \$20.1 million, or 1%, from \$1.9 billion at December 31, 2013. The increase was primarily the result of mortgage pool buyout purchases of \$274.8 million, partially offset by \$109.6 million of loans transferred from loans held for investment to loans held for sale, and \$120.1 million of delinquent loans reaching foreclosure, with the remaining decline the product of paydowns and payoffs of

existing loans. We continue to acquire government insured pool buyouts for our portfolio. However, the pace of our acquisition activity through the three months ended March 31, 2014 has been substantially offset by subsequent securitizations through GNMA as well as transfers to claims receivable from the FHA or VA.

We have a history of servicing FHA loans. As a servicer, the buyout opportunity is the right to purchase above market rate, government insured loans at par (i.e., the amount that has to be passed through to the GNMA security holder when repurchased). For banks like EverBank, with cost effective sources of short term capital, this strategy represents a very attractive return with limited additional investment risk.

Each loan in a GNMA pool is insured or guaranteed by one of several federal government agencies, including the Federal Housing Administration, Department of Veterans' Affairs or the Department of Agriculture's Rural Housing Service. The loans must at all times comply with the requirements for maintaining such insurance or guarantee. Prior to our acquisition of these loans, we perform due diligence to ensure a valid guarantee is in place; therefore we believe that a negligible amount of principal is at risk.

Duration is a potential risk of holding these loans and exposes us to interest rate risk and the risk of a funding mismatch. In most cases, acquired loans or loans purchased out of our servicing assets are greater than 89 days past due upon purchase. Loans that go through foreclosure have an expected duration of one to two years, depending on the state's servicing timelines. Bankruptcy proceedings and loss

Table of Contents

mitigation requirements could extend the duration of these loans. Extensions for these reasons do not impact the insurance or guarantee and are modeled into the acquisition price.

Loans can re-perform on their own or through loss mitigation and/or modification. Most loans are 20 to 30 year fixed rate instruments. Re-performing loans earn a higher yield as they can earn an above market note rate rather than a government guaranteed reimbursement rate. In order to mitigate the duration risk on re-performing loans, EverBank has the ability to sell those loans into the secondary market.

Operational capacity poses a lesser risk to the claim through missed servicing milestones. Servicing operations must comply with the government agencies' servicing requirements in order to avoid interest curtailments (principal is not at risk). For acquired pool buyouts, we, in general, purchase loans early in the default cycle to obtain control of the files before processing errors jeopardize claims.

Commercial and Commercial Real Estate Loans

At March 31, 2014, our commercial and commercial real estate loans, which include owner-occupied commercial real estate, commercial investment properties, asset-backed commercial and small business commercial loans, totaled \$4.8 billion, or 35%, of our total held for investment loan and lease portfolio.

Commercial and commercial real estate loans remained largely unchanged representing \$4.8 billion at both March 31, 2014 and December 31, 2013. This consistency was due to origination activity of \$158.0 million and increases in utilization by existing customers on lines of credit of \$52.6 million partially offset by paydowns of \$172.2 million and loans sold totaling \$29.9 million. The increase in utilization by existing customers was driven largely by growth within our lender finance business, which provides revolving and term credit facilities secured by equipment and receivables primarily to specialty finance companies on a national basis.

Lease Financing Receivables

Lease financing receivables increased by \$54.8 million, or 4%, to \$1.3 billion, or 9%, of our total held for investment loan and lease portfolio at March 31, 2014 from \$1.2 billion at December 31, 2013. The increase was the result of lease originations of \$169.0 million, earned income of \$18.7 million partially offset by paydowns of existing leases of \$125.9 million, amortization of deferred origination costs of \$3.5 million, charge-offs of \$1.2 million, and lease expirations and disposals. Our leases generally consist of short-term and medium-term leases and loans secured by essential use office product, healthcare, industrial and information technology equipment to small and mid-size lessees and borrowers. Of our total held for investment lease financing receivables portfolio, \$487.3 million or 38% is held within the healthcare portfolio, \$343.4 million or 27% is held within the office products portfolio and \$154.9 million or 12% is held within the information technology portfolio. All of our lease financing receivables were either purchased as a part of the Tygris acquisition or originated out of the operations of Tygris, which was re-branded as ECF.

Home Equity Lines

At March 31, 2014, our home equity lines totaled \$147.1 million, or 1%, of our total held for investment loan and lease portfolio, a decrease of \$4.8 million, or 3%, from \$151.9 million at December 31, 2013, due to paydowns on our existing lines of credit.

Consumer and Credit Card Loans

At March 31, 2014, consumer and credit card loans, in the aggregate, totaled \$5.4 million, or less than 1% of our total held for investment portfolio. These loans include direct personal loans, credit card loans and lines of credit, automobile and other loans to our clients which are generally secured by personal property. Lines of credit are generally floating rate loans that are unsecured or secured by personal property.

Mortgage Servicing Rights

The following table presents the change in our MSR portfolio for the three months ended March 31, 2014 and 2013:

Change in Mortgage Servicing Rights	Table 14	
	Three Months Ended March 31, 2014	2013
Balance, beginning of period	\$506,680	\$375,859
Originated servicing rights capitalized upon sale of loans	11,552	23,501

Sale of servicing rights	(55,547)	—
Amortization	(20,572)	(35,078)
Decrease (increase) in valuation allowance	4,941	12,555
Other	(561)	(1,196)
Balance, end of period	\$446,493	\$375,641
Valuation allowance:		
Balance, beginning of period	\$8,012	\$102,963
Recoveries	(4,941)	(12,555)
Balance, end of period	\$3,071	\$90,408

We carry MSR at amortized cost net of any required valuation allowance. We amortize MSR in proportion to and over the period of estimated net servicing income and evaluate MSR quarterly for impairment.

Originated servicing rights decreased by \$11.9 million, or 51%, in the first quarter of 2014 compared to the same period in 2013. The decrease was primarily due to lower mortgage lending volume of \$1.2 billion for the three months ended March 31, 2014 compared to the same period in 2013. Volumes have decreased as a result of the overall refinance activity in the market continuing to decline as the incentive for refinance activity has fallen as interest rates have risen.

Table of Contents

Sale of servicing rights increased by \$55.5 million for the three months ended March 31, 2014 compared to the same period in 2013 due to the sale of \$9.9 billion in UPB of servicing rights to GTS on March 28, 2014. These servicing rights are expected to transfer in May 2014 and therefore are excluded from our MSR portfolio at March 31, 2014 as we are subservicing these assets until the transfer date. Also, an additional \$1.9 billion in UPB of servicing rights is expected to be sold to GTS during the second quarter of 2014.

Amortization expense decreased by \$14.5 million, or 41%, during the three months ended March 31, 2014 compared to the same period in 2013. The decrease in amortization expense was due to lower refinancing activity resulting in lower prepayment speeds compared to the same period in 2013. Annualized amortization rates as of March 31, 2014 and 2013 approximated 15.9% and 29.1%, respectively.

A decrease in actual prepayment speeds as compared to previously expected speeds was the primary driver for the recovery of the MSR valuation allowance during the three months ended March 31, 2014 compared to the same period in 2013. At March 31, 2014, we estimate that approximately 24.7% of our portfolio was eligible to refinance under the HARP program. As such, near term annualized prepayment speeds were estimated at 12.2% at March 31, 2014.

Other Assets

The following table sets forth other assets by category as of March 31, 2014 and December 31, 2013:

Other Assets	March 31,	Table 15 December 31,
(dollars in thousands)	2014	2013
Servicing advances, net of allowance of \$10,412 and \$9,642, respectively	\$216,773	\$225,436
Foreclosure claims receivable, net of allowance of \$14,732 and \$14,398, respectively	211,527	208,226
Accrued interest receivable	66,752	66,782
Corporate advances, net of allowance of \$5,563 and \$6,168, respectively	66,371	64,702
Income taxes receivable, net	62,307	71,372
Goodwill	46,859	46,859
Other real estate owned (OREO), net of allowance of \$6,349 and \$5,958, respectively	29,333	29,034
Fair value of derivatives, net	24,423	28,170
Prepaid assets	14,422	12,270
Margin receivable, net	13,820	6,370
Intangible assets, net	5,286	5,813
Other	43,372	49,840
	\$801,245	\$814,874

Other assets decreased by \$13.6 million, or 2%, to \$801.2 million at March 31, 2014 from \$814.9 million at December 31, 2013. The decrease was driven primarily by decreases in servicing advances, income taxes receivable and the other assets category, which were partially offset by an increase in margin receivable.

Servicing advances decreased \$8.7 million, or 4%, from December 31, 2013 to March 31, 2014. The decrease was primarily attributable to the timing and seasonality of escrow advance payments.

Income taxes receivable decreased by \$9.1 million, or 13%, from December 31, 2013 to March 31, 2014. The decrease was primarily due to lower federal income taxes receivable related to an increase in current income tax expense for the quarter.

Margin receivable increased by \$7.5 million, or 117%, during the three months ended March 31, 2014, compared to December 31, 2013. The increase was primarily attributable to an increase in collateral posted for certain derivative trading activity related to hedging of our pipeline that is not subject to a master netting arrangement. The fair value of our forward sales commitments declined from December 31, 2013 and as a result we were required to pledge more collateral. See Note 11 in our condensed consolidated financial statements for more information related to our netting and cash collateral adjustments.

Other assets category decreased by \$6.5 million, or 13%, from December 31, 2013 to March 31, 2014, which was primarily due to the timing of payments received as well as a decrease in accrued interest receivable on CMOs in the first quarter of 2014.

Other assets will be impacted as a result of our default servicing platform transferring to GTS in May 2014.

Deferred Tax Asset

Our net deferred tax asset decreased by \$9.2 million to \$42.1 million at March 31, 2014, from \$51.4 million at December 31, 2013, primarily due to changes in other comprehensive income related to interest rate swaps and the recovery of MSR impairment during the period.

Accumulated Other Comprehensive Income

Accumulated other comprehensive income decreased by \$1.0 million to a loss of \$53.6 million at March 31, 2014, from a loss of \$52.6 million at December 31, 2013, primarily due to net unrealized losses as a result of changes in fair value related to our interest rate swaps partially offset by the reclassifications of unrealized losses during the period into income.

Loan and Lease Quality

We use a comprehensive methodology to monitor credit quality and prudently manage credit concentration within our portfolio of loans and leases. Our underwriting policies and practices govern the risk profile, credit and geographic concentration for our loan and lease portfolios. We also have a comprehensive methodology to monitor these credit quality standards, including a risk classification system that identifies potential problem loans based on risk characteristics by loan type as well as the early identification of deterioration at the individual loan level. In

Table of Contents

addition to our ALLL, we have additional protections against potential credit losses, including credit indemnification agreements, purchase discounts on acquired loans and leases and other credit-related reserves, such as those on unfunded commitments.

Discounts on Acquired Loans and Lease Financing Receivables

For acquired credit-impaired, or ACI, loans accounted for under ASC 310-30, we periodically reassess cash flow expectations at a pool or loan level. In the case of improving cash flow expectations for a particular loan or pool of loans, we reclassify an amount of non-accretable difference as accretable yield, thus increasing the prospective yield of the pool. In the case of deteriorating cash flow expectations, we record a provision for loan or lease losses following the allowance for loan loss framework. For more information on ACI loans accounted for under ASC 310-30, see Note 5 in our condensed consolidated financial statements.

The following table presents a bridge from UPB, or contractual net investment, to carrying value for ACI loans accounted for under ASC 310-30 at March 31, 2014 and December 31, 2013:

(dollars in thousands)	Table 16		
	Residential	Commercial and Commercial Real Estate	Total
Under ASC 310-30			
March 31, 2014			
UPB or contractual net investment	\$793,839	\$313,712	\$1,107,551
Plus: contractual interest due or unearned income	297,082	114,581	411,663
Contractual cash flows due	1,090,921	428,293	1,519,214
Less: nonaccretable difference	224,182	37,812	261,994
Less: Allowance for loan losses	4,638	10,659	15,297
Expected cash flows	862,101	379,822	1,241,923
Less: accretable yield	104,268	72,016	176,284
Carrying value	\$757,833	\$307,806	\$1,065,639
Carrying value as a percentage of UPB or contractual net investment	95	% 98	% 96
December 31, 2013			
UPB or contractual net investment	\$696,222	\$339,179	\$1,035,401
Plus: contractual interest due or unearned income	578,945	101,297	680,242
Contractual cash flows due	1,275,167	440,476	1,715,643
Less: nonaccretable difference	522,589	39,208	561,797
Less: Allowance for loan losses	4,925	9,834	14,759
Expected cash flows	747,653	391,434	1,139,087
Less: accretable yield	101,183	59,663	160,846
Carrying value	\$646,470	\$331,771	\$978,241
Carrying value as a percentage of UPB or contractual net investment	93	% 98	% 94

In our residential ACI portfolio, no significant impairment was recognized for the three months ended March 31, 2014. Within this portfolio, we also reclassified \$2.1 million from nonaccretable difference to accretable yield due to increases in cash flow expectations on our government insured pool buyouts.

In our commercial and commercial real estate ACI portfolio, no significant impairment was recognized for the three months ended March 31, 2014. Within this portfolio, we reclassified \$17.9 million from nonaccretable difference to accretable yield due to increases in cash flow expectations.

Problem Loans and Leases

Loans and leases are placed on nonaccrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual, which is generally when the loan becomes 90 days past due as defined by the OCC, with the exception of government insured loans and ACI loans. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is reversed from interest income, and both the

accrual of interest income and the amortization of unamortized deferred fees, costs, discounts and premiums are suspended. Concurrent with the placing of a loan on nonaccrual status, an assessment must be performed, considering both the creditworthiness of the borrower and the value of any collateral underlying the loan, to determine whether doubt exists about the collectability of the recorded investment in the loan. If collectability of the recorded investment in the loan is in doubt, any payments received subsequent to placing the loan on nonaccrual status are applied using the cost recovery method reducing the recorded investment to the extent necessary to eliminate such doubt. Once it can be determined that no doubt exists regarding the collectability of the recorded investment in the loan, subsequent interest payments may be recorded as interest income on a cash basis.

For purposes of disclosure in the table below, we exclude government insured pool buyout loans from our definition of non-performing loans and leases. We also exclude ACI loans from non-performing status because we expect to fully collect their new carrying value which reflects significant purchase discounts. If we are unable to reasonably estimate future cash flows, these loans may be classified as nonaccrual loans and interest income will not be recognized until the timing and amount of future cash flows can be reasonably estimated.

Table of Contents

Real estate we acquired as a result of foreclosure or by deed-in-lieu of foreclosure is classified as OREO until sold, and is carried at the balance of the loan at the time of foreclosure or at estimated fair value less estimated costs to sell, whichever is less.

In cases where a borrower experiences financial difficulties and we make certain concessionary modifications to contractual terms, the loan is classified as a TDR. Loans restructured with terms and at a rate equal to or greater than that of a new loan with comparable risk at the time the contract is modified are not considered to be impaired loans in calendar years subsequent to the restructuring.

The following table sets forth the composition of our non-performing assets (NPA), including nonaccrual, accruing loans and leases past due 90 or more days, TDR and OREO, as of the dates indicated. The balances of NPA reflect the net investment in such assets including deductions for purchase discounts.

Non-Performing Assets ⁽¹⁾	Table 17		
(dollars in thousands)	March 31, 2014	December 31, 2013	
Nonaccrual loans and leases:			
Residential mortgages	\$47,835	\$59,526	
Commercial and commercial real estate	23,884	18,569	
Lease financing receivables	5,446	4,527	
Home equity lines	3,462	3,270	
Consumer and credit card	33	18	
Total nonaccrual loans and leases	80,660	85,910	
Accruing loans 90 days or more past due	—	—	
Total non-performing loans (NPL)	80,660	85,910	
Other real estate owned	29,333	29,034	
Total non-performing assets	109,993	114,944	
Troubled debt restructurings less than 90 days past due	73,455	76,913	
Total NPA and TDR ⁽¹⁾	\$183,448	\$191,857	
Total NPA and TDR	\$183,448	\$191,857	
Government insured 90 days or more past due still accruing	1,021,276	1,039,541	
Loans and leases accounted for under ASC 310-30:			
90 days or more past due	9,915	10,083	
Total regulatory NPA and TDR	\$1,214,639	\$1,241,481	
Adjusted credit quality ratios: ⁽¹⁾			
NPL to total loans	0.56	%	0.61 %
NPA to total assets	0.62	%	0.65 %
NPA and TDR to total assets	1.04	%	1.09 %
Credit quality ratios including government insured loans and loans and leases accounted for under ASC 310-30 :			
NPL to total loans	7.72	%	8.12 %
NPA to total assets	6.47	%	6.60 %
NPA and TDR to total assets	6.89	%	7.04 %

We define NPA as nonaccrual loans, accruing loans past due 90 days or more and foreclosed property. Our NPA ⁽¹⁾ calculation excludes government insured pool buyout loans for which payment is insured by the government. We also exclude ACI loans accounted for under ASC 310-30 because we expect to fully collect the carrying value of such loans.

Total NPA and TDR decreased by \$8.4 million, or 4%, to \$183.4 million at March 31, 2014 from \$191.9 million at December 31, 2013. This decrease was primarily attributable to a \$5.3 million decrease in nonaccrual loans and leases and a \$3.5 million decrease in TDRs less than 90 days past due. The decrease in nonaccrual loans was primarily attributable to a decrease in residential nonaccrual loans of \$11.7 million, or 20%, which resulted from re-performing loans and transfers to REO of \$17.0 million partially offset by new nonaccrual residential loans of \$5.0 million. All

other nonaccrual loan categories experienced increases over the same time period.

Total regulatory NPA and TDR decreased by \$26.8 million, or 2%, to \$1.2 billion at March 31, 2014 from \$1.2 billion at December 31, 2013. This decrease was primarily attributable to a \$18.3 million decrease in government insured 90 days or more past due still accruing, a \$5.3 million decrease in nonaccrual loans and leases and a \$3.5 million decrease in TDRs less than 90 days past due.

We use an asset risk classification system in compliance with guidelines established by the OCC Handbook as part of our efforts to monitor asset quality. In connection with examinations of insured institutions, examiners have the authority to identify problem assets and, if appropriate, classify them. There are three classifications for problem assets: "substandard," "doubtful," and "loss." Substandard assets have one or more defined weaknesses and are characterized by the distinct possibility that the insured institution will sustain some loss if the deficiencies are not corrected. Doubtful assets have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full questionable and there is a high probability of loss based on currently existing facts, conditions and values. An asset classified as loss is considered uncollectible and of such little value that continuance as an asset is not warranted. Commercial loans with adverse classifications are reviewed by the commercial credit committee of our executive credit committee monthly.

Table of Contents

In addition to the problem loans described above, as of March 31, 2014, we had special mention loans and leases totaling \$42.3 million, which are not included in either the non-accrual or 90 days past due loan and lease categories but which, in our opinion, were subject to potential future rating downgrades. Special mention loans and leases decreased by \$3.7 million, or 8%, to \$42.3 million at March 31, 2014, from \$46.0 million at December 31, 2013. Loans and leases rated as special mention totaled \$42.3 million, or 0.3%, of the total loan portfolio at March 31, 2014, including \$7.2 million acquired from Bank of Florida and \$22.5 million acquired in the BPL acquisition.

Analysis for the Allowance for Loan and Lease Losses

The tables below set forth the calculation of the ALLL based on the method for determining the allowance.

Analysis for Loan and Lease Losses

Table 18

(dollars in thousands)	March 31, 2014			December 31, 2013			
	Excluding ACI Loans	ACI Loans	Total	Excluding ACI Loans	ACI Loans	Total	
Residential mortgages	\$20,763	\$4,638	\$25,401	\$21,572	\$4,925	\$26,497	
Commercial and commercial real estate	19,608	10,659	30,267	20,153	9,834	29,987	
Lease financing receivables	4,312	—	4,312	4,273	—	4,273	
Home equity lines	2,920	—	2,920	2,812	—	2,812	
Consumer and credit card	69	—	69	121	—	121	
Total ALLL	\$47,672	\$15,297	\$62,969	\$48,931	\$14,759	\$63,690	
ALLL as a percentage of loans and leases held for investment	0.37	% 1.42	% 0.45	% 0.40	% 1.49	% 0.48	%
Residential mortgages	\$6,837,355	\$762,471	\$7,599,826	\$6,393,348	\$651,395	\$7,044,743	
Commercial and commercial real estate	4,500,555	318,465	4,819,020	4,471,365	341,605	4,812,970	
Lease financing receivables	1,292,750	—	1,292,750	1,237,941	—	1,237,941	
Home equity lines	147,086	—	147,086	151,916	—	151,916	
Consumer and credit card	5,427	—	5,427	5,154	—	5,154	
Total loans and leases held for investment	\$12,783,173	\$1,080,936	\$13,864,109	\$12,259,724	\$993,000	\$13,252,724	

The recorded investment in loans and leases held for investment, excluding ACI loans, increased by \$523.4 million, or 4%, to \$12.8 billion at March 31, 2014 from \$12.3 billion at December 31, 2013. The increase is primarily attributable to new originations and strategic acquisitions of residential mortgages.

Residential

The recorded investment in residential mortgages, excluding ACI loans, increased by \$444.0 million, or 7%, to \$6.8 billion at March 31, 2014, from \$6.4 billion at December 31, 2013. The ALLL for residential mortgages, excluding ACI loans, decreased by \$0.8 million, or 4%, to \$20.8 million at March 31, 2014, from \$21.6 million at December 31, 2013 as a result of the continued performance of our high credit quality residential first portfolio. Charge-off activity for residential mortgages decreased by 38% to \$3.2 million for the three months ended March 31, 2014 from \$5.1 million for the three months ended March 31, 2013. Loan performance and historical loss rates are analyzed using the prior 12 months delinquency rates and actual charge-offs.

Commercial and Commercial Real Estate

The recorded investment for commercial and commercial real estate, excluding ACI loans, increased by \$29.2 million, or 1%, to \$4.5 billion at March 31, 2014, from \$4.5 billion at December 31, 2013. The increase is due to the organic growth in our commercial and commercial real estate portfolio during the three months ended March 31, 2014.

The ALLL for commercial and commercial real estate, excluding ACI loans, decreased by 3%, to \$19.6 million at March 31, 2014, from \$20.2 million at December 31, 2013. The reserve on loans collectively evaluated for impairment decreased by 6% to \$18.7 million at March 31, 2014 from \$19.9 million at December 31, 2013. The reserves on commercial and commercial real estate loans individually evaluated for impairment increased to \$0.9 million at March 31, 2014, from \$0.2 million at December 31, 2013. The outstanding balance of loans individually evaluated for impairment increased by 32% from December 31, 2013 to March 31, 2014. The ALLL as a percentage of loans and leases held for investment for commercial and commercial real estate, excluding ACI loans, decreased to 0.44% as of March 31, 2014 compared with 0.45% at December 31, 2013. The decreased coverage ratio is due to improvement in the credit quality of our loans and lower delinquencies on our collectively evaluated for impairment loans. Newly originated loans adhere to higher underwriting standards than in previous periods.

For commercial and commercial real estate loans, the most significant historical loss factors include credit quality and charge-off activity. The loss factors used in our allowance calculation have remained consistent over the periods presented. Charge-off activity is analyzed using a 15 quarter time period to determine loss rates consistent with loan segments used in recording the allowance estimate. During periods of more consistent and stable performance, this 15 quarter period is considered the most relevant starting point for analyzing the reserve. During periods of significant volatility and severe loss experience, a shortened time period may be used which is more reflective of expected future losses. At March 31, 2014, three segments that are included in commercial and commercial real estate loans used shortened historical loss periods of 13, 8, and 5 quarters as compared with loss periods of 12, 8 and 4 quarters at December 31, 2013. The difference is due to additional loan history that is more indicative of future expected losses. Charge-off activity for commercial and commercial real estate decreased to almost zero for the three months ended March 31, 2014, from \$1.4 million for the three months ended March 31, 2013 due to improved portfolio performance following the disposition of nonperforming commercial and commercial real estate loans during the fourth quarter of 2013. Loan delinquency is one of the leading indicators of credit quality. As of March 31, 2014, almost none of the recorded investment in commercial and commercial real estate, excluding ACI loans, was past due as compared to 0.1% as of December 31, 2013.

Table of Contents

The following table provides an analysis of the ALLL, provision for loan and lease losses and net charge-offs for the three months ended March 31, 2014 and 2013:

Allowance for Loan and Lease Losses Activity	Table 19			
	Three Months Ended			
	March 31,			
(dollars in thousands)	2014	2013		
ALLL, beginning of period	\$63,690	\$82,102		
Charge-offs:				
Residential mortgages	3,165	5,069		
Commercial and commercial real estate	5	1,447		
Lease financing receivables	1,189	708		
Home equity lines	316	489		
Consumer and credit card	15	20		
Total charge-offs	4,690	7,733		
Recoveries:				
Residential mortgages	566	111		
Commercial and commercial real estate	1	443		
Lease financing receivables	190	79		
Home equity lines	141	129		
Consumer and credit card	—	17		
Total recoveries	898	779		
Net charge-offs	3,792	6,954		
Provision for loan and lease losses	3,071	1,919		
ALLL, end of period	\$62,969	\$77,067		
Net charge-offs to average loans held for investment	0.12	%	0.23	%

Net charge-offs for the three months ended March 31, 2014 totaled \$3.8 million, down \$3.2 million, or 45%, over the three months ended March 31, 2013. The decrease in net charge-offs is primarily a result of stabilizing property values within the residential and commercial real estate portfolios as well as overall increased originations in the portfolio of higher credit quality due to tightened underwriting standards that were implemented following the credit crisis.

Loans Subject to Representations and Warranties

We originate residential mortgage loans, primarily first-lien home loans, through our direct channels with the intent of selling a majority of them in the secondary mortgage market. We sell and securitize conventional conforming and federally insured single-family residential mortgage loans predominantly to GSEs, such as FNMA and FHLMC. A majority of the loans sold to non-GSEs were agency deliverable product that were eventually sold by large aggregators of agency product who securitized and sold the loans to the agencies. We also sell residential mortgage loans that do not meet criteria for whole loan sales to GSEs (nonconforming mortgage loans) and to private non-GSE purchasers through whole loan sales.

Although we structure all of our loan sales as non-recourse sales, the underlying sale agreements require us to make certain market standard representations and warranties at the time of sale, which may vary from agreement to agreement. Such representations and warranties typically include those made regarding the existence and sufficiency of file documentation, credit information, compliance with underwriting guidelines and the absence of fraud by borrowers or other third parties such as appraisers in connection with obtaining the loan. We have exposure to potential loss because, among other things, the representations and warranties we provide purchasers typically survive for the life of the loan.

Beginning in 2009, higher loan delinquencies, resulting from deterioration in overall economic conditions and trends, particularly those impacting the residential housing sector, caused investors to carefully examine and re-underwrite credit files for those loans in default to determine if there had been a breach of a representation or a warranty in the sale agreement. Investors have most often cited missing documentation and income misrepresentations as the grounds for us to repurchase loans.

Upon receipt of a repurchase demand from an investor, we review the requests and re-underwrite the loan. We also verify any third-party information included as support for the repurchase demand. In certain cases, we may request the investor to provide additional information to assist us in our determination whether to repurchase the loan.

Upon completion of our own internal investigation as to the validity of a repurchase claim, our findings are discussed by senior management and subject-matter experts as part of our loan repurchase subcommittee. If the subcommittee determines that we are obligated to repurchase a loan, such recommendation is presented to executive management for review and approval.

If it is determined that the loans sold are (1) with respect to the GSEs, in breach of these representations or warranties, or (2) with respect to non-GSE purchasers, in material breach of these representations and warranties, we generally have an obligation to either: (a) repurchase the loan for the UPB, accrued interest and related advances, which we refer to collectively as the Repurchase Price, (b) indemnify the purchaser or (c) make the purchaser whole for the economic benefits of the loan. Our obligations vary based upon the nature of the repurchase demand and the current status of the mortgage loan. For example, if an investor has already liquidated the mortgage loan, the investor no longer has a mortgage asset that we could repurchase.

Table of Contents

Of the three courses of action described above, a loan repurchase is the only remedy where we will place the loan asset that is the subject of the repurchase demand, assuming we cannot cure the breach and redeliver the loan into the secondary market, on our balance sheet. In the case of indemnification, the investor still owns the loan asset and we indemnify the investor for losses incurred resulting from our breach of a representation or warranty. In the case of a make-whole payment, the investor or subsequent purchaser of a loan asset has liquidated the loan and there is no loan asset for us to repurchase.

At the time we repurchase a loan, we determine whether to hold the loan for sale or for investment. If the loan is sellable on the secondary market, we may elect to do so. If the loan is not sellable on the secondary market or there are other reasons why we would elect to retain the loan, we will service the asset to minimize our losses. This may include, depending on the status of the loan at the time of repurchase, modifying the loan, or foreclosure on the loan and subsequent liquidation of the mortgage property.

When we sell residential mortgage loans on the secondary mortgage market, our repurchase obligations are typically not limited to any specific period of time. Rather, the contractual representations and warranties we make on these loans survive indefinitely for the life of the loan.

We also have a limited repurchase exposure for early payment defaults (EPD) which are typically triggered if a borrower does not make the first several payments due after the mortgage loan has been sold to an investor. Certain of our private investors have agreed to waive EPD provisions for conventional conforming and federally insured single-family residential mortgage loans and certain jumbo loan products. However, we are subject to EPD provisions and prepayment protection provisions on non-conforming jumbo loan products and community reinvestment loans. Total non-conforming UPB sold subject to early prepayment default protection was \$54.2 million at March 31, 2014. Total originations of community reinvestment loans sold under the State of Florida housing program were minimal. As of March 31, 2014, we had 377 active repurchase requests. We have summarized the activity for the three months ended March 31, 2014 and 2013 below regarding repurchase requests received, requests successfully defended, and loans that we repurchased or for which we indemnified investors or made investors whole with the corresponding origination years:

Loan Repurchase Activity	Table 20	
	Three Months Ended March 31,	
(dollars in thousands)	2014	2013
Agency	44	50
Agency Aggregators / Non-GSE ⁽¹⁾	62	66
Repurchase requests received	106	116
Agency	37	24
Agency Aggregators / Non-GSE ⁽¹⁾	20	56
Requests successfully defended	57	80
Agency	4	8
Agency Aggregators / Non-GSE ⁽¹⁾	6	27
Loans repurchased, indemnified or made whole	10	35
Agency	\$226	\$727
Agency Aggregators / Non-GSE ⁽¹⁾	—	2,337
Net realized losses on loan repurchases	\$226	\$3,064
Years of origination of loans repurchased	2006-2012	2004-2012

(1) Includes a majority of agency deliverable products that were sold to large aggregators of agency product who securitized and sold the loans to the agencies.

Table of Contents

We have summarized repurchase statistics by vintage below:

Summary Statistics by Vintage	Table 21			
	2004-2005	2006-2009	2010-2014	Total
Losses to date (dollars in thousands)				
Total sold UPB	\$11,334,198	\$18,997,792	\$29,516,233	\$59,848,223
Request rate ⁽¹⁾	0.41	% 1.89	% 0.26	% 0.83
Requests received	212	1,671	340	2,223
Pending requests	29	304	40	373
Resolved requests	183	1,367	300	1,850
Repurchase rate	39	% 40	% 20	% 37
Loans repurchased	72	546	61	679
Average loan size	\$222	\$215	\$227	\$222
Loss severity	12	% 46	% 9	% 38
Losses realized	\$1,936	\$54,414	\$1,236	\$57,586
Losses realized (bps)	1.7	28.6	0.4	9.6

(1) Request rate is calculated as the number of requests received to date, compared to the total number of loans sold for the period.

The most common reasons for loan repurchases and make-whole payments relate to missing documentation, program violation, and claimed misrepresentations related to falsified employment documents and/or verifications, occupancy, credit and/or stated income. Additionally, in the same time period we received requests to repurchase or make whole loans because they did not meet the specified investor guidelines. Repurchase demands relating to early payment defaults, or EPDs, generally surface sooner, typically within six (6) months of selling the loan to an investor. Historically, we have sold loans servicing released, therefore the lack of servicing statistics and status of the loans sold is not known. As such, there is additional uncertainty surrounding the reserves for repurchase obligations for loans sold or securitized.

Along with the contingent obligation associated with representations and warranties noted above, the Company also has a noncontingent obligation to stand ready to perform over the term of the representations and warranties. A liability is established when the obligation is both probable and reasonably estimable and is recognized as a reduction on net gain on loan sales and securitizations. When calculating the reserve associated with this noncontingent obligation, we estimate the probable losses inherent in the population of all loans sold based on trends in repurchase requests and actual loss severities experienced.

Recently the Federal Housing Finance Agency (FHFA) announced that a new representations and warranties framework was to be implemented in order to provide lenders a higher degree of certainty and clarity around repurchase exposure, as well as, consistency around repurchase timelines and remedies. For conventional loans that are acquired by FNMA or FHLMC on a flow basis on or after January 1, 2013, the lender will be relieved of its obligation to remedy mortgage loans that are in breach of certain underwriting and eligibility representations and warranties if the borrower meets one of two payment history requirements and the other eligibility criteria described herein. To be eligible for the new representation and warranty framework, a mortgage loan must meet the following requirements: (A) the mortgage loan must have a January 1, 2013 or later acquisition date (whole loan purchases or mortgage loans delivered into MBS) and (B) the mortgage loan must meet one of the following payment history requirements: (1) the borrower was not 30 days delinquent during the 36 months following the acquisition date or (2) the borrower (i) had no more than two 30-day delinquencies and no 60-day or greater delinquencies, during the 36 months following the acquisition date; and (ii) was current as of the 60th month following the acquisition date. Added emphasis will be paid going forward to performing post-purchase reviews in order to support the new framework and identify data discrepancies and other defects at purchase as opposed to at default. This change in approach will have an impact on the calculated reserves for the 2013 book year and forward.

Edgar Filing: EverBank Financial Corp - Form 10-Q

The following is a rollforward of our reserves for repurchase losses for the three months ended March 31, 2014, December 31, 2013 and March 31, 2013:

Reserves for Repurchase Obligations for Loans Sold or Securitized	Table 22		
	Three Months Ended		
(dollars in thousands)	March 31, 2014	December 31, 2013	March 31, 2013
Balance, beginning of period	\$20,225	\$19,086	\$27,000
Provision for new sales/securitizations	429	635	1,266
Provision (release of provision) for changes in estimate of existing reserves	4,000	1,563	(336)
Net realized losses on repurchases	(226)	(1,059)	(3,064)
Balance, end of period	\$24,428	\$20,225	\$24,866

The liability for repurchase losses was \$24.4 million as of March 31, 2014, compared to \$20.2 million and \$24.9 million as of December 31, 2013 and March 31, 2013, respectively. The increase in the liability since December 31, 2013 is primarily due to the increased number of repurchase requests received during the current quarter from agency aggregators and non-GSEs and an increase in the reserve for active repurchase requests due to increased information and clarity into the repurchase loan pipeline including the probability of repurchase and

Table of Contents

underlying collateral values. The following table provides a breakout of the repurchase reserve into its major components for the three months ended March 31, 2014 and December 31, 2013.

Analysis of Reserves for Repurchase Obligations for Loans Sold or Securitized	Table 23	
	Three Months Ended	
(dollars in thousands)	March 31, 2014	December 31, 2013
Reserve for active (pending) repurchase requests	\$ 17,934	\$ 12,440
Remaining repurchase reserve	6,494	7,785
Total repurchase reserve	\$ 24,428	\$ 20,225

As seen in the pending pipeline analysis below, the majority of active repurchase requests are for loans sold or securitized prior to 2010. We believe repurchase requests for these vintages will ease going forward as the FHFA announced in 2013, its goal for FNMA to complete its demands for remedies for breaches of representations and warranties related to pre-conservatorship loan activity by the end of 2013. We have seen an easing of repurchase requests related to most of our counterparties as a result of FNMA's progress.

Pending Pipeline Analysis for Repurchase Obligations for Loans Sold or Securitized	Table 24			
	(dollars in thousands)			
	2002 - 2003	2004 - 2009	2010 - 2014	Total

Pending Pipeline at March 31, 2014				
Active repurchase requests	4	333	40	377
UPB of active repurchase (pending) requests	\$ 541	\$ 80,803	\$ 9,866	\$ 91,210
Pending Pipeline at December 31, 2013				
Active repurchase requests	5	301	34	340
UPB of active repurchase (pending) requests	\$ 707	\$ 73,005	\$ 7,995	\$ 81,707

We performed a sensitivity analysis on our remaining repurchase reserve by varying the foreclosure rate, repurchase rate, frequency and severity assumptions independently for each loan sale vintage year. The pending pipeline was held constant for the sensitivity analysis as this portion of the reserve is based on previously received repurchase requests from counterparties with a severity based on the actual repurchase request received from the counterparty. By increasing these assumptions by 10% and 20%, the reserve balance as of March 31, 2014 would have increased from \$24.4 million to \$26.3 million and \$29.6 million which is an increase of 8% and 21% from the baseline. Based upon qualitative and quantitative factors, including the number of pending repurchase requests, rescission rates and trends in loss severities, we may make adjustments to the base reserve balance to incorporate recent, known trends.

Loan Servicing

When we service residential mortgage loans where FNMA or FHLMC is the owner of the underlying mortgage loan asset, we are subject to potential repurchase risk for: (1) breaches of loan level representations and warranties even though we may not have originated the mortgage loan; and (2) failure to service such loans in accordance with the applicable GSE servicing guide. If a loan purchased or securitized by FNMA or FHLMC is in breach of an origination representation or warranty, such GSE may look to the loan servicer for repurchase. If we are obligated to repurchase a loan from either FNMA or FHLMC, we seek indemnification from the counterparty that sold us the MSR if the counterparty is a third party, which presents potential counterparty risk if such party is unable or unwilling to satisfy its indemnification obligations.

Total acquired UPB for counterparties unable or unwilling to satisfy their indemnification obligations subject to repurchase risk was \$6.3 billion at March 31, 2014. At March 31, 2014, we were actively servicing \$1.2 billion of remaining UPB. During 2014, no new counterparties were identified that were unwilling or unable to satisfy their indemnification obligations.

The following is a rollforward of our reserves for servicing repurchase losses related to these counterparties for the three months ended March 31, 2014, December 31, 2013 and March 31, 2013:

Reserves for Repurchase Obligations for Loans Serviced	Table 25	
	Three Months Ended	

(dollars in thousands)

Edgar Filing: EverBank Financial Corp - Form 10-Q

	March 31, 2014	December 31, 2013	March 31, 2013
Balance, beginning of period	\$23,668	\$22,733	\$26,026
Provision (release of provision) for changes in estimate of existing reserves	(5,037) 3,580	(401
Net realized losses on repurchases ⁽¹⁾	(7,835) (2,645) (2,026
Balance, end of period	\$10,796	\$23,668	\$23,599

(1) We have restated realized losses and the provision for the quarter ended March 31, 2013 due to an overstatement in the amount of losses realized.

The liability for repurchase losses was \$10.8 million as of March 31, 2014 compared to \$23.7 million and \$23.6 million as of December 31, 2013 and March 31, 2013, respectively. The decrease in the liability since December 31, 2013 is primarily due to the run-off of losses for active repurchase requests that were estimated in the prior periods, changes in estimates of existing reserves, and a decrease in the number of repurchase requests received. Net realized losses increased by \$5.2 million for the three months ended March 31, 2014 compared to the three months ended December 31, 2013. Along with the increased losses, the Company received just 13 repurchase requests in the three months ended March 31, 2014 compared to 294 received during the three months ended December 31, 2013, while also settling 199 repurchase

Table of Contents

requests through make-whole payments, loan repurchases and rescinded requests during the three months ended March 31, 2014, compared to 142 settlements for the three months ended December 31, 2013.

Analysis of Reserves for Repurchase Obligations for Loans Serviced	Table 26	
	Three Months Ended	
(dollars in thousands)	March 31, 2014	December 31, 2013
Reserve for active (pending) repurchase requests	\$5,660	\$10,338
Remaining repurchase reserve	5,136	13,330
Total Repurchase Reserve	\$10,796	\$23,668
Pending Pipeline Analysis of Reserves for Repurchase Obligations for Loans Serviced	Table 27	
	Three Months Ended	
(dollars in thousands)	March 31, 2014	December 31, 2013
UPB of pending pipeline	\$29,487	\$57,988
Number of new repurchase requests received in quarter	13	294
Number of repurchase requests settled in quarter	199	142
Active repurchase requests at period end	175	361

The reduction in repurchase requests along with the increase in request settlements led to an overall reduction of \$28.5 million of UPB within the pending pipeline. As can be seen in the analysis above, the reduction of UPB within the pending pipeline led to a decrease of \$4.7 million in repurchase liability for active repurchase requests. The remaining repurchase reserve was reduced by the previously mentioned increase in net realized losses and the FHFAs announcement that FNMA was to complete its demands for remedies for breaches of representations and warranties related to pre-conservatorship loan activity, which led to a decrease of \$8.2 million in the remaining repurchase liability.

We performed a sensitivity analysis on our loan servicing repurchase reserve by varying the frequency and severity assumptions. By increasing the frequency and severity 20%, the reserve balance as of March 31, 2014 would have increased by 30% from the baseline. Conversely, by decreasing the frequency and the severity by 20%, the reserve balance as of March 31, 2014 would have decreased by 42%. Based upon qualitative and quantitative factors, including the number of pending repurchase requests, rescission rates and trends in loss severities, management may make adjustments to the base reserve balance to incorporate recent, observable trends.

The following is a sensitivity analysis as of March 31, 2014 of our reserve related to our estimated servicing repurchase losses based on ASC Topic 460, Guarantees:

Sensitivity of Servicing Repurchase Losses	Table 28				
	Frequency and Severity				
(dollars in thousands)	Up 20%	Up 10%	Base	Down 10%	Down 20%
Reserve for servicing repurchase losses	\$13,982	\$11,749	\$10,796	\$7,865	\$6,214

Loans in Foreclosure

Losses can arise from certain government agency agreements which limit the agency's repayment guarantees on foreclosed loans, resulting in certain minimal foreclosure costs being borne by servicers. In particular, government insured loans serviced under GNMA guidelines require servicers to fund any foreclosure claims not otherwise covered by insurance claim funds of the U.S. Department of Housing and Urban Development and/or the U.S. Department of Veterans Affairs.

Other than foreclosure-related costs associated with servicing government insured loans, we have not entered into any servicing agreements that require us as servicer to cover foreclosure-related costs.

Funding Sources

Deposits obtained from clients are our primary source of funds for use in lending, acquisitions and other business purposes. We generate deposit client relationships through our consumer direct, financial center and financial intermediary distribution channels. The consumer direct channel includes: Internet, email, telephone and mobile

device access to product and customer support offerings. Our differentiated products, integrated online financial portal and value-added account features deepen our interactions and relationships with our clients resulting in high retention rates. Other funding sources include short-term and long-term borrowings and shareholders' equity. FHLB borrowings have become an important funding source as we have grown.

Table of Contents

Deposits

The following table shows the distribution of our deposits by type of deposit at the dates indicated:

Deposits	Table 29	
(dollars in thousands)	March 31, 2014	December 31, 2013
Noninterest-bearing demand	\$ 1,054,796	\$ 1,076,631
Interest-bearing demand	2,961,831	3,006,401
Market-based money market accounts	413,017	413,137
Savings and money market accounts, excluding market-based	5,023,585	5,110,992
Market-based time	583,740	597,858
Time, excluding market-based	3,251,442	3,056,321
Total deposits	\$ 13,288,411	\$ 13,261,340

Our major source of funds and liquidity is our deposit base, which provides funding for our investment securities, loan and lease portfolios. We carefully manage our interest paid on deposits to control the level of interest expense we incur. The mix and type of interest-bearing and noninterest-bearing deposits in our deposit base changes due to our funding needs, marketing activities and market conditions.

Total deposits increased by \$27.1 million to \$13.3 billion at March 31, 2014 from \$13.3 billion at December 31, 2013. During the first three months of 2014, noninterest-bearing demand deposits decreased by \$21.8 million, to \$1.1 billion, primarily due to a decrease in business accounts. Interest-bearing deposits increased by \$48.9 million to \$12.2 billion at March 31, 2014 from \$12.2 billion at December 31, 2013. This increase in interest-bearing deposits was primarily due to growth in time deposits, partially offset by decreases in savings and money market accounts and interest-bearing demand accounts.

As a result of the May 2014 transfer of mortgage servicing rights to GTS discussed at Note 7 in our condensed consolidated financial statements, we may experience some decrease in noninterest-bearing demand deposits for the escrow balances related to these serviced mortgage loans.

FHLB Borrowings

In addition to deposits, we use borrowings from the FHLB as a source of funds to meet the daily liquidity needs of our clients and fund growth in earning assets. Our FHLB borrowings remained flat at \$2.4 billion at March 31, 2014 and \$2.4 billion at December 31, 2013.

The table below summarizes the average outstanding balance of our FHLB advances, the weighted average interest rate, and the maximum amount of borrowings in each category outstanding at any month end during the three months ended March 31, 2014 and 2013, respectively.

FHLB Borrowings	Table 30	
(dollars in thousands)	Three Months Ended	
	March 31, 2014	2013
Fixed-rate advances:		
Average daily balance	\$ 1,958,449	\$ 2,453,336
Weighted-average interest rate	1.90 %	2.00 %
Maximum month-end amount	\$ 2,353,000	\$ 2,489,700
Convertible advances:		
Average daily balance	\$ —	\$ 17,000
Weighted-average interest rate	— %	4.24 %
Maximum month-end amount	\$ —	\$ 17,000
Overnight advances:		
Average daily balance	\$ —	\$ 124,389
Weighted-average interest rate	— %	0.40 %
Maximum month-end amount	\$ —	\$ 200,500
Liquidity Management		

Liquidity refers to the measure of our ability to meet the cash flow requirements of depositors and borrowers, while at the same time meeting our operating, capital and strategic cash flow needs. We continuously monitor our liquidity position to ensure that assets and liabilities are managed in a manner that will meet all short-term and long-term cash requirements.

Funds invested in short-term marketable instruments, the continuous maturing of other interest-earning assets, cash flows from self-liquidating investments such as mortgage-backed securities, the possible sale of available for sale securities, and the ability to securitize certain types of loans provide sources of liquidity from an asset perspective. The liability base provides sources of liquidity through issuance of deposits and borrowed funds. In addition, equity capital raises provide us with sources of liquidity. To manage fluctuations in short-term funding needs, we utilize borrowings under lines of credit with other financial institutions, such as the Federal Home Loan Bank of Atlanta, securities sold under

Table of Contents

agreements to repurchase, federal fund lines of credit with correspondent banks, and, for contingent purposes, the Federal Reserve Bank Discount Window. We also have access to term advances with the FHLB, as well as brokered certificates of deposits, for longer term liquidity needs. We believe our sources of liquidity are sufficient to meet our cash flow needs for the foreseeable future.

We continued to maintain a strong liquidity position during the first quarter of 2014. Cash and cash equivalents were \$0.5 billion, available for sale investment securities were \$1.1 billion, and total deposits were \$13.3 billion as of March 31, 2014.

As of March 31, 2014, we had a \$5.2 billion line of credit with the FHLB, of which \$2.5 billion was utilized. Based on asset size, the maximum potential line available with the FHLB was \$6.2 billion at March 31, 2014, assuming eligible collateral to pledge. As of March 31, 2014, we pledged collateral with the FRB that provided \$50.4 million of borrowing capacity at the discount window but did not have any borrowings outstanding. The maximum potential borrowing at the FRB is limited only by eligible collateral.

At March 31, 2014, our capacity to obtain deposits under the Promontory Interfinancial Network, LLC's CDARS® One-Way BuySM Program was \$2.6 billion with a current deposit balance of \$156.5 million. Although our capacity under the program was \$2.6 billion at March 31, 2014, funding from this source is also limited by the overall network volume of CDARS One-Way Buy deposits available in the marketplace. Our treasury function views \$500 million as the practical maximum capacity for this type of deposit funding. As of March 31, 2014, our availability under federal funds commitments was \$65.0 million with no outstanding borrowings.

We continue to evaluate the ultimate impact of the implementation of the new capital and liquidity standards under the Basel III Capital Rules and the Dodd-Frank Act on the Company's liquidity management functions.

Capital Management

Management, including our Board of Directors, regularly reviews our capital position to help ensure it is appropriately positioned under various operating and market environments.

2014 Capital Actions

On April 25, 2014, the Company's Board of Directors declared a quarterly cash dividend of \$0.03 per common share, payable on May 22, 2014, to stockholders of record as of May 12, 2014. Also on April 25, 2014, the Company's Board of Directors declared a quarterly cash dividend of \$421.875, payable on July 7, 2014, for each share of 6.75% Series A Non-Cumulative Perpetual Preferred Stock held as of June 23, 2014.

On January 24, 2014, the Company's Board of Directors declared a quarterly cash dividend of \$0.03 per common share, which was paid on February 22, 2014, to stockholders of record as of February 11, 2014. Also on January 24, 2014, the Company's Board of Directors declared a quarterly cash dividend of \$421.875, payable on April 7, 2014, for each share of 6.75% Series A Non-Cumulative Perpetual Preferred Stock held as of March 21, 2014.

Capital Ratios

As a savings and loan holding company, we are not currently subject to specific statutory capital requirements.

However, we are required to serve as a source of strength for EverBank and must have the ability to provide financial assistance if EverBank experiences financial distress.

As a result of recent regulatory requirements pursuant to the Dodd-Frank Act and Basel III, EverBank will be subject to increasingly stringent regulatory capital requirements.

At March 31, 2014, EverBank exceeded all currently effective regulatory capital requirements and is considered to be "well-capitalized" with a Tier 1 leverage ratio of 9.1% and a total risk-based capital ratio of 14.3%. Management believes, at March 31, 2014, that we and EverBank would meet all capital adequacy requirements under the Basel III capital rules on a fully phased-in basis if such requirements were currently effective.

The table below shows regulatory capital and risk-weighted assets for EB at March 31, 2014 and December 31, 2013:

Regulatory Capital (bank level)	Table 31	
(dollars in thousands)	March 31, 2014	December 31, 2013
Shareholders' equity	\$1,686,414	\$1,662,164
Less: Goodwill and other intangibles	(50,700)	(51,072)
Disallowed servicing asset	(26,419)	(20,469)

Edgar Filing: EverBank Financial Corp - Form 10-Q

Disallowed deferred tax asset	(62,682) (63,749)
Add: Accumulated losses on securities and cash flow hedges	51,507	50,608	
Tier 1 Capital	1,598,120	1,577,482	
Add: Allowance for loan and lease losses	62,969	63,690	
Total regulatory capital	\$1,661,089	\$1,641,172	
Adjusted total assets	\$17,539,708	\$17,554,236	
Risk-weighted assets	11,597,320	11,467,411	

65

Table of Contents

The regulatory capital ratios for EB, along with the capital amounts and ratios for the minimum OCC requirement and the framework for prompt corrective action are as follows:

Regulatory Capital Ratios (bank level)	Actual		Table 32 For OCC Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Capital	Ratio	Minimum Amount	Ratio	Minimum Amount	Ratio
(dollars in thousands)						
March 31, 2014						
Tier 1 capital to adjusted tangible assets	\$1,598,120	9.1	% \$701,588	4.0	% \$876,985	5.0 %
Total capital to risk-weighted assets	1,661,089	14.3	927,786	8.0	1,159,732	10.0
Tier 1 capital to risk-weighted assets	1,598,120	13.8	N/A	N/A	695,839	6.0
December 31, 2013						
Tier 1 capital to adjusted tangible assets	\$1,577,482	9.0	% \$702,169	4.0	% \$877,712	5.0 %
Total capital to risk-weighted assets	1,641,172	14.3	917,393	8.0	1,146,741	10.0
Tier 1 capital to risk-weighted assets	1,577,482	13.8	N/A	N/A	688,045	6.0

Restrictions on Paying Dividends

Federal banking regulations impose limitations upon certain capital distributions by savings banks, such as certain cash dividends, payments to repurchase or otherwise acquire its shares, payments to shareholders of another institution in a cash-out merger and other distributions charged against capital. The OCC regulates all capital distributions by EB directly or indirectly to us, including dividend payments. EB may not pay dividends to us if, after paying those dividends, it would fail to meet the required minimum levels under risk-based capital guidelines and the minimum leverage and tangible capital ratio requirements, or in the event the OCC notifies EB that it is subject to heightened supervision. Under the Federal Deposit Insurance Act, an insured depository institution such as EB is prohibited from making capital distributions, including the payment of dividends, if, after making such distribution, the institution would become "undercapitalized." Payment of dividends by EB also may be restricted at any time at the discretion of the appropriate regulator if it deems the payment to constitute an "unsafe and unsound" banking practice.

Asset and Liability Management and Market Risk

Interest rate risk is our primary market risk and results from our business of investing in interest-earning assets with funds obtained from interest-bearing deposits and borrowings. Interest rate risk is defined as the risk of loss of future earnings or market value due to changes in interest rates. We are subject to this risk because:

- assets and liabilities may mature or re-price at different times or by different amounts;
- short-term and long-term market interest rates may change by different amounts;
- similar term rate indices may exhibit different re-pricing characteristics; and
- the life of assets and liabilities may shorten or lengthen as interest rates change.

Interest rates may also have a direct or indirect effect on loan demand, credit losses, mortgage origination volume, the fair value of MSRs and other items affecting earnings. Our objective is to measure the impact of interest rate changes on our capital and earnings and manage the balance sheet in order to decrease interest rate risk.

Interest rate risk is primarily managed by the Asset and Liability Committee (ALCO), which is composed of certain executive officers and other members of management, in accordance with policies approved by our Board of Directors. ALCO has employed policies that attempt to manage our interest-sensitive assets and liabilities, in order to control interest rate risk and avoid incurring unacceptable levels of credit or concentration risk. We manage our exposure to interest rates by structuring our balance sheet according to these policies in the ordinary course of business. In addition, the ALCO policy permits the use of various derivative instruments to manage interest rate risk or hedge specified assets and liabilities.

Consistent with industry practice, we primarily measure interest rate risk by utilizing the concept of "Economic Value of Equity" (EVE) which is defined as the present value of assets less the present value of liabilities. EVE scenario

analysis estimates the fair value of the balance sheet in alternative interest rate scenarios. The EVE does not consider management intervention and assumes the new rate environment is constant and the change is instantaneous. Further, as this framework evaluates risks to the current balance sheet only, changes to the volumes and pricing of new business opportunities that can be expected in the different interest rate outcomes are not incorporated in this analytical framework. For instance, analysis of our history suggests that declining interest rate levels are associated with higher loan production volumes at higher levels of profitability. While this business hedge historically offsets most, if not all, of the heightened amortization of our MSR portfolio and other identified risks associated with declining interest rate scenarios, these factors fall outside of the EVE framework. As a result, we further evaluate and consider the impact of other business factors in a separate net income sensitivity analysis.

If EVE rises in a different interest rate scenario, that would indicate incremental prospective earnings in that hypothetical rate scenario. A perfectly matched balance sheet would result in no change in the EVE, no matter what the rate scenario. The table below shows the estimated impact on EVE of increases in interest rates of 1%, 2% and 3% and decreases in interest rates of 1%, as of March 31, 2014 and December 31, 2013.

Table of Contents

Interest Rate Sensitivity (dollars in thousands)	Table 33 March 31, 2014		December 31, 2013	
	Net Change in EVE	% Change of EVE	Net Change in EVE	% Change of EVE
Up 300 basis points	\$ (33,521)	(1.5)%	\$ (42,848)	(2.0)%
Up 200 basis points	29,089	1.3 %	32,737	1.6 %
Up 100 basis points	41,788	1.9 %	52,188	2.5 %
Down 100 basis points	(140,426)	(6.4)%	(145,849)	(7.0)%

The projected exposure of EVE to changes in interest rates at March 31, 2014 was in compliance with established policy guidelines. Exposure amounts depend on numerous assumptions. Due to historically low interest rates, the table above may not predict the full effect of decreasing interest rates upon our net interest income that would occur under a more traditional, higher interest rate environment because short-term interest rates are near zero percent and facts underlying certain of our modeling assumptions, such as the fact that deposit and loan rates cannot fall below zero percent, distort the model's results.

Volcker Rule

The Dodd-Frank Act added a new Section 13 to the Bank Holding Company Act, which is commonly referred to as the Volcker Rule. Generally, the Volcker Rule prohibits a "banking entity" from engaging in "proprietary trading" or from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with hedge funds, private equity funds and other "covered funds." Through a series of extensions, the Federal Reserve Board has generally extended the deadline for conforming activities and investments under the Rule to July 21, 2015. The Volcker Rule provides a significantly broader definition to proprietary trading, and captures many activities that would not traditionally have been referred to as proprietary trading, including risk mitigating hedging, market-making activities. This will require the Company to undertake a careful review to ensure that it has identified all potential Volcker Rule proprietary trading within the organization. Like the prohibition on proprietary trading, the restrictions on "covered funds" – the term for any fund covered by the Volcker Rule – apply to many entities and investment activities that would not traditionally have been referred to as hedge funds or private equity funds, including the acquisition of an "ownership interest" in certain trust preferred collateralized debt obligations, collateralized loan obligations and Re-REMICs that are considered to be "covered funds" under the Rule. Based on our evaluation of the impact of these changes, investments with a carrying value of \$241.2 million at March 31, 2014, have been identified that may be required to be divested. The Volcker Rule also requires the Company to develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor the Company's compliance with the Rule. We continue to evaluate the Volcker Rule and the final rules adopted thereunder.

Use of Derivatives to Manage Risk**Interest Rate Risk**

An integral component of our interest rate risk management strategy is our use of derivative instruments to minimize significant fluctuations in earnings caused by changes in interest rates. As part of our overall interest rate risk management strategy, we enter into contracts or derivatives to hedge interest rate lock commitments, loans held for sale, trust preferred debt, and forecasted issuances of debt. These derivatives include forward sales commitments (FSA), optional forward sales commitments (OFSA), forward interest rate swaps and interest rate swap futures. We enter into these derivative contracts with major financial institutions or purchase them from active exchanges where applicable. Credit risk arises from the inability of these counterparties to meet the terms of the contracts. We minimize this risk through the execution of collateral arrangements, master netting arrangements, exposure limits and monitoring procedures.

Commodity Market Risk

Commodity risk represents exposures to deposit instruments linked to various commodity and metals markets. We offer market-based deposit products consisting of MarketSafe® products, which provide investment capabilities for clients seeking portfolio diversification with respect to commodities and other indices, which are typically unavailable from our banking competitors. MarketSafe® deposits rate of return is based on the movement of a particular market

index. In order to manage the risk that may occur from fluctuations in the related markets, we enter into offsetting options with exactly the same terms as the commodity linked MarketSafe[®] deposits, which provide an economic hedge.

Foreign Exchange Risk

Foreign exchange risk represents exposures to changes in the values of deposits and future cash flows denominated in currencies other than the U.S. dollar. We offer WorldCurrency[®] deposit products which provide investment capabilities to clients seeking portfolio diversification with respect to foreign currencies. The products include WorldCurrency[®] single-currency certificates of deposit and money market accounts denominated in the world's major currencies. In addition, we offer foreign currency linked MarketSafe[®] deposits which provide returns based upon foreign currency linked indices. Exposure to loss on these products will increase or decrease over their respective lives as currency exchange rates fluctuate. In addition, we offer foreign exchange contracts to small and medium size businesses with international payment needs. Foreign exchange contract products, which include spot and simple forward contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed-upon price on an agreed-upon settlement date. Exposure to loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate. These types of products expose us to a degree of risk. To manage the risk that may occur from fluctuations in world currency markets, we enter into offsetting short-term forward foreign exchange contracts with terms that match the amount and the maturity date of our single-currency certificates of deposit, money market deposit instruments, or foreign exchange contracts. In addition, we enter into offsetting options with exactly the same terms as the foreign currency linked MarketSafe[®] deposits, which provide an economic hedge. For more information, including the notional amount and fair value, of these derivatives, see Note 11 in our condensed consolidated financial statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See the “Asset and Liability Management and Market Risk” section of Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

The Company’s management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company’s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of March 31, 2014. The Company’s disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to the Company’s management, including the Company’s Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of March 31, 2014.

Changes in Internal Control over Financial Reporting

There were no changes in the Company’s internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2014 that have materially affected or are reasonably likely to materially affect the Company’s internal control over financial reporting.

Table of Contents

Part II. Other Information

Item 1. Legal Proceedings

We are subject to various claims and legal actions in the ordinary course of our business. Some of these matters include employee-related matters and inquiries and investigations by governmental agencies regarding our employment practices. We are not presently party to any legal proceedings the resolution of which we believe would have a material adverse effect on our business, operating results, financial condition or cash flows.

In addition to the legal proceedings previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 28, 2014, we are currently subject to the following legal proceedings:

Mortgage Electronic Registration Services Related Litigation

MERS, EverHome Mortgage Company, EverBank and other lenders and servicers that have held mortgages through MERS are parties to the following material and class action lawsuits where the plaintiffs allege improper mortgage assignment and, in some instances, the failure to pay recording fees in violation of state recording statutes: (1) State of Ohio, ex. rel. David P. Joyce, Prosecuting Attorney General of Geauga County, Ohio v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc. et al. filed in October 2011 in the Court of Common Pleas for Geauga County, Ohio, and later removed to federal court and subsequently remanded to state court; (2) State of Iowa, by and through Darren J. Raymond, Plymouth County Attorney v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc., et al., filed in March 2012 in the Iowa District Court for Plymouth County, later removed to federal court and now on appeal to the United States Court of Appeals for the Eighth Circuit; (3) Boyd County, ex. rel. Phillip Hedrick, County Attorney of Boyd County, Kentucky, et al. v. MERSCORP, Inc., Mortgage Electronic Registration Services, Inc., et al. filed in April 2012 in the United States District Court for the Eastern District of Kentucky; (4) St. Clair County, Illinois v. Mortgage Electronic Registration Systems, Inc., MERSCORP, Inc. et al., filed in May 2012 in the Circuit Court of the Twentieth Judicial Circuit, St. Clair County, Illinois; (5) County of Multnomah v. Mortgage Electronic Registration Systems, Inc., et al., filed in December 2012 in an Oregon state court, later removed to the U.S. District Court for the District of Oregon and subsequently remanded back to the state court; (6) Delaware County, PA, Recorder of Deeds v. MERSCORP, Inc., Mortgage Electronic Registration Systems, Inc., et al., filed in November 2013 in the Court of Common Pleas of Delaware County, Pennsylvania, and later removed to the United States District Court for the Eastern District of Pennsylvania; (7) County of Ramsey and County of Hennepin, Minnesota v. MERSCORP Holdings, Inc., et al. filed in February 2013 in the Second Judicial District Court, subsequently removed to the U.S. District Court, District of Minnesota and now on appeal to the United States Court of Appeals for the Eighth Circuit; and (8) Jackson County, Missouri v. MERSCORP, Inc., Mortgage Electronic Registrations Systems, Inc., et al., filed in April 2012 in the Circuit Court of Jackson County, Missouri and later removed to federal court where the court granted the defendants' motion to dismiss, and now stayed due to the bankruptcy filing of defendant GMAC. In these material and class action lawsuits, the plaintiffs in each case generally seek judgment from the courts compelling the defendants to record all assignments, restitution, compensatory and punitive damages, and appropriate attorneys' fees and costs. We believe the plaintiff's claims are without merit and intend to contest all such claims vigorously.

Item 1A. Risk Factors

Our operations and financial results are subject to various risks and uncertainties, which could adversely affect our business, financial condition, results of operations, cash flows, and the trading price of our common stock. You should carefully consider the risks and uncertainties described below and in our prior filings. Additional risks not presently known to us or that we currently believe are immaterial may also significantly impair our business, financial condition and results of operation. There have not been any material changes from the discussion of risk factors affecting the Company previously disclosed in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on February 28, 2014. The Risk Factors set forth the material factors that could affect our financial condition and operations. Readers should not consider any descriptions of such factors to be a complete set of all potential risks that could affect the Company.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
