**Salisbury Bancorp, Inc. and Subsidiary**

**NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 1 - BASIS OF PRESENTATION**

The interim (unaudited) consolidated financial statements of Salisbury Bancorp, Inc. ("Salisbury") include those of Salisbury and its wholly owned subsidiary, Salisbury Bank and Trust Company (the "Bank"). In the opinion of management, the interim unaudited consolidated financial statements include all adjustments (consisting of normal recurring adjustments) necessary to present fairly the financial position of Salisbury and the statements of income, comprehensive income, shareholders' equity and cash flows for the interim periods presented.

The financial statements have been prepared in accordance with generally accepted accounting principles. In preparing the financial statements, management is required to make extensive use of estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet, and revenues and expenses for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowance for loan losses and valuation of real estate, management obtains independent appraisals for significant properties.

Certain financial information, which is normally included in financial statements prepared in accordance with generally accepted accounting principles, but which is not required for interim reporting purposes, has been condensed or omitted. Operating results for the interim period ended March 31, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. The accompanying condensed financial statements should be read in conjunction with the financial statements and notes thereto included in Salisbury's 2013 Annual Report on Form 10-K for the period ended December 31, 2013.

The allowance for loan losses is a significant accounting policy and is presented in the Notes to Consolidated Financial Statements and in Management's Discussion and Analysis, which provides information on how significant assets are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan losses to be the accounting area that requires the most subjective judgments, and as such could be most subject to revision as new information becomes available.

**Impact of New Accounting Pronouncements Issued**

In July 2013, the FASB issued ASU 2013-11, "Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." The amendments in this ASU provide guidance for the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments in this ASU are expected to reduce diversity in practice by providing guidance on the presentation of unrecognized tax benefits and will better reflect the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. The amendments apply to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date and are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The adoption

of this guidance did not have an impact on the Company's results of operations or financial position.

In January 2014, the FASB issued ASU 2014-01, "Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects." The amendments in this ASU apply to all reporting entities that invest in qualified affordable housing projects through limited liability entities that are flow-through entities for tax purposes as follows:

1. For reporting entities that meet the conditions for and that elect to use the proportional amortization method to account for investments in qualified affordable housing projects, all amendments in this ASU apply.
2. For reporting entities that do not meet the conditions for or that do not elect the proportional amortization method, only the amendments in this ASU that are related to disclosures apply.

The amendments in this ASU permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognize the net investment performance in the income statement as a component of income tax expense (benefit). For those investments in qualified affordable housing projects not accounted for using the proportional amortization method, the investment should be accounted for as an equity method investment or a cost method investment in accordance with Subtopic 970-323. The amendments in this ASU should be applied retrospectively to all periods presented. A reporting entity that uses the effective yield method to account for its investments in qualified affordable housing projects before the date of adoption may continue to apply the effective yield method for those preexisting investments. The amendments in this ASU are effective for public business entities for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. Early adoption is permitted. The Company does not expect that the adoption of this ASU will have an impact on the Company's consolidated financial statements.

In January 2014, the FASB issued ASU 2014-04, "Receivables-Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." The objective of the amendments in this ASU is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments in this ASU clarify that an insubstance repossession or foreclosure occurs; and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this ASU are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." This ASU changes the criteria for reporting discontinued operations and modifies related disclosure requirements. The new guidance is effective on a prospective basis for fiscal years beginning on or after December 15, 2014, and interim periods within those years. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

Total temporarily and other-than-temporarily impaired securities	\$13,947	\$416	\$4,998	\$550	\$18,945	\$966

Salisbury evaluates securities for OTTI where the fair value of a security is less than its amortized cost basis at the balance sheet date. As part of this process, Salisbury considers whether it has the intent to sell each debt security and whether it is more likely than not that it will be required to sell the security before its anticipated recovery. If either of these conditions is met, Salisbury recognizes an OTTI charge to earnings equal to the entire difference between the security's amortized cost basis and its fair value at the balance sheet date. For securities that meet neither of these conditions, an analysis is performed to determine if any of these securities are at risk for OTTI.

The following summarizes, by security type, the basis for evaluating if the applicable securities were OTTI at March 31, 2014.

U.S Government Agency notes, U.S. Government Agency mortgage-backed securities and U.S. Government Agency CMOs: The contractual cash flows are derived from U.S. government agencies and U.S. government-sponsored enterprises. Changes in fair values are a function of changes in investment spreads and interest rate movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities. Furthermore, Salisbury evaluates these securities for strategic fit and may reduce its position in these securities, although it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis, which may be maturity. Therefore, management does not consider these securities to be OTTI at March 31, 2014.

Municipal bonds: Contractual cash flows are performing as expected. Salisbury purchased substantially all of these securities during 2006 to 2008 as bank qualified, insured, AAA rated general obligation or revenue bonds. Salisbury's portfolio is mostly comprised of tax-exempt general obligation bonds or public-purpose revenue bonds for schools, municipal offices, sewer infrastructure and fire houses, for small towns and municipalities across the United States. In the wake of the financial crisis, most monoline bond insurers had their ratings downgraded or withdrawn because of excessive exposure to insurance for collateralized debt obligations. Where appropriate Salisbury performs credit underwriting reviews of issuers, including some that have had their ratings withdrawn and are insured by insurers that have had their ratings withdrawn, to assess default risk. For all completed reviews, pass credit risk ratings have been assigned. Management expects to recover the entire amortized cost basis of these securities. It is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis, which may be maturity. Management does not consider these securities to be OTTI at March 31, 2014.

Non-agency CMOs: Salisbury performed a detailed cash flow analysis of its non-agency CMOs at March 31, 2014, to assess whether any of the securities were OTTI. Salisbury uses first party provided cash flow forecasts for each security based on a variety of market driven assumptions and securitization terms, including prepayment speed, default or delinquency rate, and default severity for losses including interest, legal fees, property repairs, expenses and realtor fees, that, together with the loan amount are subtracted from collateral sales proceeds to determine severity. In 2009, Salisbury determined that five non-agency CMO securities reflected OTTI and recognized losses for deterioration in credit quality of \$1,128,000. Salisbury judged the four remaining securities not to have additional OTTI and all other CMO securities not to be OTTI as of March 31, 2014. It is possible that future loss assumptions could change necessitating Salisbury to recognize future OTTI for further deterioration in credit quality. Salisbury evaluates these securities for strategic fit and depending upon such factor could reduce its position in these securities, although it has no present intention to do so, and it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis.

The following table presents activity related to credit losses recognized into earnings on the non-agency CMOs held by Salisbury for which a portion of an OTTI charge was recognized in accumulated other comprehensive income:

Three months ended March 31 (in thousands)	2014	2013
Balance, beginning of period	\$1,128	\$1,128
Credit component on debt securities in which OTTI was not previously recognized	—	—
Balance, end of period	\$1,128	\$1,128

Federal Home Loan Bank of Boston ("FHLBB"): The FHLBB is a cooperative that provides services, including funding in the form of advances, to its member banking institutions. As a requirement of membership, the Bank must own a minimum amount of FHLBB stock, calculated periodically based primarily on its level of borrowings from the FHLBB. No market exists for shares of the FHLBB and therefore, they are carried at par value. FHLBB stock may be redeemed at par value five years following termination of FHLBB membership, subject to limitations which may be imposed by the FHLBB or its regulator, the Federal Housing Finance Board, to maintain capital adequacy of the FHLBB. While the Bank currently has no intentions to terminate its FHLBB membership, the ability to redeem its investment in FHLBB stock would be subject to the conditions imposed by the FHLBB. In 2008, the FHLBB announced to its members that it is focusing on preserving capital in response to ongoing market volatility including the extension of a moratorium on excess stock repurchases and in 2009 announced the suspension of its quarterly dividends. On February 22, 2011, the FHLBB declared a modest cash dividend payable to its members on March 2, 2011. The FHLBB continued to declare modest cash dividends through 2013. Based on the capital adequacy and the liquidity position of the FHLBB, management believes there is no impairment related to the carrying amount of the Bank's FHLBB stock as of March 31, 2014. Further deterioration of the FHLBB's capital levels may require the Bank to deem its restricted investment in FHLBB stock to be OTTI. If evidence of impairment exists in the future, the FHLBB stock would reflect fair value using either observable or unobservable inputs. The Bank will continue to monitor its investment in FHLBB stock.

## NOTE 3 - LOANS

The composition of loans receivable and loans held-for-sale is as follows:

(in thousands)	March 31, 2014	December 31, 2013
Residential 1-4 family	\$236,608	\$231,113
Residential 5+ multifamily	4,804	4,848

Loans receivable, net	\$446,518	\$438,178
Loans held-for-sale		
Residential 1-4 family	\$120	\$173

**Concentrations of Credit Risk**

Salisbury's loans consist primarily of residential and commercial real estate loans located principally in northwestern Connecticut and nearby New York and Massachusetts towns, which constitute Salisbury's service area. Salisbury offers a broad range of loan and credit facilities to borrowers in its service area, including residential mortgage loans, commercial real estate loans, construction loans, working capital loans, equipment loans, and a variety of consumer loans, including home equity lines of credit, and installment and collateral loans. All residential and commercial mortgage loans are collateralized by first or second mortgages on real estate. The ability of single family residential and consumer borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity within the market area and real estate values. The ability of commercial borrowers to honor their repayment commitments is dependent on the general economy as well as the health of the real estate economic sector in Salisbury's market area.

**Loan Credit Quality**

The composition of loans receivable by risk rating grade is as follows:

(in thousands)	Pass	Special mention	Substandard	Doubtful	Loss	Total

**NOTE 5 - PLEDGED ASSETS**

(in thousands)	March 31, December	
	2014	31, 2013
Securities available-for-sale (at fair value)	\$56,769	\$57,623
Loans receivable	132,301	130,574
Total pledged assets	\$189,070	\$188,197

At March 31, 2014, securities were pledged as follows: \$46.3 million to secure public deposits, \$10.4 million to secure repurchase agreements and \$0.1 million to secure FHLBB advances. Loans receivable were pledged to secure FHLBB advances and credit facilities.

## NOTE 6 – EARNINGS PER SHARE

The Company defines unvested share-based payment awards that contain nonforfeitable rights to dividends as participating securities that are included in computing Earnings Per Share (“EPS”) using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each share of common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends. Earnings per common share are calculated by dividing earnings allocated to common stockholders by the weighted-average number of common shares outstanding during the period. Basic EPS excludes dilution and is computed by dividing income allocated to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity.

The following table sets forth the computation of earnings per share (basic and diluted) for the periods indicated:

Periods ended March 31, (in thousands)	2014	2013
Net income	\$551	\$940
Less: Preferred stock dividends declared	(46 )	(40 )
Net income available to common shareholders	505	900
Less: Undistributed earnings allocated to participating securities	(6 )	(10 )
Net income allocated to common stock	\$499	\$890
Common shares issued	1,712	1,709
Less: Unvested restricted stock awards	(21 )	(20 )
Common shares outstanding used to calculate basic earnings per common share	1,691	1,689
Add: Dilutive effect of unvested restricted stock awards	—	—
Common shares outstanding used to calculate diluted earnings per common share	1,691	1,689
Earnings per common share (basic and diluted)	\$0.29	0.53

## NOTE 7 – SHAREHOLDERS’ EQUITY

**Capital Requirements**

Salisbury and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional and discretionary actions by the regulators that, if undertaken, could have a direct material effect on Salisbury and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, Salisbury and the Bank must meet specific guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Salisbury and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require Salisbury and the Bank to maintain minimum amounts and ratios (set forth in the table below) of Tier 1 capital (as defined) to average assets (as defined) and total and Tier 1 capital (as defined) to risk-weighted assets (as defined). Management believes, as of March 31, 2014, that Salisbury and the Bank meet all of their capital adequacy requirements.

In December 2010, the Basel Committee, a group of bank regulatory supervisors from around the world, released its final framework for strengthening international capital and liquidity regulation, now officially identified by the Basel Committee as "Basel III." Basel III, when fully implemented by the U.S. bank regulatory agencies and fully phased-in, will require bank holding companies and their bank subsidiaries to maintain substantially more capital, with a greater emphasis on common equity.

In July 2013, the Federal Reserve Board, Office of the Comptroller of the Currency and Federal Deposit Insurance Corporation approved final rules to implement the Basel III capital framework. The rules will be effective on January 1, 2015 and phased-in over a multiple year period through 2019. The new capital rules call for higher quality capital with higher minimum capital level requirements. We are in the process of assessing the impact from these new regulatory requirements, and while we cannot be certain of the impact, we believe that we will exceed the requirements of adequately capitalized plus the buffer, once they become effective.

The Bank was classified, as of its most recent notification, as "well capitalized." The Bank's actual regulatory capital position and minimum capital requirements as defined "To Be Well Capitalized Under Prompt Corrective Action Provisions" and "For Capital Adequacy Purposes" are as follows:

	Actual		For Capital Adequacy Purposes		To be Well Capitalized Under Prompt Corrective Action Provisions	
(dollars in thousands)	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2014						
Total Capital (to risk-weighted assets)						
Salisbury	\$66,808	16.42%	\$32,545	8.0%	n/a	—
Bank	56,573	13.80	32,802	8.0	\$41,002	10.0%
Tier 1 Capital (to risk-weighted assets)						
Salisbury	61,447	15.10	16,273	4.0	n/a	—
Bank	51,212	12.49	16,401	4.0	24,601	6.0
Tier 1 Capital (to average assets)						
Salisbury	61,447	10.65	23,070	4.0	n/a	—
Bank	51,212	8.88	23,059	4.0	28,824	5.0
December 31, 2013						
Total Capital (to risk-weighted assets)						
Salisbury	\$66,404	16.46%	\$32,280	8.0%	n/a	—
Bank	56,425	13.87	32,539	8.0	\$40,674	10.0%
Tier 1 Capital (to risk-weighted assets)						
Salisbury	61,340	15.20	16,140	4.0	n/a	—
Bank	51,361	12.63	16,270	4.0	24,405	6.0
Tier 1 Capital (to average assets)						
Salisbury	61,340	10.65	23,035	4.0	n/a	—
Bank	51,361	8.96	22,938	4.0	28,673	5.0

## **DIVIDENDS**

### **Cash Dividends to Common Shareholders**

Salisbury's ability to pay cash dividends is substantially dependent on the Bank's ability to pay cash dividends to Salisbury. There are certain restrictions on the payment of cash dividends and other payments by the Bank to Salisbury. Under Connecticut law, the Bank cannot declare a cash dividend except from net profits, defined as the remainder of all earnings from current operations. The total of all cash dividends declared by the Bank in any calendar year shall not, unless specifically approved by the Banking Commissioner, exceed the total of its net profits of that year combined with its retained net profits of the preceding two years.

FRB Supervisory Letter SR 09-4, February 24, 2009, revised March 27, 2009, notes that, as a general matter, the Board of Directors of a Bank Holding Company ("BHC") should inform the Federal Reserve and should eliminate, defer, or significantly reduce dividends if (1) net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (2) the prospective rate of earnings retention is not consistent with capital needs and overall current and prospective financial condition; or (3) the BHC will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. Moreover, a BHC should inform the Federal Reserve reasonably in advance of declaring or paying a dividend that exceeds earnings for the period (e.g., quarter) for which the dividend is being paid or that could result in a material adverse change to the BHC capital structure.

### **Preferred Stock**

In August 2011, Salisbury issued to the U.S. Secretary of the Treasury (the "Treasury") \$16,000,000 of its Series B Preferred Stock under the Small Business Lending Fund (the "SBLF") program. The SBLF program is a \$30 billion fund established under the Small Business Jobs Act of 2010 to encourage lending to small businesses by providing Tier 1 capital to qualified community banks with assets of less than \$10 billion. The Preferred Stock qualifies as Tier 1 capital for regulatory purposes and ranks senior to the Common Stock.

The Series B Preferred Stock pays noncumulative dividends. The dividend rate on the Series B Preferred Stock for the initial ten quarterly dividend periods, commencing with the period ended September 30, 2011 and ending with the period ended December 31, 2013, is determined each quarter based on the increase in the Bank's Qualified Small Business Lending over a baseline amount. The dividend rate for the quarterly period ended March 31, 2014 was 1.00%. For the eleventh quarterly dividend payment through four and one-half years after its issuance, the dividend rate on the Series B Preferred Stock will be fixed at the rate in effect at the end of the ninth quarterly dividend period and after four and one-half years from its issuance the dividend rate will be fixed at 9 percent per annum. The Series B Preferred Stock is non-voting, other than voting rights on matters that could adversely affect the Series B Preferred Stock. The Series B Preferred Stock is redeemable at any time at one hundred percent of the issue price plus any accrued and unpaid dividends.

**NOTE 8 – PENSION AND OTHER BENEFITS**

The components of net periodic cost for Salisbury's insured noncontributory defined benefit retirement plan were as follows:

Three months ended March 31, (in thousands)	2014	2013
Service cost	\$—	\$—
Interest cost on benefit obligation	67	66
Expected return on plan assets	(75 )	(67 )
Amortization of net loss	(4 )	—
Settlements and curtailments	—	—
Net periodic benefit cost	\$(12 )	\$(1 )

Salisbury's 401(k) Plan expense was \$164,000 and \$83,000, respectively, for the three month periods ended March 31, 2014 and 2013. Other post-retirement benefit obligation expense for endorsement split-dollar life insurance arrangements was \$13,000 and \$11,000 for the three month periods ended March 31, 2014 and 2013, respectively.

**Employee Stock Ownership Plan (ESOP)**

Salisbury offers an Employee Stock Ownership Plan (ESOP) to eligible employees. Under the Plan, Salisbury may make discretionary contributions to the Plan. Discretionary contributions vest in full upon six years and reflect the following schedule of qualified service:

20% after the second year, 20% per year thereafter, vesting at 100% after six full years of service.

**Other Retirement Plans**

A Non-Qualified Deferred Compensation Plan (the "Plan") was effective January 1, 2013. This Plan was adopted by the Bank for the benefit of certain key employees, ("Executive" or "Executives"), who have been selected and approved by the Bank to participate in this Plan and who have evidenced their participation by execution of a Non-Qualified Deferred Compensation Plan Participation Agreement ("Participation Agreement") in a form provided by the Bank. This Plan is intended to comply with Internal Revenue Code ("Code") Section 409A and any regulatory or other guidance issued under such Section.

In 2013, the Bank awarded six (6) Executives with a discretionary contribution to this account for a total of \$59,590. This was the first year for this benefit. Based on the Executive's date of retirement, the vesting schedule ranges from 10% per year to 50% per year.

**Grants of Restricted Stock and Options**

On February 8, 2013, Salisbury granted a total of 19,600 shares of restricted stock pursuant to its 2011 Long Term Incentive Plan, which was approved by shareholders at the 2011 Annual Meeting, to 22 employees, including 5,000 shares to one Named Executive Officer, Richard J. Cantele, Jr., President and Chief Executive Officer.

On January 3, 2014, Salisbury granted a total of 3,000 shares of restricted stock, pursuant to its 2011 Long Term Incentive Plan, to two (2) additional employees, including 2,000 shares to one Named Executive Officer, Donald E. White, Chief Financial Officer.

## NOTE 9 –ACCUMULATED OTHER COMPREHENSIVE INCOME

The components of accumulated other comprehensive income is as follows:

At March 31, (in thousands)	2014	2013
Unrealized gains on securities available-for-sale, net of tax	\$1,595	\$2,671
Unrecognized pension plan benefit (expense), net of tax	610	(469 )
Accumulated other comprehensive (loss) income, net	\$2,205	\$2,202

## NOTE 10 – FAIR VALUE OF ASSETS AND LIABILITIES

Salisbury uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, other assets are recorded at fair value on a nonrecurring basis, such as loans held for sale, collateral dependent impaired loans, property acquired through foreclosure or repossession and mortgage servicing rights. These nonrecurring fair value adjustments typically involve the application of lower-of-cost-or-market accounting or write-downs of individual assets.

ASC 820-10, “Fair Value Measurements and Disclosures,” provides a framework for measuring fair value under generally accepted accounting principles. This guidance permitted Salisbury the irrevocable option to elect fair value for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. Salisbury did not elect fair value treatment for any financial assets or liabilities upon adoption.

In accordance with ASC 820-10, Salisbury groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

GAAP specifies a hierarchy of valuation techniques based on whether the types of valuation information (“inputs”) are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Salisbury’s market assumptions. These two types of inputs have created the following fair value hierarchy.

Level 1. Quoted prices in active markets for identical assets. Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Level 1 also includes U.S. Treasury, other U.S. Government and agency mortgage-backed securities that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2. Significant other observable inputs. Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or comparable assets or liabilities.

Level 3. Significant unobservable inputs. Valuations for assets and liabilities that are derived from other methodologies, including option pricing models, discounted cash flow models and similar techniques, are not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets and liabilities.

A financial instrument’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Salisbury did not have any significant transfers of assets between levels 1 and 2 of the fair value hierarchy during the quarter ended March 31, 2014.

The following is a description of valuation methodologies for assets recorded at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Securities available-for-sale. Securities available-for-sale are recorded at fair value on a recurring basis. Level 1 securities include exchange-traded equity securities. Level 2 securities include debt securities with quoted prices, which are traded less frequently than exchange-traded instruments, whose value is determined using matrix pricing with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes obligations of the U.S. Treasury and U.S. government-sponsored enterprises, mortgage-backed securities, collateralized mortgage obligations, municipal bonds, SBA bonds, corporate bonds and certain preferred equities. Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used. Subsequent to inception, management only changes Level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalization and other transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows.

Collateral dependent loans that are deemed to be impaired are valued based upon the fair value of the underlying collateral less costs to sell. Such collateral primarily consists of real estate and, to a lesser extent, other business assets. Management may adjust appraised values to reflect estimated market value declines or apply other discounts to appraised values resulting from its knowledge of the property. Internal valuations are utilized to determine the fair value of other business assets. Collateral dependent impaired loans are categorized as Level 3.

Other real estate owned acquired through foreclosure or repossession is adjusted to fair value less costs to sell upon transfer out of loans. Subsequently, it is carried at the lower of carrying value or fair value less costs to sell. Fair value is generally based upon independent market prices or appraised values of the collateral. Management adjusts appraised values to reflect estimated market value declines or apply other discounts to appraised values for unobservable factors resulting from its knowledge of the property, and such property is categorized as Level 3.

Assets measured at fair value are as follows:

(in thousands)	Fair Value Measurements Using			Assets at fair value
	Level 1	Level 2	Level 3	
March 31, 2014				
Assets measured at fair value on a recurring basis				
U.S. Treasury notes	\$—	\$2,642	\$—	\$2,642

## Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations of Salisbury and its subsidiary should be read in conjunction with Salisbury's Annual Report on Form 10-K for the year ended December 31, 2013.

### **BUSINESS**

Salisbury, a Connecticut corporation, formed in 1998, is the bank holding company for the Bank, a Connecticut-chartered and FDIC insured commercial bank headquartered in Lakeville, Connecticut. Salisbury's principal business consists of the business of the Bank. The Bank, formed in 1848, is engaged in customary banking activities, including general deposit taking and lending activities to both retail and commercial markets, and trust and wealth advisory services. The Bank conducts its banking business from full-service offices in the towns of: Canaan, Lakeville, Salisbury and Sharon, Connecticut; South Egremont and Sheffield, Massachusetts; and, Dover Plains and Millerton, New York. The Bank conducts its trust and wealth advisory services from offices in Lakeville, Connecticut. The Bank opened a new branch in Great Barrington, Massachusetts on May 5, 2014. In addition, in January, 2014 the Bank signed an agreement to acquire a branch office and related deposits from another institution in Sharon, Connecticut and expects to consolidate its existing Sharon office with such new branch. Regulatory approvals for the transaction have been received and consummation of the transaction is expected to occur in June, 2014. On March 19, 2014, Salisbury announced the execution of a definitive merger agreement with Riverside Bank of Poughkeepsie, NY through which, following the satisfaction of normal closing conditions, including the receipt of regulatory and shareholder approvals, Riverside Bank will merge with and into the Bank.

### Critical Accounting Policies and Estimates

Salisbury's consolidated financial statements follow GAAP as applied to the banking industry in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event.

Salisbury's significant accounting policies are presented in Note 1 of Notes to Consolidated Financial Statements and, along with this Management's Discussion and Analysis, provide information on how significant assets are valued in the financial statements and how those values are determined. Management believes that the following accounting estimates are the most critical to aid in fully understanding and evaluating Salisbury's reported financial results, and they require management's most difficult, subjective or complex judgments, resulting from the need to make estimates about the effect of matters that are inherently uncertain.

Management evaluates goodwill and identifiable intangible assets for impairment annually using valuation techniques that involve estimates for discount rates, projected future cash flows and time period calculations, all of which are susceptible to change based on changes in economic conditions and other factors. Future events or changes in the estimates, which are used to determine the carrying value of goodwill and identifiable intangible assets or which otherwise adversely affects their value or estimated lives could have a material adverse impact on the results of operations.

Management evaluates securities for other-than-temporary impairment giving consideration to the extent to which the fair value has been less than cost, estimates of future cash flows, delinquencies and default severity, and the intent and ability of Salisbury to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. The consideration of the above factors is subjective and involves estimates and assumptions about matters that are inherently uncertain. Should actual factors and conditions differ materially from those used by management, the actual realization of gains or losses on investment securities could differ materially from the amounts recorded in the financial statements.

The determination of the obligation and expense for pension and other postretirement benefits is dependent on certain assumptions used in calculating such amounts. Key assumptions used in the actuarial valuations include the discount rate, expected long-term rate of return on plan assets and rates of increase in compensation and health care costs. Actual results could differ from the assumptions and market driven rates may fluctuate. Significant differences in actual experience or significant changes in the assumptions may materially affect the future pension and other postretirement obligations and expense.

## FINANCIAL CONDITION

### Overview

As discussed above, during the first calendar quarter of 2014, Salisbury took strategic initiatives to provide for future growth in each of the three states in which it operates. The new branch in Great Barrington, MA opened May 5, 2014. The agreement to acquire the Sharon, CT branch of Union Savings Bank and consolidate the Bank's existing Salisbury branch in Sharon, CT with such branch is also expected to be consummated in mid-year 2014. Finally, the announced agreement and plan of merger with Riverside Bank of Poughkeepsie, NY will add four (4) new offices to Salisbury's New York footprint upon consummation, which is expected to be in the fourth calendar quarter of 2014. Total assets were \$589.8 million at March 31, 2014, up \$2.7 million from December 31, 2013. Loans receivable, net, were \$446.5 million at March 31, 2014, up \$8.3 million, or 1.9%, from December 31, 2013. Non-performing assets were \$8.5 million at March 31, 2014, up \$1.0 million from \$7.5 million at December 31, 2013. Reserve coverage, as measured by the ratio of the allowance for loan losses to gross loans, was 1.09%, 1.06% and 1.14%, at March 31, 2014, December 31, 2013 and March 31, 2013, respectively. Deposits were \$477.5 million, up \$0.1 million from \$477.4 million at December 31, 2013.

At March 31, 2014, book value and tangible book value per common share were \$33.90 and \$27.85, respectively. Salisbury's Tier 1 leverage and total risk-based capital ratios were 10.65% and 16.42%, respectively, and above the "well capitalized" limits as defined by the FRB.

### Securities and Short Term Funds

Year-to-date 2014, securities decreased \$1.8 million to \$98.0 million as we continue to redeploy cash flow from the investment portfolio into loans. FHLBB advances decreased \$0.4 million, while cash and cash equivalents (non-time interest-bearing deposits with other banks, money market funds and federal funds sold) decreased \$3.3 million to \$9.4 million.

Salisbury evaluates securities for OTTI where the fair value of a security is less than its amortized cost basis at the balance sheet date. As part of this process, Salisbury considers its intent to sell each debt security and whether it is more likely than not that it will be required to sell the security before its anticipated recovery. If either of these conditions is met, Salisbury recognizes an OTTI charge to earnings equal to the entire difference between the security's amortized cost basis and its fair value at the balance sheet date. For securities that meet neither of these conditions, an analysis is performed to determine if any of these securities are at risk for OTTI.

Salisbury evaluates securities for strategic fit and may reduce its position in securities, although it is not more likely than not that Salisbury will be required to sell securities before recovery of their cost basis, which may be maturity. Therefore, management does not consider any of its securities, other than four non-agency CMO securities reflecting OTTI, to be OTTI at March 31, 2014.

In 2009 Salisbury determined that five non-agency CMO securities reflected OTTI and recognized losses for deterioration in credit quality of \$1,128,000. Salisbury judged the four remaining securities not to have additional OTTI and all other CMO securities not to be OTTI as of March 31, 2014. It is possible that future loss assumptions could change necessitating Salisbury to recognize future OTTI for further deterioration in credit quality. Salisbury does not intend to sell these securities and it is not more likely than not that Salisbury will be required to sell these securities before recovery of their cost basis.

Accumulated other comprehensive income at March 31, 2014 included net unrealized holding gains, net of tax, of \$1.6 million, an increase of \$1.2 million over December 2013, and unrecognized pension plan benefit, net of tax, of \$0.6 million.

## Loans

Net loans receivable increased \$8.3 million to \$446.5 million at March 31, 2014, compared with \$438.2 million at December 31, 2013.

The composition of loans receivable and loans held-for-sale is as follows:

(in thousands)	March 31, 2014	December 31, 2013
Residential 1-4 family	\$236,608	\$231,113
Residential 5+ multifamily	4,804	4,848

Loans receivable, net	\$446,518	\$438,178
Loans held-for-sale		
Residential 1-4 family	\$120	\$173
Loan Credit Quality		

The persistent weakness in the local and regional economies continues to impact the credit quality of Salisbury's loans receivable. During the first three months of 2014, non-performing assets increased \$1.0 million, however, the amount of total impaired and potential problem loans decreased \$0.2 million.

The composition of loans receivable by risk rating grade is as follows:

(in thousands)	Pass	Special mention	Substandard	Doubtful	Loss	Total
March 31, 2014						
Residential 1-4 family	\$218,660	\$11,854	\$ 5,999	\$ 95	\$ —	\$236,608

For year-to-date 2014, Salisbury has placed \$1.8 million of loans on non-accrual status as a result of deteriorated payment and financial performance and charged-off \$134,000 of loans primarily as a result of collateral deficiencies.

Salisbury has cooperative relationships with the majority of its non-performing loan customers. Substantially all non-performing loans are collateralized with real estate and the repayment of such loans is largely dependent on the

return of such loans to performing status or the liquidation of the underlying real estate collateral. Salisbury pursues the resolution of all non-performing loans through collections, restructures, voluntary liquidation of collateral by the borrower and, where necessary, legal action. When Salisbury's reasonable attempts to work with a customer to return a loan to performing status, including restructuring the loan, are unsuccessful, Salisbury will initiate appropriate legal action seeking to acquire property by deed in lieu of foreclosure or through foreclosure, or to liquidate business assets.

#### Credit Quality Segments

Salisbury categorizes loans receivable into the following credit quality segments:

Impaired loans consist of all non-accrual loans and troubled debt restructured loans, and represent loans for which it is probable that Salisbury will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreements.

Non-accrual loans, a sub-set of impaired loans, are loans for which the accrual of interest has been discontinued because, in the opinion of management, full collection of principal or interest is unlikely.

Non-performing loans consist of non-accrual loans, and accruing loans past due 90 days and over that are well collateralized, in the process of collection and where full collection of principal and interest is assured.

Non-performing assets consist of non-performing loans plus real estate acquired in settlement of loans.

Troubled debt restructured loans are loans for which concessions such as reduction of interest rates, other than normal market rate adjustments, or deferral of principal or interest payments, extension of maturity dates, or reduction of principal balance or accrued interest, have been granted due to a borrower's financial condition. Loan restructuring is employed when management believes the granting of a concession will increase the probability of the full or partial collection of principal and interest.

Potential problem loans consist of performing loans that have been assigned a substandard credit risk rating and that are not classified as impaired.

Credit Risk Ratings

Salisbury assigns credit risk ratings to loans receivable in order to manage credit risk and to determine the allowance for loan losses. Credit risk ratings categorize loans by common financial and structural characteristics that measure the credit strength of a borrower. Salisbury's rating model has eight risk rating grades, with each grade corresponding to a progressively greater risk of default. Grades 1 through 4 are pass ratings and 5 through 8 are ratings (special mention, substandard, doubtful and loss) defined by the bank's regulatory agencies, the FDIC and CTDOB. Risk ratings are assigned to differentiate risk within the portfolio and are reviewed on an ongoing basis and revised, if needed, to reflect changes in the borrowers' current financial position and outlook, risk profiles and the related collateral and structural positions.

Loans risk rated as "special mention" possess credit deficiencies or potential weaknesses deserving management's close attention that if left uncorrected may result in deterioration of the repayment prospects for the loans at some future date.

Loans risk rated as "substandard" are loans where the Bank's position is clearly not protected adequately by borrower current net worth or payment capacity. These loans have well defined weaknesses based on objective evidence and include loans where future losses to the Bank may result if deficiencies are not corrected, and loans where the primary source of repayment such as income is diminished and the Bank must rely on the sale of collateral or other secondary sources of collection.

Loans risk rated as "doubtful" have the same weaknesses as substandard loans with the added characteristic that the weakness makes collection or liquidation in full, given current facts, conditions, and values, to be highly improbable. The possibility of loss is high, but due to certain important and reasonably specific pending factors, which may work to strengthen the loan, its reclassification as an estimated loss is deferred until its exact status can be determined.

Loans risk rated as "loss" are considered uncollectible and of such little value that continuance as Bank assets is unwarranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather, it is not practical or desirable to defer writing off this loan even though partial recovery may be made in the future. Management actively reviews and tests its credit risk ratings against actual experience and engages an independent third-party to annually validate its assignment of credit risk ratings. In addition, the Bank's loan portfolio and risk ratings are examined annually on a rotating basis by its two primary regulatory agencies, the FDIC and CTDOB.

Impaired Loans

Loans individually evaluated for impairment (impaired loans) are loans for which Salisbury does not expect to collect all contractual principal and interest in accordance with the contractual terms of the loan. Impaired loans include all modified loans classified as troubled debt restructurings (TDRs) and loans on non-accrual status. The components of impaired loans are as follows:

(in thousands)	March 31, 2014	December 31, 2013
Non-accrual loans, excluding troubled debt restructured loans	\$5,989	\$5,419
Non-accrual troubled debt restructured loans	2,134	1,753
Accruing troubled debt restructured loans	8,348	8,500
Total impaired loans	\$16,471	\$15,672
Commitments to lend additional amounts to impaired borrowers	\$—	\$—

Non-Performing Assets

Non-performing assets increased \$1.0 million to \$8.5 million, or 1.5% of assets at March 31, 2014, from \$7.5 million, or 1.3% of assets at December 31, 2013, and decreased \$0.8 million from \$9.3 million, or 1.6% of assets at March 31, 2013.

The 13% increase in non-performing assets in the first three months of 2014 resulted primarily from \$1.8 million of loans placed on non-accrual status. This increase was offset in part by \$0.7 million in payoffs and repayments and \$0.1 million charged off.

The components of non-performing assets are as follows:

(in thousands)	March 31, 2014	December 31, 2013
Residential 1-4 family	\$2,316	\$1,525
Home equity credit	446	402
Commercial	1,977	1,857
Farm land	384	384
Vacant land	2,870	2,870
Real estate secured	7,993	7,038
Commercial and industrial	108	134
Consumer	22	—
Non-accruing loans	8,123	7,172
Accruing loans past due 90 days and over	26	—
Non-performing loans	8,149	7,172
Real estate acquired in settlement of loans	377	377
Non-performing assets	\$8,526	\$7,549

The past due status of non-performing loans is as follows:

(in thousands)	March 31, 2014	December 31, 2013
Current	\$1,829	\$1,274
Past due 001-029 days	304	241
Past due 030-059 days	33	134
Past due 060-089 days	18	254
Past due 090-179 days	1,130	588
Past due 180 days and over	4,835	4,681
Total non-performing loans	\$8,149	\$7,172

At March 31, 2014, 22.44% of non-performing loans were current with respect to loan payments, compared with 17.76% at December 31, 2013. Loans past due 180 days include a \$2.8 million loan secured by vacant land (residential building lots) where Salisbury has initiated a foreclosure action that is referred to in Item 1 of Part II, Legal Proceedings.

#### Troubled Debt Restructured Loans

Troubled debt restructured loans increased \$0.2 million during 2014 to \$10.5 million, or 2.33% of gross loans receivable at March 31, 2014, from \$10.3 million, or 2.32% of gross loans receivable at December 31, 2013.

The components of troubled debt restructured loans are as follows:

(in thousands)	March 31, 2014	December 31, 2013
Residential 1-4 family	\$4,622	\$4,956
Home equity credit	48	48
Personal	—	22
Vacant land	223	225
Commercial	2,923	2,691
Real estate secured	7,816	7,942

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

Commercial and industrial	532	558
Accruing troubled debt restructured loans	8,348	8,500
Residential 1-4 family	1,324	999
Home equity credit	88	40
Commercial	598	608
Vacant land	22	—
Real estate secured	2,032	1,647
Commercial and industrial	102	106
Non-accrual troubled debt restructured loans	2,134	1,753
Troubled debt restructured loans	\$10,482	\$10,253

The past due status of troubled debt restructured loans is as follows:

(in thousands)	March 31, 2014	December 31, 2013
Current	\$6,829	\$6,559
Past due 1-29 days	1,519	1,490
Past due 30-59 days	—	95
Past due 60-89 days	—	356
Accruing troubled debt restructured loans	8,348	8,500
Current	1,075	999
Past due 1-29 days	235	241
Past due 30-59 days	—	64
Past due 60-89 days	—	—
Past due 90-179 days	376	449
Past due 180 days and over	448	—
Non-accrual troubled debt restructured loans	2,134	1,753
Total troubled debt restructured loans	\$10,482	\$10,253

At March 31, 2014, 75.40% of troubled debt restructured loans were current with respect to loan payments, as compared with 73.72% at December 31, 2013.

#### Past Due Loans

Loans past due 30 days or more decreased \$1.0 million during 2014 to \$10.0 million, or 2.23% of gross loans receivable at March 31, 2014, compared with \$11.0 million, or 2.50% of gross loans receivable at December 31, 2013.

The components of loans past due 30 days or greater are as follows:

(in thousands)	March 31, 2014	December 31, 2013
Past due 030-059 days	\$2,570	\$2,535
Past due 060-089 days	1,451	2,840
Past due 090-179 days	26	—
Accruing loans	4,047	5,375
Past due 030-059 days	33	133
Past due 060-089 days	18	254
Past due 090-179 days	1,104	588
Past due 180 days and over	4,835	4,681
Non-accrual loans	5,990	5,656
Total loans past due 30 days or greater	\$10,037	\$11,031

#### Potential Problem Loans

Potential problem loans decreased \$1.0 million during the three months of 2014 to \$8.1 million, or 1.81% of gross loans receivable at March 31, 2014, compared with \$9.1 million, or 2.06% of gross loans receivable at December 31, 2013.

The components of potential problem loans are as follows:

(in thousands)	March 31, 2014	December 31, 2013
----------------	----------------------	----------------------

Edgar Filing: SALISBURY BANCORP INC - Form 10-Q

Residential 1-4 family	\$1,063	\$ 1,528
Residential 5+ multifamily	975	975
Construction of residential 1-4 family	—	—
Home equity credit	890	890
Residential real estate	2,928	3,393
Commercial	3,638	4,036
Construction of commercial	450	589
Commercial real estate	4,088	4,625
Farm land	740	751
Vacant land	70	44
Real estate secured	7,826	8,813
Commercial and industrial	291	288
Consumer	11	15
Other classified loans receivable	\$8,128	\$ 9,116

28

The past due status of potential problem loans is as follows:

(in thousands)	March 31, 2014	December 31, 2013
Current	\$6,835	\$ 7,646
Past due 001-029 days	531	189
Past due 030-059 days	502	298
Past due 060-089 days	234	983
Past due 090-179 days	26	—
Total potential problem loans	\$8,128	\$ 9,116

At March 31, 2014, 84.09% of potential problem loans were current with respect to loan payments, as compared with 83.87% at December 31, 2013.

Management cannot predict the extent to which economic or other factors may impact such borrowers' future payment capacity, and there can be no assurance that such loans will not be placed on nonaccrual status, restructured, or require increased provisions for loan losses.

#### Deposits and Borrowings

Deposits increased \$0.1 million during first quarter 2014 to \$477.5 million, from \$477.4 million at December 31, 2013, and decreased \$10.3 million year-over-year from \$487.8 million at March 31, 2013. Retail repurchase agreements increased \$0.1 million during first quarter 2014 to \$2.6 million, compared with \$2.5 million at December 31, 2013, and increased \$0.3 million for year-over-year compared with \$2.3 million at March 31, 2013.

Federal Home Loan Bank of Boston (FHLBB) advances decreased \$0.4 million during first quarter 2014 to \$30.0 million at March 31, 2014, from \$30.4 million at December 31, 2013, and decreased \$1.6 million for year-over-year from \$31.6 million at March 31, 2013. The decreases were due to amortizing payments of advances and maturities of advances that were not renewed.

#### Liquidity

Salisbury manages its liquidity position to ensure that there is sufficient funding availability at all times to meet both anticipated and unanticipated deposit withdrawals, loan originations and advances, securities purchases and other operating cash outflows. Salisbury's primary sources of liquidity are principal payments and maturities of securities and loans, short-term borrowings through repurchase agreements and FHLBB advances, net deposit growth and funds provided by operations. Liquidity can also be provided through sales of loans and available-for-sale securities.

Salisbury manages its liquidity in accordance with a liquidity funding policy, and also maintains a contingency funding plan that provides for the prompt and comprehensive response to unexpected demands for liquidity. At March 31, 2014, Salisbury's liquidity ratio, as represented by cash, short term available-for-sale securities and marketable assets to net deposits and short term unsecured liabilities, was 15.90%, down from 16.33% at December 31, 2013. Management believes Salisbury's funding sources will meet anticipated funding needs.

Operating activities for the three-month period ended March 31, 2014 provided net cash of \$2.5 million. Investing activities utilized net cash of \$5.1 million, principally from \$8.7 million of net loan originations and principal collections, offset by proceeds of \$3.5 million from calls and maturities of securities available-for-sale. Financing activities utilized net cash of \$0.7 million, principally due to pay downs of FHLBB advances of \$0.4 million and common and preferred stock dividends paid totaling \$0.5 million, offset by a net increase of \$0.2 million in deposits

and repurchase agreements.

At March 31, 2014, Salisbury had outstanding commitments to fund new loan originations of \$9.7 million and unused lines of credit of \$53.6 million. Salisbury believes that these commitments can be met in the normal course of business. Salisbury believes that its liquidity sources will continue to provide funding sufficient to support operating activities, loan originations and commitments, and deposit withdrawals.

## RESULTS OF OPERATIONS

**For the three month periods ended March 31, 2014 and 2013**

### OVERVIEW

Net income available to common shareholders was \$505,000, or \$0.29 per common share, for the first quarter ended March 31, 2014 (first quarter 2014), compared with \$940,000, or \$0.55 per common share, for the fourth quarter ended December 31, 2013 (fourth quarter 2013), and \$900,000, or \$0.53 per common share, for the first quarter ended March 31, 2013 (first quarter 2013).

Earnings per common share of \$0.29 decreased \$0.26 versus fourth quarter 2013, and decreased \$0.24, versus first quarter 2013.

Earnings per share excluding certain one-time expenses related to strategic initiatives of \$287,000, (after tax) or \$0.17 per share, would have been \$0.46 per share for the quarter.

Excluding certain one-time expenses of \$287,000 and \$202,000 (after taxes) substantially related to professional fees which were incurred in conjunction with strategic initiatives as discussed above during the first quarter 2014 and fourth quarter 2013, respectively:

Earnings per common share of \$0.46 decreased \$0.21 versus fourth quarter 2013, and decreased \$0.07, versus first quarter 2013.

Net income decreased \$344,000, or 29%, versus fourth quarter 2013 and decreased \$102,000 versus first quarter 2013.

Non-interest expense increased \$65,000, or 1%, versus fourth quarter 2013 and increased \$105,000 versus first quarter 2013.

The net interest margin increased 1 basis point versus fourth quarter 2013 and increased 18 basis points versus first quarter 2013 at 3.54%.

Net loans receivable increased \$8.3 million or 2% during the first calendar quarter of 2014 to \$446.5 million, which reflected an increase of \$40.2 million or 10% from the end of the first quarter of 2013.

The provision for loan losses was \$337,000, versus \$190,000 for fourth quarter 2013 and \$396,000 for first quarter 2013. Net loan charge-offs were \$127,000, versus \$163,000 for fourth quarter 2013 and \$70,000 for first quarter 2013.

Tax equivalent net interest income decreased \$11,000, or 0.2%, versus fourth quarter 2013, and increased \$201,000, or 4.1%, versus first quarter 2013.

Net Interest Income

Tax equivalent net interest income for first quarter 2014 increased \$201,000, or 4.1%, versus first quarter 2013. Average total interest bearing deposits decreased \$0.6 million versus first quarter 2013. Average earning assets decreased \$5.6 million versus first quarter 2013. The net interest margin increased 18 basis points versus first quarter 2013 at 3.54%.

The following table sets forth the components of Salisbury's fully tax-equivalent ("FTE") net interest income and yields on average interest-earning assets and interest-bearing funds.

Three months ended March 31, (dollars in thousands)	Average Balance		Income / Expense		Average Yield / Rate	
	2014	2013	2014	2013	2014	2013

Total	(6 )	(129)	(135)
Net change in net interest income	\$201	\$—	\$201

**Interest Income**

Tax equivalent interest income increased \$66,000 to \$5.8 million for first quarter 2014 as compared with first quarter 2013.

Loan income increased \$213,000, or 4.7%, primarily due to a \$45.3 million, or 11.2%, increase in average loans, partially offset by a 26 basis point decrease in the average loan yield.

Tax equivalent securities income decreased \$146,000, or 12.2%, for first quarter 2014 as compared with first quarter 2013, primarily due to a \$26.1 million, or 22.1%, decrease in average volume due to calls and prepayments of mortgage backed securities, and partially offset by a 52 basis point increase in average yield.

**Interest Expense**

Interest expense decreased \$135,000, or 16.8%, to \$0.7 million for first quarter 2014 as compared with first quarter 2013.

Interest on deposit accounts and retail repurchase agreements decreased \$139,000, or 28.3%, as a result of lower average rates, down 14 basis points on deposits and 8 basis points on repurchase agreements and a \$0.6 million, or 0.2%, decrease in the average balance of deposits. The lower average rate resulted from the effect of currently lower market interest rates paid on interest bearing deposits and changes in product mix.

Interest expense on FHLBB borrowings decreased \$14,000 as a result of the average borrowing rate decrease of 21 basis points as compared with first quarter 2013, offset partially by higher average borrowings, up \$0.4 million.

**Provision and Allowance for Loan Losses**

The provision for loan losses was \$337,000 for first quarter 2014, compared with \$396,000 for first quarter 2013. Net loan charge-offs were \$134,000 and \$73,000, for the respective quarters. The following table sets forth changes in the provision for loan losses:

Three months ended March 31, (dollars in thousands)	2014	2013
Balance, beginning of period	\$4,683	\$4,360
Provision for loan losses	337	396
Charge-offs		
Real estate mortgages	(125 )	(56 )
Commercial and industrial	(1 )	(4 )
Consumer	(8 )	(13 )
Total charge-offs	(134 )	(73 )
Recoveries		
Real estate mortgages	2	—
Commercial and industrial	—	—
Consumer	6	3
Total recoveries	8	3
Net charge-offs	(126 )	(70 )
Balance, end of period	\$4,894	\$4,686
Loans receivable, gross	\$450,226	\$441,679
Non-performing loans	8,149	8,587
Accruing loans past due 30-89 days	4,021	4,718

Ratio of allowance for loan losses:

to loans receivable, gross	1.09	%	1.14	%
to non-performing loans	60.06		54.59	

Ratio of non-performing loans to loans receivable, gross	1.81		2.09	
--	------	--	------	--

Ratio of accruing loans past due 30-89 days to loans receivable, gross	0.89		1.15	
--	------	--	------	--

Reserve coverage, as measured by the ratio of the allowance for loan losses to gross loans, decreased to 1.09% at March 31, 2014 compared to 1.14% March 31, 2013.

During the first quarter of 2013, non-performing loans (non-accrual loans and accruing loans past-due 90 days or more) at \$8.1 million, improved slightly at 1.81% of gross loans receivable at March 31, 2014 compared to 2.09% at March 31, 2013. Accruing loans past due 30-89 days decreased \$0.7 million to \$4.0 million, or 0.89% of gross loans receivable from 1.15% at March 31, 2013. See “Financial Condition – Loan Credit Quality” for further discussion and analysis.

The credit quality segments of loans receivable and the allowance for loan losses are as follows:

	Collectively evaluated		Individually evaluated		Total portfolio

The allowance for loan losses represents management's estimate of the probable credit losses inherent in the loan portfolio as of the reporting date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged off, and is reduced by loan charge-offs. Loan charge-offs are recognized when management determines a loan, or portion of a loan, to be uncollectible. The allowance for loan losses is computed by segregating the portfolio into three components: (1) loans collectively evaluated for impairment: general loss allocation factors for non-impaired loans are segmented into pools of loans based on similar risk characteristics such as loan product, collateral type and loan-to-value, loan risk rating, historical loss experience, delinquency factors and other similar economic indicators, (2) loans individually evaluated for impairment: individual loss allocations for loans deemed to be impaired based on discounted cash flows or collateral value, and (3) unallocated: general loss allocations for other environmental factors.

Impaired loans and certain potential problem loans, where warranted, are individually evaluated for impairment. Impairment is measured for each individual loan, or for a borrower's aggregate loan exposure, using either the fair value of the collateral, if the loan is collateral dependent, or the present value of expected future cash flows discounted at the loan's effective interest rate. An allowance is established when the collateral value or discounted cash flows of the loan is lower than the carrying value of that loan.

The component of the allowance for loan losses for loans collectively evaluated for impairment is estimated by stratifying loans into segments and credit risk ratings and then applying management's general loss allocation factors. The general loss allocation factors are based on expected loss experience adjusted for historical loss experience and other qualitative factors, including levels or trends in delinquencies; trends in volume and terms of loans; effects of changes in risk selection and underwriting standards and other changes in lending policies, procedures and practices; experience/ability/depth of lending management and staff; and national and local economic trends and conditions. The qualitative factors are determined based on the various risk characteristics of each loan segment. There were no significant changes in Salisbury's policies or methodology pertaining to the general component of the allowance for loan losses during the quarter ended March 31, 2014.

The unallocated component of the allowance is maintained to cover uncertainties that could affect management's estimate of probable losses. It reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating allocated and general reserves in the portfolio.

Determining the adequacy of the allowance at any given period is difficult, particularly during deteriorating or uncertain economic periods, and management must make estimates using assumptions and information that are often subjective and changing rapidly. The review of the loan portfolio is a continuing event in light of a changing economy and the dynamics of the banking and regulatory environment. Should the economic climate deteriorate, borrowers could experience difficulty and the level of non-performing loans, charge-offs and delinquencies could rise and require increased provisions. In management's judgment, Salisbury remains adequately reserved both against total loans and non-performing loans at March 31, 2014.

Management's loan risk rating assignments, loss percentages and specific reserves are subjected annually to an independent credit review by an external firm. In addition, the Bank is examined annually on a rotational process by one of its two primary regulatory agencies, the FDIC and CTDOB. As an integral part of their examination process, the FDIC and CTDOB review the Bank's credit risk ratings and allowance for loan losses.

**Non-Interest Income**

The following table details the principal categories of non-interest income.

Three months ended March 31, (dollars in thousands)	2014	2013	2014 vs. 2013	
Trust and wealth advisory fees	\$779	\$725	\$54	7.44 %
Service charges and fees	542	516	26	5.04
Gains on sales of mortgage loans, net	11	279	(268)	(96.06)
Mortgage servicing, net	28	26	2	7.69
Other	78	79	(1)	(1.27)
Total non-interest income	\$1,438	\$1,625	\$(187)	(11.51)%

Non-interest income decreased \$187,000, or 11.5%, in 2014 versus 2013. Trust and Wealth Advisory revenues increased \$54,000 versus first quarter 2013. The year-over-year revenue increase is the result of growth in managed assets, partially offset by lower estate fees collected in first quarter 2014. Service charges and fees increased \$26,000 versus first quarter 2013. Income from sales and servicing of mortgage loans decreased \$268,000 versus first quarter 2013 due to lower volume of residential mortgage loan sales. First quarter 2014 mortgage loans sales totaled \$0.5 million versus \$8.7 million for first quarter 2013. First quarter 2014 and first quarter 2013 included mortgage servicing valuation impairment benefits of \$11,000 and \$33,000, respectively. Other income includes bank owned life insurance income and rental income.

**Non-Interest Expense**

The following table details the principal categories of non-interest expense.

Three months ended March 31, (dollars in thousands)	2014	2013	2014 vs. 2013	
Salaries	\$1,844	\$1,750	\$94	5.37 %
Employee benefits	741	685	56	8.18
Premises and equipment	673	583	90	15.44
Data processing	399	419	(20)	(4.77)
Professional fees	619	380	239	62.89
Collections and OREO	135	157	(22)	(14.01)
FDIC insurance	98	125	(27)	(21.60)
Marketing and community support	113	122	(9)	(7.38)
Amortization of intangible assets	56	56	—	—
Other	432	428	4	0.93
Non-interest expense	\$5,110	\$4,705	\$405	8.61 %

Non-interest expense for first quarter 2014 increased \$405,000 versus first quarter 2013. Total compensation increased \$150,000; mainly attributable to a reduction of deferred loan origination compensation as a result of lower mortgage volume, and increases in benefit plan expenses.

Premises and equipment increased \$90,000 versus first quarter 2013. The increase in expense was related to the addition of a branch facility in Great Barrington, Massachusetts, technology upgrades and seasonally increased fuel and utility costs.

Data processing decreased \$20,000 versus first quarter 2013 mainly due to a change in tax preparation accruals for trust accounts.

Professional fees increased \$239,000 versus first quarter 2013. The increase was due to consulting and legal expenses related to strategic initiatives.

Collections and OREO expenses decreased \$22,000 versus first quarter 2013 due to lower legal collection and foreclosure fees.

## Income Taxes

The effective income tax rates for first quarter 2014 and first quarter 2013 were 28% and 17%, respectively. Generally, fluctuations in the effective tax rate result from changes in the mix of taxable and tax exempt income. The first quarter 2014 results include certain one-time expenses related to strategic initiatives. These expenses, for tax purposes, are non-deductible and contribute to the increase in the effective tax rate for the quarter. (Excluding these expenses the effective tax rate for the quarter would have been 14.30%). Salisbury's effective tax rate is generally less than the 34% federal statutory rate due to holdings of tax-exempt municipal bonds, some tax-exempt loans and bank owned life insurance.

Salisbury did not incur Connecticut income tax in 2013 or 2012, other than minimum state income tax, as a result of its utilization of Connecticut tax legislation that permits banks to shelter certain mortgage income from the Connecticut corporation business tax through the use of a special purpose entity called a Passive Investment Company ("PIC"). In accordance with this legislation, in 2004 the Bank formed a PIC, SBT Mortgage Service Corporation. Salisbury's income tax provision reflects the full impact of the Connecticut legislation. Salisbury does not expect to pay other than minimum state income tax in the foreseeable future unless there is a change in the State of Connecticut corporate tax law.

## CAPITAL RESOURCES

Shareholders' equity was \$74.0 million at March 31, 2014, up \$1.2 million from December 31, 2013. Book value and tangible book value per common share were \$33.90 and \$27.85, respectively, compared with \$33.21 and \$27.12, respectively, at December 31, 2013. Contributing to the increase in shareholders' equity for year-to-date 2014 was net income of \$0.5 million and other comprehensive income of \$1.2 million, partially offset by common and preferred stock dividends of \$0.5 million. Accumulated other comprehensive income consists of unrealized gains on securities available-for-sale, net of tax, of \$1.6 million and unrecognized pension plan benefits, net of tax, of \$0.6 million.

In August 2011, Salisbury issued to the U.S. Secretary of the Treasury (the "Treasury") \$16.0 million of its Series B Preferred Stock under the Small Business Lending Fund (the "SBLF") program. The SBLF program is a \$30 billion fund established under the Small Business Jobs Act of 2010 to encourage lending to small businesses by providing Tier 1 capital to qualified community banks with assets of less than \$10 billion. The Preferred Stock qualifies as Tier 1 capital for regulatory purposes and ranks senior to the Common Stock.

The Series B Preferred Stock pays noncumulative dividends. The dividend rate on the Series B Preferred Stock for the initial ten quarterly dividend periods, commencing with the period ended September 30, 2011 and ending with the period ended December 31, 2013, was determined each quarter based on the increase in the Bank's Qualified Small Business Lending over a baseline amount. The dividend rate for the quarterly period ended December 31, 2013 was 1.0%. For the eleventh quarterly dividend payment through four and one-half years after its issuance, the dividend rate on the Series B Preferred Stock will be 1.0%. Commencing with the second quarter of 2016, after four and one-half years from its issuance, the dividend rate will be fixed at 9.0% per annum. The Series B Preferred Stock is non-voting, other than voting rights on matters that could adversely affect the Series B Preferred Stock. The Series B Preferred Stock is redeemable at any time at one hundred percent of the issue price plus any accrued and unpaid dividends.

On February 8, 2013, Salisbury granted a total of 19,600 shares of restricted stock pursuant to its 2011 Long Term Incentive Plan, which was approved by shareholders at the 2011 Annual Meeting, to 22 employees, including 5,000 shares to one Named Executive Officer, Richard J. Cantele, Jr., President and Chief Executive Officer.

On January 3, 2014, Salisbury granted a total of 3,000 shares of restricted stock, pursuant to its 2011 Long Term Incentive Plan, to 2 additional employees, including 2,000 shares to one Named Executive Officer, Donald E. White, Chief Financial Officer.

## Capital Requirements

Salisbury and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Under current regulatory definitions, Salisbury and the Bank are considered to be “well capitalized” for capital adequacy purposes. As a result, the Bank pays lower federal deposit insurance premiums than banks that are not “well capitalized.” Salisbury and the Bank's regulatory capital ratios are as follows:

	Well		March 31, 2014		December 31, 2013	
	capitalized		Salisbury	Bank	Salisbury	Bank
Total Capital (to risk-weighted assets)	10.00	%	16.42	%	16.46	%
Tier 1 Capital (to risk-weighted assets)	6.00		15.10		15.20	
Tier 1 Capital (to average assets)	5.00		10.65		10.65	

To be considered a well-capitalized institution, which is the highest capital category for an institution as defined by the Prompt Corrective Action Regulations issued by the FDIC and the FRB, an institution must maintain a Total Risk-Based ratio of 10% or above, a Tier 1 Risk-Based ratio of 6% or above and a Leverage ratio of 5% or above, and must not be subject to any written order, written agreement, capital directive, or prompt corrective action directive to meet and maintain a specific capital level. Maintaining strong capital is essential to Salisbury's and the Bank's safety and soundness.

In December 2010, the Basel Committee, a group of bank regulatory supervisors from around the world, released its final framework for strengthening international capital and liquidity regulation, now officially identified by the Basel Committee as “Basel III.” Basel III, when fully implemented by the U.S. bank regulatory agencies and fully phased-in, will require bank holding companies and their bank subsidiaries to maintain substantially more capital, with a greater emphasis on common equity.

In July 2013, the Federal Reserve Board, Office of the Comptroller of the Currency and Federal Deposit Insurance Corporation approved final rules to implement the Basel III capital framework. The rules will be effective on January 1, 2015 and phased-in over a multiple year period through 2019. The new capital rules call for higher quality capital with higher minimum capital level requirements. Salisbury and the Bank are in the process of assessing the impact from these new regulatory requirements, and while management cannot be certain of the impact, management believes that Salisbury and the Bank will exceed the new requirements of adequately capitalized plus the capital conservation buffer, once they become effective.

## Dividends

During the three month period ended March 31, 2014 Salisbury paid \$46,000 in Series B preferred stock dividends to the U.S. Treasury's SBLF program, and \$479,000 in common stock dividends.

On April 25, 2014, the Board of Directors of Salisbury declared a common stock dividend of \$0.28 per common share payable on May 30, 2014 to shareholders of record on May 9, 2014. Common stock dividends, when declared, will generally be paid the last Friday of February, May, August and November, although Salisbury is not obligated to pay dividends on those dates or at any other time.

Salisbury's ability to pay cash dividends is substantially dependent on the Bank's ability to pay cash dividends to Salisbury. There are certain restrictions on the payment of cash dividends and other payments by the Bank to Salisbury. Under Connecticut law, the Bank cannot declare a cash dividend except from net profits, defined as the remainder of all earnings from current operations. The total of all cash dividends declared by the Bank in any calendar year shall not, unless specifically approved by the Commissioner of Banking, exceed the total of its net profits of that year combined with its retained net profits of the preceding two years.

FRB Supervisory Letter SR 09-4, February 24, 2009, revised September 27, 2009, notes that, as a general matter, the board of directors of a BHC should inform the FRB and should eliminate, defer, or significantly reduce dividends if (1) net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (2) the prospective rate of earnings retention is not consistent with capital needs and overall current and prospective financial condition; or (3) the BHC will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. Moreover, a BHC should inform the FRB reasonably in advance of declaring or paying a dividend that exceeds earnings for the period (e.g., quarter) for which the dividend is being paid or that could result in a material adverse change to the BHC capital structure.

Salisbury believes that the payment of common stock cash dividends is appropriate, provided that such payment considers Salisbury's capital needs, asset quality, and overall financial condition and does not adversely affect the financial stability of Salisbury or the Bank. The continued payment of common stock cash dividends by Salisbury will be dependent on Salisbury's and the Bank's future core earnings, financial condition and capital needs, regulatory restrictions, and other factors deemed relevant by the Board of Directors of Salisbury.

#### IMPACT OF INFLATION AND CHANGING PRICES

Salisbury's consolidated financial statements are prepared in conformity with generally accepted accounting principles that require the measurement of financial condition and operating results in terms of historical dollars without considering changes in the relative purchasing power of money, over time, due to inflation. Unlike most industrial companies, virtually all of the assets and liabilities of Salisbury are monetary and as a result, interest rates have a greater impact on Salisbury's performance than do the effects of general levels of inflation, although interest rates do not necessarily move in the same direction or with the same magnitude as the prices of goods and services. Although not a material factor in recent years, inflation could impact earnings in future periods.

## ADDITIONAL INFORMATION AND WHERE TO FIND IT

In connection with the proposed merger with Riverside Bank, Salisbury will file with the SEC a Registration Statement on Form S-4 that will include a proxy statement of Salisbury and Riverside Bank and a prospectus of Salisbury, as well as other relevant documents concerning the proposed transaction. SHAREHOLDERS OF SALISBURY AND RIVERSIDE BANK ARE URGED TO READ CAREFULLY THE REGISTRATION STATEMENT AND JOINT PROXY STATEMENT/PROSPECTUS REGARDING THE PROPOSED TRANSACTION IN ITS ENTIRETY WHEN IT BECOMES AVAILABLE AND ANY OTHER DOCUMENTS FILED WITH THE SEC, AS WELL AS ANY AMENDMENTS OR SUPPLEMENTS TO THOSE DOCUMENTS, BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION. Investors and shareholders of Salisbury and Riverside Bank will be able to obtain a free copy of the joint proxy statement/prospectus (when available) containing information about Salisbury and Riverside Bank, as well as other filings containing information about Salisbury, at the SEC's website at [www.sec.gov](http://www.sec.gov). The joint proxy statement/prospectus (when available) and the other filings may also be obtained free of charge at Salisbury's website at [www.salisburybank.com](http://www.salisburybank.com).

## PARTICIPANTS IN THE SOLICITATION OF PROXIES

Salisbury and Riverside Bank and certain of their respective directors, executive officers and other members of management and employees, under the SEC's rules, may be deemed to be "participants" in the solicitation of proxies from the shareholders of Salisbury and Riverside Bank in connection with the proposed merger and related matters. Information regarding the directors and executive officers of Salisbury and their ownership of Salisbury common stock is set forth in the proxy statement for Salisbury's 2013 annual meeting of shareholders, as filed with the SEC on Schedule 14A on April 30, 2013. Information regarding the directors and executive officers of Riverside Bank and their ownership of Riverside Bank common stock, and additional information regarding the interests of the Salisbury and Riverside Bank participants, may be obtained by reading the joint proxy statement/prospectus when it becomes available. Free copies of this document may be obtained as described in the preceding paragraph.

This communication does not constitute an offer to sell or the solicitation of an offer to buy any securities or a solicitation of any vote or approval, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such jurisdiction.

## FORWARD-LOOKING STATEMENTS

This Form 10-Q and future filings made by Salisbury with the Securities and Exchange Commission, as well as other filings, reports and press releases made or issued by Salisbury and the Bank, and oral statements made by executive officers of Salisbury and the Bank, may include forward-looking statements relating to such matters as:

- (a) assumptions concerning future economic and business conditions and their effect on the economy in general and on the markets in which Salisbury and the Bank do business; and
- (b) expectations for revenues and earnings for Salisbury and the Bank.

Such forward-looking statements are based on assumptions rather than historical or current facts and, therefore, are inherently uncertain and subject to risk. For those statements, Salisbury claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Salisbury notes that a variety of factors could cause the actual results or experience to differ materially from the anticipated results or other expectations described or implied by such forward-looking statements. The risks and uncertainties that may affect the operation, performance, development and results of Salisbury's and the Bank's business include the following:

- (a) the risk of adverse changes in business conditions in the banking industry generally and in the specific markets in which the Bank operates;
  - (b) changes in the legislative and regulatory environment that negatively impacts Salisbury and Bank through increased operating expenses;
  - (c) increased competition from other financial and non-financial institutions;
  - (d) the impact of technological advances; and
  - (e) other risks detailed from time to time in Salisbury's filings with the Securities and Exchange Commission.
- Such developments could have an adverse impact on Salisbury's and the Bank's financial position and results of operations.

### Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Salisbury manages its exposure to interest rate risk through its Asset/Liability Management Committee ("ALCO") using risk limits and policy guidelines to manage assets and funding liabilities to produce financial results that are consistent with Salisbury's liquidity, capital adequacy, growth, risk and profitability targets. Interest rate risk is the risk of loss to future earnings due to changes in interest rates.

The ALCO manages interest rate risk using income simulation to measure interest rate risk inherent in Salisbury's financial instruments at a given point in time by showing the effect of interest rate shifts on net interest income over a 24-month horizon. In management's March 31, 2014 analysis, all of the simulations incorporate a static growth assumption over the simulation horizons. Additionally, the simulations take into account the specific re-pricing, maturity and prepayment characteristics of differing financial instruments that may vary under different interest rate scenarios.

The ALCO reviews the simulation results to determine whether Salisbury's exposure to change in net interest income remains within established tolerance levels over the simulation horizons and to develop appropriate strategies to manage this exposure. Salisbury's tolerance levels for changes in net interest income in its income simulations varies depending on the magnitude of interest rate changes and level of risk-based capital. All changes are measured in comparison to the projected net interest income that would result from an "unchanged" rate scenario where interest rates remain stable over the forecast horizon. The ALCO also evaluates the directional trends of net interest income, net interest margin and other financial measures over the forecast horizon for consistency with its liquidity, capital adequacy, growth, risk and profitability targets.

The ALCO uses four interest rate scenarios to evaluate interest risk exposure and may vary these interest rate scenarios to show the effect of steepening or flattening changes in yield curves as well as parallel changes in interest rates. At March 31, 2014 the ALCO used the following interest rate scenarios: (1) unchanged interest rates; (2) immediately rising interest rates – immediate non-parallel upward shift in market interest rates ranging from 300 basis points for short term rates to 300 basis points for the 10-year Treasury; (3) immediately falling interest rates – immediate non-parallel downward shift in market interest rates ranging from 25 basis points for short term rates to 111 basis points for the 10-year Treasury; and (4) Static growth with assumption sensitivity stress testing with gradually rising interest rates – gradual non-parallel upward shift in market interest rates ranging from 200 basis points for short term rates to 150 basis points for the 10-year Treasury. Deposit rates are assumed to shift by lesser amounts due to their relative historical insensitivity to market interest rate movements. Further, deposits are assumed to have certain minimum rate levels below which they will not fall. Income simulations do not reflect adjustments in strategy that the ALCO could implement in response to rate shifts.

As of March 31, 2014, net interest income simulations indicated that the Bank's exposure to changing interest rates over the simulation horizons remained within its tolerance levels. The following table sets forth the estimated change in net interest income from an unchanged interest rate scenario over the periods indicated for changes in market interest rates using the Bank's financial instruments as of March 31, 2014:

As of March 31, 2014	Months 1-12	Months 13-24
Immediately rising interest rates (static growth assumptions)	(13.40)%	(5.06 )%
Immediately falling interest rates (static growth assumptions)	(0.51 )	(3.13 )
Immediately rising interest rates (static growth with assumption sensitivity stress testing)	(4.10 )	(10.03)
The negative exposure of net interest income to immediately and gradually rising rates as compared to the unchanged rate scenario results from a faster projected rise in the cost of funds versus income from earning assets, as relatively rate-sensitive money market and time deposits re-price faster than longer duration earning assets. The negative exposure of net interest income to immediately falling rates as compared to an unchanged rate scenario results from a greater decline in earning asset yields compared to rates paid on funding liabilities, as a result of faster prepayments on existing assets and lower reinvestment rates on future loans originated and securities purchased.		

While the ALCO reviews simulation assumptions and back-tests simulation results to ensure that they are reasonable and current, income simulation may not always prove to be an accurate indicator of interest rate risk or future net interest margin. Over time, the re-pricing, maturity and prepayment characteristics of financial instruments and the composition of Salisbury's balance sheet may change to a different degree than estimated. Simulation modeling assumes Salisbury's expectation for future balance sheet growth, which is a function of the business environment and customer behavior. Another significant simulation assumption is the sensitivity of core savings deposits to fluctuations in interest rates. Income simulation results assume that changes in both core savings deposit rates and balances are related to changes in short-term interest rates. The assumed relationship between short-term interest rate changes and core deposit rate and balance changes used in income simulation may differ from the ALCO's estimates. Lastly, mortgage-backed securities and mortgage loans involve a level of risk that unforeseen changes in prepayment speeds may cause related cash flows to vary significantly in differing rate environments. Such changes could affect the level of reinvestment risk associated with cash flow from these instruments, as well as their market value. Changes in prepayment speeds could also increase or decrease the amortization of premium or accretion of discounts related to such instruments, thereby affecting interest income.

Salisbury also monitors the potential change in market value of its available-for-sale debt securities in changing interest rate environments. The purpose is to determine market value exposure that may not be captured by income simulation, but which might result in changes to Salisbury's capital and liquidity position. Results are calculated using industry-standard analytical techniques and securities data. Available-for-sale equity securities are excluded from this analysis because the market value of such securities cannot be directly correlated with changes in interest rates. The following table summarizes the potential change in market value of available-for-sale debt securities resulting from immediate parallel rate shifts:

As of March 31, 2014 (in thousands)	Rates up 100bp	Rates up 200bp
U.S. Treasury notes	\$(64 )	\$(125 )
U.S. Government agency notes	(62 )	(206 )
Municipal bonds	(2,238 )	(4,548 )
Mortgage-backed securities	(1,120 )	(2,274 )
Collateralized mortgage obligations	(291 )	(613 )
SBA pools	(7 )	(13 )
Total available-for-sale debt securities	\$(3,782 )	\$(7,779 )

#### Item 4. **CONTROLS AND PROCEDURES**

##### Evaluation of Disclosure Controls and Procedures

Salisbury's management, including its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of Salisbury's disclosure controls and procedures as of March 31, 2014. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective as of March 31, 2014.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that the information required to be disclosed in reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in our reports filed under the Exchange Act is accumulated and communicated to management, including the principle executive officer and principle financial officer, as appropriate to allow timely decisions regarding required disclosure.

##### Changes in Internal Controls

In addition, based on an evaluation of its internal controls over financial reporting, no change in Salisbury's internal control over financial reporting occurred during the quarter ended March 31, 2014 that has materially affected, or is reasonably likely to materially affect, Salisbury's internal control over financial reporting.

## PART II. OTHER INFORMATION

### Item 1. LEGAL PROCEEDINGS

The Bank is involved in various claims and legal proceedings arising out of the ordinary course of business.

As previously disclosed, the Bank, individually and in its capacity as a former Co-Trustee of the Erling C. Christophersen Revocable Trust (the "Trust"), was named as a defendant in litigation filed in the Connecticut Complex Litigation Docket in Stamford, captioned John Christophersen v. Erling Christophersen, et al., X08-CV-08-5009597S (the "First Action"). The Bank also was a counterclaim-defendant in related mortgage foreclosure litigation in the Connecticut Complex Litigation Docket in Stamford, captioned Salisbury Bank and Trust Company v. Erling C. Christophersen, et al., X08-CV-10-6005847-S (the "Foreclosure Action," together with the First Action, the "Actions"). The other parties to the Actions were John R. Christophersen; Erling C. Christophersen, individually and as Co-Trustee of the Trust; Bonnie Christophersen and Elena Dreiske, individually and as Co-Trustees of the Mildred B. Blount Testamentary Trust; People's United Bank; Law Offices of Gary Oberst, P.C.; Rhoda Rudnick; and Hinckley Allen & Snyder LLP.

The Actions involved a dispute over title to certain real property located in Westport, Connecticut that was conveyed by Erling Christophersen, as grantor, to the Trust on or about August 8, 2007. Subsequent to this conveyance, the Bank loaned \$3,386,609 to the Trust, which was secured by a commercial mortgage in favor of the Bank on the Westport property. This mortgage is the subject of the Foreclosure Action brought by the Bank.

As previously disclosed, John R. Christophersen claimed an interest in the Westport real property transferred to the Trust and sought to quiet title to the property and to recover money damages from the defendants for the alleged wrongful divestiture of his claimed interest in the property.

On June 25, 2012, the Bank and John R. Christophersen entered into a Settlement Agreement which resolved all differences between John R. Christophersen and the Bank, and resulted in the withdrawal (with prejudice) of the claims made by John R. Christophersen. All claims against the Bank have been withdrawn and the Bank is no longer a defendant or counterclaim defendant in any litigation involving the Actions. As an additional consequence of the Settlement Agreement, Bonnie Christophersen, Elena Dreiske and People's United Bank are no longer parties to any of the litigation referenced above.

On July 27, 2012, Erling Christophersen filed a Motion to Restore the First Action, and on October 15, 2012 filed a Motion to Stay the Foreclosure Action pending resolution of the Motion to Restore. The Bank opposed both motions. On February 1, 2013, the Court issued orders denying both motions. On February 14, 2013, Erling Christophersen appealed the orders denying his Motion to Restore the First Action, and Motion to Stay the Foreclosure Action.

The Appellate Court dismissed the appeal of the Foreclosure Action in May 2013, and later denied Erling Christophersen's motion for reconsideration of its decision.

The Bank continues to proceed in its Foreclosure Action against Erling Christophersen. Erling Christophersen asserted two special defenses and set-off claims alleging (1) that the Bank failed to defend the title claims against the properties, and (2) that the Bank took certain trustee fees without approval. The Bank moved to strike the special defenses and set off claims. In a decision issued on November 6, 2013, the court granted the motion to strike as to the second special defense and set off, but denied the motion as to the first special defense and set off. Trial began on February 4, 2014, and concluded on February 14, 2014. Post-trial briefs are due in mid-April, 2014, and a decision is expected thereafter.

Erling Christophersen's appeal of the order denying his Motion to Restore the First Action remains pending, and was heard by the Appellate Court on March 10, 2014. The Court has now taken the matter under advisement and next it will write an opinion disposing of the appeal.

There are no other material pending legal proceedings, other than ordinary routine litigation incident to the registrant's business, to which Salisbury is a party or of which any of its property is subject.

Item 1A. RISK FACTORS
