NOTES TO UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Consolidation

Our fiscal year is reported on a 52/53-week period ending on the Saturday nearest to September 30. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, fiscal periods in this report are presented using the calendar month end as outlined in the table below.

	Period End	
	Actual	Presented as
Current quarter	December 28, 2013	December 31, 2013
Prior year quarter	December 29, 2012	December 31, 2012
Prior year end	September 28, 2013	September 30, 2013

Our consolidated interim financial statements include the accounts of International Game Technology, including all majority-owned or controlled subsidiaries and VIEs for which we are the primary beneficiary. All inter-company accounts and transactions have been eliminated.

Our consolidated interim financial statements for the first quarter ended December 31, 2013 were prepared without audit on a basis consistent with the comparative prior year quarter ended December 31, 2012, and as appropriate, with the audited financial statements for the year ended September 30, 2013. Certain information and footnote disclosures have been condensed or omitted in conformity with SEC and US GAAP guidance for interim reviews.

Our consolidated interim financial statements include all adjustments of a normal recurring nature necessary to fairly state our consolidated results of operations, financial position, and cash flows for all periods presented. Interim period results are not necessarily indicative of full year results. This Quarterly Report on Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2013.

Unless otherwise indicated in this report:

references to years relate to our fiscal years ending September 30

dollar amounts in tables are presented in millions, except per share amounts and par value

current refers to the quarter ended December 31, 2013

Use of Estimates

We are required to make estimates, judgments and assumptions that we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, and information available from other outside sources. Our estimates affect reported amounts for assets, liabilities, revenues, expenses, and related disclosures. Actual results may differ from initial estimates.

Recently Adopted Accounting Standards or Updates

Offsetting Assets and Liabilities

In December 2011, the FASB issued an ASU to require new disclosures associated with offsetting financial instruments and derivative instruments on the balance sheet that will enable users to evaluate the effect on an entity's financial position. In January 2013, the FASB issued an ASU to clarify the scope of disclosures about offsetting assets and liabilities. The scope of the new disclosures was narrowed to include derivatives, repurchase agreements and securities borrowing and lending that are offset or subject to an enforceable master netting arrangement or similar agreement. Both ASUs were effective for our 2014 first quarter and had no material impact on our financial statements.

Recently Issued Accounting Standards or Updates—Not Yet Adopted

Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward Exists

In July 2013, the FASB issued an ASU requiring the netting of unrecognized tax benefits against a deferred tax asset for a loss or other carryforward that would apply in settlement of the uncertain tax position. This ASU will be effective for our 2015 first quarter and is not expected to have a material impact on our financial statements.

Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries

In March 2013, the FASB issued an ASU requiring the release of cumulative translation adjustment into net income when an entity either sells a part or all of its investment in or no longer holds a controlling financial interest in a foreign entity. This ASU will be effective prospectively for our 2015 first quarter and is not expected to have a material impact on our financial statements.

Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the FASB issued an ASU to require new disclosures for an entity that is jointly and severally liable to measure the obligation as the sum of the amount the entity has agreed with co-obligors to pay and any additional amount it expects to pay on behalf of a co-obligor. This ASU will be effective for our 2015 first quarter and is not expected to have a material impact on our financial statements.

2. VARIABLE INTERESTS AND AFFILIATES

Variable Interest Entities

New Jersey Trusts

New Jersey regulation requires that annuitized WAP jackpot payments to winners be administered through an individual trust set up for each WAP system. These trusts are VIEs and IGT is the primary consolidating beneficiary, because these VIE trusts are designed for the sole purpose of administering jackpot payments for IGT WAP winners and IGT guarantees all liabilities of the trusts. The assets of these consolidated VIEs can only be used to settle trust obligations and have been segregated on our balance sheet.

The consolidation of these VIEs primarily increases jackpot liabilities and related assets, as well as interest income and equivalent offsetting interest expense. Consolidated VIE trust assets and equivalent liabilities totaled \$45.7 million at December 31, 2013 and \$48.6 million at September 30, 2013.

Latin America Distributor

In March 2012, we contracted with a third party distributor in Latin America to sell IGT products. The distributor is a VIE as it was unable to finance its activities without additional support from IGT; however, the distributor was not consolidated because IGT does not have contractual or implied control. This arrangement was terminated by mutual agreement in January 2014.

Under the agreement, our maximum exposure at December 31, 2013 consisted of \$0.5 million in note financing provided for operating costs and contract financing under a revolving line of credit of \$13.0 million for IGT product purchases. Revenues recognized related to this distributor totaled \$2.2 million for the 2014 first quarter. Contracts and notes receivable due from this distributor totaled \$12.0 million at December 31, 2013 (\$9.8 million current and \$2.2 million non-current).

Valuation Techniques and Balance Sheet Presentation

Money market funds were primarily money market securities valued based on quoted market prices in active markets.

Investment securities were commercial paper debt securities valued based on quoted market prices for similar instruments, using observable market based inputs.

Derivative assets and liabilities were valued using quoted forward pricing from bank counterparties, LIBOR credit default swap rates for non-performance risk, forward yields for the 10-year treasury sourced from Bloomberg, and net settlement amounts where appropriate. These are presented primarily as components of other assets, other liabilities, notes payable, and AOCI. See Note 9.

Acquisition contingent earn-out payable related to DoubleDown reaching certain earnings targets was valued with a DCF model applied to the expected payments determined based on probability-weighted internal earnings projections. We applied a rate of probability (10% - 90%) to each outstanding scenario, as well as a risk-adjusted discount rate of 18%, to derive the estimated fair value at December 31, 2013. Changes in the projections and/or the probabilities are the most significant assumptions and result in directionally similar changes in the fair value. Discount rate changes cause a directionally opposite change in the fair value. Acquisition contingent earn-out payable was presented as a component of other liabilities, \$60.0 million current and \$50.9 million noncurrent at December 31, 2013 versus \$57.6 million current and \$48.8 million noncurrent at September 30, 2013. The payable fair value increased \$4.5 million during the first quarter ended December 31, 2013 primarily due to the time-value of money.

Valuation Techniques and Balance Sheet Presentation

Jackpot investments were valued based on quoted market prices.

Contracts and notes receivable were valued using DCF, incorporating expected payments and market interest rates relative to the credit risk of each customer (low 7.5 %, medium 8.0 %, high 9.5 % - 11.25 %). Credit risk is determined on a number of factors, including customer size, type, financial condition, historical collection experience, account aging, and credit ratings derived from credit reporting agencies and other industry trade reports. Contracts are secured by the underlying assets sold and notes are secured by the developed property and/or other assets. The high risk category includes most of our development financing loans in new markets and customers in regions with a history of currency or economic instability, such as Latin America. See Notes 3 and 4.

Jackpot liabilities were valued using DCF, incorporating expected future payment timing, estimated funding rates based on the treasury yield curve, and IGT's nonperformance credit risk. Expected annuity payments over 1-25 years

(average 10 years) were discounted using the 10-year treasury yield curve rate (3.00%) for the estimated funding rate and the 10-year credit default swap rate (1.65%) for nonperformance risk. The present value (carrying value) of the expected lump sum payments were discounted using the 1-year treasury yield curve rate (.11%) with the 1-year credit default swap rate (.22%) for the current amounts and the 2-year treasury yield curve rate (.39%) with the 2-year credit default swap rate (.34%) for noncurrent amounts. Significant increases (decreases) in any of these inputs in isolation would result in a lower (higher) fair value measurement. Generally, changes in the estimated funding rates do not correlate with changes in nonperformance credit risk.

The majority of our debt was level 1 and valued using quoted market prices or dealer quotes for the identical financial instrument when traded as an asset in an active market. Outstanding borrowings, if any, under our revolving credit facility are level 2 and fair value is determined using DCF of expected payments at current borrowing rates. Carrying values in the table excluded swap adjustments and equity components of convertible debt.

Level 3 Valuation Process

Our valuation policies and procedures are determined by the Accounting Department, which ultimately reports to the Chief Financial Officer, in coordination with appropriate business asset owners and third-party valuation services when needed. Changes in fair value and methods for calibration, back testing, and other testing procedures of pricing models are evaluated through analytical review by managers of the responsible Accounting Department quarterly, by the Global Controller at inception and periodically with significant changes. Material valuations are discussed with the Audit Committee at inception and periodically if changes are significant or if impairment charges are recorded. Third-party information is evaluated for consistency with the FASB ASC for fair value measurement through analytical review and in-depth discussions with a variety of valuation experts.

Unobservable inputs are used only to the extent that observable inputs are not available and reflect management assumptions that cannot be corroborated with observable market data about what market participants would use in pricing the asset or liability, including assumptions about risk. Our unobservable inputs consist primarily of expected cash flows, stock price volatility, and other rates derived through extrapolation or interpolation. These inputs are developed based on the best information available, including trends deduced from available historical information and future expectations, using company specific data and market or industry published data. These inputs are validated for reasonableness by analytic comparison to other relevant valuation statistics whenever possible. Unobservable inputs depend on the facts and circumstances specific to a given asset or liability and require significant professional judgment.

9. FINANCIAL DERIVATIVES

Foreign Currency Hedging

The notional amount of foreign currency contracts hedging our exposure related to monetary assets and liabilities denominated in nonfunctional currency totaled \$44.3 million at December 31, 2013 and \$91.9 million at September 30, 2013.

Presentation of Derivative Amounts

Except for net interest receivable related to our interest rate swaps, all derivatives are recorded on a gross basis.

11. CONTINGENCIES

Litigation

From time to time, in the normal course of its operations, the Company is a party to litigation matters and claims. Litigation can be expensive and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict and the Company's view of these matters may change in the future as the litigation and events related thereto unfold. The Company expenses legal fees as incurred. The Company records a provision for contingent losses when it is both probable that a liability will be incurred and the amount or range of the loss can be reasonably estimated. Except as otherwise stated below, we have concluded that we cannot estimate the reasonably possible loss or range of loss, including reasonably possible losses in excess of amounts already accrued, for each specific matter disclosed below. An unfavorable outcome to any legal matter, if material, could have an adverse effect on the Company's operations or its financial position, liquidity or results of operations.

Atlantic Lotteries

In an action brought in the Supreme Court of New Foundland and Labrador by Babstock and Small as representatives of a purported class of persons allegedly harmed by VLT gaming in the Province of New Foundland and Labrador. Atlantic Lottery Corporation has impleaded VLC, Inc., IGT-Canada, Inc., International Game Technology and other third party defendants seeking indemnification for any judgment recovered against Atlantic Lottery Corporation in the main action. Plaintiffs filed a motion for class action certification on September 17, 2012. The Court has decided to address the motion for certification in two phases. Under Phase 1, the Court will determine whether the Plaintiffs have pleaded a cause of action. Hearings on Phase 1 were held on June 6 and 7, 2013. The Court has not yet issued a decision. Should the Court conclude that Plaintiffs have pleaded a cause of action, then, under Phase 2, the Court would determine the appropriateness of certification of the putative class.

Shareholder Actions

On April 8, 2011, the Company was nominally sued in a derivative complaint filed in the US District Court for the District of Nevada, captioned *Arduini v. Hart, et al.*, Case No. 3:11-cv-00255. Plaintiff purportedly brought this action on behalf of the Company. The complaint asserts claims against various current and former officers and directors of the Company, for breaches of fiduciary duties, unjust enrichment, abuse of control, gross mismanagement, waste of corporate assets, and contribution and indemnification. The complaint sought an unspecified amount of damages. A motion to dismiss was filed. On March 14, 2012, defendants' motion to dismiss the action was granted. On April 3, 2012, the plaintiff appealed to the US Court of Appeals for the Ninth Circuit. Oral argument has been scheduled for April 10, 2014.

Lightning Box Games

On July 30, 2013, IGT was sued in US District Court for the Northern District of Illinois for patent infringement by Lightning Box Games (LBG), captioned *Lightning Box Games PTY LTD. v. International Game Technology and Caesars Entertainment Corporation*, Case No. 13-cv-5423. LBG alleges infringement of two related patents for "Electronic System for Playing of Reel-Type Games," and specifically accuses IGT's MultiPLAY video slot machines of infringing one or more claims of the patents. LBG is seeking, among other items, preliminary and permanent injunctive relief, monetary damages resulting from the infringing conduct (including pre- and post-judgment interest), and court costs. IGT intends to vigorously defend against the claims asserted in this lawsuit.

Mark E Pollack Arbitration

In January 2013, IGT notified Mark E Pollack that it was terminating eight agreements between IGT and Mr. Pollack relating to services provided by Mr. Pollack (e.g., providing ideas for gaming machines and initiating and arranging meetings with various artists and intellectual property owners). Mr. Pollack disagreed that IGT could terminate the agreements and the parties entered mediation pursuant to the dispute resolution provisions in the respective agreements. On October 22, 2013, the parties filed arbitration demands submitting the dispute to arbitration before Judicial Arbitration Mediation Services (JAMS), captioned *International Game Technology v. Pollack*, Case No. 1260002648 and *Pollack v. International Game Technology*, Case No. 1260002648. Mr. Pollack is requesting unspecified monetary damages and injunctive relief. IGT is currently working with Mr. Pollack on the selection of an arbitrator to hear the dispute.

WMS Gaming, Inc.

2013 Northern District of Illinois

On July 2, 2013, IGT was sued by WMS Gaming, Inc. in US District Court for the Northern District of Illinois, captioned *WMS Gaming, Inc. v. IGT*, Case No. 1:13-cv-4788. The suit relates to a contract between the parties. WMS alleges that IGT breached the contract, anticipatorily repudiated the contract, breached the implied covenant of good faith and fair dealing, and violated the Nevada Unfair Trade Practices Act. WMS sought a temporary restraining order, which was denied. WMS is seeking, among other things, declaratory judgment, specific performance, injunctive relief, unspecified monetary damages, and attorneys' fees and costs. IGT intends to vigorously defend against the claims asserted in this lawsuit.

2013 Arbitration

Related to foregoing lawsuit, on September 10, 2013 IGT filed an arbitration with the American Arbitration Association (AAA) against WMS, captioned *IGT v. WMS Gaming, Inc.*, No. 79 517 112 13. IGT and WMS have a license agreement for Ticket-In-Ticket-Out (TITO) enabled gaming machines. IGT alleges WMS failed to pay license

fees owed on certain products covered by the agreement. IGT is seeking a judgment that WMS must pay license fees on certain products and monetary damages of \$50.0 million resulting from WMS's failure to pay license fees on those products.

2013 District of Nevada

Related to the foregoing lawsuit and arbitration, on October 22, 2013, WMS filed suit in the US District Court for the District of Nevada, captioned WMS Gaming, Inc. v. IGT, Case No. 3:13-cv-00583. WMS is seeking, among other things, a declaratory judgment that the arbitration provision of the license agreement is unenforceable, alleging that IGT is seeking to arbitrate non-arbitrable issues, and seeking a refund of royalties WMS has allegedly overpaid. WMS has filed a motion for preliminary injunction, seeking to enjoin the arbitration. IGT intends to vigorously defend against the claims asserted in this lawsuit.

Global Draw Ltd

On September 17, 2013, Global Draw Limited (an English company) issued proceedings in London against IGT-UK Group Limited (a wholly owned subsidiary of IGT) and IGT, captioned 2013 High Court of Justice (Commercial Court) in London, England, Case No. 2013, Folio 1246. The claim arises out of a Sale and Purchase Agreement dated April 26, 2011 (SPA) pursuant to which Global Draw purchased from IGT-UK all of the shares in an English company called Barcrest Limited. Global Draw seeks to claim against IGT-UK under the terms of indemnities and warranties contained in the SPA, and against IGT under the terms of a guarantee given by IGT in respect of the liabilities of IGT-UK. On November 7, 2013 IGT-UK filed and served a defense and counterclaim in response to the claim and IGT has also entered its defense. The claims assert damages of £1.3 million and US \$2.9 million excluding interest, plus other unquantified damages. IGT intends to vigorously defend against the claims asserted in this lawsuit.

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds not reflected in our balance sheet. We do not expect any material losses to result from these arrangements and are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to certain gaming operations equipment totaled \$19.5 million at December 31, 2013. We are liable to reimburse the bond issuer in the event of exercise due to our nonperformance.

Letters of Credit

Outstanding letters of credit issued under our domestic credit facility to ensure payment to certain vendors and governmental agencies totaled \$8.3 million at December 31, 2013.

IGT Licensor Arrangements

Our sales agreements that include software and IP licensing arrangements may require IGT to indemnify the third-party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark infringement, or trade secret misappropriation. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant settlement costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates for claims incurred but not reported.

State and Federal Taxes

We are subject to sales, use, income, gaming and other tax audits and administrative proceedings in various US federal, state, local, and foreign jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

Product Warranties

The majority of our products are generally covered by a warranty for periods ranging from 90 to 180 days. We estimated accrued warranty costs in the table below based on historical trends in product failure rates and expected costs to provide warranty services.

Three Months Ended December 31,	2013	2012
Beginning balance	\$4.4	\$4.2
Reduction for payments made	(1.4)	(2.5)
Accrual for new warranties issued	2.6	3.9
Adjustments for pre-existing warranties	(1.5)	(1.4)
Ending balance	\$4.1	\$4.2

12. INCOME TAXES

Our provision for income taxes is based on an estimated effective annual income tax rate, as well as the impact of discrete items, if any, occurring during the period. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized.

Our effective tax rate for the three months ended December 31, 2013 decreased to -4.9 % from 33.2% for the same prior year period. The current year effective tax rate was positively impacted by the settlement of income tax audits for fiscal years 1999, and 2006 through 2009.

At December 31, 2013, our gross UTBs totaled \$69.2 million, excluding related accrued interest and penalties of \$11.1 million. At December 31, 2013, \$52.3 million of our UTBs, including related accrued interest, penalties, and indirect effects in other jurisdictions, would affect our effective tax rate if recognized. During the three months ended December 31, 2013, our UTBs decreased \$40.0 million and related interest and penalties decreased \$12.2 million. We do not believe our total UTBs will change significantly during the next twelve months.

As of December 31, 2013 we effectively settled audits with the US tax authorities related to our fiscal year 1999 and 2006 through 2009 tax years. As a result of the settlement, we reduced our tax provision by \$29.6 million and our UTBs by \$33.1 million, inclusive of related interest, penalties and indirect effects in other jurisdictions.

We are also subject to examination in various state and foreign jurisdictions. We believe we have recorded all appropriate provisions for outstanding issues for all jurisdictions and open years. However, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

16. BUSINESS SEGMENTS

We view our business in the following two operating segments:

North America includes our operations associated with land-based and online-real money customers located in the US and Canada, as well as US-based online social gaming operations

International includes our operations associated with customers located in all other jurisdictions

Certain income and expenses related to company-wide initiatives primarily comprised of general and administrative costs and other income (expense) are managed at the corporate level and not allocated to an operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming products between operating segments. Segment accounting policies are consistent with those of our consolidated financial statements and segment profit is measured on the basis of operating income. Impairment and restructuring charges, if any, are reflected within the segment where actions occurred.

Our business segments are designed to allocate resources within a framework of management responsibility. Operating costs included in one segment may benefit other segments. Realignment of our business development and administrative functions may result in ongoing changes to allocations of operating cost amongst our operating segments.

17. SUBSEQUENT EVENT

In January 2014, the Argentina peso currency was devalued. Based on our net position at December 31, 2013, we expect to record an estimated currency exchange loss of approximately \$4.0 million during our 2014 second quarter as a result of remeasuring our peso-based assets and liabilities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following MDA is intended to enhance the reader's understanding of our operations and current business environment from the perspective of our company's management. The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2013, as well as the accompanying Consolidated Interim Financial Statements and Notes included in Item 1 of this Form 10-Q. FORWARD LOOKING STATEMENTS

This report contains statements that do not relate to historical or current facts, but are "forward looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments, or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, appear, believe, could, would, estimate, expect, indicate, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

our ability to successfully introduce new products and their impact on replacement demand

the timing, features, benefits, and expected continued or future success of new product introductions and ongoing product, marketing, and strategic initiatives

our expected future financial and operational performance

our strategic and operational plans, including our ability to implement and manage cost reduction initiatives

our leadership position in the gaming industry or in online casino-style social gaming

the advantages offered to customers by our anticipated products and product features

economic conditions and other factors affecting the gaming industry

gaming growth, expansion, and new market opportunities

expected trends in the demand for our products

developments with respect to economic, political, regulatory and other conditions affecting our international operations

mergers, acquisitions and divestitures, including the expected benefits of completed acquisitions and expectations for, possible acquisitions of, or investments in, businesses, products, and technologies

research and development activities, including anticipated benefits from such activities

fluctuations in future gross margins, tax rates, and liabilities

expectations regarding product sales or machine placements

legislative, legal or regulatory developments and related market opportunities

available capital resources to fund future operating requirements, capital expenditures, payment obligations, acquisitions, dividends, and share repurchases

losses from off-balance sheet arrangements

financial returns to shareholders related to management of our costs

the impact of recently adopted accounting pronouncements

the outcome and expense of litigation

Actual results could differ materially from those expressed or implied in our forward looking statements. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. Further information on potential factors that could affect our

financial condition, results of operations and business are included in this report and our other filings with the SEC. You should not assume at any point in the future that the forward looking statements in this report are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

OVERVIEW

International Game Technology is a global gaming company specializing in the design, development, manufacture, and marketing of casino-style gaming equipment, systems technology, and game content across multiple platforms—land-based, online real-money and online social. We are a leading supplier of gaming entertainment products worldwide and provide a diverse offering of quality products and services at competitive prices, designed to enhance the gaming player experience.

We derive our revenues from the distribution of casino games, gaming equipment and systems technology for land-based, online real-money, and online social markets. Operating results reviewed by our CEO encompass all revenue sources within each geographical region. We currently view our business in two operating segments, North America and International, each incorporating all revenue categories—Gaming Operations, Product Sales, and Interactive.

We measure segment profit on the basis of operating income. Certain income and expenses are managed at the corporate level and not allocated to an operating segment. Other segment and financial information is contained in our BUSINESS SEGMENT RESULTS below and Note 16.

SUMMARY RESULTS

First Quarters Ended December 31,	2013	2012	C h a n g e	
Revenues	\$541.2	\$530.3	\$10.9	2 %
Operating income	103.7	118.4	(14.7)	-12 %
Net Income	79.2	65.3	13.9	21 %
EPS	\$0.31	\$0.24	\$0.07	29 %

Quarters ended December 31, 2013 and 2012 compared

Revenues for our first quarter ended December 31, 2013 improved primarily due to an increase of \$18.0 million or 4% in North America, partially offset by a decrease of \$7.1 million or 6% in International. Interactive revenues increased \$21.7 million or 41%, primarily due to growing contributions from social gaming, and product sales revenues increased \$8.8 or 4%, primarily due to higher machine unit volume. These increases were partially offset by a decrease of \$19.6 million or 8% in gaming operations revenues, primarily due to installed base decline along with lower yield.

Operating income decreased as higher expenses outpaced revenue growth. Net income and EPS increased primarily due to a lower effective income tax rate of -4.9% versus 33.2% in the prior year quarter, primarily due to audit closures that reduced our provision for income taxes by \$29.6 million. EPS also benefitted from fewer shares outstanding due to share repurchases.

For a more in-depth analysis of our results, see CONSOLIDATED RESULTS directly following this OVERVIEW.

BUSINESS TRENDS

Declines in gross gaming revenues adversely impacted our first quarter results, with weakness in most domestic casino markets and a particularly sharp decline in December. In addition, economic uncertainty continues to inhibit our customers' willingness to purchase gaming machines and increasing competition continues to pressure market share. Moreover, government regulation and restrictions, such as import restrictions and regulatory compliance delays, are impeding our ability to satisfy market demand for our products in certain international jurisdictions. In this market

environment, we plan to re-evaluate our operating structure and implement cost reduction initiatives while investing in opportunities that we believe will drive growth.

We are addressing challenges in gaming operations by delivering innovative new game content and mitigating yield pressure through disciplined capital deployment. Product sales machine shipments improved in the first quarter; however, for the full fiscal year we anticipate a decline in new casino openings in the domestic market and do not foresee any replacement cycle opportunities of the scale presented by the Canadian government lottery contracts in 2013. In international markets, we are expanding our portfolio of localized content and believe more long-term growth opportunities exist outside of North America, particularly in Asia.

We expect our interactive business will continue to provide growth opportunities. With respect to online social gaming, our DoubleDown Casino® substantially grew revenues year-over-year and produced positive earnings in the first quarter. The dynamic growth of social networking and entertainment consumption on mobile devices, such as smart phones and tablets, continues to fuel growth in online social gaming. We believe that online gaming appeals to a broader consumer demographic than land-based gaming. Our November 2013 launch of online real-money games in New Jersey provides optimism for additional domestic opportunities.

STRATEGIC OBJECTIVES

We continue to partner with our customers to build stronger relationships and deliver innovative gaming products and services. We remain focused on the following strategic objectives for 2014, designed to improve our business and increase shareholder value, with adjustments as new opportunities arise and the industry evolves:

- (1) Assembling the most compelling and highest performing game library available—serving both operators and players
- (2) Expanding and managing the broadest distribution network globally
- (3) Maximizing shareholder value through the efficient operation of our business, the optimal generation of cash flow, and the responsible, dependable return of capital through dividends and share repurchases

CONSOLIDATED RESULTS – A Year Over Year Comparative Analysis

First Quarters Ended December 31,	2013	2012	C h a n g e	
Revenues	\$541.2	\$530.3	\$10.9	2 %
Gross margin	57 %	58 %	(1)	pp
Operating income	\$103.7	\$118.4	\$(14.7)	-12 %
Margin	19 %	22 %	(3)	pp
Net income	\$79.2	\$65.3	\$13.9	21 %
EPS	\$0.31	\$0.24	\$0.07	29 %

Quarters ended December 31, 2013 and 2012 compared

Total revenues improved primarily due to an increase of \$18.0 million in North America, partially offset by a decrease of \$7.1 million in International. Increases of \$23.5 million in social gaming revenues and \$8.8 million in product sales revenues were partially offset by a decrease of \$19.6 million in gaming operations revenues. Total gross margin decreased due to margin decline in gaming operations and product sales, partially offset by interactive margin improvement.

Operating income and margin declined primarily due to increased operating expenses outpacing revenue growth. See OPERATING EXPENSES below for additional information.

Net Income and EPS increased primarily due to a tax benefit of \$29.6 million resulting from audit closures discussed below under INCOME TAX PROVISIONS. EPS also benefitted from fewer shares outstanding due to share repurchases.

GAMING OPERATIONS

First Quarters Ended December 31,	2013	2012	C h a n g e	
Revenues	\$223.0	\$242.6	\$(19.6)	-8 %
Gross margin	61 %	63 %	(2)	pp
Installed base (units '000)	54.3	56.8	(2.5)	-4 %
MegaJackpots® (premium brand)	24.9	26.6	(1.7)	-6 %

PRODUCT SALES

First Quarters Ended December 31,	2013	2012	C h a n g e	
Revenues	\$ 243.6	\$ 234.8	\$ 8.8	4 %

New/expansion	4.4	2.5	1.9	76 %
Replacement	8.6	6.8	1.8	26 %

⁽¹⁾ correlates with revenues recognized; ⁽²⁾ includes deferred revenue units

Quarters ended December 31, 2013 and 2012 compared

Product sales revenue grew primarily due to increased North America machine sales. Machine units recognized increased, with growth in both new/expansion and replacement units. The increase in machine units recognized was driven primarily by an increase of 2,500 video poker replacement units mostly related to a multi-property corporate contract and 1,700 incremental new units in Ohio and California, partially offset by a decrease of 1,300 VLT replacement units in Canada. Non-machine revenues decreased primarily due to lower license fee revenue, partially offset by increased systems sales.

ASP declined primarily due to a greater mix of lower-priced video poker units with volume discounts, under a multi-property contract, as well as unfavorable changes in foreign exchange rates. Gross margin decline was attributed to lower license fee revenue primarily due to the prior year \$5.0 million royalty settlement, as the impact of discounts was offset by favorable product mix.

* as a single application with multiple games, active users equal unique users

Quarters ended December 31, 2013 and 2012 compared

Interactive revenue grew, primarily from growth in our DoubleDown Casino®. Social gaming revenues improved as a result of increases in both bookings per DAU (up 35%) and DAU (up 17%). These improvements were driven primarily by the continued roll-out of IGT content to the DoubleDown Casino® and effective player marketing strategies. Mobile applications comprised 28% of social gaming bookings compared to 12% in the prior year quarter.

International IGTi revenues declined with an improved gross margin, primarily due to the strategic shutdown of certain content that carried higher royalty costs, resulting in a higher overall gross profit. Mobile generated 29% of online casino revenues compared to 18% in the prior year quarter.

Interactive gross margin growth was primarily due to the increasing contribution from social gaming, with revenues increasing at a greater pace than amortization. Amortization in cost of sales for DoubleDown acquired developed technology totaled \$2.7 million, up from \$2.3 million in the prior year quarter.

OPERATING EXPENSES

First Quarters Ended December 31,	2013	2012	C h a n g e	
Selling, general and administrative	\$117.8	\$100.2	\$(17.6)	-18%
Research and development	60.3	54.4	(5.9)	-11%

Contingent acquisition-related costs	11.3	17.5	6.2	35%
Total operating expenses	\$206.1	\$191.1	\$(15.0)	-8%

Quarters ended December 31, 2013 and 2012 compared

Increases in operating expenses included:

\$8.4 million related to social gaming, including \$5.0 million of advertising linked to player marketing and \$2.0 million of R&D

\$5.6 million for professional fees, primarily in legal and compliance

\$2.4 million of incremental investment in R&D for land-based and online real-money gaming

\$2.1 million for severance

Lower acquisition-related charges (mostly related to DoubleDown) are outlined in the table below. Factors driving changes in the contingent acquisition costs are discussed in Note 8.

Acquisition-related charges	2013	2012
Earn-out	\$4.7	\$2.1
Retention	6.6	15.4
Total contingent costs	11.3	17.5
Amortization of acquired intangibles	3.4	4.4

Total other income (expense), net	\$(28.2)	\$(20.7)	\$(7.5)	-36%

Quarters ended December 31, 2013 and 2012 compared

The unfavorable change in total other income (expense) was primarily due to increased interest expense related to additional bonds issued in September 2013 and an increased fair value loss adjustment on interest rate swaps.

WAP interest income and expense relates to previous jackpot winner liabilities and accretes at approximately the same rate. WAP interest income also includes earnings on restricted cash and investments held for future winner payments.

INCOME TAX PROVISION (See Note 12)

First Quarters Ended December 31,	2013	2012	C h a n g e
Income tax provision (benefit)	\$(3.7)	\$32.4	\$ 36.1
Effective tax rate	-4.9%	33.2%	38.1 pp

Our 2014 effective tax rate was favorably impacted by the settlement of US Federal audits, which reduced our income tax provision by \$29.6 million. In general, differences between our effective tax rate and the US federal statutory rate of 35% principally result from the geographical distribution of taxable income, differences between the book and tax treatment of certain permanent items, and changes in unrecognized tax benefits.

NORTH AMERICA SEGMENT RESULTS

First Quarters Ended December 31,	2013	2012	C h a n g e
Total Revenues	\$427.4	\$409.4	\$ 18.0 4 %
Gross Margin	57 %	60 %	(3)pp
Operating Income	\$105.9	\$112.4	\$(6.5) -6 %
Margin	25 %	27 %	(2)pp

Quarters ended December 31, 2013 and 2012 compared

North America revenues improved driven by increases of \$23.9 million in interactive and \$11.1 million in product sales, partially offset by a decline in gaming operations of \$17.0 million. Total gross margin declined due to lower margins in game operations and product sales, partially offset by higher interactive margin. Operating income and margin declined as a result higher operating expenses.

NORTH AMERICA GAMING OPERATIONS

First Quarters Ended December 31,	2013	2012	C h a n g e

Quarters ended December 31, 2013 and 2012 compared

North America product sales revenue growth was driven primarily by higher machine sales. The increase in machine units recognized was driven primarily by an increase of 2,500 video poker replacement units mostly related to a multi-property corporate contract and 1,700 incremental new units in Ohio and California, partially offset by a decrease of 1,300 VLT replacement units in Canada. Non-machine revenues decreased primarily due to a prior year patent royalty settlement of \$5.0 million. Machine ASP declined primarily due to a greater mix of lower-priced video poker units with volume discounts, under a multi-property contract, as well as unfavorable changes in foreign exchange rates. Gross margin decline was attributed to lower license fee revenue primarily due to the prior year \$5.0 million royalty settlement, as the impact of discounts was offset by favorable product mix.

Quarters ended December 31, 2013 and 2012 compared

North America interactive revenues increased primarily due to growth in social gaming. Our DoubleDown Casino® social gaming revenues continue to improve as a result of increases in both DAU and bookings per DAU. These improvements were driven primarily by the continued roll-out of IGT content to the DoubleDown Casino® and effective player marketing strategies. Mobile comprised 28% of social gaming bookings compared to 12% in the prior year quarter. Gross margin growth was primarily the result of a more favorable contribution from DoubleDown, with revenues growing at a greater pace than amortization expense.

Yield (average revenue per unit per day - \$0.00)	\$26.32	\$27.15	\$(0.83)	-3 %

Quarters ended December 31, 2013 and 2012 compared

International gaming operations revenues decreased primarily due to lower yields along with installed base decline. Gross margin increased primarily due to lower depreciation. Installed base decline was driven by lease operations units that were converted to for-sale units and casino closures. Yield declined primarily due to unfavorable changes in foreign exchange rates and lower play levels.

INTERNATIONAL PRODUCT SALES

First Quarters Ended December 31,	2013	2012	C h a n g e	
Revenues	\$73.6	\$75.9	\$(2.3)	-3 %

Quarters ended December 31, 2013 and 2012 compared

International product sales revenue decreased primarily due to unfavorable changes in foreign exchange rates and targeted promotional discounting. Unit decline in our Latin America region of 44% was partially offset by an increase of 23% in the Asia-Pacific region. Non-machine revenues increased as a result of higher systems sales. Gross margin improved primarily due to a greater mix of non-machine sales and lower machine costs. ASP declined primarily due to unfavorable changes in foreign currency rates.

INTERNATIONAL INTERACTIVE

Gross margin	66 %	50 %	16	pp

Quarters ended December 31, 2013 and 2012 compared

International IGTi revenues declined with an improved gross margin, primarily due to the strategic shutdown of certain content that carried higher royalty costs, resulting in a higher overall gross profit.

LIQUIDITY AND CAPITAL RESOURCES

SOURCES OF LIQUIDITY

At December 31, 2013, our principal sources of liquidity were cash and equivalents and amounts available under our revolving bank credit facility discussed below under CREDIT FACILITIES AND INDEBTEDNESS. Other potential sources of capital include, but are not limited to, the issuance of debt and equity securities. Based on past performance and current expectations, we believe the combination of these resources will satisfy our needs for working capital, jackpot liabilities, capital expenditures, debt service, and other liquidity requirements associated with our existing operations into the foreseeable future.

Selected Financial Information and Statistics

	December 31, 2013	September 30, 2013	Increase (Decrease)
Cash and equivalents	\$ 480.6	\$ 713.3	\$ (232.7)
Accounts receivable, net	338.0	348.6	(10.6)
Inventories	74.5	90.1	(15.6)
Working Capital	117.9	267.5	(149.6)
Trailing-twelve month statistics:			
Days sales outstanding (excluding contracts and notes)	52	54	(2)
Inventory turns	7.1	5.8	1.3

Cash and equivalents decreased during the three months ended December 31, 2013 primarily due to \$211.0 million cash used for share repurchases (including payments for net shares settled), investment securities of \$70.6 million, and dividends paid of \$25.9 million. These decreases were primarily offset by cash generated from operations of \$76.1 million. Restricted cash and investments, as well as jackpot annuity investments, are used for funding jackpot winner payments and online player deposits.

Foreign subsidiary operations held 21% of our cash and equivalents at December 31, 2013 and 17% at September 30, 2013. In January 2014, the Argentina peso currency was devalued. Based on our net position at December 31, 2013, we expect to record an estimated currency exchange loss of approximately \$4.0 million during our 2014 second quarter as a result of remeasuring our peso-based assets and liabilities.

Working capital decreased primarily due to the share repurchases under the accelerated share repurchase transaction. See Note 14 for more information about the transaction.

Inventory turns increased with lower inventory due to customer deliveries in our 2014 first quarter. Days sales outstanding decreased as revenues and collections on accounts receivable increased.

Cash Flows Summary

Three Months Ended December 31,	2013	2012	Favorable (Unfavorable)
Operations	\$76.1	\$94.5	\$ (18.4)
Investing	(77.3)	(9.8)	(67.5)
Financing	(229.1)	(89.3)	(139.8)
Effects of exchange rates	(2.4)	(1.0)	(1.4)
Net Change	\$(232.7)	\$(5.6)	\$ (227.1)

Operating cash flows decreased primarily due to increased cash used in operating assets and liabilities of \$20.3 million related to variations in business volume and payment timing, partially offset by higher earnings. Increased cash used of \$40.5 million for timing of income tax payments and less cash from receivables of \$27.6 million were partially offset by less cash used of \$32.5 million for accounts payable and accrued liabilities and \$13.0 million for inventories.

31

Increased cash used for investing was primarily due to purchases of investment securities of \$70.6 million and an increase in restricted cash of \$6.5 million partially offset by lower capital expenditures (see table below).

	Increase		
Three Months Ended December 31,	2013	2012	(Decrease)
Property, plant and equipment	\$7.6	\$7.3	\$ 0.3
Gaming operations equipment	16.9	30.1	(13.2)
Intellectual property	0.1	0.2	(0.1)
Total capital expenditures	\$24.6	\$37.6	\$ (13.0)

Increased cash used for financing was primarily due to an increase of \$211.0 million cash used for share repurchases, including net shares, partially offset by less cash used in net debt repayments of \$75.0 million.

During the first three months of 2014, 8.2 million shares were delivered under the \$200.0 million accelerated share repurchase transaction prepaid in November 2013. See Note 14 for more information about this transaction.

CREDIT FACILITIES and INDEBTEDNESS (See Note 10)

At December 31, 2013, no borrowings were outstanding on our \$1.0 billion revolving credit facility, \$972.2 million was available, and \$27.8 million was reserved for letters of credit and performance bonds. We were in compliance with all debt covenants at December 31, 2013, with an interest coverage ratio of 11.2:1 and a net funded debt leverage ratio of 2.4:1.

The credit facility interest rates and facility fees are based on our public debt ratings or our net funded debt to EBITDA ratio, whichever is more favorable to IGT. Net funded debt is defined as debt minus any unrestricted cash and investments in excess of \$150.0 million. At December 31, 2013, the credit facility carried an interest rate of LIBOR plus 100 bps and a facility fee of 17.5 bps.

The credit facility carries no limitations on shares repurchases or dividend payments provided no default exists and includes the following covenants (all terms as defined in the facility documents):

- a minimum ratio of 3.0 adjusted EBITDA to interest expense (interest coverage ratio)
- a maximum ratio of 3.5 for net funded debt to adjusted EBITDA (net funded debt leverage ratio)
- certain restrictions on our ability to:
 - § pledge the securities of our subsidiaries
 - § permit our subsidiaries to incur or guaranty additional debt, or enter into swap agreements
 - § incur liens
 - § merge with or acquire other companies, liquidate or dissolve
 - § sell, transfer, lease or dispose of all or substantially all assets
 - § change the nature of our business

The facility specifies a number of events of default (some of which are subject to applicable grace or cure periods), including failure to make timely principal and interest payments or satisfy the covenants. An event of default, if not cured, could cause the entire outstanding borrowings under the credit facility to become immediately due and payable, lenders may cease making loans and/or terminate commitments, and cross-default provisions may be triggered in other debt issuances.

3.25% Convertible Notes

During the period beginning February 2, 2014 through the close of business on April 29, 2014, our 3.25% Convertible Notes will be convertible into cash up to the aggregate principal amount of each note and if applicable, shares of our common stock for any conversion value in excess of the principal amount as determined per the indenture. For additional information, see Item 8--Note 12 of our Annual Report on Form 10-K for the year ended September 30, 2013.

FINANCIAL CONDITION

	December 31, 2013	September 30, 2013	Increase (Decrease)
Assets	\$ 4,347.5	\$ 4,612.8	\$ (265.3)
Liabilities	3,242.6	3,358.7	(116.1)
Total Equity	1,104.9	1,254.1	(149.2)

Changes During The Three Months Ended December 31, 2013

Total assets decreased primarily due to reductions in:

Cash, equivalents and short term investments of \$162.0 million mostly related to the accelerated share repurchase transaction

taxes deferred and receivable of \$45.7 million mostly related to audit closures and tax payments timing

net property, plant and equipment of \$16.6 million mostly related to depreciation

inventories of \$15.6 million related mostly to fulfillment of customer orders

net other intangible assets of \$13.4 million mostly related to amortization

other assets related to the fair value adjustment on our interest rate swaps of \$11.1 million

Total liabilities decreased primarily due to reductions in:

UTBs of \$56.8 million primarily resulting from audit closures

accrued employee benefits of \$29.3 million related to payment timing

accounts payable of \$13.1 million related to payment timing

jackpot liabilities of \$12.3 million due to variations in the timing of jackpots, winner payments, volume of play, and applicable interest rates

Total equity decreased primarily due to share repurchases and dividends partially offset by increased earnings.

CONTRACTUAL OBLIGATIONS

There have been no significant changes in our contractual obligations since those presented in Item 7 of our Annual Report on Form 10-K for the year ended September 30, 2013.

Arrangements with Off-Balance Sheet Risk

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

out of our breach of agreements with those parties

from services to be provided by us

from IP infringement claims made by third parties

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, which may cover our liabilities arising from these indemnification obligations in certain circumstances.

It is not possible to determine the maximum potential obligations under these indemnification undertakings due to the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

We do not expect any material losses to result from these arrangements and do not rely on off-balance sheet financing arrangements to fund our operations. See Note 11.

RECENTLY ISSUED ACCOUNTING STANDARDS OR UPDATES

There are no recently issued accounting standards or updates expected to have a material impact on our financial statements. See Note 1.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with US GAAP. Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understand and evaluate our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. The following accounting estimates are considered the most sensitive to changes from external factors.

- revenue recognition
- goodwill, other intangible assets, and royalties
- jackpot liabilities and expenses
- inventory and gaming operations equipment
- income taxes

There have been no significant changes in our critical accounting estimates since those presented in Item 7 of our Annual Report on Form 10-K for the year ended September 30, 2013.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company's market risk profile has not changed materially during the first three months of 2014 since those presented in Item 7A of our Annual Report on Form 10-K for the year ended September 30, 2013.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate, to allow for timely decisions regarding required disclosures. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including our CEO and CFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

As a part of our normal operations, we update our internal controls as necessary to accommodate any modifications to our business processes or accounting procedures. No changes occurred during the most recent quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

For a description of our material legal proceedings, see Note 11, which is incorporated by reference in response to this item.

Item 1A. Risk Factors

A description of our risk factors can be found in Part I, Item 1A of our Annual Report on Form 10-K for the year ended September 30, 2013. There were no material changes to those risk factors during the three months ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Share Repurchases

The purpose of our common stock repurchase plan is to increase shareholder value and to reduce outstanding share count dilution. On June 13, 2012, our Board of Directors authorized share repurchases of up to \$1.0 billion with no expiration date specified. We may use open market or privately negotiated transactions, as well as Rule 10b5-1 trading plans, depending on market conditions and other factors. See Note 14 for a description of our accelerated share repurchase transaction executed in November 2013.
