**Item 5. Other Events.**

On May 30, AXT, Inc., a Delaware corporation ( AXT or the Company ), announced that in the second quarter of 2002, in connection with its ongoing review of its portfolio of assets, AXT performed a balance sheet review that identified assets whose carrying value amounts are not recoverable. AXT calculated the present value of expected cash flows of certain operating assets to determine their fair value. As a result, AXT will record asset impairment charges for the write-down of fixed assets totaling \$24.0 million. This non-cash impairment charge consists of \$14.1 million related to excess capacity at AXT's Fremont substrate facility, and \$9.9 million in the opto-electronics segment reflecting the outlook for slow market improvement for communication laser diodes. Additionally, AXT will continue to assess the recoverability of its investment in Finisar Corporation common stock (Nasdaq: FNSR), and may take further impairment charges on this investment at quarter end.

The Company expects that pro forma operating results, excluding the non-cash impairment charges, for the second quarter ending June 30, 2002 will be in line with previously announced guidance. The substrate business is expected to achieve three to six percent sequential revenue growth. The LED business is expected to grow 15 to 20 percent compared with the first quarter of 2002 and remains capacity constrained.
