(State or other jurisdiction of
incorporation or organization)

20-5361360

(IRS Employer
Identification No.)

10350 Science Center Drive, Suite 210,

92121

San Diego, California

(Address of principal executive offices)

(Zip Code)

(858) 480-3100

(Registrant's telephone number, including area code)

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13, or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

As of April 30, 2009, there were approximately 103,091,858 shares of the Registrant's common stock outstanding.

NEXTWAVE WIRELESS INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Significant Accounting Policies

Financial Statement Preparation

The condensed consolidated financial statements of NextWave Wireless Inc. (together with its subsidiaries, "NextWave", "we", "our" or "us") are unaudited. We have prepared the condensed consolidated financial statements in accordance with the rules and regulations of the United States Securities and Exchange Commission ("SEC"), and therefore, certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. In the opinion of management, the accompanying condensed consolidated financial statements for the periods presented reflect all adjustments necessary to fairly state our financial position, results of operations and cash flows, including adjustments related to asset impairment write-offs and restructuring-related charges. These condensed consolidated financial statements should be read in conjunction with our audited financial statements for the year ended December 27, 2008, included in our Annual Report on Form 10-K filed with the SEC on April 2, 2009.

Basis of Presentation and Liquidity

The accompanying consolidated financial statements have been prepared assuming that we will continue as a going concern. This basis of accounting contemplates the recovery of our assets and the satisfaction of our liabilities in the normal course of business. We generated net losses of \$82.2 million and \$95.0 million for the three months ended March 28, 2009 and March 29, 2008, respectively, and have an accumulated deficit of \$982.5 million at March 28, 2009. We used cash from operating activities of our continuing operations of \$32.3 million and \$31.0 million for the three months ended March 28, 2009 and March 29, 2008, respectively. We had net a net working capital deficit of \$4.0 million at March 28, 2009.

We have funded our operations, business combinations, strategic investments and wireless spectrum license acquisitions primarily with the \$550.0 million in cash received in our initial capitalization in April 2005, the net proceeds of \$295.0 million from our issuance of 7% Senior Secured Notes (the "Senior Notes") in July 2006, the net proceeds of \$351.1 million from our issuance of Series A Senior Convertible Preferred Stock (the "Series A Preferred Stock") in March 2007, which, in October 2008, we exchanged for Third Lien Subordinated Secured Convertible Notes due 2011 (the "Third Lien Notes") in the aggregate principal amount of \$478.3 million, and the net proceeds of \$87.5 million from our issuance of Senior-Subordinated Secured Second Lien Notes due 2010 (the "Second Lien Notes") in October 2008. We did not receive any proceeds from the issuance of the Third Lien Notes.

Our total unrestricted cash, cash equivalents and marketable securities held by continuing operations at March 28, 2009 totaled \$18.7 million.

In an effort to reduce our future working capital requirements and in order to comply with the terms of our Senior Notes, Second Lien Notes and Third Lien Notes, in the second half of 2008, our Board of Directors approved the implementation of a global restructuring initiative, pursuant to which we have divested, either through sale, dissolution or closure, our network infrastructure businesses and our semiconductor business, and we are required to, among other things, pursue the sale of certain of our other businesses and assets, including our wireless spectrum licenses, and complete other cost reduction actions. The actions contemplated under our global restructuring initiative are described in more detail below under the heading "Restructuring Initiative and Discontinued Operations".

Our Senior Notes, Second Lien Notes and Third Lien Notes require that the net proceeds from any sales or dispositions of assets be applied towards the repayment of the notes, rather than being used to fund our ongoing operations. Additionally, the Senior Notes and Second Lien Notes require that we maintain a minimum cash balance of \$5.0 million ("Minimum Balance Condition"). Failure to comply with the Minimum Balance Condition results in an immediate event of default.

In April 2009, we entered into a binding commitment letter with Navation, Inc., an entity controlled by Allen Salmasi, our Chairman, to provide up to \$15 million in working capital financing. Up to \$7.5 million of the obligation to provide working capital financing has been assigned to Sola Ltd., a holder of our Second Lien Notes, Third Lien Notes and common stock warrants. The terms of the commitment letter provide that we will be entitled to borrow up to \$15 million in one or more borrowings beginning June 1, 2009, subject to conditions including the completion of definitive documentation. Amounts outstanding under the facility will bear interest at a rate of 14% per annum, payable in kind, and will be secured by a first lien on certain working capital collateral and second lien on the assets securing our Second Lien Notes, on a *pari passu* basis. As a condition to such commitment, in April 2009, we paid a commitment fee of \$750,000 to Navation, Inc. and, upon the initial borrowing under such facility, we will issue to the lenders thereunder warrants to purchase 7.5 million shares of our common stock at an exercise price of \$0.01 per share. The terms of the commitment letter also provide that Mr. Salmasi will be nominated to serve an additional three-year term as Chairman of the Board of Directors, subject to stockholder approval at our 2009 annual

meeting of stockholders, and that Navation, Inc. will have a right of first refusal to purchase the assets of our semiconductor business.

We believe that the completion of the asset divestiture and cost reduction actions contemplated by our global restructuring initiative, our current cash and cash equivalents, projected revenues from our Multimedia segment, our committed \$15 million working capital financing and our ability to pay payment-in-kind interest, in lieu of cash interest, to the holders of 50% of the aggregate remaining outstanding principal balance of our Senior Notes will allow us to meet our estimated working capital requirements at least through March 2010. Should we be unable to achieve the revenues and/or cash flows for fiscal year 2009 contemplated in our operating plan, which was approved by the Governance Committee of our Board of Directors on March 27, 2009, we will implement certain additional actions to reduce our working capital requirements including staffing reductions, the deferral of capital expenditures associated with the build-out requirements of our wireless spectrum licenses and reductions in foreign operations.

If we are unable to achieve the anticipated savings from the implementation of our global restructuring initiative, we are unable to consummate our working capital financing transaction, or if we were to incur significant unanticipated expenditures, we would be required to renegotiate our lending arrangements and we may also be required to seek additional debt and/or equity financing and/or further reduce discretionary spending. There can be no assurance that any additional financing will be available on acceptable terms, if at all. Insufficient capital would significantly restrict our ability to operate and could cause us to seek relief through a filing under the U.S. Bankruptcy Code.

Restructuring Initiative and Discontinued Operations

Pursuant to our global restructuring initiative and the terms of our Senior Notes, Second Lien Notes and Third Lien Notes, we have completed the following actions:

- We have terminated approximately 600 employees worldwide and vacated seven leased facilities.
- We sold a controlling interest in our IPWireless subsidiary.
- We shut down the operations of our other network infrastructure businesses, which comprise our Networks segment, including the operations of our GO Networks and Cygnus subsidiaries and our Global Services and NextWave Network Support strategic business units.
- We initiated bankruptcy liquidation proceedings for three of our network infrastructure subsidiaries in Israel, Denmark and Canada, which proceedings are intended to provide an orderly process for the discontinuance of operations and to advance our divestiture and cost reduction strategy.
- We retained Canaccord Adams to explore strategic transactions to preserve the value of our semiconductor business and eliminate the need for us to make on-going capital investments in or incur liabilities relating to this business. Subsequently, in the first quarter of 2009, we shut down our semiconductor business and terminated approximately 200 employees.
- We retained Goetz Partners to explore the sale of our WiMax Telecom business.

We anticipate the continued implementation of our global restructuring initiative will result in the termination of additional employees in 2009.

Several factors led to our decision to divest our network infrastructure businesses, including adverse worldwide economic conditions, which we believe have adversely affected manufacturers of telecommunications equipment and technology and caused our Networks segment to experience lower than projected contract bookings and revenues. We believe these conditions have also led to a delay in global WiMAX network deployments, which adversely impacted the timing and volume of projected commercial sales of WiMAX products of our discontinued semiconductor business.

Considering the actions described above, we have classified the businesses comprising our Networks and Semiconductors segments as well as our WiMax Telecom business, which is included in our Strategic Initiatives segment, as discontinued operations for all periods presented in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Principles of Consolidation

Our consolidated financial statements include the assets, liabilities and operating results of our wholly-owned subsidiaries as of March 28, 2009 and March 29, 2008 and for the three months then ended, respectively. All significant intercompany accounts and transactions have been eliminated in consolidation.

Fiscal Year End

We operate on a 52-53 week fiscal year ending on the Saturday nearest to December 31 of the current calendar year or the following calendar year. Normally, each fiscal year consists of 52 weeks, but every five or six years the fiscal year consists of 53 weeks. Fiscal year 2009 is a 53-week year ending on January 2, 2010. The three month periods ended March 28, 2009 and March 29, 2008 include 13 weeks each.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, income taxes and the valuation of marketable securities, share-based

awards, goodwill, wireless spectrum licenses, intangible assets and other long-lived assets. Actual results could differ from those estimates.

Revenues, Cost of Revenues and Deferred Contract Costs

Our continuing and discontinued operations have derived revenues from the following sources:

- Contracts to provide multimedia software products for mobile and home electronic devices and related royalties through our PacketVideo subsidiary;
- Sales of wireless broadband and mobile broadcast network products and services by our IPWireless and GO Networks subsidiaries, which are included in discontinued operations for the first quarter of 2008. The wireless broadband and mobile broadcast network products sold by IPWireless and GO Networks often included embedded software; and
- Customer subscriptions for the WiMAX network operated by our WiMax Telecom subsidiary, which is included in discontinued operations for all periods presented.

For arrangements that do not contain software or embedded software that is incidental to the arrangement, we recognize revenue in accordance with the principles in SEC Staff Accounting Bulletin (“SAB”) No. 104 *Revenue Recognition*, when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collectibility is reasonably assured.

For software arrangements, or in cases where the software is considered more than incidental and is essential to the functionality of the hardware or the infrastructure products, revenue is recognized pursuant to American Institute of Certified Public Accountants (“AICPA”) Statement of Position (“SOP”) No. 97-2 *Software Revenue Recognition*, SOP No. 98-9, *A Modification of SOP 97-2 Software Revenue Recognition with Respect to Certain Transactions*, and Emerging Issues Task Force (“EITF”) Issue No. 03-5 *Applicability of SOP 97-2 to Non-Software Deliverables in an Arrangement Containing More-Than-Incidental Software*. We also consider the provisions of SOP No. 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*.

Our revenue arrangements can include multiple deliverables, including hardware, a software or technology license, non-recurring engineering services and post-contract customer support. For these arrangements, we consider the guidance provided by EITF Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. Accordingly, we evaluate each deliverable in the arrangement to determine whether it represents a separate unit of accounting. If objective and reliable evidence of fair value exists (“vendor specific objective evidence”) for all units of accounting in the arrangement, revenue is allocated to each unit of accounting or element based on those relative fair values. If vendor specific objective evidence of fair value exists for all undelivered elements, but not for delivered elements, the residual method would be used to allocate the arrangement consideration. If elements cannot be treated as separate units of accounting because vendor specific objective evidence of the undelivered elements does not exist, they are combined into a single unit of accounting and the associated revenue is deferred until all combined elements have been delivered or until there is only one remaining element to be delivered. To date, we have not been able to establish vendor specific objective evidence for any of the elements included in our revenue arrangements, as the software and hardware products or services have not yet been sold separately, nor has a standard price list been established. As a result, once the software or technology is delivered and the only undelivered element is services, the entire non-contingent contract value is recognized ratably over the remaining service period. Costs directly attributable to providing these services are also deferred and amortized over the remaining service period of the respective revenues.

Services sold separately are generally billed on a time and materials basis at agreed-upon billing rates, and revenue is recognized as the services are performed.

We earn royalty revenues on licensed embedded multimedia products sold by our licensees. Generally, royalties are paid by licensees on a per unit or contingent usage basis. The licensees generally report and pay the royalty in the quarter subsequent to the period of delivery or usage. We recognize royalty revenues based on royalties reported by licensees. When royalty arrangements also provide for ongoing post-contract customer support that does not meet the criteria to be recognized upon delivery of the software, the royalty is recognized ratably from the date the royalty report is received through the stated remaining term of the post-contract customer support. In limited situations, we have determined that post-contract customer support revenue can be recognized upon delivery of the software because the obligation to provide post-contract customer support is for one year or less, the estimated cost of providing the post-contract customer support during the arrangement is insignificant and unspecified upgrades or enhancements offered for the particular post-contract customer support arrangement historically have been and are expected to continue to be minimal and infrequently provided. In these instances, we have accrued all the estimated costs of providing the services upfront, which to date have been insignificant.

If we receive non-refundable advanced payments from licensees that are allocable to future contracts periods or could be creditable against other obligations of the licensee to us, the recognition of the related revenue is deferred until such future periods or until such creditable obligations lapse.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

In instances where we have noted extended payment terms, revenue is recognized in the period the payment becomes due. If an arrangement includes specified upgrade rights, revenue is deferred until the specified upgrade has been delivered.

We do not generally allow for product returns and we have no history of significant product returns. Accordingly, no allowance for returns has been provided.

The timing and amount of revenue recognition depends upon a variety of factors, including the specific terms of each arrangement and the nature of our deliverables and obligations. Determination of the appropriate amount of revenue recognized involves judgments and estimates that our management believes are reasonable.

Income Taxes

We recognize income tax expense based on estimates of our consolidated taxable income (loss) taking into account the various legal entities through which, and jurisdictions in which, we operate. As such, income tax expense may vary from the customary relationship between income tax expense and income (loss) before taxes.

Recent Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board (“FASB”) issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. FSP No. FAS 115-2 and FAS 124-2 amends the other-than-temporary impairment guidance to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. As permitted by FSP, we elected to early adopt FSP No. FAS 115-2 and FAS 124-2 in the first quarter of 2009. Our adoption of FSP No. FAS 115-2 and FAS 124-2 did not have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. FSP No. FAS 157-4 provides additional guidance for estimating fair value in accordance with SFAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased and requires that companies provide interim and annual disclosures of the inputs and valuation technique(s) used to measure fair value. As permitted by the FSP, we elected to early adopt FSP No. FAS 157-4 in the first quarter of 2009. Our adoption of FSP No. FAS 157-4 did not have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. FSP No. FAS 107-1 and APB 28-1 amends SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. As permitted by the FSP, we elected to early adopt FSP No. FAS 107-1 and APB 28-1 in the first quarter of 2009. The interim disclosures required by FSP No. FAS 107-1 and APB 28-1 are included in Note 10.

In June 2008, the FASB ratified EITF Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity’s Own Stock*. Paragraph 11(a) of SFAS No 133, *Accounting for Derivatives and Hedging Activities*, specifies that a contract that would otherwise meet the definition of a derivative, but is both (a) indexed to an entity’s own stock and (b) classified in stockholders’ equity in the statement of financial position would not be considered a derivative financial instrument. EITF Issue No. 07-5 provides a new two-step model to be applied in determining whether a financial instrument or an embedded feature is indexed to an issuer’s own stock and thus able to qualify for the SFAS 133 paragraph 11(a) scope exception. Our adoption of EITF Issue No. 07-5 in the first quarter of 2009 did not have a material impact on our consolidated financial statements.

In May 2008, the FASB issued FASB Staff Position No. APB 14-1 *Accounting for Convertible Debt Instruments That May Be Settled Upon Conversion (Including Partial Cash Settlement)* (“FSP No. APB 14-1”). FSP No. APB 14-1, which is effective for the first quarter of 2009, requires the initial proceeds from convertible debt that may be settled in cash to be bifurcated between a liability component and an equity component. Our Third Lien Notes do not allow for cash settlement upon conversion and therefore are excluded from the scope of FSP No. APB 14-1. Accordingly, our adoption of FSP No. APB 14-1 did not have a material impact on our consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities - An amendment of FASB Statement No. 133*, which requires enhanced qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. We do not currently transact in derivative instruments or engage in hedging activities and therefore our adoption of SFAS No. 161 in the first quarter of 2009 did not have an impact on our consolidated financial statements.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements — an amendment of Accounting Research Bulletin No. 51*. SFAS No. 160 establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of retained noncontrolling

equity investments when a subsidiary is deconsolidated. SFAS No. 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. Our adoption of SFAS No. 160 did not have a material impact on our consolidated financial statements.

2. Wireless Spectrum Licenses

We retained investment bankers to explore the sale of our wireless spectrum holdings in the United States and Canada, and our WiMax Telecom business, which includes certain wireless spectrum holdings in Europe. Additionally, we are actively marketing for sale our wireless spectrum holdings in Germany, Argentina and Chile. Any sale or transfer of the ownership of our wireless spectrum holdings is subject to regulatory approval. Upon consummation of a potential sale of our spectrum holdings, we would be required to pay certain fees to our investment bankers. We are required to use the net proceeds from the sale of our wireless spectrum licenses to redeem our Senior Notes, Second Lien Notes and Third Lien Notes.

During the first quarter of 2009, we completed the sale of certain of our owned Advanced Wireless Services (“AWS”) spectrum licenses in the United States to a third party for net proceeds, after deducting direct and incremental selling costs, of \$1.7 million, and recognized a gain on the sale of \$3,000. The net proceeds from the sale are reported as restricted cash in the accompanying consolidated balance sheet and, in April 2009, were used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.

We anticipate that certain of our wireless spectrum licenses will be sold within the next twelve months. Accordingly, at March 28, 2009, we classified wireless spectrum holdings with a carrying value of \$113.4 million as assets held for sale in accordance with SFAS No. 144 and we are no longer amortizing these assets. As of March 28, 2009, the aggregate net carrying value of our remaining wireless spectrum license assets that are not considered held for sale was \$418.6 million, which includes \$93.4 million of asset value allocated as a result of related deferred tax liabilities determined in accordance with EITF Issue No. 98-11, *Accounting for Acquired Temporary Differences in Certain Purchase Transactions That Are Not Accounted for as Business Combinations*. Unpaid spectrum lease obligations related to our wireless spectrum holdings aggregated \$24.4 million at March 28, 2009.

Through our continued efforts to sell our remaining domestic AWS spectrum licenses and our wireless spectrum licenses in Germany, we determined that the carrying value of these spectrum licenses exceeded their fair value based primarily on bids received and negotiations with third parties regarding the sale of these licenses which occurred in April 2009. Accordingly, in the first quarter of 2009, we wrote-down the carrying value of our domestic AWS spectrum licenses and our wireless spectrum licenses in Germany to their estimated fair value and recognized an asset impairment charge of \$16.2 million, the substantial majority of which is reported in continuing operations.

3. Long-Lived Asset Impairment Charges

In connection with the implementation of our global restructuring initiative, we continue to review our long-lived assets for impairment and, in the first quarter of 2009, determined that indicators of impairment were present for the long-lived assets in our semiconductor segment as well as certain other long-lived assets. Accordingly, based on the guidance provided by SFAS No. 144, we performed an assessment to determine if the carrying value of these long-lived assets was recoverable through estimated undiscounted future cash flows resulting from the use of the assets and their eventual disposition.

For the long-lived asset recoverability assessment performed during the first quarter of 2009, the undiscounted cash flows used to estimate the recoverability of the asset carrying values were based on the estimated future net cash flows to be generated from the sale or licensing of the assets, less estimated costs to sell. Based on the analysis, we concluded that the carrying value of certain of our long-lived assets was not recoverable. The impaired assets primarily consist of research and development equipment utilized in our discontinued semiconductor business. Accordingly, during the three months ended March 28, 2009, we recognized additional asset impairment charges of \$3.2 million, of which \$3.1 million is reported as an asset impairment charge in discontinued operations and \$0.1 million is reported as an asset impairment charge in continuing operations.

There are inherent estimates and assumptions underlying the projected cash flows utilized in the recoverability assessment and management’s judgment is required in the application of this information to the determination of the recovery value of the assets. No assurance can be given that the underlying estimates and assumptions will materialize as anticipated.

4. Restructuring Charges

As previously described, in the second half of 2008, we commenced the implementation of a global restructuring initiative, pursuant to which we have divested, either through sale, dissolution or closure, our network infrastructure businesses and our semiconductor business, and will, among other things, pursue the sale of certain of our other businesses and assets and complete other cost reduction actions. In connection with the implementation of our global restructuring initiative, we have terminated approximately 600 employees worldwide and vacated seven leased facilities, of which approximately 220 employees were terminated and two leased facilities were vacated in the first quarter of 2009.

The following summarizes the restructuring activity for the three months ended March 28, 2009 and the related restructuring liabilities:

<i>(in thousands)</i>	Balance at December 27, 2008	Charges to Expense	Cash Payments	Reversal of Deferred Charges	Balance at March 28, 2009
Employee termination costs	\$ 237	\$ 4,741	\$ (4,851)	\$ —	\$127
Lease abandonment and facility closure costs	1,616	1,433	(572)	1,831	4,308
Other related costs, including contract termination costs, selling costs and legal fees	2,668	1,232	(2,482)	—	1,418
Total	\$ 4,521	\$ 7,406	\$ (7,905)	\$1,831	\$5,853
Continuing operations (1)	\$ 3,492	\$ 2,758			\$5,362
Discontinued operations	1,029	4,648			491
Total	\$ 4,521	\$ 7,406			\$5,853

- (1) Included in the restructuring charges of continuing operations for the first quarter of 2009 is \$1.4 million of lease abandonment and facility closure costs related to certain shared facilities and costs related to the divestiture and closure of discontinued businesses totaling \$1.2 million.

We anticipate that we will incur additional restructuring charges in the future as the implementation of our global restructuring initiative moves towards completion.

5. Long-Term Obligations

Long-term obligations held by continuing operations consist of the following:

<i>(dollars in thousands)</i>	March 28, 2009	December 27, 2008
7% Senior Secured Notes due July 2010, net of unamortized discount of \$17,528 and \$20,713 at March 28, 2009 and December 27, 2008, respectively	\$ 199,285	\$ 193,474
14% Senior-Subordinated Secured Second Lien Notes due December 2010, net of unamortized discount of \$15,149 and \$16,951 at March 28, 2009 and December 27, 2008, respectively	97,146	91,505
7.5% Third Lien Subordinated Secured Convertible Notes due December 2011, net of unamortized discount of \$173,739 and \$185,382 at March 28, 2009 and December 27, 2008, respectively	321,544	300,685
Wireless spectrum leases, net of unamortized discounts of \$18,475 and \$18,973 at March 28, 2009 and December 27, 2008, respectively; expiring from 2011 through 2036 with one to five renewal options ranging from 10 to 15 years each	24,372	24,419
Collateralized non-recourse bank loan with interest at 30-day LIBOR plus 0.25%; principal and interest due upon sale of auction rate securities; secured by auction rate securities	21,382	21,459
Other	638	1,322
Long-term obligations held by continuing operations	664,367	632,864
Less current portion	(139,570)	(136,567)
Long-term portion	\$ 524,797	\$ 496,297

Under the terms of the purchase agreements for our Senior Notes and Second Lien Notes, we were required to enter into binding agreements to effect asset sales generating net proceeds of at least \$350 million no later than March 31, 2009 and consummate such sales no later than six months following execution of such agreements, unless closing is delayed solely due to receipt of pending regulatory approvals (the "Asset Sale Condition"). We did not meet the Asset Sale Condition. As a result, pursuant to the terms of the note purchase agreements, the interest rate on the Senior Notes increased by 200 basis points effective March 31, 2009 and, on April 8, 2009, we issued additional warrants to purchase an aggregate of 10.0 million shares of our

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

common stock at an exercise price of \$0.01 per share to the purchasers of the Second Lien Notes. Of the warrants issued, 7.5 million were issued to Avenue AIV US, L.P., an affiliate of Avenue Capital Management II, L.P. ("Avenue Capital"). Robert Symington, a portfolio manager with Avenue Capital, is a member of our Board of Directors. The warrants are exercisable at any time from the April 8, 2009 through April 6, 2012. The grant-date fair value of the warrants will be recorded to additional paid-in capital and reduce the carrying value of the Second Lien Notes, and will be recognized as additional interest expense over the remaining term of the Second Lien Notes.

On April 1, 2009, we obtained an amendment and waiver from the holders of our Senior Notes, Second Lien Notes, and Third Lien Notes that adjusts the Minimum Balance Condition from \$15 million to \$5 million, waives certain events of default relating to timely delivery of a new operating budget, permits us to issue up to \$25 million of indebtedness on a *pari passu* basis with our Second Lien Notes, and allows us to pay certain holders of our Senior Notes payment-in-kind interest at a rate of 14%. Pursuant to the amendment and waiver, holders of 50% of the aggregate remaining outstanding principal balance of our Senior Notes have elected to receive payment-in-kind interest in lieu of cash interest.

6. Comprehensive Loss

Comprehensive loss was as follows:

<i>(in thousands)</i>	Three Months Ended	
	March 28,	March 29,
	2009	2008
Net loss	\$ (82,179)	\$ (95,018)
Net unrealized gains on marketable securities	—	(10)
Foreign currency translation adjustment	(3,893)	5,906
Total comprehensive loss	\$ (86,072)	\$ (89,122)

7. Net Loss Per Common Share Information

Basic and diluted net loss per common share for the three months ended March 28, 2009 and March 29, 2008 is computed by dividing net loss applicable to common shares during the period by the weighted average number of common shares outstanding during the respective periods, without consideration of common stock equivalents.

The following securities that could potentially dilute earnings per share in the future are not included in the determination of diluted loss per share as they are antidilutive. The share amounts are determined using a weighted average of the shares outstanding during the respective periods and assume that the last day of the respective quarterly periods were the end dates of the contingency period for any contingently issuable shares in accordance with SFAS No. 128, *Earnings Per Share*.

<i>(in thousands)</i>	Three Months Ended	
	March 28, 2009	2008
Third Lien Notes / Series A Preferred Stock	43,997	34,017
Outstanding stock options	15,979	20,570
Common stock warrants	500	2,436
Restricted stock	1,087	67
Contingently issuable shares under advisory contract	—	833

In addition to the securities listed above, we may be required to issue shares of our common stock in payment of additional purchase consideration of \$1.6 million due in connection with our 2007 acquisition of IPWireless.

8. Stockholders' Deficit

Changes in shares of common stock and stockholders' deficit for the three months ended March 28, 2009 were as follows:

<i>(in thousands)</i>	Total Stockholders' Deficit

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

	Shares of Common Stock	
Balance at December 27, 2008	103,092	\$ (56,116)
Share-based compensation expense	—	1,287
Foreign currency translation adjustment	—	(3,893)
Net loss	—	(82,179)
Balance at March 28, 2009	103,092	\$ (140,901)

13

9. Share-Based Payments

At March 28, 2009, we may issue up to an aggregate of 32.7 million shares of common stock under our equity compensation plans, of which 13.4 million shares are reserved for issuance upon exercise of granted and outstanding options and 19.3 million shares are available for future grant.

The following table summarizes stock option activity under our equity compensation plans during the three months ended March 28, 2009:

	Number of Shares (in thousands)	Weighted Average Exercise Price per Share
Outstanding at December 27, 2008	16,259	\$ 6.71
Granted	1,510	\$ 0.31
Exercised	—	\$ —
Canceled	(4,366)	\$ 7.14
Outstanding at March 28, 2009	13,403	\$ 5.85
Exercisable at March 28, 2009	10,093	\$ 6.01

We utilized the Black-Scholes option-pricing model for estimating the grant-date fair value of employee stock awards with the following assumptions:

	Three Months Ended	
	March 28, 2009	March 29, 2008
Risk-free interest rate	2.89%	1.98%-3.47%
Expected life (in years)	5.3	3.5-10.0
Stock price volatility	110%	53%
Expected dividend yield	0%	0%
Weighted average grant-date fair value per share	\$0.25	\$2.70

The risk-free interest rates are based on the implied yield available on U.S. Treasury constant maturities in effect at the time of the grant with remaining terms equivalent to the respective expected lives of the awards. Because we have a limited history of stock option exercises and due to the recent significant structural changes to our business resulting from the implementation of our global restructuring initiative, we determine the expected award life based primarily on the “simplified method” described in SAB No. 107 *Share-Based Payments*, and the expected award lives applied by certain of our peer companies to determine the expected life of each grant. We determine expected volatility based primarily on our historical stock price volatility. We have never paid cash dividends and have no present intention to pay cash dividends on our common stock and therefore we have assumed a dividend yield of zero.

The following table summarizes the share-based compensation expense included in each operating expense line item in our consolidated statements of operations:

	Three Months Ended	
	March 28, 2009	March 29, 2008
<i>(in thousands)</i>		
Cost of revenues	\$ 114	\$ 73
Engineering, research and development	199	350
Sales and marketing	38	72
General and administrative	601	1,208
Total continuing operations	952	1,703
Discontinued operations	335	3,658
Total share-based compensation	\$ 1,287	\$ 5,361

At March 28, 2009, the total unrecognized share-based compensation expense relating to unvested share-based awards granted to employees, net of forfeitures, was \$11.4 million, which we anticipate recognizing as a charge against income over a weighted average period of 3.3 years.

10. Fair Value Measurements**Assets and Liabilities Measured at Fair Value on a Recurring Basis**

The following table summarizes our assets and liabilities that require fair value measurements on a recurring basis and their respective input levels based on the SFAS No. 157 fair value hierarchy:

	Fair Value at March 28, 2009	Fair Value Measurements at March 28, 2009 Using:		
		Quoted Market Prices for Identical Assets	Significant Observable Inputs	Other Significant Unobservable Inputs
(in thousands)		(Level 1)	(Level 2)	(Level 3)
Cash and cash equivalents	\$18,734	\$18,734	\$—	\$—
Auction rate securities ⁽¹⁾	22,538	—	—	22,538
Auction rate securities rights ⁽²⁾	2,353	—	—	2,353
Embedded derivatives ⁽³⁾	12,922	—	—	12,922

(1) Included in restricted cash and marketable securities in the accompanying consolidated balance sheet.

(2) Included in other noncurrent assets in the accompanying consolidated balance sheet.

(3) Included in other long-term liabilities in the accompanying consolidated balance sheet.

Auction Rate Securities. At March 28, 2009, we estimated the fair value of our auction rate securities, which we have classified as trading securities under SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, using a discounted cash flow model (Level 3 inputs), which measures fair value based on the present value of projected cash flows over a specific period. The values are then discounted to reflect the degree of risk inherent in the security and achieving the projected cash flows. The discounted cash flow model used to determine the fair value of the auction rate securities utilized a discount rate of 4.6%, which represents an estimated market rate of return, and an estimated period until sale and/or successful auction of the security of 5 years. The determination of the fair value of our auction rate securities also considered, among other things, the collateralization underlying the individual securities and the creditworthiness of the counterparty.

Auction Rate Securities Rights. Our auction rate securities rights allow us to sell our auction rate securities at par value to UBS at any time during the period of June 30, 2010 through July 2, 2012. We have elected to measure the fair value of the auction rate securities rights under SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of FASB Statement No. 115*, which we believe will mitigate volatility in our reported earnings due to the inverse relationship between the fair value of the auction rate securities rights and the underlying auction rate securities. At March 28, 2009, we estimated the fair value of our auction rate securities rights using a discounted cash flow model, similar to the auction rate securities (Level 3 inputs). The discounted cash flow model utilized a discount rate of 3.7% and an estimated period until recovery of 1.3 years, which represents the period until the earliest date that we can exercise our auction rate securities rights.

Embedded Derivatives. Our obligation to redeem the Second Lien Notes and Third Lien Notes upon an asset sale and a change in control constitute embedded derivatives under SFAS No. 133. Accordingly, we have bifurcated the estimated fair value of each embedded derivative from the fair value of the Second Lien Notes and Third Lien Notes upon issuance, and recognized subsequent changes in the fair value of the embedded derivatives against income. We measured the estimated fair value of the Second Lien Notes and Third Lien Notes embedded derivatives using a probability-weighted discounted cash flow model (Level 3 inputs). The discounted cash flow model utilizes management assumptions of the probability of occurrence of a redemption of the Second Lien Notes and Third Lien Notes upon an asset sale and a change in control.

The following table summarizes the activity in assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3):

	Embedded Derivatives				
	Auction Rate Securities	Auction Rate Securities Rights	Second Lien Notes	Third Lien Notes	Total
(in thousands)					
Balance at December 27, 2008	\$ 20,798	\$ 4,210	\$ (968)	\$ (10,792)	\$ 13,248
Purchases, issuances, sales, exchanges and settlements	—	—	(25)	(203)	(228)
Unrealized gains (losses) included in other expense, net	1,740	(1,857)	(19)	(915)	(1,051)
Balance at March 28, 2009	\$ 22,538	\$ 2,353	\$ (1,012)	\$ (11,910)	\$ 11,969

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The following table summarizes our assets and liabilities that were measured at fair value on a nonrecurring basis during the period and their respective input levels based on the SFAS No. 157 fair value hierarchy:

	Fair Value During the Three Months Ended March 28, 2009	Fair Value Measurements Using:		
		Quoted Market Prices for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<i>(in thousands)</i>				
Wireless spectrum licenses held for sale	\$ 113,431	\$ —	\$ 113,431	\$ —
Property and equipment, net ⁽¹⁾	19,395	—	—	19,395

(1) Includes property and equipment of continuing operations of \$3.5 million, property and equipment of discontinued operations of \$9.4 million and property and equipment held for sale by discontinued operations of \$6.5 million.

Wireless Spectrum Licenses. Through our continued efforts to sell our remaining domestic AWS spectrum licenses and our wireless spectrum licenses in Germany, we determined that the carrying value of these spectrum licenses exceeded their fair value based primarily on bids received and negotiations with third parties regarding the sale of these licenses which occurred in April 2009. We estimated the fair value of these wireless spectrum licenses based on advanced negotiations and submitted bids from third parties for the purchase of the licenses (Level 2 inputs). Accordingly, in the first quarter of 2009, we wrote-down the carrying value of our domestic AWS spectrum licenses and our wireless spectrum licenses in Germany to their estimated fair value and recognized an asset impairment charge of \$16.2 million, the substantial majority of which is reported in continuing operations.

Property and Equipment, Net. In connection with the implementation of our global restructuring initiative, we continue to review our long-lived assets for impairment and, in the first quarter of 2009, determined that indicators of impairment were present for the long-lived assets in our semiconductor segment as well as certain other long-lived assets. Accordingly, based on the guidance provided by SFAS No. 144, we performed an assessment to determine if the carrying value of these long-lived assets was recoverable through estimated undiscounted future cash flows resulting from the use of the assets and their eventual disposition (Level 3 inputs). Based on the impairment assessment performed, we determined that the carrying value of our property and equipment exceeded its estimated fair value and accordingly we recognized an asset impairment charge of \$2.7 million during the first quarter of 2009.

The following table summarizes the activity in assets and liabilities measured at fair value on a non-recurring basis using significant unobservable inputs (Level 3):

	Property and Equipment, Net
<i>(in thousands)</i>	
Balance at December 27, 2008	\$ 24,132
Purchases and disposals	(197)
Depreciation expense	(1,250)
Asset impairment charges	(2,675)
Foreign currency and other	(615)
Balance at March 28, 2009	\$ 19,395

Fair Value of Other Financial Instruments

The carrying amounts of certain of our financial instruments of continuing operations, including cash and cash equivalents, accounts receivable, accounts payable, accrued expenses and note payable to bank, approximate fair value due to their short-term nature. The carrying amounts and fair values of our long-term obligations of continuing operations are as follows:

	March 28, 2009		December 27, 2008	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<i>(in thousands)</i>				

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Senior Notes	\$199,285	\$187,498	\$193,474	\$171,822
Second Lien Notes	97,146	97,146	91,505	91,505
Third Lien Notes	321,544	321,544	300,685	300,685
Wireless spectrum leases	24,372	13,587	24,419	16,445

We determined the fair value of our Senior Notes, Third Lien Notes and wireless spectrum licenses using a discounted cash flow model with a discount rate of 25.5%, which represents our estimated incremental borrowing rate. The Third Lien Notes were measured at fair value upon issuance.

11. Legal Proceedings

On September 16, 2008, a putative class action lawsuit, captioned “Sandra Lifschitz, On Behalf of Herself and All Others Similarly Situated, Plaintiff, v. NextWave Wireless Inc., Allen Salmasi, George C. Alex and Frank Cassou, Defendants”, was filed in the U.S. District Court for the Southern District of California against us and certain of our officers. The suits allege that the defendants made false and misleading statements and/or omissions in violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The suit seeks unspecified damages, interest, costs, attorneys’ fees, and injunctive, equitable or other relief on behalf of a purported class of purchasers of our common stock during the period from March 30, 2007 to August 7, 2008. A second putative class action lawsuit captioned Benjamin et al. v. NextWave Wireless Inc. et al.” was filed on October 21, 2008 alleging the same claims on behalf of purchasers of our common stock during an extended class period, between November 27, 2006 through August 7, 2008. On February 24, 2009, the Court issued an Order consolidating the two cases and appointing a lead plaintiff pursuant to the Private Securities Litigation Reform Act.

We were notified on July 11, 2008 that the former stockholders of GO Networks have filed a demand for arbitration in connection with the February milestone. In the demand, the stockholder representative has claimed that we owe compensation to the former stockholders of GO Networks on the basis of GO Networks purportedly having partially achieved the February milestone under the acquisition agreement. The stockholder representative seeks damages of \$10.4 million. Further, on December 5, 2008, the stockholder representative amended his demand and added claims pertaining to the August milestone. In the claims, the stockholder representative asserts, among other claims, that we acted in bad faith in a manner that prevented the achievement of the milestone, and he seeks damages of \$12.8 million in connection with these additional claims. We dispute that the February milestone has been met and deny any wrongdoing with respect to the August milestone. The dispute will be administered and heard in accordance with procedures set forth by the International Centre for Dispute Resolution, a division of the American Arbitration Association. We submitted our Statement of Defense on August 25, 2008 and an Amended Statement of Defense on January 6, 2009. A three member arbitration panel has been constituted and the panel has issued a Procedural Order establishing dates and parameters for discovery and the arbitration hearing.

On February 20, 2009, Arden Realty Limited Partnership (“Arden”) filed a complaint in California State Superior Court for the County of San Diego against us alleging breach of two written lease agreements for commercial property. Arden seeks damages in the amount of \$2.5 million and \$1.4 million, respectively, for the alleged breaches, as well as interest, attorneys’ fees, etc. In April 2009, we entered into a settlement and lease termination agreement with Arden, whereby Arden agreed to dismiss the complaint and terminate the lease agreements in exchange for a cash payment of \$0.6 million. Accordingly, at March 28, 2009, we recorded a liability for the settlement amount to be paid to Arden.

We are also currently involved in other legal proceedings in the ordinary course of our business operations. We estimate the range of liability related to pending litigation where the amount and range of loss can be estimated. We record our best estimate of a loss when the loss is considered probable. Where a liability is probable and there is a range of estimated loss with no best estimate in the range, we record the minimum estimated liability related to the claim. As additional information becomes available, we assess the potential liability related to our pending litigation and revise our estimates. As of March 28, 2009, other than the Arden matter described above, we have not recorded any significant accruals for contingent liabilities associated with our legal proceedings based on our belief that a liability, while possible, is not probable. Further, any possible range of loss cannot be estimated at this time. Revisions to our estimate of the potential liability could materially impact results of operations.

12. Guarantees and Indemnifications

We provide indemnifications of varying scope and size to certain customers against claims of intellectual property infringement made by third parties arising from the use of our products. We have also entered into indemnification agreements with our officers and directors. Although the maximum potential amount of future payments we could be required to make under these indemnifications is unlimited, to date we have not incurred material costs to defend lawsuits or settle claims related to these indemnification provisions. Additionally, we have insurance policies that, in most cases, would limit our exposure and enable us to recover a portion of any amounts paid. Therefore, we believe the estimated fair value of these agreements is minimal and likelihood of incurring an obligation is remote. Accordingly, we have not accrued any liabilities in connection with these indemnification obligations as of March 28, 2009.

NextWave Wireless Inc. has irrevocably and unconditionally guaranteed the loan obligation of our GO Networks subsidiary, with a principal balance of \$0.6 million as of March 28, 2009. We have included this loan obligation in the liabilities of our continuing operations in the accompanying consolidated balance sheet.

13. Segment Information

Our business is currently organized in two reportable segments on the basis of products, services and strategic initiatives as follows:

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

- Multimedia— device-embedded multimedia software, media content management platforms, and content delivery services delivered through our PacketVideo subsidiary.
- Strategic Initiatives— manages our portfolio of worldwide licensed wireless spectrum assets.

We evaluate the performance of our segments based on revenues and loss from operations excluding depreciation and amortization. Corporate overhead expenses and other income and charges are not allocated to segments in our internal management reports because they are not considered in evaluating the segments' operating performance. Unallocated income and charges include investment income on corporate investments and interest expense related to the Senior Notes, Second Lien Notes and Third Lien Notes and the change in the fair value of the embedded derivatives on the Second Lien Notes and Third Lien Notes, all of which were deemed not to be directly related to the businesses of the segments. We have no intersegment revenues.

Financial information for our continuing reportable segments for the three months ended March 28, 2009 and March 29, 2008 is as follows:

<i>(in thousands)</i>	Multimedia	Strategic Initiatives	Other or Unallocated	Discontinued Operations	Consolidated
For the Three Months Ended:					
March 28, 2009					
Revenues from external customers	\$ 16,911	\$ 4	\$ —	\$ —	\$ 16,915
Loss from operations	(816)	(18,793)	(10,348)	—	(29,957)
Significant non-cash and non-recurring items included in loss from operations above:					
Depreciation and amortization expense	1,483	2,452	114	—	4,049
Asset impairment charges	—	16,071	132	—	16,203
Restructuring charges	—	—	2,758	—	2,758
March 29, 2008					
Revenues from external customers	\$ 14,550	\$ —	\$ —	\$ —	\$ 14,550
Loss from operations	(3,324)	(3,106)	(15,339)	—	(21,769)
Significant non-cash items included in loss from operations above:					
Depreciation and amortization expense	1,595	2,249	1,021	—	4,865
At March 28, 2009					
Total assets	\$ 67,955	\$ 497,399	\$ 63,585	\$ 55,024	\$ 683,963
Included in total assets:					
Wireless spectrum licenses, intangible assets and goodwill	55,482	496,977	79	35,043	587,581
At December 27, 2008					
Total assets	\$ 73,383	\$ 520,377	\$ 102,930	\$ 60,820	\$ 757,510
Wireless spectrum licenses, intangible assets and goodwill	57,505	519,071	81	36,094	612,751

14. Subsequent Events

In April 2009, we completed the sale of additional AWS spectrum licenses in the United States to a third party for net proceeds, after deducting direct and incremental selling costs, of approximately \$3.1 million. The net proceeds from the sale were subsequently used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

In addition to historical information, the following discussion contains forward-looking statements that are subject to risks and uncertainties. Actual results may differ substantially from those referred to herein due to a number of factors, including but not limited to risks described in the section entitled Risk Factors and elsewhere in this Quarterly Report. Additionally, the following discussion and analysis should be read in conjunction with the consolidated financial statements and the notes thereto included in Item 1 of Part I of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 27, 2008 contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on April 2, 2009.

OVERVIEW

First Quarter Highlights

- Our revenues from continuing operations for the first quarter of 2009 totaled \$16.9 million compared to \$14.6 million for the first quarter of 2008, reflecting continued growth in our Multimedia segment.
- During the first quarter of 2009, we completed the sale of certain of our owned AWS spectrum licenses in the United States to a third party for net proceeds, after deducting direct and incremental selling costs, of \$1.7 million, and recognized a gain on the sale of \$3,000. The net proceeds from the sale will be used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.
- In April 2009, we entered into a binding commitment letter with Navation, Inc., an entity controlled by Allen Salmasi, our Chairman, to provide up to \$15 million in working capital financing. The terms of the commitment letter provide that we will be entitled to borrow up to \$15 million in one or more borrowings beginning June 1, 2009, subject to conditions including the completion of definitive documentation. Amounts outstanding under the facility will bear interest at a rate of 14% per annum, payable in kind, and will be secured by a first lien on certain working capital collateral and second lien on the assets securing our Second Lien Notes, on a *pari passu* basis.

Our Business and Operating Segments

NextWave Wireless Inc. is a holding company for mobile multimedia businesses and a significant wireless spectrum portfolio. As a result of our global restructuring initiative, our continuing operations are focused on two key segments: Multimedia, consisting of the operations of our wholly owned subsidiary PacketVideo, and Strategic Initiatives, focused on the management of our wireless spectrum interests.

In the second half of 2008, we commenced the implementation of our global restructuring initiative in an effort to reduce our working capital requirements, narrow our business focus and reorganize our operating units. Key results of this initiative include an approximately 53% reduction in our global workforce to date, the divestiture of our IPWireless network infrastructure business, the discontinuation of operations at our GO Networks, Cygnus, Global Services and NextWave Networks Products Support infrastructure businesses and our semiconductor business, and the closure of several facilities throughout the world. We anticipate that further implementation of our global restructuring initiative will result in additional headcount reductions and operating unit divestitures or discontinuations, including the divestiture of our WiMax Telecom business and the sale of certain assets of our semiconductor business.

To further enhance our operational flexibility, on April 1, 2009, we have obtained an amendment and waiver from the holders of our Senior Notes, Second Lien Notes, and Third Lien Notes that adjusts our minimum cash balance requirement from \$15 million to \$5 million, waives certain events of default relating to timely delivery of a new operating budget, permits us to issue up to \$25 million of indebtedness on a *pari passu* basis with our Second Lien Notes, and allows us to pay certain holders of our Senior Notes payment-in-kind interest at a rate of 14%. We also entered into the binding commitment letter with Navation, Inc. to provide up to \$15 million of working capital financing.

We believe that the completion of the asset divestiture and cost reduction actions contemplated by our global restructuring initiative, our current cash and cash equivalents, projected revenues from our Multimedia segment, our committed \$15 million working capital financing and our ability to pay payment-in-kind interest, in lieu of cash interest, to the holders of 50% of the aggregate remaining outstanding principal balance of our Senior Notes will allow us to meet our estimated working capital requirements at least through March 2010. Should we be unable to achieve the revenues and/or cash flows for fiscal year 2009 contemplated in our operating plan, which was approved by the Governance Committee of our Board of Directors on March 27, 2009, we will implement certain additional actions to reduce our working capital requirements including staffing reductions, the deferral of capital expenditures associated with the build-out requirements of our wireless spectrum licenses and further reductions in foreign operations.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

If we are unable to achieve the anticipated savings from the implementation of our global restructuring initiative, if we are unable to consummate our working capital financing transaction, or if we were to incur significant unanticipated expenditures,

19

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

we would be required to renegotiate our lending arrangements and we may also be required to seek additional debt and/or equity financing and/or further reduce discretionary spending. There can be no assurance that any additional financing will be available on acceptable terms, if at all. Insufficient capital would significantly restrict our ability to operate and could cause us to seek relief through a filing in the U.S. Bankruptcy Court.

Multimedia Segment

PacketVideo was founded in 1998 and supplies multimedia software and services to many of the world's largest network operators and wireless handset manufacturers. These companies in turn use PacketVideo's platform to offer music and video services on mobile handsets, generally under their own brands. To date, over 280 million PacketVideo-powered handsets have been shipped worldwide. PacketVideo has been contracted by some of the world's largest carriers, such as Orange, NTT DoCoMo, Rogers Wireless, TeliaSonera, TELUS Mobility, Verizon Wireless and Vodafone India to design and implement the embedded multimedia software capabilities contained in their handsets. PacketVideo's software is compatible with virtually all network technologies including CDMA, GSM, WiMAX, LTE and WCDMA.

As mobile platforms evolve, PacketVideo continues to provide the best multimedia solutions. PacketVideo is one of the original founding members of the Open Handset Alliance ("OHA"), led by Google. PacketVideo's OpenCORE™ platform serves as the multimedia software subsystem for the OHA's mobile device Android™ platform. In a similar vein, PacketVideo has been recognized for its support of the LiMO Foundation™ and their platform initiatives. We believe that by supporting the efforts of the OHA and LiMO Foundation, PacketVideo is well positioned to market its full suite of enhanced software applications to Android and LiMO application developers.

In addition, since 2006 PacketVideo has offered software products for use on PCs, consumer electronics and other devices in the home. We believe that media consumption in the home and media consumption on mobile handsets is converging. PacketVideo's TwonkyMedia™ product line is designed to capitalize on this trend. PacketVideo has invested in the development and acquisition of a wide range of technologies and capabilities to provide its customers with software solutions to enable home/office digital media convergence using communication protocols standardized by the Digital Living Network Alliance™. The TwonkyMedia™ suite of products that provide for content search, discovery, organization and content delivery/sharing amongst consumer electronics products connected to an Internet Protocol-based network. This powerful platform is designed to provide an enhanced user experience by intelligently responding to user preferences based on content type, day-part, and content storage location. In addition, PacketVideo's patented Digital Rights Management ("DRM") solutions, already in use by many wireless carriers globally, represent a key enabler of digital media convergence by preventing the unauthorized access or duplication of multimedia content used or shared by PacketVideo-enabled devices. Additionally, PacketVideo is one of the largest suppliers of Microsoft DRM technologies for the wireless market today.

Although we believe that PacketVideo's products are advantageous and well positioned for success, PacketVideo's business largely depends upon volume based sales of devices into the market. The economic downturn in the global markets has affected consumer spending habits. PacketVideo's customers and distribution partners, telecommunications companies and consumer electronics device manufacturers, are not immune to such uncertain and adverse market conditions. PacketVideo relies on these partners as distribution avenues for its developed products. Additionally, competitive pressures may cause further price wars in an effort to win or sustain business which will have an effect on overall margins and projections. If economic conditions continue to deteriorate, this may result in lower than expected sales volumes, resulting in lower revenue, gross margins, and operating income.

Strategic Initiatives Segment

Our strategic initiatives business segment is engaged in the management of our global wireless spectrum holdings. Our total spectrum holdings consist of approximately ten billion MHz points-of-presence ("POPs"), covering approximately 220.4 million POPs, of which 118.2 million POPs are covered by 20 MHz or more of spectrum, and an additional 87.2 million POPs are covered by at least 10 MHz of spectrum. In addition, a number of markets, including much of the New York metropolitan region, are covered by 30 MHz or more of spectrum. Our domestic spectrum resides in the 2.3 GHz Wireless Communication Services ("WCS"), 2.5 GHz Broadband Radio Service ("BRS")/Educational Broadband Service ("EBS"), and 1.7/2.1 GHz AWS bands and offers propagation and other characteristics suitable to support high-capacity, mobile broadband services.

Our international spectrum holdings include nationwide 3.5 GHz licenses in Austria, Croatia, Germany, Slovakia and Switzerland; a nationwide 2.0 GHz license in Norway; 2.3 GHz licenses in Canada; and 2.5 GHz licenses in Argentina and Chile, covering 145 million POPs.

We continue to pursue the sale of our wireless spectrum holdings and engaged Deutsche Bank and UBS Investment Bank to explore the sale of our domestic wireless spectrum holdings, Canaccord Adams to explore the sale of our Canadian wireless spectrum holdings and goetpartners to explore the sale of our WiMax Telecom business in Europe. Additionally, we are actively marketing for sale our wireless spectrum holdings in Germany, Argentina and Chile. Any sale or transfer of the ownership of our wireless spectrum holdings is subject to regulatory approval.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

During the first quarter of 2009, we completed the sale of certain of our owned AWS spectrum licenses in the United States covering 1.3 million POPs to a third party for net proceeds, after deducting direct and incremental selling costs, of \$1.7 million, and recognized a gain on the sale of \$3,000. The net proceeds from the sale will be used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.

To date, we have realized a significant return on the sale of the majority of our domestic AWS spectrum licenses. However, there can be no assurance that we will realize a similar return upon the sale of our remaining wireless spectrum holdings. Although we believe that the fair value of our wireless spectrum assets at least approximates the carrying value, the sale price of our wireless spectrum assets will be impacted by, among other things:

- the FCC's final resolution of ongoing proceedings regarding interference from satellite digital audio radio services to our WCS spectrum licenses;
- the timing and associated costs of build out or substantial service requirements attached to our domestic and international spectrum licenses, where a failure to comply with these requirements could result in license forfeiture;
- timing of closure of potential sales, particular if it is necessary to accelerate the planned sale of certain of our spectrum licenses in order to meet debt payment obligations;
- worldwide economic conditions which we believe have adversely affected manufacturers of telecommunications equipment and technology and led to a delay in global WiMAX network deployments; and
- availability of capital for prospective spectrum buyers has been negatively impacted by the downturn in the credit and financial markets.

As we have previously disclosed, our efforts to sell our wireless spectrum holdings on favorable terms has been delayed by current market conditions, as well as regulatory and other market activities involving potential buyers. We are continuing to have discussions with numerous parties who have expressed interest in our various spectrum assets. However, we believe that adverse economic conditions continue to affect potential purchasers of our wireless spectrum, and there can be no assurance as to the timing of further spectrum sales or the sales prices that will be attained.

RESULTS OF OPERATIONS

The results of operations of our Networks segment, which includes our GO Networks, IPWireless and Cygnus subsidiaries, and our Global Services and NextWave Network Product Support strategic business units, our Semiconductor segment and our WiMax Telecom business, have been reported as discontinued operations in the consolidated financial statements for all periods presented.

Comparison of Our First Quarter of 2009 to Our First Quarter of 2008 – Continuing Operations

Revenues

Total revenues from continuing operations for the first quarter of 2009 were \$16.9 million, as compared to \$14.6 million for the first quarter of 2008, an increase of \$2.3 million. Total revenues for both periods consist entirely of revenues generated by our Multimedia segment. The increase in revenues was attributable to increased non-recurring technology development revenues primarily resulting from the receipt of final acceptance from Google on technology development services performed in support of the OHA, offset by lower royalty revenues resulting from a decline in unit sales of mobile subscriber services by wireless operators and device manufacturers. Unit sales were adversely impacted by worldwide economic conditions which caused a softening in consumer demand for new devices and services.

Sales to three Multimedia customers, Google, Verizon Wireless and NTT DoCoMo, accounted for 34%, 19%, and 13%, respectively, of our total revenues from continuing operations during the first quarter of 2009. Sales to Google primarily represent the completion of technology development deliverables in support of the OHA. We do not anticipate recognizing significant revenues associated with transactions with Google in future quarters. Sales to three Multimedia customers, Verizon Wireless, Sony Ericsson and NTT DoCoMo, accounted for 44%, 13% and 13%, respectively, of our total revenues from continuing operations during the first quarter of 2008.

In general, the financial consideration received from wireless carriers and mobile phone and wireless device manufacturers is primarily derived from a combination of technology development contracts, royalties, software support and maintenance and wireless broadband products.

We expect that revenues from our Multimedia segment for fiscal year 2009 will be affected by the current adverse worldwide economic conditions, and among other things, new product and service introductions, competitive conditions, customer marketing budgets for introduction of new subscriber products, the rate of expansion of our customer base, the build-out rate of wireless networks, price increases, subscriber device

life cycles and demand for wireless data services.

21

Operating Expenses

<i>(in millions)</i>	Three Months Ended		Increase (Decrease)
	March 28, 2009	March 29, 2008	
Cost of revenues	\$ 6.2	\$ 4.6	\$ 1.6
Engineering, research and development	6.1	6.1	—
Sales and marketing	2.8	4.5	(1.7)
General and administrative	12.8	21.1	(8.3)
Asset impairment charges	16.2	—	16.2
Restructuring charges	2.8	—	2.8
Total operating expenses	\$ 46.9	\$36.3	\$ 10.6

Cost of Revenues

Cost of revenues from continuing operations as a percentage of the associated revenues for the first quarter of 2009 was 37%, as compared to 32% for the first quarter of 2008. The decline in gross margins in 2009 reflects lower royalty revenues, which have minimal associated cost of revenue, resulting from a decline in unit sales of mobile subscriber services by wireless operators and device manufacturers. Unit sales were adversely impacted by worldwide economic conditions which caused a softening in consumer demand for new devices and services.

Cost of revenues from continuing operations, which consists entirely of cost of revenues generated by our Multimedia segment, primarily includes direct engineering labor expenses, allocated overhead costs, costs associated with offshore contract labor costs, other direct costs related to the execution of technology development contracts and amortization of purchased intangible assets.

Included in cost of revenues during the first quarters of 2009 and 2008 is \$0.7 million and \$0.6 million, respectively, of amortization of purchased intangible assets. Also included in cost of revenues during the each of the first quarters of 2009 and 2008 is \$0.1 million of share-based compensation expense.

We believe that cost of revenues as a percentage of revenue for future periods will be affected by, among other things, sales volumes, competitive conditions, product mix, royalty payments by us on licensed technologies, changes in average selling prices, and our ability to make productivity improvements through continual cost reduction programs.

Engineering, Research and Development

Engineering, research and development expenses during the first quarter of 2009 of \$6.1 million were consistent with the first quarter of 2008.

Included in engineering, research and development expenses during each of the first quarters of 2009 and 2008 is \$42,000 of amortization of purchased intangible assets. Also included in engineering, research and development expenses during the first quarters of 2009 and 2008 is \$0.2 million and \$0.4 million, respectively, of share-based compensation expense.

Sales and Marketing

The \$1.7 million decrease in sales and marketing expenses from continuing operations during the first quarter of 2009, as compared to the first quarter of 2008, is primarily attributable to a \$1.0 million decrease in the sales and marketing expenses of our Multimedia segment as a result of cost reduction actions implemented in the first quarter of 2009 and a \$0.7 million decrease in our corporate marketing expenses resulting from the global restructuring initiative we implemented in the second half of 2008, which included reductions in workforce and certain overhead and discretionary costs. The compensation related costs incurred in relation to the employees terminated in connection with the restructuring are included in restructuring charges.

Included in sales and marketing expenses during the first quarters of 2009 and 2008 is \$0.3 million and \$0.5 million, respectively, of amortization of purchased intangible assets. Also included in sales and marketing expenses during the first quarters of 2009 and 2008 is \$38,000 and \$0.1 million, respectively, of share-based compensation expense.

General and Administrative

The \$8.3 million decrease in general and administrative expenses from continuing operations during the first quarter of 2009, as compared to the first quarter of 2008, is primarily attributable to the corporate cost reductions resulting from the global restructuring initiative we implemented in the second half of 2008, which included reductions in workforce and certain overhead and discretionary costs, and the closure of certain facilities. The costs incurred in connection with our global restructuring initiative, including compensation related costs incurred related to terminated employees, costs incurred related to vacated leased facilities and other restructuring related costs, are included in restructuring charges.

Included in general and administrative expenses during the first quarters of 2009 and 2008 is \$2.5 million and \$2.3 million, respectively, of amortization of finite-lived wireless spectrum licenses and \$0.1 million and \$0.1 million, respectively, of

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

amortization of purchased intangible assets. Also included in general and administrative expenses during the first quarters of 2009 and 2008 is \$0.6 million and \$1.2 million, respectively, of share-based compensation expense.

Asset Impairment Charges

Through our continued efforts to sell our remaining domestic AWS spectrum licenses and our wireless spectrum licenses in Germany, we determined that the carrying value of these spectrum licenses exceeded their fair value based primarily on bids received and negotiations with third parties regarding the sale of these licenses which occurred in April 2009. Accordingly, in the first quarter of 2009, we wrote-down the carrying value of our domestic AWS spectrum licenses and our wireless spectrum license in Germany to their estimated fair value and recognized an asset impairment charge related to continuing operations of \$16.1 million.

Additionally, during the first quarter of 2009, we recognized an asset impairment charge of \$0.1 million related to certain long-lived assets utilized by our corporate administration functions.

We may incur additional asset impairment charges in the future as we continue to implement asset divestiture actions.

Restructuring Charges

In connection with the implementation of our global restructuring initiative, during the first quarter of 2009, our corporate support function incurred \$0.1 million in employee termination costs, \$1.5 million in lease abandonment and related facility closure costs and \$1.2 million of costs related to the divestiture and closure of discontinued businesses.

We may incur additional restructuring charges in the future as the implementation of our global restructuring initiative moves towards completion.

Gain on Sale of Wireless Spectrum Licenses

During the first quarter of 2009, we completed the sale of certain of our owned AWS spectrum licenses in the United States to a third party for net proceeds, after deducting direct and incremental selling costs, of \$1.7 million, and recognized a gain on the sales of \$3,000. The net proceeds from the sale will be used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.

Interest and Other Expense, Net

Interest and other expense, net from continuing operations during the first quarter of 2009 was \$38.2 million, as compared to \$14.4 million during the first quarter of 2008, an increase of \$23.8 million. The increase is primarily attributable to \$6.9 million of interest expense and interest accretion of the debt discount and issuance costs related to our Second Lien Notes, which were issued in October 2008, and \$21.1 million in interest expense and interest accretion of the debt discount related to our Third Lien Notes, which were issued in October 2008, partially offset by \$2.7 million in lower interest expense related to our Senior Notes resulting from redemptions of the Senior Notes in the fourth quarter of 2008 using the proceeds from sales of wireless spectrum licenses and \$3.5 million which is attributable to consent fees paid during the first quarter of 2008 to withdraw \$25.0 million from the cash reserve account related to our Senior Notes. The increase is also due to a \$1.8 million decrease in interest income resulting from the decline in our unrestricted and restricted cash, cash equivalents and marketable securities balances held by continuing operations during 2009.

Interest expense from continuing operations will be impacted over the next twelve months by the timing and amount of redemptions of our Senior Notes using the proceeds from asset sales.

Provision for Income Taxes

During the first quarter of 2009, substantially all of our U.S. subsidiaries generated taxable losses and, therefore, no material income tax provision or benefit was recognized for these subsidiaries. However, certain of our controlled foreign corporations generated taxable income as a result of cost sharing and transfer pricing arrangements with our U.S. subsidiaries in relation to research and development expenses incurred. Our effective income tax rate for continuing operations for the first quarter of 2009 was 0.3%, resulting in a \$0.2 million income tax provision on our pre-tax loss of \$68.2 million. The income tax provision primarily consists of \$0.1 million of income taxes related to our controlled foreign corporations and \$0.1 million for foreign withholding tax on royalty payments received from certain PacketVideo customers.

The effective income tax rate for continuing operations during the first quarter of 2008 was 0.5%, resulting in a \$0.2 million income tax provision on our pre-tax loss of \$36.2 million, which primarily relates to foreign withholding tax on royalty payments received from certain PacketVideo customers.

Segment Results

Results for our continuing operating segments for the first quarters of 2009 and 2008 are as follows.

<i>(in millions)</i>	Multimedia	Strategic Initiatives	Other or Unallocated	Consolidated
For the Three Months Ended:				
March 28, 2009				
Revenues from external customers	\$ 16.9	\$ —	\$ —	\$ 16.9
Loss from operations	(0.8)	(18.8)	(10.4)	(30.0)
Significant non-cash items included in loss from operations above:				
Depreciation and amortization expense	1.5	2.4	0.1	4.0
Asset impairment charges	—	16.1	0.1	16.2
Restructuring charges	—	—	2.8	2.8
March 29, 2008				
Revenues from external customers	\$ 14.6	\$ —	\$ —	\$ 14.6
Loss from operations	(3.3)	(3.1)	(15.4)	(21.8)
Significant non-cash items included in loss from operations above:				
Depreciation and amortization expense	1.6	2.3	1.0	4.9

Multimedia

Revenues for the Multimedia segment increased \$2.3 million during the first quarter of 2009, as compared to the first quarter of 2008, and resulted primarily from increased non-recurring technology development revenues primarily resulting from the receipt of final acceptance from Google on technology development services performed in support of the OHA, offset by lower royalty revenues resulting from a decline in unit sales of mobile subscriber services by wireless operators and device manufacturers. Unit sales were adversely impacted by worldwide economic conditions which caused a softening in consumer demand for new devices and services.

Loss from operations for the Multimedia segment decreased \$2.5 million during the first quarter of 2009 and was attributable to the \$2.3 million increase in revenues described above and a decrease in the operating expenses of our Multimedia segment as a result of cost reduction actions implemented in the first quarter of 2009.

Strategic Initiatives

Loss from operations for the Strategic Initiatives segment increased \$15.7 million during the first quarter of 2009 is primarily attributable to \$16.1 million in asset impairment charges recognized in the first quarter of 2009 related to certain of our domestic AWS spectrum licenses and our Germany wireless spectrum license, partially offset by lower losses associated with our investment in Hughes Systique of \$0.3 million and lower operating expenses resulting from cost reduction actions implemented in the first quarter of 2009.

Other or Unallocated

The loss from operations classified as Other or Unallocated decreased \$5.0 million during the first quarter of 2009 and is primarily attributable to the corporate cost reductions resulting from the global restructuring initiative we implemented in the second half of 2008, which included reductions in workforce and certain overhead and discretionary costs, and the closure of certain facilities.

Comparison of Our First Quarter of 2009 to Our First Quarter of 2008 – Discontinued Operations

The results of operations of our discontinued Networks and Semiconductor segments and WiMax Telecom business are as follows:

<i>(in millions)</i>	Three Months Ended		Increase
	March 28,	March 29,	
	2009	2008	(Decrease)
Revenues	\$ 1.2	\$ 11.4	\$ (10.2)
Operating expenses:			
Cost of revenues	1.7	14.0	(12.3)

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Engineering, research and development	3.5	39.3	(35.8)
Sales and marketing	0.7	9.1	(8.4)
General and administrative	0.6	6.8	(6.2)
Asset impairment charges	3.2	—	3.2
Restructuring charges	4.7	—	4.7
Total operating expenses	14.4	69.2	(54.8)
Net gain on business divestitures	0.1	—	0.1
Loss from operations	(13.1)	(57.8)	44.7
Other expense, net	(0.7)	(0.8)	0.1
Net loss	\$ (13.8)	\$ (58.6)	\$ 44.8

Revenues

The \$10.2 million decrease in revenues from discontinued operations during the first quarter of 2009 was primarily attributable to our divestiture of our IPWireless subsidiary in December 2008.

Cost of Revenues

The \$12.3 million decrease in cost of revenues from discontinued operations during the first quarter of 2009 was primarily attributable to our divestiture of our IPWireless subsidiary and the discontinuation of operations at our GO Networks subsidiary in the fourth quarter of 2008.

Engineering, Research and Development

The \$35.8 million decrease in engineering, research and development expenses from discontinued operations during the first quarter of 2009 is primarily attributable our divestiture of our IPWireless subsidiary and the discontinuation of operations at our GO Networks subsidiary in the fourth quarter of 2008, and the shut down of the operations of our semiconductor business in the first quarter of 2009. The compensation related costs incurred in relation to the employees terminated in connection with the shut down of our semiconductor business are included in restructuring charges.

Sales and Marketing

The \$8.4 million decrease in sales and marketing expenses from discontinued operations during the first quarter of 2009 is primarily attributable our divestiture of our IPWireless subsidiary and the discontinuation of operations at our GO Networks subsidiary in the fourth quarter of 2008, and the shut down of the operations of our semiconductor business in the first quarter of 2009. The compensation related costs incurred in relation to the employees terminated in connection with the shut down of our semiconductor business are included in restructuring charges.

General and Administrative

The \$6.2 million decrease in general and administrative expenses from discontinued operations during 2008 primarily is primarily attributable to our divestiture of our IPWireless subsidiary and the discontinuation of operations at our GO Networks subsidiary in the fourth quarter of 2008, and lower operating expenses at our WiMax Telecom subsidiary resulting from cost reduction actions implemented in the first quarter of 2009.

Asset Impairment Charges

In connection with the implementation of our global restructuring initiative, we continue to review our long-lived assets for impairment and, in the first quarter of 2009, determined that indicators of impairment were present for the long-lived assets in our semiconductor business. We performed an impairment assessment of these assets and concluded that their carrying value exceeded their fair value. Accordingly, during the three months ended March 28, 2009, we recognized an asset impairment charge of \$3.2 million.

We may incur additional asset impairment charges in the future as we continue to implement asset divestiture actions.

Restructuring Charges

In connection with the implementation of our global restructuring initiative, during the first quarter of 2009, we incurred employee termination costs of \$4.6 million and \$0.1 million in contract termination costs related to our discontinued operations. The employee termination costs incurred in the first quarter of 2009 primarily resulted from the termination of approximately 200 employees upon the shut down of our semiconductor business.

We may incur additional restructuring charges in the future as the implementation of our global restructuring initiative moves towards completion.

Net Gain on Business Divestitures

The net gain on business divestitures primarily relates to \$0.1 million in cash received from the sale of certain assets of our GO Networks subsidiary during the first quarter of 2009.

Other Expense, Net

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Other expense, net during the first quarter of 2009 was \$0.7 million, as compared to \$0.8 million during the first quarter of 2008, a decrease of \$0.1 million. The decrease of \$0.1 million was primarily attributable to lower net foreign currency exchange rate losses recognized during the first quarter of 2009.

25

LIQUIDITY AND CAPITAL RESOURCES

We have funded our operations, business combinations, strategic investments and wireless spectrum license acquisitions primarily with the \$550.0 million in cash received in our initial capitalization in April 2005, the net proceeds of \$295.0 million from the issuance of the Senior Notes in July 2006, the net proceeds of \$351.1 million from our issuance of Series A Preferred Stock in March 2007 and the net proceeds of \$87.5 million from our issuance of the Second Lien Notes in October 2008. Our total unrestricted cash, cash equivalents and marketable securities held by continuing operations totaled \$18.7 million at March 28, 2009.

In an effort to reduce our future working capital requirements and in order to comply with the terms of our Senior Notes, Second Lien Notes and Third Lien Notes, in the second half of 2008, we commenced the implementation of a global restructuring initiative, pursuant to which we have divested our network infrastructure businesses and shut down our semiconductor business and we are required to, among other things, pursue the sale of certain of our other businesses and assets, including our wireless spectrum licenses, and complete other cost reduction actions.

Our Senior Notes, Second Lien Notes and Third Lien Notes require that the net proceeds from any sales or dispositions of assets be applied towards the repayment of the notes, rather than being used to fund our ongoing operations. Additionally, the Senior Notes and Second Lien Notes require that we maintain a minimum cash balance of \$5.0 million ("Minimum Balance Condition"). Failure to comply with the Minimum Balance Condition results in an immediate event of default.

In April 2009, we entered into a binding commitment letter with Navation, Inc., an entity controlled by Allen Salmasi, our Chairman, to provide up to \$15 million in working capital financing. Up to \$7.5 million of the obligation to provide working capital financing has been assigned to Sola Ltd., a holder of our Second Lien Notes, Third Lien Notes and common stock warrants. The terms of the commitment letter provide that we will be entitled to borrow up to \$15 million in one or more borrowings beginning June 1, 2009, subject to conditions including the completion of definitive documentation. Amounts outstanding under the facility will bear interest at a rate of 14% per annum, payable in kind, and will be secured by a first lien on certain working capital collateral and second lien on the assets securing our Second Lien Notes, on a *pari passu* basis. As a condition to such commitment we agreed to pay a commitment fee of \$750,000 to Navation, Inc. and, upon the initial borrowing under such facility, we will issue to the lenders thereunder warrants to purchase 7.5 million shares of our common stock at an exercise price of \$0.01 per share. The terms of the commitment letter also provide that Mr. Salmasi will be nominated to serve an additional three-year term as Chairman of the Board of Directors, subject to stockholder approval at our 2009 annual meeting of stockholders, and that Navation, Inc. will have a right of first refusal to purchase the assets of our semiconductor business.

We believe that the completion of the asset divestiture and cost reduction actions contemplated by our global restructuring initiative, our current cash and cash equivalents, projected revenues from our Multimedia segment, our committed \$15 million working capital financing and our ability to pay payment-in-kind interest, in lieu of cash interest, to the holders of 50% of the aggregate remaining outstanding principal balance of our Senior Notes will allow us to meet our estimated working capital requirements at least through March 2010. Should we be unable to achieve the revenues and/or cash flows for fiscal year 2009 contemplated in our operating plan, which was approved by the Governance Committee of our Board of Directors on March 27, 2009, we will implement certain additional actions to reduce our working capital requirements including staffing reductions, the deferral of capital expenditures associated with the build-out requirements of our wireless spectrum licenses and reductions in foreign operations.

If we are unable to achieve the anticipated savings from the implementation of our global restructuring initiative, we are unable to consummate our working capital financing transaction, or if we were to incur significant unanticipated expenditures, we would be required to renegotiate our lending arrangements and we may also be required to seek additional debt and/or equity financing and/or further reduce discretionary spending. There can be no assurance that any additional financing will be available on acceptable terms, if at all. Insufficient capital would significantly restrict our ability to operate and could cause us to seek relief through a filing in the U.S. Bankruptcy Court.

The following table presents our working capital (deficit), and our cash and cash equivalents balances:

Ending cash, cash equivalents and marketable securities-continuing operations	\$ 18.7	\$ 80.5

Significant Investing and Financing Activities During the First Quarter of 2009

During the first quarter of 2009, we completed the sale of certain of our owned AWS spectrum licenses in the United States to a third party for net proceeds, after deducting direct and incremental selling costs, of \$1.7 million, and recognized a gain on the sale of \$3,000. The net proceeds from the sale will be used to redeem a portion of the Senior Notes at a redemption price of 105% of the principal amount thereof plus accrued interest.

Looking Forward

We anticipate our PacketVideo subsidiary will need minimal future cash investments based on its projected revenues, which are subject to the risks discussed in this Quarterly Report under the heading "Risk Factors". Our PacketVideo subsidiary, which is reported in our Multimedia segment, supplies multimedia software and server solutions to many of the world's largest wireless carriers and wireless handset manufacturers, who use it to transform a mobile phone into a feature-rich multimedia device that provides people with the ability to stream, download and play video and music, receive live TV broadcasts, and engage in two-way video telephony.

We have completed several steps to minimize the future working capital needs, including divesting our IPWireless subsidiary, shutting down the operations of our other network infrastructure businesses, which comprise our Networks segment, including the operations of our GO Networks and Cygnus subsidiaries and our Global Services and NextWave Network Support strategic business units, and shutting down the operations of our semiconductor business. Additionally, we have initiated divestiture actions for our WiMax Telecom business, which is reported in our Strategic Initiatives segment, and consists of strategic investments in European wireless spectrum and wireless broadband network operations.

In April 2009, we entered into the binding commitment letter with Navation to provide up to \$15 million in working capital financing, as described above. The terms of the commitment letter provide that we will be entitled to borrow up to \$15 million in one or more borrowings beginning June 1, 2009, subject to conditions including the completion of definitive documentation.

In addition to divesting and/or discontinuing the business units and subsidiaries described above, we are in the process of implementing certain additional cost reduction activities as follows:

- A re-sizing of our corporate overhead functions to match the anticipated reduction in overall global support requirements, including our information technology, legal, finance, human resources and corporate branding and marketing functions.
- Integration of certain corporate administration functions into our PacketVideo operations in San Diego, California.
- Continued pursuit of wireless spectrum license sales, which will reduce our outstanding indebtedness thereby reducing the interest costs payable in future years.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Proceeds from the sale of our assets, including wireless spectrum and our office building in Nevada, net of costs to sell, must be used to redeem our Senior Notes, Second Lien Notes and Third Lien Notes.

At March 28, 2009, the principal balances on our Senior Notes, due in July 2010, our Second Lien Notes, due in December 2010, and our Third Lien Notes, due in December 2011, were \$216.8 million, \$112.3 million and \$495.3 million, respectively. We will be required to successfully monetize most of our wireless spectrum assets in order to retire our debt. There is no guarantee that we will be able to find third parties interested in purchasing our wireless spectrum assets at prices sufficient to retire this debt prior to maturity. To date, we have realized a significant return on the sale of our domestic AWS spectrum

licenses. However, there can be no assurance that we will realize a similar return upon the sale of our remaining wireless spectrum holdings. While we have no material debt maturities prior to July 2010, the United States credit markets are currently experiencing an unprecedented contraction. As a result of the tightening credit markets, as well as our operating losses, we may not be able to refinance our existing debt at maturity on favorable terms, or at all. If we are unable to pay our debt at maturity, the holders of our notes could proceed against the assets pledged to secure these obligations, which include our spectrum assets and the capital stock of our material subsidiaries.

Our long term operating success will depend on our ability to execute our cost reduction and divestiture programs in a timely manner, to obtain favorable cash flow from the continued growth and market penetration of our PacketVideo subsidiary, and optimally executing our wireless spectrum sale program so as to meet debt payment requirements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of our results of operations and liquidity and capital resources are based on our consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, valuation of intangible assets and investments, and litigation. We base our estimates on historical and anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results that differ from our estimates could have a significant adverse effect on our operating results and financial position. Our accounting policies are described in more detail in Note 1 to our consolidated financial statements for the year ended December 27, 2008, contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on April 2, 2009.

There have been no significant changes in our critical accounting policies and estimates from December 27, 2008.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

At March 28, 2009, our investment portfolios held by continuing and discontinued operations included unrestricted and restricted cash and investment securities that are subject to interest rate risk and will decline in value if interest rates increase. Interest income earned on our investments is affected by changes in the general level of U.S. interest rates. These income streams are generally not hedged.

Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates (e.g. 3.00% to 3.30%) would have no material impact on our financial condition or results of operations.

Foreign Currency Risk

In addition to our U.S. operations, we conduct business through international subsidiaries, primarily located in Europe and Asia. As a result, our financial position, results of operations and cash flows can be affected by fluctuations in foreign currency exchange rates, particularly fluctuations in the Euro, Swiss Franc and Japanese Yen exchange rates. Additionally, a portion of our sales to customers located in foreign countries, specifically certain sales by our PacketVideo subsidiary, are denominated in Euros, which subjects us to foreign currency risks related to those transactions.

We analyze our exposure to currency fluctuations and may engage in financial hedging techniques in the future to reduce the effect of these potential fluctuations. We do not currently have hedging contracts in effect.

Other Market Risk

At March 28, 2009, we held auction rate securities with an aggregate carrying value of \$22.5 million. With the liquidity issues experienced in the global credit and capital markets, auction rate securities have experienced multiple failed auctions as the amount of securities submitted for sale has exceeded the amount of purchase orders, and as a result, we have been unable to liquidate our remaining auction rate securities and these securities are subject to declines in fair value as a result of their current illiquidity. To date, we have recognized losses of \$2.7 million representing our estimate of the decline in the fair value of our auction rate securities through March 28, 2009. The risk associated with the illiquidity of our auction rate securities is mitigated by our participation in UBS's auction securities rights offering, which allow us to sell our auction rate securities at par value to UBS at any time during the period of June 30, 2010 through July 2, 2012.

Item 4. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), that are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required financial disclosures. Because of inherent limitations, our disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of such disclosure controls and procedures are met.

As more fully described in Item 9A of our Annual Report on Form 10-K for the year ended December 27, 2008, we reported that our management identified a control deficiency that represents a material weakness in our internal control over financial reporting. The material weaknesses identified by management resulted from a lack of effective controls over the accounting for our global restructuring initiative, including the accounting and income tax implications of asset sales, impairments and divestitures, and debt issuances and redemptions. As a result of the identification of this material weakness, our principal executive officer and principal financial officer concluded that as of December 27, 2008, our disclosure controls and procedures were not effective pursuant to Exchange Act Rules 13a-15(f) and 15d-15(f).

Management is in the process of identifying the remediation actions required to successfully remediate the identified material weakness in our internal control over financial reporting, which will include supplementing our existing accounting personnel with additional resources with expertise in technical accounting matters. We anticipate that the remediation actions will be identified and implemented by the end of the second quarter of 2009.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act"). Based on this evaluation, our principal executive officer and our principal financial officer concluded that the identified material weakness in our internal control over financial reporting had not been fully remediated and, therefore, our disclosure controls and procedures

were not effective as of the end of the period covered by this Quarterly Report. Notwithstanding the material weakness described above, management believes that the consolidated financial statements included in this Quarterly Report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting during the third quarter of fiscal 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

On September 16, 2008, a putative class action lawsuit, captioned “Sandra Lifschitz, On Behalf of Herself and All Others Similarly Situated, Plaintiff, v. NextWave Wireless Inc., Allen Salmasi, George C. Alex and Frank Cassou, Defendants”, was filed in the U.S. District Court for the Southern District of California against the Company and certain of its officers. The suits allege that the defendants made false and misleading statements and/or omissions in violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The suit seeks unspecified damages, interest, costs, attorneys’ fees, and injunctive, equitable or other relief on behalf of a purported class of purchasers of the Company’s common stock during the period from March 30, 2007 to August 7, 2008. A second putative class action lawsuit captioned “Benjamin et al. v. NextWave Wireless Inc. et al.” was filed on October 21, 2008 alleging the same claims on behalf of purchasers of the Company’s common stock during an extended class period, between November 27, 2006 through August 7, 2008. On February 24, 2009, the Court issued an Order consolidating the two cases and appointing a lead plaintiff pursuant to the Private Securities Litigation Reform Act.

We were notified on July 11, 2008 that the former stockholders of GO Networks have filed a demand for arbitration in connection with the February milestone. In his demand, the stockholder representative has claimed that we owe compensation to the former stockholders of GO Networks on the basis of GO Networks purportedly having partially achieved the February milestone under the acquisition agreement. The stockholder representative seeks damages of \$10.4 million. Further, on December 5, 2008, the stockholder representative amended his demand and added claims pertaining to the August milestone. In his claims, the stockholder representative asserts, among other claims, that NextWave acted in bad faith in a manner that prevented the achievement of the milestone, and he seeks damages of \$12.8 million in connection with these additional claims. We dispute that the February milestone has been met and deny any wrongdoing with respect to the August milestone. The dispute will be administered and heard in accordance with procedures set forth by the International Centre for Dispute Resolution, a division of the American Arbitration Association. We submitted our Statement of Defense on August 25, 2008 and an Amended Statement of Defense on January 6, 2009. A three member arbitration panel has been constituted and the panel has issued a Procedural Order establishing dates and parameters for discovery and the arbitration hearing.

On February 20, 2009, Arden Realty Limited Partnership (“Arden”) filed a complaint in California State Superior Court for the County of San Diego against us, alleging breach of two written lease agreements for commercial property. Arden seeks damages in the amount of \$2.5 million and \$1.4 million respectively for the alleged breaches, as well as interest, attorneys’ fees, among other things. In April 2009, we entered into a settlement and lease termination agreement with Arden, whereby Arden agreed to dismiss the complaint and terminate the lease agreements in exchange for a cash payment of \$0.6 million. Accordingly, at March 28, 2009, we recorded a liability for the settlement amount to be paid to Arden.

We are also currently involved in other legal proceedings in the ordinary course of our business operations.

ITEM 1A. Risk Factors

Risks Relating to Our Business

Our disclosure controls and procedures were determined not be effective as of December 27, 2008, in particular due to a material weakness in our internal control over financial reporting. If we cannot successfully remediate such material weakness, there is a reasonable possibility that a material misstatement in our financial statements will not be prevented or detected.

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

The Sarbanes-Oxley Act of 2002 and SEC rules require that management report annually on the effectiveness of our internal control over financial reporting. Among other things, management must conduct an assessment of our internal control over financial reporting to allow management to report on, and our independent registered public accounting firm to audit, the effectiveness of our internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act.

Our management concluded that our disclosure controls and procedures were not effective as of the end of the period covered by this Annual Report, in particular due to a control deficiency that represents a material weakness in our internal control over financial reporting. A material weakness is defined as a control deficiency, or combination of control deficiencies, that

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The material weakness identified by management resulted from a lack of effective controls over the accounting for our global restructuring initiative, including the accounting and tax implications of asset sales, impairments and divestitures, and debt issuances and redemptions. Our failure to properly account for our global restructuring initiative resulted from a lack of a sufficient number of employees with appropriate levels of knowledge, expertise and training in the application of generally accepted accounting principles relevant to these types of transactions. This material weakness is more fully explained in Part II "Item 9A" in this Annual Report on Form 10-K. Management is in the process of identifying the remediation actions required to successfully remediate the identified material weakness in our internal control over financial reporting. We anticipate that the remediation actions will be identified and implemented by the end of the second quarter of 2009.

Any failure to implement effective internal controls could cause us to fail to meet our reporting obligations. Inadequate internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock, and may require us to incur additional costs to improve our internal control system.

We must successfully complete our global restructuring initiative in order to comply with the terms of our Senior Notes and Second Lien Notes and continue as a going concern.

We have realized significant operating losses during each reporting period since our inception in 2005 and expect to realize further operating losses in the future. In an effort to reduce our working capital requirements, in the third quarter of 2008, we commenced the implementation of a global restructuring initiative. In October 2008, we expanded our restructuring initiative through the adoption of an operating budget as required pursuant to the terms of the Second Lien Notes (the "Operating Budget"), the appointment of an interim Chief Operating Officer and the formation of a Governance Committee of our Board of Directors with responsibilities for monitoring compliance with the Operating Budget and overseeing certain asset management activities contemplated by the Operating Budget. The Operating Budget contemplated that we would no longer provide any funding to, or incur liabilities with respect to, the network infrastructure businesses comprising our Networks segment, including our IPWireless, Go Networks and Cygnus Communications subsidiaries, and our semiconductor and WiMax Telecom business units past certain dates as reflected in the budget. In order to implement the actions required by the Operating Budget, we sold a controlling interest in our IPWireless subsidiary, shut down the operations of our network infrastructure businesses, including the operations of our GO Networks and Cygnus subsidiaries and our Global Services and NextWave Network Support strategic business units, and our semiconductor business, and initiated bankruptcy liquidation proceedings for three of our network infrastructure subsidiaries in Israel, Denmark and Canada. We have retained Canaccord Adams to explore strategic transactions for the divestiture of our semiconductor business and goetzpartners to explore the sale of our WiMAX Telecom business and our wireless spectrum licenses in Europe.

In connection with the implementation of our global restructuring initiative, to date, we have reduced our global workforce by approximately 53% and vacated seven leased facilities. In the second half of 2008, we incurred employee termination costs of \$8.0 million, lease abandonment and related facility closure costs of \$2.6 million and other restructuring costs of \$4.8 million, including costs related to the divestiture and closure of discontinued businesses and contract termination charges. For the three months ended March 28, 2009, we incurred employee termination costs of \$4.7 million, lease abandonment and related facility closure costs of \$1.4 million and other restructuring costs of \$1.2 million, including costs related to the divestiture and closure of discontinued businesses and contract termination charges.

We anticipate that our restructuring activities will continue in 2009 as we continue to implement cost reduction actions and pursue asset divestitures. The completion of our restructuring activities has required and will continue to require significant management time and focus and the incurrence of professional fees and other expenses. The accounting for certain of our restructuring activities is complex, and we have identified a material weakness in our internal control over financial reporting due to our failure to properly account for such transactions.

We have obtained a commitment for working capital financing in order to complete our restructuring activities, support our ongoing operations and continue as a going concern. We entered into a binding commitment letter with Navation, Inc., an entity controlled by Allen Salmasi, our Chairman, to provide up to \$15 million in working capital financing. Our ability to access such funding remains subject to conditions including the completion of definitive documentation to the satisfaction of all parties. As a condition to such commitment, we paid a commitment fee of \$750,000 to Navation, Inc. and, upon the initial borrowing under such facility, we will issue to the lenders thereunder warrants to purchase 7.5 million shares of our common stock at an exercise price of \$0.01 per share.

Our restructuring activities and cost reduction efforts are subject to risks including the effect of accounting charges which may be incurred, expenses of employee severance or contract terminations or defaults, or legal claims by employees or creditors. In addition, we may face difficulty in retaining critical employees, customers or suppliers who may believe that a continued relationship with us is of greater risk due to our restructuring activities. If we cannot successfully complete our restructuring efforts, our expenses will continue to exceed our revenue and available funding resources and we will not be able to continue as a going concern and could potentially be forced to seek relief through a filing under the U.S. Bankruptcy Code.

We are highly leveraged and our operating flexibility will be significantly reduced by our debt covenants.

As of March 28, 2009, the aggregate principal amount of our secured indebtedness was \$824.4 million. This amount includes our Senior Notes with an aggregate principal amount of \$216.8 million, our Second Lien Notes with an aggregate principal amount of \$112.3 million and our Third Lien with an aggregate principal amount of \$495.3 million. Covenants in the purchase agreements for our Senior Notes and Second Lien Notes impose operating and financial restrictions on us. These restrictions prohibit or limit our ability, and the ability of our subsidiaries, to, among other things:

- pay dividends to our stockholders;
- incur, or cause to incur, additional indebtedness or incur liens;
- sell assets for consideration other than cash;
- consolidate or merge with or into other companies;
- issue shares of our common stock or securities of our subsidiaries;
- make capital expenditures or other strategic investments in our business not contemplated by the Operating Budget; or
- acquire assets or make investments.

In addition, any proceeds from the sale of our assets may not be retained to finance our operations but must be used to redeem our Senior Notes, Second Lien Notes and Third Lien Notes.

We anticipate that our overall level of indebtedness and covenant restrictions will:

- limit our ability to pursue business opportunities;
- limit our flexibility in planning for, or reacting to, changes in the markets in which we compete;
- place us at a competitive disadvantage relative to our competitors with less indebtedness;
- render us more vulnerable to general adverse economic, regulatory and industry conditions; and
- require us to dedicate a substantial portion of our cash flow, as well as all proceeds from asset sales, to service our debt.

Our ability to meet our cash requirements, including our debt service obligations, is dependent upon our ability to substantially improve our operating performance, which will be subject to general economic and competitive conditions and to financial, business and other factors, many of which are or may be beyond our control. If our operating results, cash flow or asset sale proceeds prove inadequate, we could face substantial liquidity problems and might be required to accelerate asset sales, forego expenditures permitted by the Operating Budget or shut down businesses on an accelerated basis to meet our debt and other obligations. Further, any of these actions may not be sufficient to allow us to comply with our debt covenants or may have an adverse impact on our business. Our existing debt agreements limit our ability to take certain of these actions. Our failure to generate sufficient operating cash flow to pay our debts, to refinance our indebtedness or to successfully undertake any of these other actions could have a material adverse effect on us.

A breach of any covenants contained in the note purchase agreements governing our secured notes could result in a default under our indebtedness. If we are unable to repay or refinance those amounts, the holders of our notes could proceed against the assets pledged to secure these obligations, which include our spectrum assets and substantially all of our other assets.

The terms of our Senior Notes and Second Lien Notes require us to certify our compliance with a restrictive operating budget and any failure to comply with these terms will have adverse economic consequences.

The terms of our Senior Notes and Second Lien Notes require us to deliver a six-month Operating Budget to the noteholders on a quarterly basis, which budget is reasonably acceptable to Avenue Capital. Avenue Capital holds the majority in aggregate principal amount of our Second Lien Notes and 50% of the aggregate principal amount of our Senior Notes. Our Operating Budget requires us to cut costs and limits the funding that we may provide to specified businesses (the "Named Businesses", which have already been sold or discontinued as part of our global restructuring initiative).

We must deliver monthly certifications relating to our cash balances to the holders of our Senior Notes and Second Lien Notes. If we are unable to certify that our cash balances have not deviated in a negative manner by more than 10% from budgeted balances, default interest will accrue and, if such condition persists, (i) for two monthly reporting periods, if we have not satisfied our obligations to cease funding to the Named

Business within the required timeframes or (ii) three monthly reporting periods, if

32

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

we have satisfied such obligations, an event of default would occur under our Senior Notes, Second Lien Notes, and, if the maturity of the foregoing indebtedness were to be accelerated, our Third Lien Notes.

We did not achieve our asset sale targets under our Senior Notes and Second Lien Notes and will accordingly incur additional interest expense and issue additional warrants.

The terms of our Senior Notes and Second Lien Notes required us to consummate, or enter into agreements pursuant to which we will consummate, asset sales for net proceeds of at least \$350 million on or prior to March 31, 2009 (inclusive of net proceeds from \$150 million of previously announced asset sales). We did not meet our asset sale targets. Accordingly, our Senior Notes began accruing additional interest at a rate of 2% per annum effective March 31, 2009 and, on April 8, 2009, we issued to the holders of our Second Lien Notes warrants to purchase 10.0 million shares of our common stock at an exercise price of \$0.01 per share.

We have substantial debt maturities in 2010 and 2011 and our ability to retire our debt on or prior to its maturity dates will require us to successfully sell a substantial portion of our domestic and international spectrum assets. If we are unable to retire our debt through asset sales, we may not be able to refinance our debt at maturity.

Our Senior Notes, having an aggregate principal amount of \$216.8 million at March 28, 2009, will mature in July 2010 and our Second Lien Notes, having an aggregate principal amount of approximately \$112.3 million at March 28, 2009, will mature in December 2010. In addition, our Third Lien Notes, having an aggregate principal amount of \$495.3 million at March 28, 2009, will mature in December 2011. Fifty-percent of the aggregate remaining outstanding principal balance of our Senior Notes, and all of our Second Lien Notes and Third Lien Notes, bear payment-in-kind interest at rates of 14.0%, 14.0% and 7.5%, respectively, which will increase the principal amount of this debt upon retirement. We are required to use the net proceeds of asset sales to retire our debt with limited exceptions. We expect that we will be required to successfully monetize a substantial portion of our wireless spectrum assets in order to retire our debt. There is no guarantee that we will be able to find third parties interested in purchasing our wireless spectrum assets at prices sufficient to retire this debt prior to maturity. Although we continue to believe that the fair value of our wireless spectrum assets at least approximates the carrying value, the sale price of our wireless spectrum assets will be impacted by, among other things:

- the FCC's final resolution of ongoing proceedings regarding interference from satellite digital audio radio services to our WCS spectrum licenses;
- build-out or substantial service requirements attached to our domestic and international spectrum licenses, where a failure to comply with these requirements could result in license forfeiture;
- timing of closure of potential sales, particularly if it is necessary to accelerate the planned sale of certain of our spectrum licenses in order to meet debt payment obligations;
- worldwide economic conditions which we believe have adversely affected manufacturers of telecommunications equipment and technology and led to a delay in global WiMAX network deployments; and
- availability of capital for prospective spectrum bidders has been negatively impacted by the downturn in the credit and financial markets.

The United States credit markets are currently experiencing an unprecedented contraction. As a result of the tightening credit markets, as well as our operating losses, we may not be able to refinance our existing debt at maturity on favorable terms, or at all. If we are unable to pay our debt at maturity, the holders of our notes could proceed against the assets pledged to secure these obligations, which include our spectrum assets and the capital stock of our material subsidiaries.

The failure of our Multimedia segment to sustain and grow its business in the current challenging economic climate may adversely impact our ability to comply with our Operating Budget and will have an adverse effect on our business.

Revenues of our Multimedia segment business have been impacted by global economic conditions and a decline in handset sales. If the operating performance of our Multimedia segment were to deteriorate, our ability to meet the targeted cash balance levels set forth in the Operating Budget, and required to be certified to the holders of our Second Lien Notes and Senior Notes, may be impacted. Given the divestiture and/or discontinuation of operations of our network infrastructure subsidiaries, all of our operating revenues are generated by our Multimedia segment. Current economic conditions make it extremely difficult for our customers, our vendors and us to accurately forecast and plan future business activities, and they could cause U.S. and foreign businesses to slow spending on the products and services offered by our Multimedia segment, which would delay and lengthen sales cycles. Furthermore, during challenging economic times our customers may face issues gaining timely access to sufficient credit, which could result in an impairment of their ability to make timely payments to us. We cannot predict the timing, strength or duration of any economic slowdown or subsequent economic recovery, worldwide, or in the wireless communications markets. If the economy or markets in which we operate continue to deteriorate, the business, financial condition and results of operations of our Multimedia segment will likely be materially and adversely affected. If our Multimedia segment experiences a significant

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

decline in its revenues or operating margins, this will have a significant adverse effect on our business and our ability to comply with our debt covenants.

Our common stock could be delisted from the NASDAQ Global Market if our stock price continues to trade below \$1.00 per share.

On October 7, 2008, we received a Staff Deficiency Letter from The NASDAQ Stock Market LLC, or NASDAQ, notifying us that we were not in compliance with NASDAQ's Marketplace Rule 4450(a)(5), or the Rule, because the closing bid price for our Common Stock had, for the preceding 30 consecutive business days, closed below the minimum \$1.00 per share requirement for continued listing. In accordance with NASDAQ Marketplace Rule 4450(e)(2), we were provided a period of 180 calendar days to regain compliance. On October 16, 2008, NASDAQ announced that they had suspended the enforcement of the Rule until January 19, 2009, and as a result, the period during which we have to regain compliance has been extended to July 10, 2009. If at any time before July 10, 2009, the bid price of our Common Stock closes at or above \$1.00 per share for a minimum of 10 consecutive business days, NASDAQ will provide written notification that we have achieved compliance with the Rule. If compliance with the Rule cannot be demonstrated by July 10, 2009, our Common Stock will be subject to delisting from The NASDAQ Global Market.

In the event that we receive notice that our common stock is being delisted from The NASDAQ Global Market, NASDAQ rules permit us to appeal any delisting determination by the NASDAQ staff to a NASDAQ Listing Qualifications Panel. Alternatively, NASDAQ may permit us to transfer the listing of our common stock to The NASDAQ Capital Market if we satisfy the requirements for initial inclusion set forth in Marketplace Rule 4310(c), except for the bid price requirement. If our application for transfer is approved, we would have an additional 180 calendar days to comply with the Minimum Bid Price Rule in order to remain on The NASDAQ Capital Market. At this time, we cannot determine whether we can realistically meet the requirements of the NASDAQ Global Market or the NASDAQ Capital Market and our Board of Directors may evaluate whether to voluntarily delist from NASDAQ prior to the dates indicated above in order to mitigate the costs of listing and compliance given the current market capitalization of the Company.

Delisting from The NASDAQ Global Market could have an adverse effect on our business and on the trading of our common stock. If a delisting of our common stock from the NASDAQ Stock Market were to occur, our common stock would trade on the OTC Bulletin Board or on the "pink sheets" maintained by the National Quotation Bureau, Inc. Our stock price, as well as the liquidity of our common stock, may be adversely impacted as a result.

We have become and may continue to be the target of securities class action suits and derivative suits which could result in substantial costs and divert management attention and resources.

Securities class action suits and derivative suits are often brought against companies following periods of volatility in the market price of their securities. Defending against these suits can result in substantial costs to us and divert the attention of our management.

On September 16, 2008, a putative class action lawsuit captioned "Sandra Lifschitz, On Behalf of Herself and All Others Similarly Situated, Plaintiff, v. NextWave Wireless Inc., Allen Salmasi, George C. Alex and Frank Cassou, Defendants" was filed in the U.S. District Court for the Southern District of California against us and certain of our officers. The suit alleges that the defendants made false and misleading statements and/or omissions in violation of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder. The suit seeks unspecified damages, interest, costs, attorneys' fees, and injunctive, equitable or other relief on behalf of a purported class of purchasers of our common stock during the period from March 30, 2007 to August 7, 2008. A second putative class action lawsuit captioned "Benjamin et al. v. NextWave Wireless Inc. et al." was filed on October 21, 2008 alleging the same claims on behalf of purchasers of our common stock during an expanded class period, between November 27, 2006 through August 7, 2008. On February 24, 2009, the Court issued an Order consolidating the two cases and appointing a lead plaintiff pursuant to the Private Securities Litigation Reform Act.

We operate in an extremely competitive environment which could materially adversely affect our ability to win market acceptance of our products and achieve profitability.

We operate in an extremely competitive market and we expect such competition to increase in the future.

We continue to experience intense competition for our products and services. Our competitors range in size from Fortune 500 companies to small, specialized single-product businesses. At present, the primary competitors for our multimedia software products are the internal multimedia design teams at large OEM handset manufacturers such as Nokia, Samsung, LG, Sony Ericsson, Motorola, Apple, RIM, HTC, Palm and others. Many of these companies now offer their own internally developed multimedia services (e.g. Nokia Ovi, SonyEricsson PlayNow) that come bundled with various handset products. While these groups compete against the company in the overall market for wireless multimedia, these companies also represent the primary distribution channel for delivering PacketVideo products. This is because PacketVideo's mobile operator customers ask these manufacturers to install or preload a version of PacketVideo's software customized for such mobile operator in handsets that they purchase. In addition to the handset manufacturers, a number of companies compete with PacketVideo at various product levels,

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

including Adobe, Microsoft, MobiTV, NXP Software, Real Networks, Sasken, Streamezzo, SurfKitchen, and UIEvolution, offering software products and services that directly or indirectly compete with PacketVideo.

For the connected home set of product solutions, our primary competitors again include internal software design teams at large consumer electronics companies like Sony, Microsoft, Cisco Linksys, Samsung and Panasonic. In addition, we face competition from a number of other companies such as Apple, Macrovision, Microsoft, Monsoon Networks, the Orb, and Real Networks. Our ability to generate earnings will depend, in part, upon our ability to effectively compete with these competitors.

Our Multimedia business is dependent on a limited number of customers.

Our Multimedia segment generates all of our revenues from continuing operations and is dependent on a limited number of customers. For the three months ended March 28, 2009, sales to three Multimedia customers, Google, Verizon Wireless and NTT DoCoMo, accounted for 34%, 19%, and 13%, respectively, of our consolidated revenues from continuing operations. If any of these customers terminate their relationships with us, our revenues and results of operations could be materially adversely affected.

Our customer agreements do not contain minimum purchase requirements and can be cancelled on terms that are not beneficial to us.

Our customer agreements with wireless service providers and mobile phone and device manufacturers are not exclusive and many contain no minimum purchase requirements or flexible pricing terms. Accordingly, our customers may effectively terminate these agreements by no longer purchasing our products or reducing the economic benefits of those arrangements. In many circumstances, we have indemnified these customers from certain claims that our products and technologies infringe third-party intellectual property rights. Our customer agreements have a limited term of one to five years, in some cases with evergreen, or automatic renewal, provisions upon expiration of the initial term. These agreements set out the terms of our distribution relationships with the customers but generally do not obligate the customers to market or distribute any of our products or applications. In addition, in some cases customers can terminate these agreements early or at any time, without cause.

Defects or errors in our products and services or in products made by our suppliers could harm our relations with our customers and expose us to liability. Similar problems related to the products of our customers or licensees could harm our business.

Our products and technologies are inherently complex and may contain defects and errors that are detected only when the products are in use. Further, because our products and technologies serve as critical functions in our customers' products, such defects or errors could have a serious impact on our customers, which could damage our reputation, harm our customer relationships and expose us to liability. Defects in our products and technologies or those used by our customers or licensees, equipment failures or other difficulties could adversely affect our ability and that of our customers and licensees to ship products on a timely basis as well as customer or licensee demand for our products. Any such shipment delays or declines in demand could reduce our revenues and harm our ability to achieve or sustain desired levels of profitability. We and our customers or licensees may also experience component or software failures or defects which could require significant product recalls, reworks and/or repairs which are not covered by warranty reserves and which could consume a substantial portion of the capacity of our third-party manufacturers or those of our customers or licensees. Resolving any defect or failure related issues could consume financial and/or engineering resources that could affect future product release schedules. Additionally, a defect or failure in our products and technologies or the products of our customers or licensees could harm our reputation and/or adversely affect the growth of our business.

PacketVideo prides itself on quality embedded software and has spent a decade improving upon its processes and performance. While we are not immune to product issues, developing for existing platforms that are constantly being upgraded and new platforms that have not fully been tested in the commercial market require much experience. Some of our technology may launch with a platform that does not do well in the market and some of our technology may launch on popular platforms that may have been modified due to aggressive timelines upon which PacketVideo has very little influence over. It is the nature of our business to continuously improve upon our deliverables.

With regards to the connected home products, the market is new, the products are not standardized and PacketVideo has no control over the design of the products with which it must connect. Moreover, PacketVideo must work with each individual consumer electronics manufacturer to ensure seamless connectivity and given the size of the consumer electronics device market, a large number of resources is constantly required.

We may be unable to protect our own intellectual property and could become subject to claims of infringement, which could adversely affect the value of our products and technologies and harm our reputation.

As a technology company, we expect to incur expenditures to create and protect our intellectual property and, possibly, to assert infringement by others of our intellectual property. Other companies or entities also may commence actions or respond to an infringement action that we initiate by seeking to establish the invalidity or unenforceability of one or more of our patents or to dispute the patentability of one or more of our pending patent applications. In the event that one or more of our patents or

applications are challenged, a court may invalidate the patent, determine that the patent is not enforceable or deny issuance of the application, which could harm our competitive position. If any of our patent claims are invalidated or deemed unenforceable, or if the scope of the claims in any of these patents is limited by court decision, we could be prevented from licensing such patent claims. Even if such a patent challenge is not successful, it could be expensive and time consuming to address, divert management attention from our business and harm our reputation. Effective intellectual property protection may be unavailable or limited in certain foreign jurisdictions.

We also expect to incur expenditures to defend against claims by other persons asserting that the technology that is used and sold by us infringes upon the right of such other persons. From time to time, we have received, and expect to continue to receive, notices from our competitors and others claiming that their proprietary technology is essential to our products and seeking the payment of a license fee. Any claims, with or without merit, could be time consuming to address, result in costly litigation and/or the payment of license fees, divert the efforts of our technical and management personnel or cause product release or shipment delays, any of which could have a material adverse effect upon our ability to commercially launch our products and technologies and on our ability to achieve profitability. If any of our products were found to infringe on another company's intellectual property rights or if we were found to have misappropriated technology, we could be required to redesign our products or license such rights and/or pay damages or other compensation to such other company. If we were unable to redesign our products or license such intellectual property rights used in our products, we could be prohibited from making and selling such products. In any potential dispute involving other companies' patents or other intellectual property, our customers and partners could also become the targets of litigation. Any such litigation could severely disrupt the business of our customers and partners, which in turn could hurt our relations with them and cause our revenues to decrease.

We are subject to risks associated with our international operations.

We operate or hold spectrum through various subsidiaries and joint ventures in Argentina, Austria, Canada, Chile, Croatia, Germany, Norway, Slovakia and Switzerland and have additional operations located in Finland, France, Germany, India, Japan, South Korea and Switzerland. We may continue to expand our international operations and potentially enter new international markets through acquisitions, joint ventures and strategic alliances.

Our activities outside the United States operate in different competitive and regulatory environments than we face in the United States, with many of our competitors having a dominant incumbent market position and/or greater operating experience in the specific geographic market. In addition, in some international markets, foreign governmental authorities may own or control the incumbent telecommunications companies operating under their jurisdiction. Established relationships between government-owned or government-controlled telecommunications companies and their traditional local telecommunications providers often limit access of third parties to these markets. In addition, owning and operating wireless spectrum in overseas jurisdictions may be subject to a changing regulatory environment. In particular, our ownership of wireless broadband spectrum in Argentina remains subject to obtaining governmental approval. We cannot assure you that changes in foreign regulatory guidelines for the issuance or use of wireless licenses, foreign ownership of spectrum licenses, the adoption of wireless standards or the enforcement and licensing of intellectual property rights will not adversely impact our operating results. Due to these competitive and regulatory challenges, our activities outside the United States may require a disproportionate amount of our management and financial resources, which could disrupt our operations and adversely affect our business.

We are dependent on a small number of individuals, and if we lose key personnel upon whom we are dependent, our business will be adversely affected.

Our future success depends largely upon the continued service of our board members, executive officers and other key management and technical personnel, particularly James Brailean, our Chief Executive Officer, Chief Operating Officer and President.

Our key employees represent a significant asset, and the competition for these employees is intense in the wireless communications industry. Due to our history of operating losses and our business restructuring efforts which has resulted, and will continue to result, in the divestiture or discontinuation of operations of some of our subsidiaries, we may have particular difficulty attracting and retaining key personnel given the significant use of incentive compensation by well-established competitors. We do not maintain key person life insurance on any of our personnel. We also have no covenants against competition or nonsolicitation agreements with certain of our key employees. The loss of one or more of our key employees or our inability to attract, retain and motivate qualified personnel could negatively impact our ability to design, develop and commercialize our products and technology.

Risks Relating to Government Regulation

If we do not comply with build-out requirements relating to our domestic and international spectrum licenses, such licenses could be subject to forfeiture.

Certain build-out or "substantial service" requirements apply to our licensed wireless spectrum, which generally must be satisfied as a condition of license renewal. In particular, the renewal deadline and the substantial service build-out deadline for our domestic WCS spectrum is July 21, 2010; for our domestic BRS and EBS spectrum, the substantial service build-out deadline is

Edgar Filing: NextWave Wireless Inc. - Form 10-Q

May 1, 2011; and for our domestic AWS spectrum, the substantial service build-out deadline is December 18, 2021. Failure to make the substantial service demonstration domestically, without seeking and obtaining an extension from the FCC, would result in license forfeiture. Extensions of time to meet substantial service demonstrations are not routinely granted by the FCC.

We also have certain build-out requirements internationally, and failure to make those service demonstrations could also result in license forfeiture. For example, in Canada, our 2.3 GHz licenses are subject to mid-term in-use demonstration requirements in November of 2009 and in April of 2010. In Chile, our 2.5 GHz licenses are subject to build-out requirements in June of 2009. In Germany, our 3.5 GHz licenses include build-out obligations to provide coverage to 15% of municipalities in each of the country's regions by year-end 2009 and 25% of municipalities by year-end 2011. In Switzerland, our licenses are subject to a build-out requirement of 120 base station transmitters by September 2010. In Austria, the license includes build-out obligations for 2007 and 2008, which the Company fulfilled, as confirmed by the regulator for 2007 and pending review for 2008. In Croatia, due to the general delay in the commercialization of WiMAX technology and the recent financial market developments the Company is late on certain build-out commitments it has made. To date, the Croatian regulatory authority has not taken any remedial action against the Company, however, for failure to meet these commitments, but it could choose to do so in the future.

We may not have complete control over our transition of BRS and EBS spectrum, which could impact compliance with FCC rules.

The FCC's rules require transition of BRS and EBS spectrum to the new band plan on a Basic Trading Area ("BTA") basis. See "Government Regulation-BRS-EBS License Conditions." All of our EBS and BRS spectrum has been transitioned to the new band plan except for our BRS spectrum in Albuquerque, New Mexico. Sprint filed an initiation plan on February 12, 2008 to transition the Albuquerque BTA. We do not hold all of the BRS and EBS spectrum in Albuquerque BTA. Consequently, we will need to coordinate with other BRS and EBS licensees in order to transition spectrum we hold or lease. Disagreements with other BRS or EBS licensees about how the spectrum should be transitioned may delay our efforts to transition spectrum, could result in increased costs to transition the spectrum, and could impact our efforts to comply with applicable FCC rules. The FCC rules permit us to self-transition to the reconfigured band plan if other spectrum holders in our BTAs do not timely transition their spectrum.

Our use of EBS spectrum is subject to privately negotiated lease agreements. Changes in FCC rules governing such lease agreements, contractual disputes with EBS licensees, or failures by EBS licensees to comply with FCC rules could impact our use of the spectrum.

With few exceptions, commercial enterprises are restricted from holding licenses for EBS spectrum. Eligibility for EBS spectrum is limited to accredited educational institutions, governmental organizations engaged in the formal education of enrolled students (e.g., school districts), and nonprofit organizations whose purposes are educational. Access to EBS spectrum can only be gained by commercial enterprises through privately-negotiated EBS lease agreements. FCC regulation of EBS leases, private interpretation of EBS lease terms, private contractual disputes, and failure of an EBS licensee to comply with FCC regulations all could impact our use of EBS spectrum and the value of our leased EBS spectrum. The FCC rules permit EBS licensees to enter into lease agreements with a maximum term of 30 years; lease agreements with terms longer than 15 years must contain a "right of review" by the EBS licensee every five years beginning in year 15. The right of review must afford the EBS licensee with an opportunity to review its educational use requirements in light of changes in educational needs, technology, and other relevant factors and to obtain access to such additional services, capacity, support, and/or equipment as the parties shall agree upon in the spectrum leasing arrangement to advance the EBS licensee's educational mission. A spectrum leasing arrangement may include any mutually agreeable terms designed to accommodate changes in the EBS licensee's educational use requirements and the commercial lessee's wireless broadband operations. In addition, the terms of EBS lease agreements are subject to contract interpretation and disputes could arise with EBS licensees. There can be no assurance that EBS leases will continue for the full lease term, or be extended beyond the current term, or be renewed or extended on terms that are satisfactory to us. Similarly, since we are not eligible to hold EBS licenses, we must rely on EBS licensees with whom we contract to comply with FCC rules. The failure of an EBS licensee from whom we lease spectrum to comply with the terms of their FCC authorization or FCC rules could result in termination, forfeiture or non-renewal of their authorization, which would negatively impact the amount of spectrum available for our use.

We have no guarantee that the licenses we hold or lease will be renewed.

The FCC generally grants wireless licenses for terms of ten or 15 years, which are subject to renewal and revocation. FCC rules require all wireless licensees to comply with applicable FCC rules and policies and the Communications Act in order to retain their licenses. For example, licensees must meet certain construction requirements, including making substantial service demonstrations, in order to retain and renew FCC licenses. Failure to comply with FCC requirements with respect to any license could result in revocation or non-renewal of a license. In general, most wireless licensees who meet their construction and/or substantial service requirements are afforded a "renewal expectancy," however, all FCC license renewals can be challenged in various ways, regardless of whether such challenges have any legal merit. Under FCC rules, licenses continue in effect during the pendency of timely filed renewal applications. Challenges to license renewals, while uncommon, may impact the timing of renewal grants and may impose legal costs. Accordingly, there is no guarantee that licenses we hold or lease will remain in full force and effect or be renewed.

We hold 30 licenses issued by the FCC for WCS spectrum. Renewal applications for all 2.3 GHz WCS licenses, including those issued to us, were due to be filed with the FCC on July 21, 2007. We filed our WCS renewal applications on April 23, 2007. Under FCC rules, licenses continue in effect during the pendency of timely file renewal applications. At least three parties about which we are aware made filings purporting to be competing "applications" in response to the renewal applications we filed, AT&T and perhaps others. The basis on which the third-party filings were made was the alleged failure of WCS licensees to deploy service on WCS spectrum and satisfy substantial service requirements by July 21, 2007. However, on December 1, 2006, the FCC issued a waiver order extending the substantial service deadline for WCS licensees to July 21, 2010. The FCC's rules contain no procedures for processing competing "applications" filed for WCS spectrum and the FCC has not accepted them for filing. We have no knowledge of the status of these filings and cannot predict how the FCC may address them or how these filings may impact our renewal applications.

Interference could negatively impact our use of wireless spectrum we hold, lease or use.

Under applicable FCC and equivalent international rules, users of wireless spectrum must comply with technical rules that are intended to eliminate or diminish harmful radiofrequency interference between wireless users. Licensed spectrum is generally entitled to interference protection, subject to technical rules applicable to the radio service, while unlicensed spectrum has no interference protection rights and must accept interference caused by other users.

Wireless devices utilizing WCS, BRS and EBS spectrum may be susceptible to interference from Satellite Digital Audio Radio Services ("SDARS").

Since 1997, the FCC has considered a proposal to permanently authorize terrestrial repeaters for SDARS operations adjacent to the C and D blocks of the WCS band. The FCC has permitted a large number of these SDARS terrestrial repeaters to operate on a special temporary authorization since 2001. Permanently authorizing SDARS repeaters adjacent to the WCS band could cause interference to WCS, BRS and EBS receivers. The extent of the interference from SDARS repeaters is unclear and is subject to the FCC's final resolution of pending proceedings. Because WCS C and D block licenses are adjacent to the SDARS spectrum, the potential for interference to this spectrum is of greatest concern. There is a lesser magnitude concern regarding interference from SDARS to WCS A and B block licenses, and BRS and EBS licenses. Central to the FCC's evaluation of this proposal has been the technical specifications for the operation of such repeaters. SDARS licensees are seeking rule changes that would both unfavorably alter WCS technical operating requirements and permit all existing SDARS repeaters to continue to operate at their current operating parameters. Through their representative association, the WCS Coalition, the majority of affected WCS licensees, including NextWave, also have proposed technical rules for SDARS terrestrial repeaters and WCS operations to the FCC. Final technical rules will determine the potential interference conditions and requirements for mitigation. If SDARS repeaters result in interference to our WCS, BRS or EBS spectrum, our ability to realize value from this spectrum may be impaired.

Increasing regulation of the tower industry may make it difficult to deploy new towers and antenna facilities which could adversely affect the value of certain of our wireless spectrum assets.

The FCC, together with the FAA, regulates tower marking and lighting. In addition, tower construction and deployment of antenna facilities is impacted by federal, state and local statutes addressing zoning, environmental protection and historic preservation. The FCC adopted significant changes to its rules governing historic preservation review of new tower projects, which makes it more difficult and expensive to deploy towers and antenna facilities. The FCC also is considering changes to its rules regarding when routine environmental evaluations will be required to determine compliance of antenna facilities with its radiofrequency radiation exposure limits. If adopted, these regulations could make it more difficult to deploy facilities. In addition, the FAA has proposed modifications to its rules that would impose certain notification requirements upon entities seeking to (i) construct or modify any tower or transmitting structure located within certain proximity parameters of any airport or heliport, and/or (ii) construct or modify transmission facilities using the 2500-2700 MHz radiofrequency band, which encompasses virtually all of the BRS/EBS frequency band. If adopted, these requirements could impose new administrative burdens upon use of BRS/EBS spectrum.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3. Default Upon Senior Securities

None.

ITEM 4. Submission of Matters to a Vote of Security Holders

None.

ITEM 5. Other Information

As previously disclosed, on May 4, 2009, we promoted Francis J. Harding to the role of Chief Financial Officer. In addition to his new responsibilities, Mr. Harding will continue to maintain his role as our Executive Vice President, Corporate Controller and Chief Accounting Officer. On May 6, 2009 we entered into a letter agreement with Mr. Harding detailing certain terms governing the employment relationship between NextWave and Mr. Harding (the "Letter Agreement").

The initial term of the Letter Agreement is three years, subject to extension for all periods beyond the conclusion of the term that Mr. Harding remains employed by us. As part of the Letter Agreement, Mr. Harding is entitled to a one time Retention Payment of \$30,000 and a base salary of \$153.00 per hour, effective as of January 1, 2009.

If Mr. Harding's employment with us is terminated for Good Reason, as defined in the Letter Agreement, or without Cause, as defined in the Letter Agreement, then we will pay to Mr. Harding (i) all accrued salary and wages as of the date of termination; (ii) accrued vacation as of the date of termination and (iii) six months of Mr. Harding's base salary. Additionally, we will provide continued medical, dental, and vision insurance coverage for Mr. Harding for six months from the date of the termination of his employment. Furthermore, if Mr. Harding's employment is terminated without Cause or for Good Reason or upon the conclusion of the term of the Letter Agreement, we will retain Mr. Harding as a independent contractor consultant, subject to execution of a mutually agreeable contract, whereupon Mr. Harding will provide general managerial and financial consultancy services to NextWave for the six month period following the termination of Mr. Harding's employment with us. Mr. Harding would be compensated \$5,000 per week to perform such services. If such services provided by Mr. Harding exceed twenty hours per week, we will compensate Mr. Harding with an additional payment of \$250 per hour for every hour worked by Mr. Harding in excess of twenty hours per week. In the event that we terminate Mr. Hardings's employment for Cause, the Letter Agreement provides that we will pay Mr. Harding all of his accrued wages and salary that he is owed as part of his employment with us.

The Letter Agreement is filed as Exhibit 10.36 of this Form 10-Q.

ITEM 6. Exhibits

Exhibit No.	Description
10.36	Letter Agreement, dated May 6, 2009, between Francis J. Harding and NextWave Wireless Inc. Regarding Employment Benefits.
