RADA Announces the Net Centric Digital Recorder and ACMI Pod

Friday February 11, 10:00 am ET

Revealed at the Aero India Exhibition and Designed for Indian Air Force Needs  
BANGALORE, India, February 11 /PRNewswire-FirstCall/ -- RADA Electronic Industries Ltd. (NASDAQ: RADI - News) currently presenting at the Aero India 2005, 5th International Aerospace and Defense Exhibition, has introduced two new products in the training and debriefing segments; the Net Centric Digital Recorder (NCDR) and the Air Combat Maneuvering Instrumentation (ACMI) pod.

The NCDR is a centralized airborne digital data recorder capable of collecting and storing multiple video and audio streams as well as numerous data signals. Its initial market is based on the replacement of Airborne Video Tape Recorders currently installed on most fighter aircrafts around the world. The NCDR, provides an excellent vehicle for performing additional data management functions, such as Data Transfer, ACMI data recording and others.

The ACMI pod is designed to meet the Indian Air Force's desire for an externally mounted ACMI system that can be easily integrated into any aircraft, and support advanced debriefing. The RADA pod is using elements integrated with Rafael's advanced data link system, that enables real time debriefing as well as the capability to become a tactical data link system.

The recent purchase by RADA of Vectop Limited's assets, including Vectop's significant penetration into the Indian market in the form of over 200 aircraft including the Sukhoi - 30 and Jaguar equipped with HUD cameras and Video recorders, generates additional opportunities for RADA's new products at one of the biggest traditional customers of the Israeli defense industries.

Zvika Alon, RADA's V.P. of Business Development commented "RADA is now in a position to offer the most advanced training and debriefing capabilities. The system, which can be both internal and external to the aircraft, combined with the "Reality by RADA" Squadron Information Management Network (SIM-Net) playback system, provides superb training to any air force, and in particular the Indian Air Force which is searching to extend and improve its debriefing capabilities."

About RADA

RADA Electronic Industries Ltd. is an Israel based company involved in the military and commercial aerospace industries. The Company specializes in Avionics, Ground Debriefing Stations (Video, ACMI and Maintenance) and Automatic Test Equipment.
