FOR IMMEDIATE RELEASE

GSE Systems Announces Second Quarter Results

Columbia, Maryland, August 14, 2003-- GSE Systems, Inc. (GSE) (AMEX:GVP), a leading global provider of real-time simulation and process control solutions to the energy and process industries, reported a net loss of (\$1.13) million or (\$.20) per diluted share for the quarter ended June 30, 2003. This compares to a net income of \$123,000 or \$.01 per diluted share for the same period in 2002. Revenue for the three months ended June 30, 2003 was \$9.8 million compared to \$12.1 million for the second quarter of 2002.

The Company's Power Simulation business reported a 5% increase in revenue and a

Edgar Filing: GSE SYSTEMS INC - Form 8-K

positive operating income for the quarter, compared to an operating loss of (\$441,000) for the same period in 2002. Revenue for the second quarter of 2003 was \$5.5 million compared to \$5.2 million in the second quarter of 2002. During the second quarter, the Company closed on simulation contracts in Mexico, Japan, and the U.S. totaling over \$9.5 million. Revenue and earnings from these projects will ramp up during the third quarter of 2003 and continue over the next couple of years. The Power Simulation business backlog, which is expected to remain healthy, was \$30 million at the end of the second quarter, the highest in several years. The Company expects Power Simulation's profitability to increase in the second half of 2003.

As recently announced, following the second quarter, the Company received an additional \$5.5 million in orders for power plant simulators including an Asian customer and the Tennessee Valley Authority (TVA), bringing the backlog for this part of the business to over \$32 million.

The Company continued to invest in the development of its Process Simulation and Plant Security businesses. In the second quarter, the Company invested \$100,000 primarily in marketing, sales and product development activities for the nuclear and chemical plant security market. The Company expects that both businesses will experience growth in 2004.

The Process Automation business reported revenue of \$4.3 million for the second quarter of 2003, compared to \$6.9 million for the same quarter in 2002. The business reported an operating loss of (\$706,000) compared to an operating income of \$733,000 for the second quarter of 2002. These results reflect a continuing soft economy in the key chemical market, as well as \$313,000 in expenses related to the consolidation of building facilities. This consolidation has the potential to save the Process Automation business in excess of \$2 million over the next five years. The Company expects this business to have an increase in orders and a return to profitability in the second half of the year. In July, the Company announced new orders in Process Automation of over \$2 million.

GSE President and Chief Operating Officer, Jerry Jen, said: "I am very pleased with the success of our simulation business and its continued strong performance. We anticipate profits to increase in this business over the balance of the year. New orders in the Process Automation business picked up in July and we expect a stronger third quarter and balance of the year."

The GSE Systems second quarter 2003 conference call is being webcast at CCBN's www.companyboardroom.com on Friday August 15, at 11:00 am. Contact Gill Grady at 410.772.3501
